MINUTES OF MEETING KENTUCKY RETIREMENT SYSTEMS BOARD OF TRUSTEES MEETING NOVEMBER 14, 2023, AT 10:00 AM, E.T. VIA LIVE VIDEO TELECONFERENCE

At the Meeting of the Kentucky Retirement Systems Board of Trustees held on November 14, 2023 the following members were present: Lynn Hampton (Chair), Ramsey Bova, Mary Eaves, Prewitt Lane, Dr. Crystal Miller, Keith Peercy and William Summers, V. Staff members present were CERS CEO Ed Owens, III, KRS CEO John Chilton, David Eager, Rebecca Adkins, Erin Surratt, Connie Pettyjohn, Michael Board, Victoria Hale, Leigh Ann Davis, Michael Lamb, Connie Davis, D'Juan Surratt, Steve Willer, Ashley Gabbard, Katie Park, Shaun Case, and Sherry Rankin. Others present included Tracey Garrison and Larry Loew with Humana, Chris Tessman and David Lindberg with Wilshire Advisors, and Danny White, Janie Shaw, and Krysti Kiesel with GRS.

Ms. Hampton called the meeting to order.

Mr. Board read the Legal Public Statement.

Ms. Rankin called roll.

There being no *Public Comment* submitted, Ms. Hampton introduced agenda item *Approval of Minutes – September 7, 2023, and September 14, 2023* (*Video 00:06:27 to 00:07:05*). A motion was made by Mr. Summers and seconded by Mr. Lane to approve the minutes as presented. The motion passed unanimously.

Ms. Hampton introduced agenda item *Review of Draft 2023 Actuarial Valuation* (*Video 00:07:06 to 01:07:18*). Ms. Shaw and Mr. White with GRS presented the 2023 Valuation Results.

Ms. Eaves entered the meeting

Mr. Chilton led a discussion of annuity rates. He stated that there was recent discussion regarding whether to increase the rate used for computing annuities from 5.25% to what was recently

suggested in what CERS adopted was 5.875% recently. Mr. Chilton recommended that the annuity rate be increased to 5.875% as adopted by The CERS Board of Trustees and that 7.50% rate charged when retirees recontribute funds that had been previously distributed be maintained.

Mr. White provided an overview of annuity factors and how they impact member benefits. He noted that the KPPA system is set-up to handle only one set of administrative factors for both systems. It would take a lot of a lot of effort to create two different sets of factors for use, said Mr. White.

Mr. Peercy stated that the KRS Board of Trustees needs to follow the lead of the CERS Board of Trustees and adopt an annuity rate of 5.875% or disadvantage the KPPA employees as they will need to administer two separate benefit types for the same class of employees or disadvantage the KRS membership as it would be more valuable to work for a CERS employer. Therefore, Mr. Peercy made a motion to follow the lead of CERS and adopt a 5.875% annuity rate. The motion was seconded by Mr. Lane.

Mr. Lane advised that he agreed with Mr. Peercy's statement. Mr. Eager also supported Mr. Peercy's statement. He stated that the KPPA strongly encouraged a single rate from an administrative and equity standpoint.

Ms. Eaves asked if the proposed interest rate assumption of 5.875% was in-line with other states. Mr. White stated that the proposed rate is low; however, the median return assumption utilized by other systems is 7.00%. However, 5.875% is consistent with the current return assumption used by CERS and KRS, said Mr. White.

Ms. Bova expressed that more information was needed for a decision and asked if there was an approval deadline. Ms. Surratt indicated that an effective date had not been established; the Boards of Trustees must first determine the rate to be used to determine the factors. Depending on when the factors are received from GRS, July 1, 2023, would be the earliest implementation date – if the same rate is utilized by both KRS and CERS, said Ms. Surratt.

Mr. Peercy voiced that if KRS does not utilize the rate approved by CERS (5.875%), the Tier 3 annuity payout of KRS members would become less valuable than the CERS system.

The vote was taken, and Ms. Bova abstained; however, the motion to adopt a 5.875% annuity rate passed.

Ms. Hampton introduced the *Joint Retiree Health Plan Committee Report* (*Video 01:07:19 to 01:15:50*). Ms. Pettyjohn stated that the Joint CERS & KRS Retiree Health Plan (RHP) Committee met October 23, 2023. She advised that the Committee reviewed an informational presentation from Humana regarding 2024 Pharmacy Review, Pharmacogenomics, and Medication Therapy Management (MTM). She briefly discussed 2024 Formulary changes, open enrollment, and retiree engagement/outreach efforts. Mr. Larry Loew with Humana reported that contract negotiations continue between Humana and Baptist Health Medical Group (BHMG).

Ms. Hampton introduced agenda item *Statutorily Required Reporting* (*Video 01:15:51 to 01:17:20*). Ms. Adkins presented an informational memo illustrating the variety of reports that are statutorily required to be submitted to the Legislative Research Committee (LRC) annually. She advised that the listed reports would be submitted via email to the LRC on or before Nov 15, 2023.

Ms. Hampton introduced agenda item *KRS 61.5991 Contract Reporting of quasi-Governmental Agencies* (*Video 01:17:21 to 01:21:11*). Mr. D'Juan Surratt presented an informational memo regarding KRS 61.5991 Contract Reporting of Quasi-Governmental Agencies & Employer Audits. He stated that KRS 61.5991 requires certain KERS employers to report data on contracted employees to the KPPA for data reporting to the LRC and the Office of the State Budget Director (OSBD).

Mr. Surratt reported that all agencies submitted their Form 6756 and supporting documentation. KPPA staff provided this data to LRC and OSBD on August 28, 2023.

Mountain Comprehensive Care Center (MCCC) was marked as non-compliant on the report as they have not submitted contract employees whom KPPA has deemed to be employees pursuant to KRS 61.675. These employees should have been added to the monthly reports for FY23 as participating members, said Mr. Surratt.

He advised that KRS 61.5991 requires KPPA to perform audits each fiscal year to ensure employers subject to these requirements are reporting all eligible employees and contributions are being paid

in accordance with KRS 61.510 to 61.705. At the March 1, 2023, KRS Board of Trustees meeting, the KPPA Division of Employer Reporting, Compliance and Education (ERCE) was directed to annually audit 5% of the 102 agencies who are subject to KRS 61.5991 reporting. ERCE staff had completed four (4) agency audits thus far, reported Mr. Surratt.

Ms. Hampton introduced agenda item *December Meeting Date Discussion* (*Video 01:21:12 to 01:25:03*). The next KPPA meeting is scheduled for December 6, 2023, and the next KRS Board of Trustees meeting was scheduled for December 7, 2023. Ms. Hampton advised that there may be actions at the KRS Board of Trustees meeting requiring ratification by the KPPA. Therefore, the KRS Board of Trustees meeting was rescheduled as a special called meeting to Tuesday, December 5, 2023, at 10:30 a.m.

Ms. Hampton introduced agenda item *KRS Update/CEO Report* (*Video 01:25:04 to 01:26:49*). Mr. Chilton stated that he attended a recent Trustee Education Session and a meeting of the Public Pensions Oversight Board. Discussions about the KPPA Housekeeping Bill and other legislation that may arise during the upcoming 2024 Legislative Session continue, said Mr. Chilton. He also noted a memo drafted with the assistance of GRS regarding actuarial factors and interest rates. Mr. Chilton advised that the memo would be distributed to all KRS Trustees.

Ms. Hampton introduced agenda item *New Business* (*Video 01:26:50 to 01:27:49*). Ms. Hampton announced that the KPPA Ad Hoc Executive Director Search Committee comprised of CERS Trustees Bill O'Mara (Chair) and Betty Pendergrass and KRS Trustees Lynn Hampton and Keith Peercy. The Committee has been working diligently with KPPA Staff and the position opening will be posted in several locations soon; however, a search firm will not be utilized, said Ms. Hampton.

Ms. Hampton introduced agenda item *Closed Session* (*Video 01:27:50 to 01:28:51*) and requested a motion to enter closed session to discuss pending litigation pursuant to KRS 61.810(c). A motion was made by Mr. Summers and seconded by Mr. Lane. The motion passed unanimously.

Ms. Hampton read the following statement and the meeting moved into closed session: A motion having been made in open session to move into a closed session for a specific purpose, and such motion having carried by majority vote in open, public session, the Board shall now enter closed session to consider litigation, pursuant to KRS 61.810(1)(c), because of the necessity of protecting

the confidentiality of the Systems' litigation strategy and preserving any available attorney-client privilege. All public attendees exited the meeting.

Closed Session (*Video - Part 2 - 00:00:14 to 00:00:30*)

Ms. Hampton called the meeting back to open session and stated that there was no action taken by the KRS Board of Trustees as result of the Closed Session.

There being no further business, Ms. Hampton *adjourned* the meeting.

Copies of all documents presented are incorporated as part of the Minutes of the Board of Trustees held November 14, 2023, except documents provided during a closed session conducted pursuant to the open meetings act and exempt under the open records act.

The remainder of this page left blank intentionally.

CERTIFICATION

I do certify that I was present at this meeting, and I have recorded the above actions of the Trustees on the various items considered by it at this meeting. Further, I certify that all requirements of KRS 61.805-61.850 were met in conjunction with this meeting.

Recording Secretary

I, the Chair of the Board of Trustees of the Kentucky Retirement Systems, do certify that the Minutes of Meeting held on November 14, 2023, were approved on December 5, 2023.

Chair of the Board of Trustees

I have reviewed the Minutes of the November 14, 2023, Board of Trustees Meeting for content, form, and legality.

Management's Responsibility for Financial Reporting

Management has prepared the combining financial statements of Kentucky Public Pensions Authority (KPPA) and is responsible for the integrity and fairness of the information presented.

December 6, 2023: Management has prepared the combining financial statements of KPPA and is responsible for the integrity and fairness of the information presented. Some amounts included in the combining financial statements may be based upon estimates and judgements. These estimates and judgments were made utilizing the best business practices available. The accounting policies followed in the preparation of these combining financial statements conform to U.S. Generally Accepted Accounting Principles (GAAP). Financial information presented throughout the annual report is consistent with the combining financial statements.

Responsibility: Ultimate responsibility for the combining financial statements and Annual Comprehensive Financial Report (ACFR) rests with the KPPA Board (Board). The Executive Director and KPPA staff assist the Board in its responsibilities.

Systems of internal control and supporting procedures are maintained to provide assurance that transactions are authorized, assets safeguarded, and proper records maintained. These controls include standards in hiring and training employees, the establishment of an organizational structure, and the communications of policies and guidelines throughout the organization. The cost of a control should not exceed the benefits to be derived; the objective is to provide reasonable, rather than absolute, assurance that the combining financial statements are free of any material misstatements. These internal controls are reviewed by internal audit programs. All internal audit reports are submitted to the KPPA Audit Committee, KPPA, CERS and KRS Boards.

The Auditor of Public Accounts (APA) has conducted an independent audit of the combining financial statements in accordance with U.S. Generally Accepted Government Auditing Standards. This audit is described in their Independent Auditors' Report on pages 16 through 19 in the Financial Section. Management has provided the external auditors with full and unrestricted access to KPPA's staff to discuss their audit and related findings as to the integrity of the plan's financial reporting and the adequacy of internal controls for the preparation of combining financial statements.

EXECUTIVE DIRECTOR'S MESSAGE

Daniel Eugen David L. Eager **Executive Director**

December 6, 2023 To the Trustees & Membership

On behalf of the Kentucky Public Pensions Authority and the Boards of the County Employees Retirement System (CERS) and the Kentucky Retirement Systems (KRS), it is my honor to present the Annual Comprehensive Financial Report for the Fiscal Year (FY) ended June 30, 2023. This report, and the Summary Annual Financial Report, are provided as a resource for understanding the KPPA structure and the financial status of the systems KPPA operates.

Total assets in the systems administered by the Kentucky Public Pensions Authority (KPPA) increased to a record \$24.9 billion in Fiscal Year (FY) 2023, buoyed by strong investment returns, General Fund appropriations authorized by the legislature, and employer contributions. The blended FY return for all of the CERS and KRS hazardous and nonhazardous pension funds was 9.54%, while the blended return for the CERS and KRS hazardous and nonhazardous insurance trust fund was 10.15%.

Investment performance by system can be found on page 129. More information can be found in the Investments section of the KPPA website.

Those strong investment returns exceeded the median peer pension fund return of 7.64%, the target returns for those portfolios, and the actuarially assumed rates of return, which were 5.25% for the Kentucky Employees Retirement System (KERS) Nonhazardous and State Police Refirement System (SPRS) pension funds and 6.25% for all other pension and insurance funds.

Funding Improves

Thanks to strong investment returns for FY 2023 and funding approved by the General Assembly over and above the actuarially determined contribution (ADC) for KERS Nonhazardous and SPRS, as well as changes in some actuarial assumptions for CERS, the funded ratio of all three pension systems improved from FY 2022.

| Pension Funded Ratio | | | | | | | | | | |
|----------------------|------------------------------|-------|-------|-------|-------|-------|--|--|--|--|
| | 2018 2019 2020 2021 2022 202 | | | | | | | | | |
| CERS NH | 52.7% | 49.1% | 49.4% | 51.8% | 52.0% | 56.1% | | | | |
| CERS H | 48.4% | 45.3% | 45.1% | 46.7% | 47.6% | 51.4% | | | | |
| KERS NH | 12.9% | 13.4% | 14.2% | 16.8% | 18.5% | 21.8% | | | | |
| KERS H | 55.5% | 54.8% | 55.3% | 60.4% | 63.2% | 65.4% | | | | |
| SPRS | 27.1% | 27.0% | 28.1% | 30.7% | 52.5% | 54.0% | | | | |

| Insurance Funded Ratio | | | | | | | | | | | |
|-----------------------------|--------|--------|--------|--------|--------|--------|--|--|--|--|--|
| 2018 2019 2020 2021 2022 20 | | | | | | | | | | | |
| CERS NH | 76.7% | 70.7% | 78.5% | 85.4% | 132.1% | 131.5% | | | | | |
| CERS H | 74.6% | 75.8% | 78.2% | 84.3% | 101.0% | 100.7% | | | | | |
| KERS NH | 36.4% | 36.3% | 42.7% | 50.2% | 79.1% | 81.7% | | | | | |
| KERS H | 130.0% | 123.1% | 126.0% | 135.5% | 172.2% | 170.4% | | | | | |
| SPRS | 71.6% | 71.3% | 75.0% | 82.0% | 100.6% | 100.5% | | | | | |

Commitments by the General Assembly and the Governor to fully fund contributions, and provide additional allocations, combined with prudent management by the Office of Investments and other staff, have all five pension funds on track to be fully funded by 2049.

To read the full actuarial reports, visit the Actuarial Valuations page on our website, under the Publications & Forms tab.

Ratings Boosts

Both S&P Global Ratings and Fitch Ratings raised their credit ratings for the Commonwealth in FY 2023. Governor Andy Beshear said on June 29, "We're showing everyone that our economy is booming, our pension systems are strong and our fiscal house is in order due to strong management."

For Fiscal Year 2023, the General Assembly allocated the full actuarially recommended contribution. Additionally, legislation passed in the 2022 General Assembly made additional appropriations to the KERS Nonhazardous plan of \$240 million for FY 2023 and FY 2024, and to the State Police Retirement System (SPRS) of \$215 million.

Strategic Plan In March 2023 Provaliant Retirement, LLC of Scottsdale, Arizona, was selected through an RFP process to assist KPPA in developing the agency's first strategic plan since 2009. Provaliant is tasked with helping KPPA identify ways to improve efficiency, productivity, the quality of service delivery, governance practices, retaining and motivating employees, and promoting the best interest of members and stakeholders.

KPPA will collaborate with the CEOs and Trustees of CERS and KRS to develop strategic plans that are specific to each entity but that also complement one another. This months-long process is expected to yield plans with actions that will be implemented over time, in some cases years.

6

EXECUTIVE DIRECTOR'S MESSAGE

Financial Management KPPA hired its first Chief Financial Officer, Michael Lamb, who is responsible for oversight of the accounting, budgeting, cash management, risk management, and procurement for KPPA, and for developing and maintaining accounting controls, conducting financial operations, and producing financial reporting for all of the systems operated by KPPA. Previously Mr. Lamb was General Manager, Enterprise Risk Management and Audit at Toyota Tusho America (TAI) Inc., in Georgetown, KY.

Cybersecurity KPPA continues to make the security of our members' information our highest priority. Nation-wide news reports of cyberattacks and data breaches at large companies and government agencies are unfortunately all too frequent. Our Enterprise and Technology Services staff monitor an ever-changing cyberthreat landscape and take a variety of proactive measures to protect both member information and KPPA resources. All KPPA staff are routinely trained in cybersecurity issues to ensure they recognize suspicious activity and work to keep KPPA data secure, and security topics are covered in KPPA member newsletters to increase member security awareness. KPPA also has ongoing agency-wide planning and readiness efforts in disaster recovery, business continuity, and incident response.

Report from CERS CEO Ed Owens III

This fiscal year has been an exciting one for the CERS Board of Trustees and its membership. Our FY 2023 Actuarial Valuation shows we had an estimated annual return on net assets of over 10% for both the pension and insurance plans. Those returns ranked in the top five for public pension systems nationwide.

The Board increased the assumed rate of return from 6.25% to 6.50% for all four plans. This has the effect of lowering the employer contribution rate and decreasing our unfunded liability. Our pension plans are now approximately 56% funded while our insurance plans are over 100% funded.

Although employer contributions were lowered, the pension plans received approximately the same dollar amount of contributions as in the prior fiscal year due to strong growth in active membership and covered payroll.

The CERS Investment Committee and the Board are now focused on reviewing the system's asset allocation and making changes where appropriate. The goal will be to target the same level of investment return while reducing the amount of risk in the portfolio.

The Board of Trustees and I remain focused on protecting the assets of the CERS Trust while we ensure excellent service to the CERS members.

Report from KRS CEO John Chilton As a part of the FY 2023 and 2024 budgets, the General Assembly provided full funding for the actuarially determined pension and health insurance contributions, plus additional amounts totaling \$695 million over fiscal years 2022 through 2024. The progress toward fully funding the actuarial liabilities will continue.

The KRS trustees continue to follow the evolving world of Environmental, Social, and Governance (ESG) issues as they relate to investments. In response to legislation passed in the 2023 Regular Session, KRS' corporate proxy voting history will be posted quarterly on the KPPA website. (Many ESG issues are addressed in corporate governance proposals by the corporations in which we invest.) Additionally, and importantly, the KRS Board monitors ongoing litigation in anticipation of favorably resolving longstanding cases.

This year, the Investment Committee worked with the KPPA Office of Investments to monitor KRS investments with a view to maximizing investment returns while minimizing investment risks. In fiscal year 2023, KPPA, CERS, and KRS have worked to further upgrade the Office of Investments team by adding investment professionals. Further staff additions are planned for FY 2024.

A Personal Update

In 2023, I signed a one-year contract that will end with my retirement. KPPA has formed a search committee comprising members of the KRS and CERS boards, which is in the process of identifying candidates to be the next KPPA Executive Director.

It has been my great honor to have served as KPPA's Executive Director these past eight years. During that time, KPPA has worked hard to improve member servicing. We enhanced our relationships with key stakeholders including members of the State Legislature and the Executive Branch, as well as retiree groups, members of the media, and the general public. And, we successfully strengthened employee morale, with 94% of our employees agreeing that they feel part of the KPPA team. KPPA is like a family, and I have been fortunate to have been a part of that family. No matter who sits in the Executive Director's office, KPPA's commitment to our Six Mandates will not waver, nor will our commitment to serving the retirees of state and local government and the State Police. KPPA will never stop working for our Members.

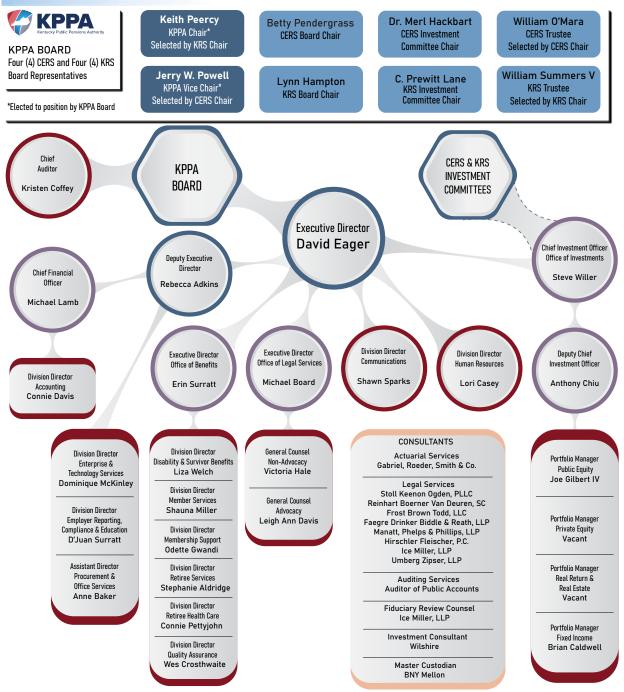

Acknowledgments

The preparation of this report has been a collaborative effort of KPPA Executive Management and the Accounting Division, Communications Division, Office of Investments, and the CERS and KRS CEOs. The contents have been reviewed by the Internal Audit Division. KPPA is responsible for all the information in the report and confidently presents it as a basis for understanding the stewardship of the systems operated by KPPĂ.

AGENCY STRUCTURE

AS UI DECEITIDEL 0, 2025

The Kentucky Public Pensions Authority oversees the operations of CERS, KERS, and SPRS by providing administrative support, investment management, and conducting daily activities on behalf of the CERS, KRS, and KPPA Boards. The 8-member KPPA Board is made up of elected and appointed representatives from the CERS and KRS Boards. KPPA is led by an Executive Director who is appointed by the KPPA Board to work with the CERS and KRS Chief Executive Officers to carry out the statutory provisions of the Systems.

Refer to the Investments Section for additional information regarding Investment Advisors (pages 137-142) and Schedules of Fees and Expenses (pages 143-144).

INT₈

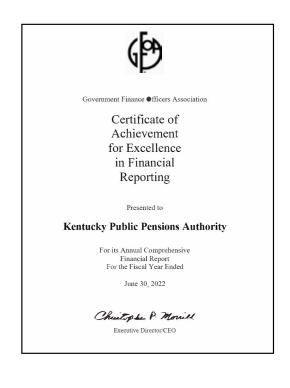

The systems operated by KPPA are governed by two 9-member boards of trustees, each consisting of three elected members and six gubernatorial appointees serving four-year terms. The CERS Board of Trustees is responsible for governance of the CERS funds. The governance of the KERS funds and the SPRS funds are the responsibility of the KRS Board of Trustees. CERS and KRS each have a Chief Executive Officer who serves as a legislative and executive advisor to the respective boards and a General Counsel who provides legal services.

Professional Awards

CERTIFICATE OF ACHIEVEMENT FOR EXCELLENCE IN FINANCIAL REPORTING

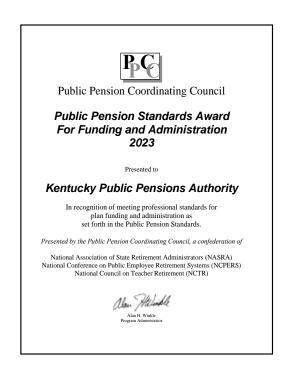

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Kentucky Public Pensions Authority for its Annual Comprehensive Financial Report for the Fiscal Year ended June 30, 2022. The Certificate of Achievement is a prestigious national award recognizing excellence in the preparation of state and local government financial reports and is valid for a period of one year. This is the 24th award earned by Kentucky Public Pensions Authority (formerly the Kentucky Retirement Systems). In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized document. The report must satisfy both generally accepted accounting principles and applicable legal requirements. We believe our 2023 report will continue to meet the Certificate of Achievement Program's requirements, and we will be submitting it to the GFOA for their consideration.

PUBLIC PENSIONS STANDARDS AWARD FOR FUNDING AND ADMINISTRATION

The Public Pension Coordinating Council awarded the Public Pensions Standards Award for Funding and Administration to the Kentucky Public Pensions Authority (KPPA) for 2023. This is the second award earned by KPPA.

The Public Pension Coordinating Council established the Public Pension Standards to reflect minimum expectations for public retirement system management, administration, and funding. The Standards serve as a benchmark to measure public defined benefit plans. The Award for Funding and Administration is a distinguished national award recognizing pension programs meeting professional standards for plan design and administration as set forth in the Public Pension Standards. This award is valid for a period of one year. We believe KPPA will continue to meet these standards, and we will be applying for the award next year.

Pension Benefits paid to retirees and beneficiaries of Kentucky Public Pensions Authority have a wide ranging impact on the state's economic health. In fiscal year 2023, KPPA paid over \$2 billion to its recipients. The majority, 92.79%, of these payments are issued to Kentucky residents. Each county in the Commonwealth receives at least \$1 million annually from KPPA, providing a stabilizing element for all local economies.

| Total Retirement Payments For the Period ending June 30, 2023 (in Whole \$) | | | | | | | | |
|--|---------|--------|---------------|--|--|--|--|--|
| | Payees | % | Payments | | | | | |

| Kentucky | 116,523 | 92.79% | 2,193,919,524 | | | | | |
| Out of State | 9,843 | 7.21% | 170,466,194 | | | | | |
| Frand Total 126,366 100.00% \$2,364,385,718 | | | | | | | | |
| This table represents all payees receiving a monthly payment, retirement eligible refund, or actuarial refund during the fiscal year | | | | | | | | |

*This table represents all payees receiving a monthly payment, retirement eligible refund, or actuarial refund during the fiscal year.

** Included in Kentucky and Out of State Payees and Payments, therefore, are not included in Grand Total Amount and percentage.

Benefit Tiers

KPPA administers three different benefit tiers. Each plan provides pension and insurance benefits based on the member's participation date:

- Tier 1: Members with a participation date prior to September 1, 2008.
- Tier 2: Members with a participation date of September 1, 2008 through December 31, 2013.
- Tier 3: Members with a participation date on or after January 1, 2014.

MIKE HARMON AUDITOR OF PUBLIC ACCOUNTS

Independent Auditor's Report

To the Members Kentucky Public Pensions Authority

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Kentucky Public Pensions Authority (KPPA), a (discretely presented) component unit of the Commonwealth of Kentucky, as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise KPPA's financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of KPPA as of June 30, 2023, and the changes in its fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of KPPA and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis-of-Matter - Reporting Entity

As discussed in Note A, the financial statements present only the KPPA, and are not intended to present fairly the financial position of the Commonwealth of Kentucky, or the results of its operations in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

KPPA's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about KPPA's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of KPPA's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about KPPA's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter - Summarized Comparative Information

The financial statements of KPPA for the year ended June 30, 2022, were audited by another auditor, who expressed an unmodified opinion on those statements on December 7, 2022. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2022 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages XXXX through XXXX and the defined benefit pension plan and other post-employment benefit supplemental schedules on pages XXXX through XXXX, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedules of administrative expense, direct investment expense, and professional consultant fees are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual comprehensive annual report. The other information comprises the introductory, investment, actuarial and statistical sections but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on

the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 27, 2023 on our consideration of KPPA's internal control over financial reporting and on our test of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering KPPA's internal control over financial reporting and compliance.

Respectfully Submitted,

Farrah Petter, CPA Assistant Auditor of Public Accounts Frankfort, Ky

November 27, 2023

This section provides a discussion and analysis of the financial performance of the retirement and OPEB plans administered by the Kentucky Public Pensions Authority (KPPA) for the year ended June 30, 2023. The discussion and analysis of the plans' financial performance is within the context of the accompanying basic financial statements, notes to the financial statements, required supplementary schedules, and additional information following this section.

KPPA is responsible for administering cost-sharing, multiple-employer defined benefit pension plans for various employer agencies of Kentucky, along with a single-employer defined benefit pension plan and defined benefit OPEB plans. All plans are fiduciary plans.

The defined benefit pension plans include:

County Employees Retirement System (includes CERS Nonhazardous and CERS Hazardous) Kentucky Employees Retirement System (includes KERS Nonhazardous and KERS Hazardous) State Police Retirement System

The defined benefit OPEB plans are in the Kentucky Retirement System Insurance Trust Fund. The Insurance Fund provides health benefits for CERS Nonhazardous, CERS Hazardous, KERS Nonhazardous, KERS Hazardous, and SPRS plans for retired members and beneficiaries.

The Management Discussion and Analysis is the KPPA leadership summary of the management of the CERS, KERS, and SPRS Fiduciary Pension Plans (collectively the Pension Funds) and Insurance Trust Fund. KPPA is a component unit of the Commonwealth of Kentucky, (the Commonwealth) for financial and reporting purposes.

PENSION FUNDS

The following highlights are explained in more detail later in this report.

Total Pension Funds Fiduciary Net Position was \$15.2 billion at the beginning of the fiscal year and increased by 11.18% to \$16.9 billion as of June 30, 2023. The \$1.7 billion increase is primarily attributable to the appreciation in the fair value of investments.

CONTRIBUTIONS

Total contributions reported for fiscal year 2023 were \$2,723.8 million compared to \$2,653.1 million in fiscal year 2022. The increase is the result of a General Fund appropriation to KERS Nonhazardous in the amount of \$240.0 million; the increase in employer contribution rates for CERS Nonhazardous and CERS Hazardous; as well as an increase in covered payroll for all funds. These increases were offset by a General Fund appropriation to SPRS of \$215.0 million as well as Employer Cessation contributions of \$63.1 million in 2022.

INVESTMENTS

The investment portfolio for the Pension Funds reported a net return of 9.54% for fiscal year 2023 compared to a net negative return of 5.73% for fiscal year 2022.

The net appreciation in the fair value of investments for fiscal year 2023 was \$1,073.5 million compared to net depreciation of \$1,175.9 million for the previous fiscal year.

Interest, dividends, and net securities lending income for fiscal year 2023 was \$471.2 million compared to \$431.2 million in fiscal year 2022. All investment returns are reported net of fees and investment expenses, including carried interests. Investment expenses totaled \$171.6 million for fiscal year 2022 compared to \$108.9 million in the current fiscal year. The decrease in fees is the result of less than favorable market conditions causing returns to drop, impacting those fees directly related to performance most notably Private Equity, Real Estate and Specialty Credit. in fiscal year 2023.

DEDUCTIONS

Pension benefits paid to retirees and beneficiaries for fiscal year 2023 totaled \$2,380.1 million compared to \$2,328.6 million in fiscal year 2022, a 2.21% increase. The increase was due to a 1.63% increase in the number of retirees to 126,369. Refunded contributions paid to former members upon termination of employment for fiscal year 2023 totaled \$45.9 million compared to \$42.9 million in fiscal year 2022, a 6.99% increase, as more members elected a refund at employment termination.

KPPA's fiscal year 2023 Pension administrative expense totaled \$41.9 million compared to \$39.7 million in the prior year. The increase was mainly due to the state pay increase in salaries and employee retirement benefits.

INSURANCE FUND

The following highlights are explained in more detail later in this report.

The combined fiduciary net position of the Insurance Fund increased by \$635.1 million during fiscal year 2023. Total combined net position for the fiscal year was \$7,231.7 million. Total contributions and net investment income of \$997.8 million offset deductions of \$362.7 million which resulted in the net position increase.

CONTRIBUTIONS

Employer contributions of \$282.5 million were received in fiscal year 2023 compared to \$319.0 million in fiscal year 2022. Total contributions changed (11.44)% primarily due to a decrease in Employer Contribution Rates, Humana Gain Share Payment, and Employer Cessation Contributions.

The reimbursement of retired/reemployed health insurance for fiscal year 2023 totaled \$13.9 million compared to \$12.7 million in the prior fiscal year. The increase is due to an increase in retired/re-employed members for whom employers are paying health insurance reimbursements.

INVESTMENTS

Interest, dividends, and net securities lending income for fiscal year 2023 was \$200.5 million compared to \$193.5 million in fiscal year 2022. The increase in income and dividends is the result of an increase in allocation to the public equities and fixed income asset classes.

The investment portfolio reported a net return of 10.15% for the fiscal year, which was higher than fiscal year 2022's net negative return of 5.34%. The investment return was above the 6.25% assumed rate of return used for actuarial calculations.

The net appreciation in the fair value of investments for fiscal year 2023 was \$508.6 million compared to net depreciation of \$(482.5) million for the previous fiscal year. This \$991 million increase in fiscal year 2023 was due to favorable market returns compared to fiscal year 2022.

Investment expenses totaled \$51.9 million for fiscal year 2023 compared to \$84.0 million in the prior fiscal year. The decrease in fees is the result of less than favorable market conditions causing returns to drop, impacting those fees directly related to performance most notably Private Equity, Real Estate and Specialty Credit in fiscal year 2023.

DEDUCTIONS

Total insurance premiums, plus self-funded reimbursements were \$360.2 million for fiscal year 2023. The fiscal year 2023 insurance premiums were \$22.0 million less compared to fiscal year 2022, the number of covered lives only increased approximately 1% year-over-year.

Insurance administrative expenses for retirees under age 65, decreased from \$2.45 million in fiscal year 2022 to \$2.43 million in fiscal year 2023.

Using This Financial Report

Because of the long-term nature of a defined benefit pension plan and post-employment healthcare benefit plan, the combining financial statements alone cannot provide sufficient information to properly reflect the Plans' ongoing financial perspective. This financial report consists of three combining financial statements and two schedules of historical trend information. All plans within KPPA are included in the aforementioned combining financial statements. The Combining Statement of Fiduciary Net Position for the Pension Funds on page $\underline{29}$ and the Combining Statement of Fiduciary Net Position for the Pension Funds on page $\underline{29}$ and the Combining Statement of the three systems as of fiscal year end 2023. The Combining Statement of Changes in Fiduciary Net Position for the Pension Funds on page $\underline{30}$, and the Combining Statement of Changes in Fiduciary Net Position for the Insurance Fund on page $\underline{31}$, summarize the additions and deductions that occurred for each of the ten funds during fiscal year 2023.

The economic assumptions for the Pension Funds and Insurance Fund for fiscal year 2023 are on page <u>75</u>, the Schedules of Changes in Employers' Total Pension Liability on pages <u>95-99</u>, the Schedules of the Employer Net Pension Liability on pages <u>93-94</u>; the Schedule of Changes in Employers' Total Other Post-Employment Benefits (OPEB) Liability are on pages <u>106-110</u>; and, the Schedule of the Employers' Net OPEB Liabilities are on pages <u>104-105</u>. These schedules include current and historical trend information about the actuarially funded status of each plan from a long-term, ongoing plan perspective and the progress made in accumulating sufficient assets to pay benefits and insurance premiums when due. The Schedules of the Employers' Contributions – Pensions are on pages <u>101-103</u>, and the Schedules of the Employers' Contributions – OPEB are on pages <u>113-115</u>. These schedules present current and historical trend information about the annual required contributions and the contributions made in relation to the requirement. These schedules provide information that contributes to understanding the changes over time in the funded status of the plans.

Kentucky Public Pensions Authority Combined

FIN 22

KPPA's combined fiduciary net position changed by \$2,327 million in fiscal year 2023, compared to the fiduciary net position for the previous fiscal year. The increase in fiduciary net position for the fiscal year 2023 is primarily attributable to positive investment performance. This analysis focuses on the net position table and changes in the fiduciary net position table for KPPA's Pension and Insurance Funds.

Pension Plan Activities

Member contributions increased by \$46.6 million. This is primarily due to an increase in covered payroll across all funds. Retirement contributions are calculated by applying a percentage factor to salary and are remitted by each employer on behalf of members. Nonhazardous Tier 1 members pay pension contributions of 5.00% of creditable compensation and Hazardous Tier 1 members contribute 8.00% of creditable compensation; whereas, Nonhazardous Tier 2 and 3 members pay contributions of 6.00% of creditable compensation and Hazardous Tier 2 and 3 members pay contributions of 6.00% of creditable compensation and Hazardous Tier 2 and 3 members contribute 9% of creditable compensation.

Employer contributions increased by \$62.0 million for fiscal year 2023. The increase in contributions was the result of the increase in covered payroll for all funds, and an increase in the employer contribution rates for CERS Nonhazardous and CERS Hazardous.

Total Pension Plans deductions increased by \$56.6 million. The 2.35% increase was primarily driven by the normal increase in retirements across all plans.

Net investment income increased by \$2,352.0 million. This is illustrated in the Investment Income Pension table on the next page. The increase in fair value of investments during fiscal year 2023 was the driving force of the increase in net investment income when compared to fiscal year 2022.

Overall, KPPA reported a net positive return of 9.54% for the fiscal year. This outperformed both the IPS policy benchmark return of 8.88% and the actuarial assumed rate of return of 6.25% used by CERS Nonhazardous, CERS Hazardous and KERS Hazardous, and 5.25% used by KERS Nonhazardous and SPRS.

Insurance Plan Activities

Employer contributions paid into the Insurance Plans decreased by \$36.5 million in fiscal year 2023 over the prior fiscal year. The decrease in employer contributions is directly related to a decrease in the employer contribution rate for the Insurance Plans.

Income from investment activities increased by \$1,030.1 million in fiscal year 2023 compared to fiscal year 2022. Overall, KPPA reported a net positive return of 10.15% for the fiscal year. This outperformed both the IPS policy benchmark of 9.27% and the actuarial assumed rate of return of 6.25% used by all of the Insurance Plan Funds.

Historical Trends

Accounting standards require that the Combining Statement of Fiduciary Net Position state asset values at fair value and include benefits and refunds due plan members and beneficiaries; unrealized investment income (loss); and administrative expenses as of the reporting date. Information regarding the actuarial funding status of the Pension and Insurance Funds is provided in the Schedules of Net Pension Liability (NPL) on page <u>93-94</u> and Net OPEB Liability on pages <u>104-105</u>. The asset values stated in the Schedules of Changes in Employers' Total Pension Liability (TPL) on pages <u>95-99</u> and Total OPEB Liability on pages <u>106-110</u> are the actuarial value of assets. The actuarial value of assets recognizes a portion of the difference between the fair value of assets and the expected fair value of assets based on the investment return assumption. The amount recognized each year is 20% of the difference between fair value and expected fair value. The actuarial accrued liability is calculated using the entry age normal cost funding method. This actuarial accrued liability is the measure of the cost of benefits that have been earned to date by CERS, KERS and SPRS' members, but not yet paid. The difference in value between the actuarial accrued liability and the actuarial value of assets is defined as the unfunded actuarial accrued liability.

The unfunded actuarial accrued liability from the June 30, 2023, actuarial valuation in the Pension Plans decreased by \$1,823.0 million for a total unfunded amount of \$23,278.5 million in fiscal year 2023, compared to an unfunded amount of \$25,101.5 million in fiscal year 2022. The overall decrease in the unfunded actuarial accrued liability is the result of an increase in the fair value of the assets due to favorable market conditions, an increase in employee salaries, and General Fund Appropriations during fiscal year 2023.

The Insurance Plan's unfunded actuarial accrued liability from the June 30, 2023, actuarial valuation for fiscal year 2023, was negative \$730.1 million compared to negative \$663.0 million for fiscal year 2022. This is a decrease in the unfunded actuarial accrued liability of \$67.1 million. The decrease in the unfunded actuarial accrued liability is the result of an increase in the fair value of the assets due to favorable market conditions and an increase in employee salaries during fiscal year 2023. Please see the charts on the following page for the unfunded actuarial accrued liability.

Annual required actuarially determined contributions by the employers and actual contributions made by employers and other contributing entities in relation to the required contributions, are provided in the Schedules of Employer Contributions - Pension on pages <u>101-103</u>, and in the Schedules of Contributions - OPEB on pages <u>113-115</u>. The difference in the annual required contributions and actual contributions made by employers and other contributing entities in the KERS and SPRS funds is attributable to the fact that the employer contribution rate set by the Kentucky General Assembly was less than the rate recommended by the KPPA actuary in prior years and adopted by the Board.

Information Requests

This financial report is designed to provide a general overview of the CERS, KERS, SPRS, and Insurance Fund finances. Questions concerning any of the information provided in this report or requests for additional information should be directed to:

NOTE A. Summary of Significant Accounting Policies

Kentucky Retirement Systems (KRS) is responsible for the administration of the Kentucky Employees Retirement System (KERS) and the State Police Retirement System (SPRS). HB 484, passed in the 2020 Legislative Session, also created a separate governing board in Kentucky Revised Statutes 78.782, County Employees Retirement System (CERS), to administer the statewide cost-sharing plans for local government employers. KPPA is responsible for administering the single personnel system for the pension plans, a system of accounting, day-to-day administrative needs of CERS and KRS, selecting consulting and service contractors to provide administrative services including an external auditor. KPPA is also responsible for promulgating administrative regulations on behalf of KRS and CERS, individually or collectively. It is additionally tasked with administering and operating any jointly held assets for KRS and CERS including, but not limited to real estate, office space, equipment, and supplies. KPPA staff manages assets in accordance with investment policies developed by the CERS and KRS Investment Committees and approved by each Board. KPPA staff recommends to the Boards the hiring, retention and termination of investment managers. Each Board is responsible for selection of investment services for the management and custody of the assets while KPPA is responsible for the remaining investment services.

This summary of KPPA's significant accounting policies is presented to assist in understanding the combining financial statements for CERS and KRS. The combining financial statements and notes are representations of KPPA's management, which is responsible for their integrity and objectivity. These accounting policies conform to Generally Accepted Accounting Principles (GAAP) and have been consistently applied in the preparation of the combining financial statements.

Basis of Accounting

KPPA's combining financial statements are prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which contributions are due. Employer contributions to the plan are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Premium payments are recognized when due and payable in accordance terms of the plan. Administrative and investment expenses are recognized when incurred. The net position represents the five funds of CERS, KERS, SPRS and the five funds of the Kentucky Retirement Insurance Trust Fund (Insurance Fund) that have accumulated thus far to pay pension benefits for retirees, active and inactive members, and health care premiums for current and future employees.

Method Used to Value Investments

Investments are reported at fair value. Fair value is the price that would be received upon selling an asset or the amount paid to transfer a liability in an orderly transaction between market participants at the measurement date. Short-term investments are reported at cost, which approximates fair value. See Investments Note D for further discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the dividend date. Gain (loss) on investments includes gains and losses on investments bought and sold as well as held during the fiscal year. Investment returns are recorded in all plans net of investment fees.

Investment Unitization

Within the plan accounting structure there are two primary types of accounts: Plan Accounts and Pool Accounts. Plan Accounts are the owners of the investment pool. An account is established for each plan/fund and these accounts hold Units of Participation that represent the plan's/fund's invested value of the investment pool. Pool Accounts are accounts that hold the assets of the investment pool where all investment related activity and earnings occur. The pooled accounts are the investment strategies of the pool. Units of Participation are bought and sold as each plan/fund contributes or withdraws cash or assets from the investment pool. The investment pool earnings are then allocated to plans utilizing a cost distribution method that allows for fluctuating prices experienced in capital markets. This involves earnings allocated to the plan accounts with an increase or decrease in cost on the Unit of Participation Holdings of the Plan Accounts. Correspondingly, the price of the Unit of Participation Holdings is updated to reflect change in fair value in the investment pool. Earnings are allocated based on the daily weighted average of Master Trust Units held by each plan/fund account during each monthly earnings period. This method is commonly used when plans make multiple contributions or withdrawals from the investment pool throughout the month as it eliminates allocation distortion due to large end of month cash flows.

Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Equipment

Office equipment is valued at historical cost and depreciation is computed utilizing the straight-line method over the estimated useful lives of the assets ranging from three to ten years. Improvements, which increase the useful life of the equipment, are capitalized. Maintenance and repairs are charged as an expense when incurred. The capitalization threshold used in fiscal year 2023 was \$3,000 (see Equipment Note J for further information).

Intangible Assets

Intangible assets, currently computer software, are valued at historical cost and amortization is computed utilizing the straight-line method over the estimated useful lives of the assets which is ten years. The capitalization threshold used in fiscal year 2023 was \$3,000 (see Intangible Assets Note K for further information).

Accounts Receivable

Accounts Receivable consist of amounts due from employers. KPPA management considers accounts receivable to be fully collectible; accordingly, no allowance for doubtful accounts is considered necessary. If amounts become uncollectible, they will be charged to operations when that determination is made. If amounts previously written off are collected, they will be credited to income when received.

The Investment Accounts Receivable and Investment Accounts Payable consist of investment management earnings and fee accruals, as well as all buys and sells of securities which have not closed as of the reporting date.

Payment of Benefits

Benefits are recorded when paid.

Expense Allocation

KPPA administrative expenses are allocated based on a hybrid allocation developed by the Boards. The hybrid allocation is based on a combination of plan membership and direct plan expenses. All investment related expenses are allocated in proportion to the percentage of investment assets held by each plan.

Component Unit

KPPA is a component unit of the Commonwealth of Kentucky (the Commonwealth) for financial reporting purposes.

CERS was created by the Kentucky General Assembly on July 1, 1958, pursuant to Kentucky Revised Statutes 78.520, and the separate governing board was created in 2021. KERS was created by the Kentucky General Assembly on July 1, 1956, pursuant to Kentucky Revised Statutes 61.515. SPRS was created by the Kentucky General Assembly on July 1, 1958, pursuant to Kentucky Revised Statutes 16.510. The KRS Insurance Trust Fund was created by the Kentucky General Assembly pursuant to Kentucky Revised Statutes 61.701. KPPA's administrative budget is subject to approval by the Kentucky General Assembly. Employer contribution rates for KERS and SPRS are also subject to legislative approval. Employer contribution rates for CERS are determined by the Board of CERS without further legislative review. The methods used to determine the employer rates for CERS and KRS (KERS and SPRS) are specified in Kentucky Revised Statutes 78.635 and 61.565. Employee contribution rates are set by statute and may be changed only by the Kentucky General Assembly.

Perimeter Park West, Incorporated (PPW) is governed by a three-member board selected by shareholders. Although it is legally separate from KPPA, PPW is reported as part of KPPA, because its sole ownership is Kentucky Retirement Systems, and therefore through unitization is owned by KERS, CERS, and SPRS. PPW functions as a real estate holding company for the offices used by the plans administered by KPPA.

Recent Accounting Pronouncements

In June 2017, the Governmental Accounting Standards Board (GASB) issued *Statement Number 87 Leases*. The objective of this Statement is to address government lessee's recognition of lease liabilities, intangible assets, and report amortization expense for using the leased asset, interest expense on the lease liability, and note disclosures about the lease. Another objective of this Statement is to address government lessor's recognition of a lease receivable, deferred inflow, and report lease revenue, interest income, and note disclosures about the lease. Due to COVID-19, *Statement Number 87 Leases* was updated by GASB to extend the requirement of this standard to take effect for financial statements starting with the fiscal year that ends June 30, 2022. KPPA determined that the KPPA lease agreements are not material to the overall financial statements. Therefore, KPPA did not report the leases according to *Statement Number 87 Leases*.

GASB Statement Number 96, Subscription-Based Information Technology Arrangements (SBITAs) established standards of accounting and financial reporting for SBITAs by a government end user (a government). The requirements of this Statement apply to financial statements of all state and local governments. The underlying accounting principles for SBITAs are similar to the standards established in *Statement Number 87, Leases,* as amended. The requirements of this Statement will take effect for financial statements starting with the fiscal year that ends June 30, 2023. KPPA determined that the KPPA SBITAs lease agreements are not material to the overall financial statements. Therefore, KPPA did not report the SBITAs leases according to Statement Number 96 SBITAs.

GASB Statement Number 100, Accounting Changes and Error Corrections - an amendment of GASB Statement No. 62. The requirements of this Statement will take effect for financial statements starting with the fiscal year that ends June 30, 2024. KPPA is evaluating the impact of the Statement to the financial report.

GASB Statement Number 101, Compensated Absences. The requirements of the Statement will take effect for financial statements starting with the fiscal year that ends December 31, 2024. KPPA is evaluating the impact of the Statement to the financial report.

Note B. Descriptions & Contribution Information

| CERS Membership Combined As of June 30 | | | | | | |

or Participating Employers

Note: Each person is only counted once in the Membership by System report. A member who has both a membership account and a retired account is included in the retired count. Members who have multiple membership accounts are included under the system where they most recently contributed. Members who have more than one retirement account are included in the system with the greatest service credit. If the retired accounts have equal service credit, they are counted first in SPRS, CERS Hazardous, KERS Hazardous, CERS Nonhazardous, then KERS Nonhazardous.

| Retiree Medical Insurance Coverage As of June 30, 2023 | | | | | | |
|---|--------|-------------------|--------|-------------------------------------|----------------------------------|--|
| | Single | Couple/ Family | Parent | Medicare Without Prescription | Medicare With Prescription | |
| CERS Nonhazardous | 8,721 | 524 | 234 | 1,921 | 29,542 | |
| CERS Hazardous | 1,893 | 3,047 | 491 | 138 | 4,455 | |
| CERS Total | 10,614 | 3,571 | 725 | 2,059 | 33,997 | |

| KERS Total | 7,346 | 1,023 | 551 | 1,029 | 24,772 | |
| SPRS | 230 | 434 | 92 | 17 | 1,022 | |
| Total | 18,190 | 5,028 | 1,368 | 3,105 | 59,791 | |

The total number of Participating Employers is 1,454.

Note: Medical Insurance coverage is provided based on the member's initial participation date and length of service. Members receive either a percentage or dollar amount for insurance coverage. The counts are the number of medical plans contracted with the Department of Employee Insurance or Medicare vendor and are not representative of the number of persons.

Plan Descriptions

The County Employees Retirement System (CERS), the Kentucky Employees Retirement System (KERS), and the State Police Retirement System (SPRS) provide retirement, disability, and death benefits to system members. Retirement benefits may be extended to beneficiaries of members under certain circumstances. KPPA provides administrative support to CERS, KERS, SPRS, and Kentucky Retirement System Insurance Trust Fund (Insurance Fund). In addition to executive management, the CERS, KERS, SPRS, and Insurance Fund share investment management, accounting, and information system services, the costs of which are allocated to the plans on an equitable basis.

CERS - County Employees Retirement System

CERS was established by Kentucky Revised Statutes 78.520. The CERS system is comprised of two plans -CERS Nonhazardous plan and CERS Hazardous plan. The CERS Nonhazardous plan was established to provide retirement benefits to all regular full-time members employed in positions of each participating county, city, school board, and any additional eligible local agencies electing to participate in CERS. The membership of the CERS Hazardous plan includes employees whose position is considered hazardous with principal job duties including, but are not limited to, active law enforcement, probation and parole officers, detectives, pilots, paramedics, and emergency medical technicians, with duties that require frequent exposure to a high degree of danger and also require a high degree of physical condition.

The responsibility for the general administration and operation of the plans within CERS is vested in the CERS Board of Trustees. The CERS Board of Trustees consists of 9 members. Six trustees are appointed by the governor and three are elected by CERS members (active, inactive, and/or retired). The six appointed trustees are selected from a list of candidates provided to the Governor's Office by one of three employer advocacy groups: Kentucky League of Cities, Kentucky Association of Counties, or Kentucky School Board Association. Of the six appointed trustees, three must have investment experience and three must have retirement experience as defined by statute. All appointments by the governor are subject to Senate confirmation.

KERS - Kentucky Employees Retirement System

KERS was established by Kentucky Revised Statutes 61.515. The KERS system is comprised of two plans - KERS Nonhazardous plan and KERS Hazardous plan. The KERS Nonhazardous plan was established to provide retirement benefits to all regular full-time members employed in positions of any state department, board, or agency directed by Executive Order to participate in KERS. The membership of the KERS Hazardous plan includes employees whose position is considered hazardous with principal job duties including, but are not limited to, active law enforcement, probation and parole officer, detective, pilots, paramedics, and emergency medical technicians, with duties that require frequent exposure to a high degree of danger and also require a high degree of physical condition.

The responsibility for the general administration and operation of KERS is vested with the Kentucky Retirement Systems (KRS) Board of Trustees. The KRS Board of Trustees consist of 9 members. Six trustees are appointed by the governor and three are elected. Of the elected trustees, two are elected by KERS members and one is elected by SPRS members. Active, inactive and retired members of the appropriate system are invited to participate in the election of trustees. Of the six appointed trustees, three must have investment experience and three must have retirement experience as defined by statute. All appointments by the governor are subject to Senate confirmation. The two trustees elected by the KERS membership must be members of or retired from KERS. The one trustee elected by the SPRS membership must be a member of or retired from SPRS.

SPRS - State Police Retirement System

SPRS is a single employer defined benefit pension plan and was established by Kentucky Revised Statutes 16.510 to provide retirement benefits to all full-time state troopers employed in positions by the Kentucky State Police. The responsibility for the general administration and operation of the SPRS is vested with the KRS Board of Trustees (see KERS - Kentucky Employees Retirement System for KRS Board composition).

Kentucky Retirement System Insurance Trust Fund

The Insurance Fund was established by Kentucky Revised Statutes 61.701 for the purpose of providing hospital and medical insurance benefits for eligible members receiving benefits from CERS Nonhazardous, CERS Hazardous, KERS Nonhazardous, KERS Hazardous, and SPRS (collectively the Insurance Fund). The responsibility for the general administration and operation of the Insurance Fund is vested with both the CERS Board of Trustees and the KRS Boards of Trustees. Each of the OPEB funds: CERS Nonhazardous, CERS Hazardous, KERS Nonhazardous, KERS Nonhazardous, and SPRS is legally separated with benefits only eligibility to be paid for each of the respective membership groups.

Cost of Living Adjustment (COLA)

Prior to July 1, 2009, COLAs were provided to retirees annually equal to the percentage increase in the annual average of the consumer price index (CPI) for all urban consumers for the most recent calendar year, not to exceed 5% in any plan year. After July 1, 2009, the COLAs were to be limited to 1.50%.

In 2013 the General Assembly created a new law to govern how COLAs will be granted. Language included in Senate Bill 2 during the 2013 Regular Session states COLAs will only be granted in the future if the Systems' Boards determine that assets of the Systems are greater than 100% of the actuarial liabilities and legislation authorizes the use of surplus funds for the COLA; or the General Assembly fully prefunds the COLA or directs the payment of funds in the year the COLA is provided. Kentucky Revised Statutes 78.5518 governs how COLAs may be granted for members of CERS. The granting of COLAs for the KERS and SPRS membership is covered under Kentucky Revised Statutes 61.691.

No COLA has been granted since July 1, 2011.

Employer Contributions

Local government participating employers are required to contribute an actuarially determined rate for CERS pension contributions, per the Kentucky Revised Statutes 78.635. The CERS Board of Trustees establishes the employer contribution rate based on Kentucky Revised Statutes 78.454(33) each year following the annual actuarial valuation as of July 1 and prior to July 1 of the succeeding fiscal year for local governments in Kentucky.

The Commonwealth is required to contribute at an actuarially determined rate for KERS and SPRS pensions. The KRS Board of Trustees recommends the rates each year following the annual actuarial valuation, but the rates are set by the legislature within the budget bill for each biennium. The contribution rates from July 1, 2022, through June 30, 2023, were set within HB 1, passed in the 2022 Regular Legislative Session, for KERS Nonhazardous, KERS Hazardous and SPRS employers.

The KERS Nonhazardous employer contribution rate shall include, (1) the normal cost contribution and (2) the prorated amount of the actuarially accrued liability assigned to each individual nonhazardous employer in accordance with Kentucky Revised Statutes 61.565(1)(d). Each employer pays the normal cost as a percentage of reported payroll plus a flat amount to cover the employer-specific actuarially accrued liability contribution for the fiscal year as determined by the annual valuation.

Per Kentucky Revised Statutes 61.565 and 16.645(18), normal contribution and past service contribution rates shall be determined by the KRS Board on the basis of the last annual valuation preceding July 1 of a new biennium. The KRS Board may amend contribution rates as of the first day of July of the second year of a biennium, if it is determined on the basis of a subsequent actuarial valuation that amended contribution rates are necessary to satisfy requirements determined in accordance with actuarial bases adopted by the KRS Board. However, formal commitment to provide the contributions by the employer is made through the biennial budget for KERS and SPRS.

For the fiscal year ended June 30, 2023, participating employers of CERS Nonhazardous, CERS Hazardous, KERS Hazardous, and SPRS contributed a percentage of each employee's creditable compensation. The actuarially determined rates set by the Boards for the fiscal year is a percentage of each employee's creditable compensation. Administrative costs of KPPA are financed through employer contributions and investment earnings. See the charts on the following page for the fiscal year employer contribution rates, including the actuarially recommended rates.

| Contribution Rate As of June 30, 202 | | y Fund | | | | |
|---|-----------------------------------|-------------------------------------|-----------------------------------|-------------------------------------|-----------------------------------|-------------------------------------|
| | Pens | ion | Insura | ance | Combine | d Total |
| Fund | Employer Contribution Rates | Actuarially Recommended Rates | Employer Contribution Rates | Actuarially Recommended Rates | Employer Contribution Rates | Actuarially Recommended Rates |
| CERS Nonhazardous** | 23.40% | 23.40% | 3.39% | 3.39% | 26.79% | 26.79% |
| CERS Hazardous** | 42.81% | 42.81% | 6.78% | 6.78% | 49.59% | 49.59% |
| KERS Nonhazardous * | 7.82% | 7.82% | 2.15% | 2.15% | 9.97% | 9.97% |
| KERS Hazardous | 31.82% | 31.82% | 0.00% | 0.00% | 31.82% | 31.82% |
| SPRS *** | 85.32% | 126.40% | 14.11% | 14.11% | 99.43% | 140.51% |

* House Bill 8 passed during the 2021 legislative session required, beginning July 1, 2021, the KERS Nonhazardous employers pay the normal cost for all employees plus a flat amount which is equal to their assigned percentage of the annual dollar amount that is sufficient to amortize the total unfunded actuarial accrued liability of the system over a closed period. The percentage is based on the liability that was attributable to the agency as of June 30, 2019.

**House Bill 362 passed during the 2018 legislative session caps CERS employer contribution rate increases up to 12% per year over the prior fiscal year for the period of July 1, 2018 to June 30, 2028.

*** House Bill 1 passed during the 2022 legislative session included \$215 million in FY 2021-2022 for SPRS pension fund to be applied to the unfunded liability, which immediately lowered the SPRS contribution rate from the Fiscal Year 2022 146.06% rate to 99.43% for Fiscal Year 2023.

As of June 30, 2023, the date of the most recent actuarial valuation, membership consisted of:

TIER 1:

Tier 1 plan members who began participating prior to September 1, 2008, are required to contribute 5% (Nonhazardous) or 8% (Hazardous) of their annual creditable compensation. These members are classified in the Tier 1 structure of benefits. Interest is paid each June 30 on members' accounts at a rate of 2.5%. If a member terminates employment and applies to take a refund, the member is entitled to a full refund of contributions and interest.

TIER 2:

Tier 2 plan members, who began participating on or after September 1, 2008, and before January 1, 2014, are required to contribute 6% (Nonhazardous) or 9% (Hazardous) of their annual creditable compensation. Further, 1% of these contributions are deposited to an account created for the payment of health insurance benefits under 26 USC Section 401(h) in the Insurance Fund (see Kentucky Administrative Regulation (KAR) 105 KAR 1:420). These members are classified in the Tier 2 structure of benefits. Interest is paid each June 30 on members' accounts at a rate of 2.5%. If a member terminates employment and applies to take a refund, the member is entitled to a full refund of contributions and interest; however, the 1% Health Insurance Contribution (HIC) to the 401(h) account is non-refundable and is forfeited.

TIER 3:

Tier 3 plan members, who began participating on or after January 1, 2014, are required to contribute to the Cash Balance Plan. The Cash Balance Plan is known as a hybrid plan because it has characteristics of both a defined benefit plan and a defined contribution plan. Members contribute 5% (Nonhazardous) or 8% (Hazardous) of their monthly creditable compensation which is deposited into their account, and an additional 1% which is deposited to an account created for payment of health insurance benefits under 26 USC Section 401(h) in the Insurance Fund (see 105 KAR1:420), which is not refundable. Tier 3 member accounts are also credited with an employer pay credit in the amount of 4% (Non-Hazardous) or 7.5% (Hazardous) of the member's monthly creditable compensation. The employer pay credit amount is deducted from the total employer contribution rate paid on the member's monthly creditable compensation. If a vested (60 months of service) member terminates employment and applies to take a refund, the member is entitled to the members contributions (less HIC) plus employer pay credit plus interest (for both employee contributions and employer pay). If a non-vested (less than 60 months) member terminates employment and applies to take a refund, the member is entitled to receive employee contributions (less HIC) plus interest (on employee contributions only).

Tier 3

Interest is paid into the Tier 3 member's account. The account currently earns 4% interest credit on the member's accumulated account balance as of June 30 of the previous year. The member's account may be credited with additional interest if the fund's five-year Geometric Average Net Investment Return (GANIR) exceeded 4%. If the member was actively employed and participating in the fiscal year, and if KPPA's GANIR for the previous five years exceeds 4%, then the member's account will be credited with 75% of the amount of the returns over 4% on the account balance as of June 30 of the previous year (Upside Sharing Interest). It is possible that one fund in KPPA may get an Upside Sharing Interest, while another may not.

Upside Sharing Interest

Upside Sharing Interest is credited to both the member contribution balance and Employer Pay Credit balance. Upside Sharing Interest is an additional interest credit. Member accounts automatically earn 4% interest annually. The GANIR is calculated on an individual fund basis.

The chart below shows the interest calculated on the members' balances as of June 30, 2022, and credited to each member's account on June 30, 2023.

| (A-B) = C x 75% = D then B + D = Interest (\$ in Thousands) | | | | | | |
|---|--|---------------------------------|-------------------------------|--|--|---|
| | Α | В | С | D | | |
| Fund | 5-Year Geometric Average Return | Less Guarantee Rate of 4% | Upside Sharing Interest | Upside Sharing Interest X 75% = Upside Gain | Interest Rate Earned (4% + Upside) | Total Interest Credited to Member Accounts |
| CERS Nonhazardous | 6.52% | 4.00% | 2.52% | 1.89% | 5.89% | \$25,233 |
| CERS Hazardous | 6.68% | 4.00% | 2.68% | 2.01% | 6.01% | \$8,761 |
| KERS Nonhazardous | 5.61% | 4.00% | 1.61% | 1.21% | 5.21% | \$9,667 |
| KERS Hazardous | 6.40% | 4.00% | 2.40% | 1.80% | 5.80% | \$3,186 |
| SPRS | 6.09% | 4.00% | 2.09% | 1.57% | 5.57% | \$513 |

Insurance Fund Description

The Insurance Fund was established to provide hospital and medical insurance for eligible members receiving benefits from CERS, KERS, and SPRS. The eligible non-Medicare retirees are covered by the Department of Employee Insurance (DEI) plans. The KPPA Board contracts with Humana to provide health care benefits to the eligible Medicare retirees through a Medicare Advantage Plan. KPPA submits the premium payments to DEI and Humana. The Insurance Fund pays a prescribed contribution for whole or partial payment of required premiums to purchase hospital and medical insurance. For the fiscal year ended June 30, 2023, insurance premiums withheld from benefit payments for KPPA's members were \$23.7 million and \$4.0 million for CERS Nonhazardous and Hazardous, respectively; \$19.5 million and \$1.4 million for KERS Nonhazardous and Hazardous, respectively; and, \$0.4 million for SPRS.

The amount of benefit paid by the Insurance Fund is based on years of service. For members who began participating prior to July 1, 2003, a percentage of the contribution rate is paid based on years of service with 100% of the contribution rate being paid with 20 years of service. Since the passage of House Bill 290 (2004 Kentucky General Assembly), medical insurance benefits have been calculated differently for members who began participating on or after July 1, 2003. Once members reach a minimum vesting period of 10 years, Nonhazardous employees whose participation began on or after July 1, 2003, earn \$10 per month for insurance benefits at retirement for every year of earned service. Hazardous employees whose participation began on or after July 1, 2003 earn \$15 per month for insurance benefits at retirement for every year of earned service without regard to a maximum dollar amount. Upon death of a Hazardous employee, the employee's spouse receives \$10 per month for insurance benefits for each year of the deceased employee's earned Hazardous service. This dollar amount is subject to adjustment annually, which is currently 1.5%, based upon Kentucky Revised Statutes. House Bill 1 (2008 Kentucky General Assembly) changed the minimum vesting requirement for participation in the health insurance plan to 15 years for members whose participation began on or after September 1, 2008. This benefit is not protected under the inviolable contract provisions of Kentucky Revised Statutes 16.652, 61.692 and 78.852. The Kentucky General Assembly reserves the right to suspend or reduce this benefit if, in its judgment, the welfare of the Commonwealth so demands. The Insurance Plan pays 100% of the contribution rate for hospital and medical insurance premiums for the spouse and dependents of members who die as a direct result of an act in the line of duty or from a duty-related injury.

For members participating prior to July 1, 2003, years of service and respective percentages of the maximum benefit are as follows:

| Portion Paid by Insurance Fund As of June 30, 2023 | |
|---|-------------------------------|
| Years of Service | Paid by Insurance Fund (%) |
| 20+ years | 100.00% |
| 15-19 years | 75.00% |
| 10-14 years | 50.00% |
| 4-9 years | 25.00% |
| Less than 4 years | 0.00% |

The amount of benefit paid by the Insurance Fund is based on years of service. For members participating on or after July 1, 2003, the dollar amounts of the benefit per year of service are as follows:

| Dollar Contribution | for Fiscal Year 2023 For Member participation date on or after | July 1, 2003 |
|----------------------------|--|---------------|
| | | (in Whole \$) |
| CERS Nonhazardous | | \$14.20 |
| CERS Hazardous | | \$21.30 |
| KERS Nonhazardous | | \$14.20 |
| KERS Hazardous | | \$21.30 |
| SPRS | | \$21.30 |

Note C. Cash, Short-Term Investments & Securities Lending Collateral

The provisions of GASB Statement No. 28 Accounting and Financial Reporting for Securities Lending Transactions require that cash received as collateral on securities lending transactions and investments made with that cash must be reported as assets on the financial statements. The non-cash collateral is not reported because the securities received as collateral are unable to be pledged or sold unless the borrower defaults. In accordance with GASB No. 28, KPPA classifies certain other investments, not related to the securities lending program, as short-term. Cash and short-term investments consist of the following:

Cash, Short-Term Investments, & Securities Lending Collateral As of June 30, 2023 (\$ in Thousands) ^{CERS} Pension

| CERS Nonhazardous | | |
|--|-----------|-----------|
| Cash | \$662 | \$259 |
| Short-Term Investments | 303,178 | 132,269 |
| Securities Lending Collateral Invested | 176,126 | 59,513 |
| Total | \$479,966 | \$192,041 |
| CERS Hazardous | | |
| Cash | \$262 | \$8 |
| Short-Term Investments | 134,692 | 31,789 |
| Securities Lending Collateral Invested | 60,803 | 29,266 |
| Total | \$195,757 | \$61,063 |

Insurance

| KERS | | |
|--|-----------|-----------|
| | Pension | Insurance |
| KERS Nonhazardous | | |
| Cash | \$375 | \$105 |
| Short-Term Investments | 648,780 | 170,091 |
| Securities Lending Collateral Invested | 71,804 | 26,420 |
| Total | \$720,959 | \$196,616 |
| KERS Hazardous | | |
| Cash | \$141 | \$9 |
| Short-Term Investments | 89,143 | 29,906 |
| Securities Lending Collateral Invested | 18,277 | 11,270 |
| Total | \$107,561 | \$41,185 |

| SPRS | | |
|--|-----------|-----------|
| | Pension | Insurance |
| Cash | \$35 | \$8 |
| Short-Term Investments | 133,780 | 10,868 |
| Securities Lending Collateral Invested | 12,028 | 4,491 |
| Total | \$145,843 | \$15,367 |

Note D. Investments

Kentucky Revised Statutes 61.650 and 78.790 specifically state that the Board of Trustees for the respective retirement Plan(s) shall have the full and exclusive power to invest and reinvest the funds of the Plan(s) they govern. In addition, Kentucky Revised Statutes 61.645 and 78.782 require three (3) members of each Board to have at least ten (10) years of investment experience as defined by the statutes. The Boards of Trustees are required to establish Investment Committees who are specifically charged with implementing the investment policies adopted by the Board of Trustees and to act on behalf of the Board of Trustees on all investment-related matters. The Board of Trustees and the Investment Committee members are required to discharge their duty to invest the funds of the Plans in accordance with the "Prudent Person Rule" as set forth in Kentucky Revised Statutes 61.650 and 78.790 and to manage those funds consistent with the long-term nature of the trusts and solely in the interest of the members and beneficiaries. All internal investment staff of the Kentucky Public Pensions Authority, and investment consultants must adhere to the Code of Ethics and Standards of Professional Conduct of the CFA Institute and all board trustees must adhere to the Code of Conduct for Members of a Pension Scheme Governing Body of the CFA Institute. The Boards of Trustees are authorized to adopt policies. The Boards of Trustees have adopted Investment Policy Statements (IPS) which define the framework for investing the assets of the Plans. The IPS is intended to provide general principles for establishing the investment goals of the Plans, the allocation of assets, employment of outside asset management, and monitoring the results of the respective Plans. A copy of each Board's IPS can be found on the KPPA website. By statutes, the Boards, through adopted written policies, shall maintain ownership and control over its assets held in its unitized managed custodial account. Additionally, the Investment Committees establish specific investment guidelines that are summarized below and are included in the Investment Management Agreement (IMA) for each investment management firm.

Equity

Public Equity

Investments may be made in common stock; securities convertible into common stock; preferred stock of publicly traded companies on stock markets; asset class relevant Exchange Traded Funds (ETFs); or any other type of security contained in a manager's benchmark. Each individual equity account has a comprehensive set of investment guidelines, which contains a listing of permissible investments, portfolio restrictions, and standards of performance.

Private Equity

Subject to the specific approval of the Investment Committees, Private Equity investments may be made for the purpose of creating a diversified portfolio of alternative investments under the Equity umbrella. Private equity investments are expected to achieve attractive risk-adjusted returns and, by definition, possess a higher degree of risk with a higher return potential than traditional investments. Accordingly, total rates of return from private equity investments are expected to be greater than those that might be obtained from conventional public equity or debt investments.

Fixed Income

Core Fixed Income

The Core Fixed Income accounts may include, but are not limited to, the following securities: U.S. government and agency bonds; investment grade U.S. corporate credit; investment grade non-U.S. corporate credit; mortgages, including residential mortgage-backed securities; commercial mortgage-backed securities and whole loans; asset-backed securities; and, asset class relevant ETFs.

Specialty Credit

The Specialty Credit accounts may include, but are not limited to, the following types of securities and investments: non-investment grade U.S. corporate credit including both bonds and bank loans; non-investment grade non-U.S. corporate credit including bonds and bank loans; private debt; municipal bonds; non-U.S. sovereign debt; mortgages, including residential mortgage-backed securities; commercial mortgage backed securities and whole loans; asset-backed securities and emerging market debt (EMD), including both sovereign EMD and corporate EMD; and asset class relevant ETFs. Each individual Specialty Credit account shall have a comprehensive set of investment guidelines which contains a listing of permissible investments, portfolio restrictions, risk parameters, and standards of performance for the account.

Cash and Cash Equivalent Securities

The following short-term investment vehicles are considered acceptable: Publicly traded investment grade corporate bonds; variable rate demand notes; government and agency bonds; mortgages, municipal bonds, and collective short-term investment funds (STIFs), money market funds or instruments (including, but not limited to certificates of deposit, bank notes, deposit notes, bankers' acceptance and commercial paper) and repurchase agreements relating to the above instruments. Instruments may be selected from among those having an investment grade rating at the time of purchase by at least one recognized bond rating service. In cases where the instrument has a split rating, the lower of the two ratings shall prevail. All instruments shall have a maturity at the time of purchase that does not exceed 397 days.

Fixed income managers, who utilize cash equivalent securities as an integral part of their investment strategy, are exempt from the permissible investments contained in the preceding paragraph. Permissible short-term investments for Fixed Income managers shall be included in the investment manager's investment guidelines.

Inflation Protected

Real Estate and Real Return

Subject to the specific approval of the corresponding Investment Committee, investments may be made to create a diversified portfolio of alternative investments. Investments are made in equity and debt real estate for the purpose of achieving the highest total rate of return possible consistent with a prudent level of risk. The purpose of the Real Return investments are to identify strategies that provide both favorable stand-alone risk-adjusted returns as well as the benefit of hedging inflation for the broader plans.

Investment Expenses

In accordance with GASB Statement No. 67 and No. 74, Financial Reporting for Pension Plans and Other Postemployment Benefit Plans other than Pension Plans, KPPA has exercised professional judgment to report investment expenses. It is not cost-beneficial to separate certain investment expenses from either the related investment income or the general administrative expenses. In fiscal year 2015, KPPA changed Private Equity investment fees from a gross basis to a net basis. The Boards made the decision to enhance transparency reporting. Prior to 2015, the majority of the trusts' Private Equity investment fees were netted against investment activity which is the standard used within the Private Equity sector. Trusts' net investment income has always included these fees regardless of the reporting method used. During the 2017 Regular Session of the Kentucky General Assembly, legislators passed SB 2 which requires the reporting of all investment fees and expenses. KPPA staff continues to work with managers to enhance fee and expense reporting.

Derivatives

Derivative instruments are financial contracts that have various effective dates and maturity dates and whose values depend on the values of one or more underlying assets, reference rates, or financial indices. External managers and KPPA Investment Staff are permitted to invest in derivative securities, or strategies which make use of derivative investments, for exposure, cost efficiency and risk management purposes, if such investments do not cause the portfolio to be leveraged beyond a 100% invested position. Any derivative security shall be sufficiently liquid that it can be expected to be sold at, or near, its most recently quoted market price. Examples of such derivatives include, but are not limited to the following securities: foreign currency forward contracts; futures; options; and swaps.

For accounting and financial reporting purposes, all derivative instruments are considered investment derivative instruments. The derivatives have been segregated on the Combining Statement of Fiduciary Net Position for both the Pension and Insurance Funds.

In accordance with GASB *Statement No. 53, Accounting and Financial Reporting for Derivative Instruments*, KPPA provides additional disclosure regarding its derivatives. The charts included represent the derivatives by types as of June 30, 2023. The chart shows the change in fair value of derivative types as well as the current fair value and notional value. The notional value is the reference amount of the underlying asset times its current spot price. The trusts hold investments in options, commitments, futures, and forward foreign exchange contracts.

Custodial Credit Risk for Deposits

Custodial credit risk for deposits is the risk that may occur as a result of a financial institution's failure, whereby KPPA deposits may not be returned. All non-investment related bank balances are held by JP Morgan Chase and each individual account is insured by the Federal Deposit Insurance Corporation (FDIC). None of these balances were exposed to custodial credit risk as they were either insured or collateralized at required levels.

Custodial Credit Risk for Investments

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, KPPA will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party. As of June 30, 2023, the currencies in the chart below were uninsured and unregistered, with securities held by the counterparty or by its trust department or agent but not in Trust's name. Below are total cash and securities held by Global Managers and consist of various currencies.

Credit Risk Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The debt security portfolios are managed by the Office of Investments staff and by external investment management firms. All portfolio managers are required by the CERS IPS and/or the KRS IPS to maintain diversified portfolios. Each portfolio is also required to be in compliance with risk management guidelines that are assigned to them based upon the portfolio's specific mandate. In total, the Pension and Insurance Funds' debt securities portfolios are managed using the following guidelines adopted by the Board:

- Bonds, notes, or other obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities are permissible investments and may be held without restrictions.
- The duration of the core fixed income portfolios combined shall not vary from that of the system's Fixed Income Index by more than +/- 25% duration as measured by effective duration, modified duration or dollar duration except when the system's Investment Committee has determined a target duration to be used for an interim basis.
- The amount invested in the debt of a single corporation shall not exceed 5% of the total fair value of CERS' and KRS' assets.
- No public Fixed Income manager shall invest more than 5% of the fair value of assets held in any single issue Short-Term instrument with the exception of U.S. Government issued, guaranteed or agency obligations.

As of June 30, 2023, the Pension portfolio had \$831.5 million in debt securities rated below BBB- which does not include not rated (NR) or withdrawn (WD) securities.

Note: These ratings are based on Standard & Poor's (S&P) Global Ratings. Where S&P ratings are unavailable, equivalent Fitch and Moody's Ratings are used as proxies.

Differences due to rounding.

Government Agencies, Government Mortgage-Backed Securities, Government Issued Commercial Mortgage Backed and Government Bonds are highly rated securities since they are backed by the US Government.

The NR reported indicate a rating has not been assigned.

FIN 54

As of June 30, 2023, the Insurance portfolio had \$363.8 million in debt securities rated below BBB- which does not include not rated (NR) or withdrawn (WD) securities.

Differences due to rounding.

Government Agencies, Government Mortgage-Backed Securities, Government Issued Commercial Mortgage Backed and Government Bonds are highly rated securities since they are backed by the US Government.

The NR reported indicate a rating has not been assigned.

The WD reported are ratings which have been withdrawn.

Concentration of Credit Risk Debt Securities

Concentration of credit risk is the risk of loss attributed to the magnitude of an entity's exposure in a single issuer. The total debt securities portfolio is managed using the following general guidelines adopted by the CERS and KRS Boards: bonds, notes, or other obligations issued or guaranteed by the U.S. Government, its agencies, or instrumentalities are permissible investments and may be held without restrictions. The amount invested in the debt of a single issuer shall not exceed 5% of the total fair value of the Plans' fixed income assets.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Duration measures the sensitivity of the market prices of fixed income securities to changes in the yield curve and can be measured using two methodologies: effective or modified duration. Effective duration uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price, and makes adjustments for any bond features that would retire the bonds prior to maturity. The modified duration, similar to effective duration, measures the sensitivity of the market prices to changes in the yield curve, but does not assume the securities will be called prior to maturity.

Below are the fair values and modified durations for the combined fixed income securities.

Foreign Currency Risk

Foreign currency risk is the risk that occurs if exchange rates adversely affect the value of a non-U.S. dollar based investment or deposit within the portfolios. Currency risk exposure, or exchange rate risk, primarily resides with the portfolios Non-U.S. equity holdings, but also affects other asset classes. Neither KRS or CERS have a formal policy to limit foreign currency risk; however, some individual managers are given the latitude to hedge some currency exposures. All foreign currency transactions are classified as Short-Term Investments. All gains and losses associated with these transactions are recorded in the Net Appreciation (Depreciation) in Fair Value of Investments on the combining financial statements.

Fair Value Measurement and Applications (GASB 72)

In accordance with GASB *Statement No. 72, Fair Value Measurement and Application*, KPPA provides this additional disclosure regarding the fair value of its Pension and Insurance investments. KPPA categorizes its fair value measurements within the fair value hierarchy established by GAAP.

KPPA defined the Fair Value Hierarchy and Levels as follows:

Level 1

Quoted prices (unadjusted) in an active market for identical assets or liabilities that KPPA has the ability to access at the measurement date (e.g., prices derived from NYSE, NASDAQ, Chicago Board of Trade, and Pink Sheets). Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using quoted prices (unadjusted) in an active market for identical assets or liabilities that KPPA has the ability to access at the measurement date.

Level 2

Inputs (other than quoted prices included within Level 1) that are observable for an asset or liability, either directly or indirectly. These inputs can include matrix pricing, market corroborated pricing and inputs such as yield curves and indices.

Level 3

Unobservable inputs for an asset or liability, which generally results in using the best information available for the valuation of the assets or liabilities being reported.

Net Asset Value (NAV)

The remaining investments not categorized under the fair value hierarchy are shown at net asset value (NAV). These are investments in non-governmental entities for which a readily determinable fair value is not available, such as member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Note: The fair value hierarchies do not reflect cash and accruals thus totals differ from the Investment Summaries.

Note: Cash Equivalents include publicly traded investment grade corporate bonds; variable rate demand notes; government and agency bonds; mortgages; municipal bonds; Short Term Investment Funds (STIF); money market funds or instruments (including, but not limited to, certificates of deposit, bank notes, deposit notes, bankers' acceptances and commercial paper); and repurchase agreements.

The investments measured at net asset value (NAV) are presented in the chart below:

⁽¹⁾ This type includes 13 high yield specialty credit managers with multiple strategies. These managers may invest in U.S. or non-U.S. investment grade corporate credit, including both bonds and bank loans, municipal bonds, non-U.S. sovereign debt, mortgages including residential mortgage backed securities, commercial mortgage backed securities and whole loans, asset-backed securities and emerging market debt.

⁽²⁾ This type includes 12 real estate funds that invest primarily in U.S. commercial real estate; however, there is one manager who invests solely in non-U.S. commercial real estate. The fair value of the investments have been determined using the NAV per share of the Plan's ownership interest and in the partners' capital. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the funds will be liquidated over the next 7 to 10 years. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share of the Plan's ownership interest in the partners' capital. Due to restrictions in the contract, redemptions are not likely until the assets of the fund are liquidated.

⁽³⁾ This type includes 11 real return managers that invest in multiple strategies such as infrastructure, agriculture, royalties, commodities, and natural resources. These investments are intended to provide both favorable risk-adjusted returns and correlation with inflation to help with the hedging of inflation for the broader plan. This group of managers also includes any hedge fund managers remaining in the portfolio which have all been terminated and are only awaiting payouts.

⁽⁴⁾ This type includes 35 managers with multiple strategies. These investments cannot be redeemed. Instead, the investments are redeemed throughout the life of the investment. Distributions are received through the liquidation of the underlying assets of the fund. It is expected that each fund will remain invested for a period of 5 to 10 years. It is probable that all of the investments in this type will be sold at an amount different from the NAV per share of the Plan's ownership interest in partners' capital. Therefore, the fair values of the investment in this asset class have been determined using recent observable transaction information.

⁽⁶⁾ This type includes short-term commingled investment instruments issued by the US Government, Federal agencies, sponsored agencies or sponsored corporations.

The investments measured at net asset value (NAV) are presented in the chart below:

⁽¹⁾ This type includes 13 high yield specialty credit managers with multiple strategies. These managers may invest in U.S. or non-U.S. investment grade corporate credit, U.S. or non U.S. non-investment grade corporate credit, including both bonds and bank loans, municipal bonds, non-U.S. sovereign debt, mortgages including residential mortgage backed securities, commercial mortgage backed securities and whole loans, asset-backed securities and emerging market debt.

⁽²⁾ This type includes 12 real estate funds that invest primarily in U.S. commercial real estate; however, there is one manager who invests solely in non-U.S. commercial real estate. The fair value of the investments have been determined using the NAV per share of the Plan's ownership interest and in the partners' capital. Distributions from each fund will be received as the underlying investments of the funds are liquidated. It is expected that the funds will be liquidated over the next 7 to 10 years. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been determined using the NAV per share of the Plan's ownership interest in the partners' capital. Due to restrictions in the contract, redemptions are not likely until the assets of the fund are liquidated.

⁽³⁾ This type includes 11 real return managers that invest in multiple strategies such as infrastructure, agriculture, royalties, commodities, and natural resources. These investments are intended to provide both favorable risk-adjusted returns and correlation with inflation to help with the hedging of inflation for the broader plan. This group of managers also includes any hedge fund managers remaining in the portfolio which have all been terminated and are only awaiting payouts.

⁽⁴⁾ This type includes 35 managers with multiple strategies. These investments cannot be redeemed. Instead, the investments are redeemed throughout the life of the investment. Distributions are received through the liquidation of the underlying assets of the fund. It is expected that each fund will remain invested for a period of 5 to 10 years. It is probable that all of the investments in this type will be sold at an amount different from the NAV per share of the Plan's ownership interest in partners' capital. Therefore, the fair values of the investment in this asset class have been determined using recent observable transaction information.

⁽⁵⁾ This type includes short-term commingled investment instruments issued by the US Government, Federal agencies, sponsored agencies or sponsored corporations.

The investments measured at net asset value (NAV) are presented in the chart below:

Money-Weighted Rates of Return

In accordance with GASB Statement No. 67, Financial Reporting for Pension Plans, and GASB Statement No. 74, Financial Reporting for Post-Employment Benefit Plans Other than Pension Plans, KPPA provides this additional disclosure regarding its money-weighted rate of return for the period of June 30, 2023. The money-weighted rate of return is a method of calculating period-by-period returns on the Pension and Insurance Funds' investments that adjusts for the changing amounts actually invested. For the purposes of this Statement, money-weighted rate of return is calculated as the internal rate of return on investments, net of investment expenses, then adjusted for the changing amounts actually invested.

| Money-Weighted Rates of Return As of June 30 - Pension | | | | | | | | | | |
|--|-------------------|----------------|-------------------|----------------|-------|--|--|--|--|--|
| | CERS Nonhazardous | CERS Hazardous | KERS Nonhazardous | KERS Hazardous | SPRS | | | | | |
| 2023 | 10.25% | 10.35% | 7.07% | 9.46% | 7.53% | | | | | |

| Money-Weighted Rates of Return As of June 30 - Insurance | | | | | | | | | | |
|--|-------------------|----------------|-------------------|----------------|-------|--|--|--|--|--|
| | CERS Nonhazardous | CERS Hazardous | KERS Nonhazardous | KERS Hazardous | SPRS | | | | | |
| 2023 | 10.32% | 10.06% | 9.89% | 9.26% | 9.44% | | | | | |

Note E. Securities Lending Transactions

Kentucky Revised Statutes 61.650 and 386.020(2) permit the Pension and Insurance Trust Funds to lend their securities to broker-dealers and other entities. KPPA utilizes a securities lending program to temporarily lend securities to qualified agents in exchange for either cash collateral or other securities with an initial fair value of 102% or 105% of the value of the borrowed securities. The borrowers of the securities simultaneously agree to return the borrowed securities in exchange for the collateral. The types of securities lent include U.S. Treasuries, U.S. Agencies, U.S. Corporate Bonds, U.S. Equities, Global Fixed Income Securities, and Global Equities Securities. Securities Lending transactions are accounted for in accordance with GASB 28. The net earnings for the Pension and Insurance Trust Funds was \$1.7 million and \$0.7 million, respectively.

The IPS does not address any restrictions on the amount of loans that can be made. As of June 30, 2023, KPPA had no credit risk exposure to borrowers because the collateral amounts received exceeded the amounts out on loan. The contracts with the custodial bank require them to indemnify KPPA if the borrowers fail to return the securities and one or both of the custodial banks have failed to live up to their contractual responsibilities relating to the lending of securities.

All securities loans can be terminated on demand by either party to the transaction. BNY Mellon invests cash collateral as permitted by state statute and Board policy. The agent, BNY Mellon, of the Funds cannot pledge or sell collateral securities received unless the borrower defaults. KPPA maintains a conservative approach to investing the cash collateral with BNY Mellon, emphasizing capital preservation, liquidity, and credit quality.

Cash collateral is invested in guaranteed, short-term obligations of the U.S. government, select government agencies and repurchase agreements with qualified agents. KPPA cannot pledge or sell collateral securities received unless the borrower defaults. BNY Mellon as the lending agent also indemnifies KPPA from any financial loss associated with a borrower's default and collateral inadequacy.

As of June 30, 2023, the average days to maturity for loans was one day, and the weighted average investment maturity of cash collateral investments was one day. The trusts had no credit risk exposure to borrowers because the amounts owed to borrowers exceeded the amounts the borrowers owed the trust, and no losses resulted during the period.

Security lending programs can entail interest rate risk and credit risk. KPPA minimizes interest rate risk by limiting the term of cash collateral investments to several days. The credit risk is controlled by investing cash collateral in securities with qualities similar to the credit worthiness of lent securities.

As of June 30, 2023, the cash collateral received for the securities on loan for the Pension and Insurance Trust Funds was \$339.0 million and \$131.0 million, respectively. The securities non-cash collateral received a total of \$142.8 million and \$64.6 million, respectively. The collateral volume of the total underlying securities was \$481.8 million for Pension and \$195.6 million for the Insurance Trust Funds, respectively.

| | Securities Lending Cash Collateral As of June 30, 2023 | | | | | | | | | | | |
|-----------|--|-----------|--------------|-----------|----------|---------------|--|--|--|--|--|--|
| | CERS | CERS | KERS | KERS | SPRS | Pension Total | | | | | | |

| | | | | | | | | | | | | |
| Insurance | \$59,513 | \$29,266 | \$26,420 | \$11,270 | \$4,491 | \$130,960 | | | | | | |

FIN 72

Note F. Risk of Loss

KPPA is exposed to various risks of loss related to torts; thefts of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Under the provisions of the Kentucky Revised Statutes the Office of Claims and Appeals is vested with full power and authority to investigate, hear proof, and compensate persons for damages sustained to either person or property as a result of negligence of the agency or any of its employees. Awards are limited to \$250,000 for a single claim and \$400,000 in aggregate per occurrence. Awards and a pro rata share of the operating cost of the Office of Claims and Appeals are paid from the fund of the agency having a claim or claims before the Office of Claims and Appeals.

Claims against the CERS Board, KRS Board and the KPPA Board, or any of its staff as a result of an actual or alleged breach of fiduciary duty, are self-insured effective May 26, 2019.

Claims for job-related illnesses or injuries to employees are insured by the state's self-insured workers' compensation program. Payments approved by the program are not subject to maximum limitations. All medical expenses related to a work injury or illness are paid based upon appropriate statutory and regulatory reductions, and up to 66.67% of wages for temporary disability. Each agency pays premiums based on fund reserves and payroll. Settlements did not exceed insurance coverage in any of the past three fiscal years. Thus, no secondary insurance had to be utilized. There were no claims which were appealed to the Kentucky Workers' Compensation Board.

Note G. Contingencies

In the normal course of business, KPPA is involved in litigation concerning the right of participants, or their beneficiaries, to receive benefits. KPPA does not anticipate any material losses for CERS, KERS, SPRS or the Insurance Fund as a result of the contingent liabilities. KPPA is involved in other litigation; therefore, please see Note O. Litigation, for further information.

Note H. Defined Benefit Pension Plan

KPPA is an agency within the Executive branch of the Commonwealth of Kentucky. All regular full-time employees in nonhazardous positions of any Kentucky State Department, Board, or Agency are directed by Executive Order (EO) to participate in KERS. These employees participate in KERS Nonhazardous, a cost-sharing, multiple-employer defined pension fund that provides retirement, disability, and death benefits to fund members. Fund benefits are extended to beneficiaries of fund members under certain circumstances. Tier 1 Fund members contributed 5% of creditable compensation for the fiscal year ended June 30, 2023. Tier 2 and Tier 3 Fund members contributed 6% of creditable compensation for the fiscal year ended June 30, 2023.

The chart below includes the covered payroll and contribution amounts for the employees of KPPA:

| Payroll and Contributions as of June 30, 2023 (\$ in Thousands) | 1 |
|--|--|
| Covered Payroll | \$15,947 |
| Required Employer Contributions | \$1,590 |
| Employer Percentage Contributed | 100.00% |
| Note: KRS 61.565, as amended by the 2021 Regular Legislative Session 8, requires the employers to contribute a normal cost for retirement plus ar determined unfunded liability contribution. The Office of the State Budget determined the percentage of the contribution for FY 2023 for the Excutive 68.03% for the actuarially determined unfunded liability and 9.97% for the | nd actuarially Director Branch to be |

Note I. Income Tax Status

The Internal Revenue Service (IRS) has ruled that plans administered by KPPA qualify under Section 401(a) of the Internal Revenue Code are, generally, not subject to tax. The plans are subject to income tax on any unrelated business income (UBI).

Note J. Equipment

| Equipment as of June 30, 2023 (\$ in Thousands) | | | | | | | |
|---|---------|--|--|--|--|--|--|
| Equipment, cost | \$2,885 | | | | | | |
| Less Accumulated Depreciation | (2,885) | | | | | | |
| Equipment, net | \$0 | | | | | | |

Note K. Intangible Assets

The provisions of GASB *Statement No. 51, Accounting and Financial Reporting for Intangible Assets*, requires that intangible assets be recognized in the Combining Statement of Fiduciary Net Position only if they are considered identifiable. In accordance with the Statement, KPPA has capitalized software costs as indicated below for the Strategic Technology Advancements for the Retirement of Tomorrow (START) project.

| Software Expenses as of June 30 2023 (\$ in Thousands) | |
|---|----------|
| Software, cost | \$17,302 |
| Less Accumulated Amortization | (17,302) |
| Intangible Assets, net | \$0 |

FIN 74

Note L. Actuarial Valuation

KPPA's actuary, Gabriel, Roeder, Smith & Co. (GRS), completed the actuarial valuation for the calculation of the employer contribution rates for the CERS, KERS, SPRS and Insurance Fund for the period ended June 30, 2023. The last experience study was conducted with experience through June 30, 2022, adopted by the Board of Trustees on June 5, 2023 for first use in this actuarial valuation.

Note M. Financial Report for (GASB 67) Pension

Plans and (GASB 74) Postemployment Benefit Plans

The following details actuarial information and assumptions utilized in determining the unfunded (overfunded) actuarial accrued liabilities for CERS, KERS, SPRS and Insurance Fund. Please note that calculations for TPL, net fiduciary position, NPL, total OPEB liability, net OPEB fiduciary position, and net OPEB liability are reported in the Plans' Required Supplementary Information (RSI) on pages <u>93-110</u> are based on June 30, 2022, actuarial valuations, rolled forward to June 30, 2023. The prior year valuations are used as the basis for the roll forward method and are applied to complete the current year pension and OPEB valuations as of the measurement date, June 30, 2023, in accordance with GASB *Statement No.67*, paragraph 37, and GASB *Statement No. 74*, paragraph 41.

Financial Report for Pension Plan (GASB 67)

Basis of Calculations

GRS completed reports by plan in compliance with GASB Statement No. 67 Financial Reporting for Pension Plans. The TPL, NPL, and sensitivity information are based on an actuarial valuation date of June 30, 2022. The TPL was rolled forward from the valuation date to the Plans' fiscal year ended June 30, 2023, using generally accepted actuarial principles. Information disclosed for years prior to June 30, 2017, were prepared by KPPA's prior actuary. GRS will provide separate reports at a later date with additional accounting information determined in accordance with GASB Statement No. 68, Accounting and Financial Reporting for Pensions.

Assumptions

The CERS and KRS Board of Trustees adopted new actuarial assumptions on May 9, 2023 and June 5, 2023, respectively. Based on the June 30, 2021, actuarial valuation report, the actuarial methods and assumptions used to calculate these contributions rates are:

- Investment Return 6.25% for CERS Nonhazardous, and CERS Hazardous, KERS Hazardous, 5.25% for KERS Nonhazardous and SPRS.
- Inflation 2.30% for all plans.
- Salary Increases 3.30% to 10.30% for CERS Nonhazardous, 3.55% to 19.05% for CERS Hazardous, 3.30% to 15.30% for KERS Nonhazardous, 3.55% to 20.05% for KERS Hazardous, and 3.55% to 16.05% for SPRS, varies by service.
- Payroll Growth 2% for CERS Nonhazardous and Hazardous, 0% for KERS Nonhazardous and Hazardous, and SPRS.
- Mortality System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019.

Plan Provisions

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump-Sum Optional Form of payment for members who retire on and after January 1, 2024, with the lump-sum payment options expanded to include 48 or 60 times the member's monthly retirement allowance.

Since this optional form of payment results in a reduced, actuarial equivalent, monthly retirement allowance for members who elect a partial lump-sum option, this provision does not have a fiscal impact to the total pension liability of any of the plans.

House Bill 506 also adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances for each plan. This is a minimal change for members in the KERS hazardous, CERS hazardous, and SPRS plans, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total pension liability of the KERS hazardous, CERS plans.

Similarly, this is a relatively small change for future retirees in the KERS and CERS non-hazardous plans. But as the minimum separation period was previously three months in almost every circumstance, we have assumed that

there would be a 1.0% increase in the rate of retirement for each of the first two years a non-hazardous member becomes retirement eligible under the age of 65, in order to reflect a shift in the retirement pattern. The total pension liability as of June 30, 2023 for the KERS non-hazardous and CERS non-hazardous plans is determined using these updated benefit provisions.

There have been no other plan provision changes that would materially impact the total pension liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable, appropriate, and comply with applicable requirements under GASB No. 67.

Discount Rate

A single discount rate of 5.25% was used for the KERS Nonhazardous pension plan and SPRS pension plan, a single discount rate of 6.25% was used for the KERS Hazardous pension plan, and a single discount rate of 6.50% was used for the CERS Nonhazardous pension plan and CERS Hazardous pension plan to measure the total pension liability for the fiscal year ending June 30, 2023. The single discount rate for CERS Nonhazardous and CERS Hazardous increased by 0.25% from 6.25% in fiscal year 2022 to 6.50% in fiscal year 2023. These single discount rates were based on the expected rate of return on pension plan investments. Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the pension plan's fiduciary net position and future contributions were projected to be sufficient to finance all the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of the projected benefit payments to determine the total pension liability.

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Except where noted below, future contributions are projected assuming that the entire actuarially determined employer contribution is received by each plan each future year, calculated in accordance with the current funding policy. The assumed future employer contributions for the CERS plans reflect the provisions of House Bill 362 (passed during the 2018 legislative session) which limit the increases to the employer contribution rates to 12% over the prior fiscal year through June 30, 2028.

Additional health care contributions (IRC 401(h) Subaccount)

Based on guidance issued by GASB in connection with GASB *Statement No. 74*, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered as an Other Post Employment Benefit (OPEB) asset. As a result, the reported pension fiduciary net positions as of June 30, 2017, and later are net of the 401(h) asset balance.

Additional Disclosures

These reports are based upon information furnished to us by the Kentucky Public Pensions Authority (KPPA), which includes benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" for each system and the reports titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for the fiscal year ending June 30, 2023.

Financial Reporting for Postemployment Benefit Plans (GASB 74)

GRS completed reports by plan in compliance with GASB Statement No. 74, Financial Reporting for Postemployment Benefit Plans Other than Pension Plans for the fiscal year ended June 30, 2023. GRS will provide separate reports at a later date with additional accounting information determined in accordance with GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions.

Basis of Calculations

The total OPEB liability, net OPEB liability (NOL), and sensitivity information are based on an actuarial valuation date of June 30, 2022. The total OPEB liability was rolled forward from the valuation date to the plan's fiscal year ended June 30, 2023, using generally accepted actuarial principles.

Assumptions

The discount rates used to calculate the total OPEB liability increased for each fund since the prior year (see further discussion on the calculation of the single discount rates later in this section). There were no other material assumption changes and it is GRS' opinion that these procedures are reasonable and appropriate, and comply with applicable requirements under GASB No. 74.

The actuarially determined contribution rates effective for fiscal year ended 2023 that are documented in the schedules were calculated as of June 30, 2021. Based on the June 30, 2021, actuarial valuation reports the actuarial methods and assumptions used to calculate the required contributions are:

- Investment Return 6.25%.
- Inflation 2.30%.
- Salary Increases 3.30% to 10.30% for CERS Nonhazardous, 3.55% to 19.05% for CERS Hazardous, 3.30% to 15.30% for KERS Nonhazardous, 3.55% to 20.05% for KERS Hazardous, 3.55% to 16.05% for SPRS, varies by service.
- Payroll Growth 2.00% for CERS Nonhazardous and CERS Hazardous, 0.00% for KERS Nonhazardous, KERS Hazardous, and SPRS.
- Mortality System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019.
- Health Care Trend Rates:
 - Pre-65 Initial trend starting at 6.30% on January 1, 2023, and gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement.
 - Post-65 Initial trend starting at 6.30% on January 1, 2023, and gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement.

Plan Provisions

House Bill 506 passed during the 2023 legislative session and adjusted the minimum required separation period before a retiree may become reemployed to be one month for all circumstances for each plan. This is a minimal change for members in the KERS hazardous, CERS hazardous, and SPRS plans, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total OPEB liability of the KERS hazardous, CERS hazardous, or SPRS plans. Similarly, this is a relatively small change for future retirees in the KERS and CERS non-hazardous plans. But as the minimum separation period was previously three months in almost every circumstance, we have assumed that there would be a 1.0% increase in the rate of retirement for each of the first two years a nonhazardous member becomes retirement eligible under the age of 65, in order to reflect a shift in the retirement pattern. The total OPEB liability as of June 30, 2023 for the KERS non-hazardous and CERS nonhazardous plans is determined using these updated benefit provisions. There were no other plan provision changes that would materially impact the total OPEB liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable and appropriate, and comply with applicable requirements under GASB No. 74.

Implicit Employer Subsidy for non-Medicare retirees

The fully-insured premiums paid for the Kentucky Employees' Health Plan are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit employer subsidy for the non-Medicare eligible retirees. GASB No. 74 requires that the liability associated with this implicit subsidy be included in the calculation of the Total OPEB Liability.

Discount Rates

The following single discount rates were used to measure the total OPEB liability for the fiscal year ending June 30, 2023.

| PLAN | FISCAL YEAR 2023 | FISCAL YEAR 2022 | CHANGE IN RATE |
|-------------------|------------------|------------------|----------------|
| CERS Nonhazardous | 5.93% | 5.70% | 0.23% |
| CERS Hazardous | 5.97% | 5.61% | 0.36% |
| KERS Nonhazardous | 5.94% | 5.72% | 0.22% |
| KERS Hazardous | 5.94% | 5.59% | 0.35% |
| SPRS | 6.02% | 5.69% | 0.33% |

The single discount rates are based on the expected rate of return on OPEB plan investments of 6.50% and a municipal bond rate of 3.86%, as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of June 30, 2023. Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the plan's fiduciary net position and future contributions were projected to be sufficient to finance the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on insurance plan investments was applied to all periods of the projected benefit payments paid from the retirement system. However, the cost associated with the implicit employer subsidy is not currently being included in the calculation of the plan's actuarial determined contributions, and it is our understanding that any cost associated with the implicit subsidy will not be paid out of the plan's trust. Therefore, the municipal bond rate was applied to future expected benefit payments associated with the implicit subsidy.

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Future contributions are projected assuming that the entire actuarially determined employer contribution is received by each plan each future year, calculated in accordance with the current funding policy.

Additional health care contributions (IRC 401(h) Subaccount)

Based on guidance issued by GASB in connection with GASB Statement No. 74, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered an OPEB asset. As a result, the reported fiduciary net position includes these 401(h) assets. Additionally, these member contributions and associated investment income and administrative expenses are included in the reconciliation of the fiduciary net position.

Additional Disclosures¹

The reports are based upon information furnished to GRS by the KPPA, which includes benefit provisions, membership information, and financial data. GRS did not audit this data and information, but GRS applied a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" for each system and the report titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for fiscal year ending June 30, 2023.

Target Asset Allocation

The long-term (10-year) expected rates of return were determined by using a building block method in which best estimated ranges of expected future real rates of return were developed for each asset class. The ranges were combined by weighting the expected future real rate of return by the target asset allocation percentage. The target allocation and best estimates of arithmetic real rate of return for each major asset class are summarized in the tables on the following page.

¹ Note: Data and information regarding GASB 67 and GASB 74 reporting was provided by GRS Retirement Consulting.

| Allocations apply to CERS Pension and Insurance Funds | | |
|---|----------------------|--|
| Asset Class | Target Allocation | Long-Term Expected Real Rate of Return |
| Equity | | |
| Public Equity | 50.00% | 5.90% |
| Private Equity | 10.00% | 11.73% |
| Fixed Income | | |
| Core Fixed Income | 10.00% | 2.45% |
| Specialty Credit | 10.00% | 3.65% |
| Cash | 0.00% | 1.39% |
| Inflation Protected | | |
| Real Estate | 7.00% | 4.99% |
| Real Return | 13.00% | 5.15% |

| As of June 30, 2023 Allocations apply to KERS Nonhazardous and SPRS Pension Funds | | | | | |
|---|----------------------|--|--|--|--|
| Asset Class | Target Allocation | Long-Term Expected Real Rate of Return | | | |
| Equity | | | | | |
| Public Equity | 32.50% | 5.90% | | | |
| Private Equity | 7.00% | 11.73% | | | |

| Real Return | 10.00% | 5.15% | | | |

| Allocations apply to KERS Hazardous Pension and all KR | S Insurance Funds | |
|--|----------------------|--|
| Asset Class | Target Allocation | Long-Term Expected Real Rate of Return |
| Equity | | |
| Public Equity | 43.50% | 5.90 |
| Private Equity | 10.00% | 11.73 |
| Fixed Income | | |
| Core Fixed Income | 10.00% | 2.45 |
| Specialty Credit | 15.00% | 3.65 |
| Cash | 1.50% | 1.399 |
| Inflation Protected | | |
| Real Estate | 10.00% | 4.999 |
| Real Return | 10.00% | 5.15% |

NOTE: Minor deviations are expected between the actuarial assumed rate of return and the expected rate of return reported in the above charts. The actuarial assumed rates of return are based on a review of economic assumptions completed periodically as warranted but not longer than every 2 years; whereas, the expected rate of return is calculated annually for GASB purposes by taking the current asset allocation and applying the most relevant long term market expectations (March 2023) for each asset class.

Note N. Pension Legislation

2023 Regular Session

The 2023 Regular Session of the Kentucky General Assembly adjourned on Thursday, March 30, 2023. Highlights of the 2023 Session include:

BILLS OF DIRECT INTEREST TO OUR MEMBERS AND RETIREES

House Bill 444: Pay Raise for Government Workers; Allocation to Conduct a Full Salary Classification Study for State Government

House Bill 444 provides a 6% raise for workers in all three branches of government, effective July 1, 2023. The bill also authorizes an additional \$2,000 pay raise for all employees and elected officials in the Judicial Branch and allocates \$500,000 to provide additional contractual resources for the Personnel Cabinet to complete a full salary classification study by November 1, 2023.

The General Assembly originally requested a full salary classification study from the executive branch in July 2021. However, the resulting study presented to the Interim Joint Committee on Appropriations and Revenue in July 2022 did not contain the level of detail that legislators said they needed to make informed decisions. Therefore, the General Assembly allocated money to hire an outside vendor with the industry experience and appropriate resources needed to perform such a complex study.

House Bill 506: Establish a Partial Lump Sum Option (PLSO) for retirees and reduce required break for employment after retirement

House Bill 506 establishes a Partial Lump Sum Option (PLSO), with and without survivor rights, as a payment option for retiring members of the County Employees Retirement System (CERS), Kentucky Employees Retirement System (KERS), or State Police Retirement System (SPRS).

State law previously offered a PLSO to members who retired on or before January 1, 2009. For retirement dates effective January 1, 2024 and after, members will again be allowed to choose a retirement payment option that offers a lump-sum payment equal to 12, 24, 36, 48 or 60 months of payments of the Basic/Annuity or Survivorship 100% payment options and a lifetime monthly benefit that is actuarially reduced to reflect the lump-sum payment.

The bill also changes the required break in service before a retiree may return to work with a participating employer and continue to receive their retirement allowance. Currently, in almost all reemployment situations, a three (3) calendar month break in service from the retired member's retirement date is required before returning to employment with a participating employer or their retirement benefit will be voided.

Under House Bill 506, the break in service is reduced to only one (1) month for retirees in most all reemployment situations. Prearranged agreements to return to employment with a participating employer made prior to a member's retirement date continue to be prohibited by law for all members. Additionally, all required forms must be completed if a retired member reemploys with a participating employer within twelve (12) months of their effective retirement date.

These changes take effect for retirement dates January 1, 2024 and after.

ADMINISTRATIVE BILLS FOR KPPA

House Bill 551: Legalize Sports Wagering in Kentucky and Create Wagering Administration Fund: Portion of Remaining Funds to go to KY Permanent Pension Fund

House Bill 551 legalizes sports wagering in Kentucky and creates the Wagering Administration Fund to pay for the administrative expenses involved with overseeing sports wagering activities. After administrative costs have been paid, a portion of any remaining funds in the Wagering Administration Fund will be deposited in the Kentucky Permanent Pension Fund established in Kentucky Revised Statutes 42.205. This fund was created in 2016 to address the Commonwealth's unfunded pension liabilities. Each system operated by KPPA is potentially eligible to receive funding from this account, if authorized by the General Assembly in an enacted biennial budget bill.

House Bill 587: Internal audit functions at KPPA

House Bill 587 requires the Kentucky Public Pensions Authority (KPPA) to appoint or contract for the services of an Internal Auditor who will report directly to the KPPA board. The Internal Auditor will be exempt from the hiring and employment provisions of Kentucky Revised Statutes Chapter 18A, Chapter 45A, and 64.640, and is authorized by the Authority to appoint employees under his or her direct supervision. The Internal Auditor will also have an annual performance review conducted by the Authority.

The Legislative Research Commission (LRC) did not request an Actuarial Analysis from KPPA for this bill; however, the Internal Auditor position has been in place at KPPA (the agency was then known as "Kentucky Retirement Systems") since 2003 so there are no significant administrative cost increases expected.

House Bill 236: Fiduciary duties owed to the state-administered retirement systems

House Bill 236 amends Kentucky Revised Statutes 61.650 and 78.790 to stipulate that fiduciaries shall consider the sole interest of the systems' members and beneficiaries using only factors with "... a direct and material connection to the financial risk or financial return of an investment." In particular, the bill prohibits the consideration of environmental, social, and governance (ESG) interests in making investment decisions.

The bill also requires the CERS and KRS Boards to adopt proxy guidelines and ensure that all proxy votes are executed by either the Board or the Board's designee in accordance with the Board's proxy voting policy; or a proxy voting service that has acknowledged a fiduciary duty in writing and who commits to following the Board's policy. Finally, House Bill 236 requires a report of proxy votes to be provided to the Boards at least once a quarter.

Because our systems are, and have always been, fiduciaries who are required to invest solely in the interest of our members and retirees, KPPA and the other state-administered retirement systems submitted Actuarial Analysis letters to the General Assembly that said there is no expected actuarial impact from this bill. However, the letters from each of the systems covered by this bill say there is an expected increase in administrative costs for each plan to cover the cost of compiling and reporting proxy votes on a quarterly basis.

State Senate Confirms Gubernatorial Appointments to KRS Board

State law requires that gubernatorial appointments to the KRS Board of Trustees receive Senate approval. On March 30, three (3) Senate Resolutions confirming Governor Andy Beshear's recent appointments to the KRS board were unanimously adopted by a vote of 37-0:

1. **Senate Resolution 152**, sponsored by Senator Julie Raque Adams, confirmed the reappointment of E. Lynn Hampton to the Kentucky Retirement Systems Board of Trustees for a term expiring June 17, 2026;

2. **Senate Resolution 226**, sponsored by Senator Jimmy Higdon, confirmed the appointment of Ramsey Bova to the Kentucky Retirement Systems Board of Trustees for a term expiring June 17, 2026; and

3. **Senate Resolution 251**, sponsored by Senator Julie Raque Adams, confirmed the reappointment of William E. Summers V to the Kentucky Retirement Systems Board of Trustees for a term expiring June 17, 2026.

The Resolutions only required Senate confirmation and did not need to be adopted in the House.

Note O. Litigation

Seven Counties

Seven Counties Services, Inc. (Seven Counties) filed for Chapter 11 bankruptcy in the United States Bankruptcy Court for the Western District of Kentucky (the Bankruptcy Court) in April 2013. Seven Counties provides mental health services for the Cabinet for Health and Family Services for the greater Louisville, Kentucky area and surrounding counties. Seven Counties participated in KERS for approximately twenty-five years. Seven Counties identified KERS as a creditor with a primary objective of discharging its continuing obligation to remit retirement contributions for approximately 1,300 employees and to terminate its participation in KERS. If Seven Counties is successful in discharging its obligations to KERS, the estimated member pension and insurance actuarial accrued liability is in the range of \$145 to \$150 million.

KERS opposed Seven Counties' attempt to discharge its obligations and terminate its participation. KERS asserted that Seven Counties is a Governmental Unit properly participating in KERS by Executive Order issued in 1978 and thus ineligible for Chapter 11 relief. Consequently, Seven Counties would remain statutorily obligated to continue participation and remit contributions. On May 30, 2014, the Bankruptcy Court held that Seven Counties was not a Governmental Unit and could move forward with its Chapter 11 bankruptcy case. The Bankruptcy Court further held that Seven Counties' statutory obligation to participate in and remit contributions to KERS was a "contract" eligible for rejection. KRS appealed this decision.

On August 24, 2018, the U.S. Court of Appeals for the Sixth Circuit (the Sixth Circuit) issued a two to one Opinion affirming the decision that Seven Counties is eligible to file for bankruptcy under Chapter 11. However, the Sixth Circuit went on to state, "lacking state court precedent characterizing the nature of the relationship between Seven Counties and KERS, we certify that question to the Kentucky Supreme Court." KERS filed a petition to have the Opinion Reheard En Banc by the entire Sixth Circuit. On October 5, 2018, the Sixth Circuit issued an order holding the petition in abeyance pending a response from the Kentucky Supreme Court on the certified question of law. On November 1, 2018, the Supreme Court of Kentucky issued an Order granting certification of the question. The certified question of law was briefed by the parties and oral arguments were held before the Supreme Court of Kentucky on March 6, 2019. On August 29, 2019, the Supreme Court of Kentucky ruled that Seven Counties' participation in and its contributions to KERS are based on a statutory obligation. The Supreme Court of Kentucky's ruling was forwarded to the Sixth Circuit for further consideration.

On July 20, 2020, the Sixth Circuit Court of Appeals issued an Opinion stating that they affirmed their previous determination that Seven Counties was eligible to file a Chapter 11 bankruptcy case. The Sixth Circuit also reversed the conclusion that Seven Counties can reject its obligation to participate as an executory contract and that Seven Counties need not maintain its statutory contribution obligation during the pendency of the bankruptcy. The Sixth Circuit dismissed Seven Counties' cross appeal and remanded the case for further proceedings consistent with the opinion. KERS again filed a petition to have the Opinion regarding Seven Counties' ability to file a Chapter 11 bankruptcy Reheard En Banc by the entire Sixth Circuit. This petition was denied in an Order dated September 11, 2020. The case was remanded back to the Bankruptcy Court.

The parties were able to stipulate to the principal amount of Seven Counties unpaid employer contributions for the post-petition time-frame of April 6, 2014 through February 5, 2015. A limited hearing occurred in February 2022 regarding whether interest is applicable to the stipulated amount. The Bankruptcy Court entered an order that set the amount of the contributions, but did not order Seven Counties to pay that amount. The order was silent regarding the application of interest. Both Seven Counties and KERS appealed the Bankruptcy Court's order to the United States District Court where it will be joined with the pending appeal of the confirmation of Seven Counties' reorganization plan.

The United States District Court refused to hear the appeals stating that the Bankruptcy Court's order was not final and appealable. That left KERS in a position where no relief was possible; the Bankruptcy Court would not enter an order requiring payment, and the District Court would not hear an appeal. This forced KERS to once again appeal the United States Court of Appeals for the Sixth Circuit. The matter is now fully briefed before that court and parties are awaiting oral arguments.

Mayberry

In December 2017, certain members and beneficiaries of the Kentucky Retirement Systems filed litigation (Mayberry et al v. KKR et al) against certain Hedge Fund Sellers, Investment, Actuarial and Fiduciary Advisors, Annual Report Certifiers, and certain (past and present) Kentucky Retirement Systems' Trustees and Officers in Franklin Circuit Court. The litigation alleges (in summary) that actuarial assumptions, fees, statements and disclosures harmed the financial status of the Retirement Systems. While Kentucky Retirement Systems is designated a "Defendant," that designation is a technical formality in so much as Kentucky Retirement Systems is a "nominal defendant." On

April 20, 2018, the Kentucky Retirement Systems and the plaintiffs filed a joint notice with the Court advising that Kentucky Retirement Systems does not intend to challenge its status as a "nominal defendant." Since then, the Franklin Circuit Court ruled on various Defendants' Motions to Dismiss, denying nearly all of them. On January 10, 2019, KKR, Henry Kravis and George Roberts (collectively, "KKR Parties") amended their Answer to assert cross claims against Kentucky Retirement Systems. Certain Officer and Trustee Defendants appealed the denial of their Motion to Dismiss on immunity grounds to the Court of Appeals, and that appeal was transferred to the Kentucky Supreme Court. The hedge fund defendants filed a Petition for Writ of Prohibition in the Court of Appeals, arguing the Plaintiffs lacked standing to bring the action. That Petition was granted on April 23, 2019. Plaintiffs promptly appealed the Court of Appeals' decision to the Supreme Court of Kentucky. On July 9, 2020, the Supreme Court of Kentucky issued an Opinion stating that the plaintiffs, as beneficiaries of a defined-benefit plan who have received all of their vested benefits so far and are legally entitled to receive their benefits for the rest of their lives, do not have a concrete stake in this case and therefore lack standing to bring this claim. The case was remanded to the circuit court with directions to dismiss the complaint. Thereafter, plaintiffs filed a motion seeking to amend their complaint to add parties (Tier 3 members of the Retirement Systems) and claims that would purportedly correct the standing defect identified by the Supreme Court of Kentucky. Furthermore, the Attorney General of the Commonwealth of Kentucky sought leave to intervene in this action through a motion filed July 20, 2020, and an Intervening Complaint on July 22, 2020. The Defendants filed motions seeking to have the case dismissed. On December 28, 2020, Franklin Circuit Court issued an Order dismissing the Complaint filed by the Plaintiffs, denied Plaintiffs' Motion to file a Second Amended Complaint, and granted the Office of the Attorney General's Motion to Intervene. A variety of additional motions and pleadings were filed, including an original action by the Tier 3 Group. This original action is still in the initial stages and is pending with Franklin Circuit Court. (Tia Taylor, et al. v KKR & Co. L.P., et al.) On January 12, 2021, Franklin Circuit Court issued a scheduling Order granting the Attorney General until February 1, 2021 to file an Amended Intervening Complaint, granting the Tier 3 Group until February 11, 2021 to file a Motion to Intervene in this action. Additional extension orders were granted for the Attorney General intervention. The Attorney General filed an Amended Complaint on May 24, 2021. On June 14, 2021, the Tier 3 Group's Motion to Intervene in the Attorney General action was denied. In the spring of 2022, Franklin Circuit Judge Phillip Shepherd recused and this matter was assigned to Judge Thomas Wingate.

Following the Attorney General's intervention, the Defendant's challenged the intervention as beyond the scope of the remand from the Supreme Court in July of 2020. Franklin Circuit Court denied that motion and the matter was on appeal when this case was assigned to Judge Thomas Wingate. Judge Wingate placed the matter in abeyance pending a decision on whether the Attorney General's intervention was proper. The Court of Appeals held that the Attorney General should not have been allowed to intervene and the Attorney General is currently seeking Discretionary Review by the Supreme Court.

Simultaneously with his intervention, the Attorney General filed a separate, stand-alone case with an identical complaint to protect against the possibility that his intervention would be deemed improper. That matter is now proceeding.

A number of related cases have also developed based on issues raised in the above referenced Mayberry action. There has been an action filed by a number of the Trustees and Officers named in Mayberry seeking reimbursement by Kentucky Retirement Systems of legal fees. Kentucky Retirement Systems has also filed an action against Hallmark Specialty Insurance seeking a declaratory judgement that Hallmark has a duty to defend and indemnify Kentucky Retirement Systems in the Mayberry action. Two of the hedge fund Defendants in the Mayberry action have also filed an action in the United States District Court for the Eastern District of Kentucky naming individual members of the former KRS Board of Trustees as Defendants. This action is seeking a judgment declaring that the Trustees violated Plaintiffs' right to due process as well as an award of costs and attorneys' fees. Three actions have also been filed in Delaware regarding the Mayberry action. One filed by Prisma Capital Partners and one filed by Blackstone Alternative Asset Management allege breaches of warranties, representations and more relating to the Subscription Agreements signed by the Kentucky Retirement Systems. The third was filed by Prisma Capital Partners against the Daniel Boone Fund, LLC. Additionally, an action has been filed by PAAMCO against Kentucky Retirement Systems in California also alleging breaches of warranties, representations and more relating to the Subscription Agreements signed by the Kentucky Retirement Systems. Finally, on August 2, 2021, Blackstone Alternative Asset Management, L.P. (BAAM) filed an action against the Kentucky Public Pensions Authority, the Board of Trustees of the Kentucky Retirement Systems, the Board of Trustees of the County Employees Retirement System, the Kentucky Retirement Systems Insurance Fund, and the Kentucky Retirement Systems Pension Fund (collectively "Defendants") for breach of contract. The Defendants filed a Motion to Dismiss on September 8, 2021. The last of these additional actions, the suit filed by BAAM, was dismissed by Franklin Circuit Court. The Court of Appeals upheld the dismissal, and BAAM is seeking Discretionary Review by the Supreme Court. The rest of these cases remain active in various stages of litigation.

Bayhills

In 2018, Kentucky Retirement Systems sued Bayhills for breach of contract seeking to terminate Bayhills as investment managers. Kentucky Retirement Systems filed the suit in Franklin Circuit Court, but Bayhills removed it to federal district court. Kentucky Retirement Systems successfully had the case remanded back to state court. The case is now pending before Franklin Circuit Court. The Court entered an injunction preventing Bayhills from paying themselves management and other fees during the litigation. Bayhills has appealed this ruling to the Court of Appeals. The Court of Appeals and the Kentucky Supreme Court denied Bayhills their requested relief on appeal. Litigation is still ongoing.

Kentucky State Lodge & Linda Cook

In January and February 2022, two complaints were filed on behalf of specific named plaintiffs and others similarly situated based on the same facts that gave rise to the former River City Fraternal Order of Police (FOP) complaint. KPPA was aware that the River City FOP case impacted more individuals than the named plaintiffs and had been working on legislative and regulatory solutions. Legislation passed by the 2022 General Assembly allows individuals negatively impacted by the Medicare Secondary Payer Act (MSPA) to receive their health insurance through the Kentucky Employees Health Plan, and KPPA has promulgated a regulation to reimburse those individuals who had to pay for health insurance consistent with the Sixth Circuit Opinion. The two lawsuits from January and February are currently in the discovery phase concerning class certification. In addition to the MSPA issue, the two new suits allege that requiring Medicare eligible members to pay for Medicare Part B violates their right to "free" health insurance under their inviolable contract.

Mountain Comprehensive Care Center & Adanta

In 2022, Mountain Comprehensive Care Center and Adanta filed separate suits challenging the actuarially accrued liability assigned these two entities via the process outlined in KRS 61.565, known as House Bill 8 from the 2021 Regular Session of the Kentucky General Assembly. The suits challenge not only the liability assigned to them, but they challenge the constitutionality of the statutory scheme. These suits are currently in the early stages of litigation.

Note P. Reciprocity Agreement

In accordance with Kentucky Revised Statutes 78.5536 and 61.702, CERS and KRS have reciprocity agreements with Teachers' Retirement System of Kentucky (TRS), and Judicial Form Retirement System (JFRS) for the payment of insurance benefits for those members who have creditable service in CERS, KERS, and/or SPRS, and TRS and/ or JFRS systems.

Note Q. Reimbursement of Retired Re-Employed Health Insurance, Active Member Health Insurance Contributions, and Retired Re-Employed Employer Contributions

Reimbursement of Retired Re-Employed Health Insurance

If a retiree is re-employed in a regular full-time position and has chosen health insurance coverage through KPPA, the employer is required to reimburse KPPA for the health insurance premium paid on the retiree's behalf, not to exceed the cost of the single premium rate. Exceptions for retired members who re-employ as a police officer, sheriff or school resource officer exist which may exempt employers from paying employer contributions and health insurance reimbursements if certain requirements are met. For the fiscal year ended June 30, 2023, the reimbursement totaled \$13.9 million.

Active Member Health Insurance Contributions

For new plan participants after August 31, 2008, an active member contribution of 1% in addition to the member pension contribution is required. This 1% is applicable to all Nonhazardous and Hazardous funds, and reported in the Insurance Fund. For the fiscal year ended June 30, 2023, members paid into the Insurance Fund \$32.4 million.

Retired Re-Employed Employer Contributions

Employers are required to report employer contributions on retired members who are employed in a regular full-time position. These members are referred to as retired re-employed members. These are reported within the employer contributions on the financial statements. Please see the chart below for the breakdown.

| Retired Reemployed Healthcare Contributions As of June 30. | CERS | CERS | KERS | KERS | SPRS | KPPA Total |
|---|---------------|-----------|---------------|-----------|------|------------|
| 2023 (\$ in Thousands) | Non-Hazardous | Hazardous | Non-Hazardous | Hazardous | | |
| Amount | \$4,922 | \$1,611 | \$5,885 | \$1,452 | \$- | \$13,870 |

| Retired Reemployed Employer Contributions As of June 30, 2023 | CERS | CERS | KERS | KERS | SPRS | KPPA Total |
|--|---------------|-----------|---------------|-----------|------|------------|
| (\$ in Thousands) | Non-Hazardous | Hazardous | Non-Hazardous | Hazardous | | |
| Amount | \$20,057 | \$8,001 | \$5,797 | \$2,940 | \$- | \$36,795 |

Note R. General Fund Appropriations

During the 2022 Regular Session of the Kentucky General Assembly, HB1 allocated an additional \$485 million in general fund dollars to the KERS plans and the SPRS plan. This amount includes \$215 million in FY 2021-2022 for the SPRS pension fund to be applied to the unfunded liability, which immediately lowered the SPRS contribution rate from 146.06% to 99.43% for the 2022-2023 fiscal year. The rest of the \$485 million will consist of \$135 million in each fiscal year of the biennium (2022-23 and 2023-24) for the KERS Nonhazardous pension fund to be applied to the unfunded liability. Also, House Bill 604 allocated \$105 million in fiscal year 2023 and fiscal year 2024 to be applied to the unfunded liability of the KERS Nonhazardous pension plan.

| General Fund Appropriations (\$ in Thousands) | | | | | | | | |
|---|--------------|-----------|------------|--|--|--|--|--|
| | KERS | SPRS | KPPA Total | | | | | |
| Fiscal Year | Nonhazardous | | | | | | | |
| 2021-2022 | \$- | \$215,000 | \$215,000 | | | | | |
| 2022-2023 | \$240,000 | \$- | \$240,000 | | | | | |
| 2023-2024 | \$240,000 | \$- | \$240,000 | | | | | |
| Total | \$480,000 | \$215,000 | \$695,000 | | | | | |

Note S. Prisma Daniel Boone Fund

The funds invested with Prisma Daniel Boone Fund continue to be held in a contingency reserve to cover potential obligations arising from the Mayberry Action (see Note O for details of Mayberry Case). The total reported in reserve as of June 30, 2023, is \$97.7 million for the Pension Plans and \$40.6 million for the Insurance Plan. This is based on the May 31, 2023, report because Absolute Return managers are reported on a one month lag.

Note T. Subsequent Events

Management has evaluated the period June 30, 2023 to December 6, 2023 (the date the combining financial statements were available to be issued) for items requiring recognition or disclosure in the combining financial statements.

Note U. Employer Cessation

Kentucky Revised Statutes 61.522, 61.523 and 78.535 allow for an employer of KERS or CERS to make an election to cease participating in the systems operated by KPPA. The statutes require that the employer ceasing from the plan must pay the employer's portion of the unfunded liability as calculated by the actuary. HB 1 of the 2019 Regular Session established a one-time, voluntary cessation window for KERS Quasi-Governmental Employers, including universities and community colleges, to cease participation for its nonhazardous employees by June 30, 2020. SB 249 of the 2020 Regular session extended the cessation date to June 30, 2021. HB 1 also added additional parameters apart from the normal cessation process including a soft freeze option (Tier 1 and Tier 2 employees continue to earn service credit after the cessation date), created an installment payment option and established different discount rates for use in calculating the cost. Northern Kentucky University (NKU) and Kentucky Housing Corporation (KHC) elected to cease participation effective June 30, 2021, under HB 1. HB 8 of the 2021 Regular Session further adjusted the discount rate to be used to calculate the cessation cost for universities and community colleges. NKU elected a soft-freeze, lump sum payment option, and its actuarially determined estimated portion of the cessation cost was \$204.0 million. NKU paid \$175.6 million for the pension portion and \$28.4 million for the insurance portion of the cessation cost in the 2021 fiscal year. The final cost was calculated in early 2022, and NKU received refunds of \$(13.4) million for the pension portion, and \$(8.5) million for the insurance portion of the cessation cost. KHC did not make a payment in fiscal year 2021. KHC elected a hard freeze, lump sum payment option, and its actuarially determined estimated portion of the cessation cost was \$87.4 million. KHC paid \$76.5 million for the pension portion and \$10.9 million for the insurance portion of the cessation cost. The deadline has passed for Quasi-Governmental Employers to cease participation under special provisions, therefore, any future cessations will be calculated under normal parameters unless new legislation is enacted.

Note V. Related Party

Perimeter Park West, Incorporated (PPW) was established in 1998 as a 501(c) (25) corporation located at 1260 and 1270 Louisville Road, Frankfort, Kentucky. As such, PPW can only acquire and hold title to real property. The only source of revenue for the Corporation is rent paid from lessees, and interest on account balances. Currently, KPPA is the only lessee. When cash in excess of \$500,000 is on hand at PPW, the money is paid back to the PPW shareholders in the form of dividends. PPW's expenses are for the maintenance of the property. Title to the property is held in the name of PPW and there is no mortgage on the property. KPPA does not have title to the property, however, CERS and KRS maintains PPW as an investment on the financial statements and the Pension plans are the sole shareholders. PPW's market value was \$7.3 million as of June 30, 2023. PPW is audited annually and submits IRS Form 990 as required for this entity. The purposes of PPW are as an investment for the Pension plans; and to protect the Pension and Insurance Trusts of CERS, KERS, and SPRS should someone become injured on the property. If this occurred and a lawsuit was filed against the property, the suit would be filed against PPW instead of the KPPA, CERS or KRS.

The current lease between PPW and KPPA was entered into on December 5, 2019, and continued thereafter until altered by a new agreement or termination of the lease. The premises, consisting of 85,357 square feet, are rented for the fiscal year period of July 1 to June 30. The contractual lease payments through June 30, 2027, are:

- FY 2023 \$961,968
- FY 2024 \$961,968
- FY 2025 \$961,968
- FY 2026 \$961,968
- FY 2027 \$961,968

⁽¹⁾ Does not include 401(h) assets for fiscal years 2017 and later. Assets totaled \$20,605,000 as of June 30, 2023.

⁽²⁾ Does not include 401(h) contributions or associated investment income for fiscal years 2017 and later. For fiscal year 2023, 401(h) contributions equaled \$(20,000): and associated investment return equaled \$1,931,000.

⁽³⁾ Based on derived compensation using the provided employer contribution information for fiscal years 2017 and later.

(4) Adjustment due to 401(h) plan asset balance being considered an OPEB asset under GASB 74 for fiscal years 2017 and later.

⁽⁵⁾ Northern Trust Settlement.

(1) Does not include 401(h) assets for fiscal years 2017 and later. Assets totaled \$67,263,000 as of June 30, 2023.

⁽²⁾ Does not include 401(h) contributions or associated investment income for fiscal year 2017 and later. For fiscal year 2023 401(h) contributions equaled \$(12,000); and associated investment return equaled \$4,378,000.

⁽³⁾ Based on derived compensation using the provided employer contribution information for fiscal years 2017 and later.

⁽⁴⁾ Adjustment due to 401(h) plan asset balance being considered an OPEB asset under GASB 74 for fiscal years 2017 and later.

⁽⁵⁾ Northern Trust Settlement.

(6) Includes \$63.1 million and \$175.6 million employer cessation contributions for fiscal year 2022 and 2021, respectively

⁽¹⁾ Does not include 401(h) assets for fiscal years 2017 and later. Assets totaled \$1,312,000 as of June 30, 2023.

⁽²⁾ Does not include 401(h) contributions or associated investment income for fiscal years 2017 and later. For fiscal year 2023, 401(h) contributions equaled (\$8,000); and associated investment return equaled \$93,000.

⁽³⁾ Based on derived compensation using the provided employer contribution information for fiscal years 2017 and later.

⁽⁴⁾ Adjustment due to 401(h) plan asset balance being considered an OPEB asset under GASB 74 for fiscal years 2017 and later.

⁽⁵⁾ Northern Trust Settlement.

The actuarially determined contributions effective for fiscal year ending 2023 that are documented in the schedules on the following pages, were calculated as of June 30, 2021. Based on the June 30, 2021, actuarial valuation report, the actuarial methods and assumptions used to calculate these contribution rates are below:

| Notes to Schedule of | Employers' Co | ntribution | | | |
|---|---|--|---|--|--|
| | CERS | CERS | KERS | KERS | SPRS |
| Item | Nonhazardous | Hazardous | Nonhazardous | Hazardous | |
| Determined by the Actuarial Valuation as of: | June 30, 2021 | June 30, 2021 | June 30, 2021 | June 30, 2021 | June 30, 2021 |

⁽¹⁾ Benefit payments are offset by insurance premiums received from retirees, Medicare Drug Reimbursements, and Humana Gain Share Payments (in applicable years).

⁽²⁾ Employer contributions and benefit payments include expected benefits due to the implicit subsidy for members under age 65, equal to (\$533,552) for fiscal year 2023.

⁽³⁾ Based on derived compensation using the provided employer contribution information.

(4) Northern Trust Settlement.

This table is intended to show information for ten years; additional year's information will be displayed as it becomes available.

The actuarially determined contribution effective for fiscal year ending 2023 that is documented in the following schedule was calculated as of June 30, 2021. Separate contribution rates are determined for each fund based on the liabilities associated with the current active members, former inactive members, and members receiving benefits from each respective fund, as well as the separately maintained asset balances for each fund.

Based on the June 30, 2021, actuarial valuation report, the actuarial methods and assumptions used to calculate the required contributions follow.

⁽¹⁾ Data for years prior to 2018 is based on contribution data provided in the 2017 ACFR, based on calculations provided by the prior actuary. ⁽²⁾ Actuarially determined contribution for fiscal year ended 2023 is based on the contribution rate calculated with the June 30, 2021, actuarial valuation.

⁽³⁾ Employer contributions do not include the expected implicit subsidy included in the Schedule of Changes in Employer's Net OPEB Liability - SPRS.

⁽⁴⁾ Based on derived compensation using the provided employer contribution information

Money-Weighted Rates of Return

In accordance with GASB, KPPA provides this additional disclosure regarding the money-weighted rate of return for the Pension Funds and Insurance Fund. The money-weighted rate of return is a method of calculating period-byperiod returns on Pension Funds' and Insurance Fund's investments that adjusts for the changing amounts actually invested. For purposes of this statement, money-weighted rate of return is calculated as the internal rate of return on Pension Funds' and Insurance Fund's investments, net of Pension Funds' and Insurance Fund's investments, net of Pension Funds' and Insurance Fund's investment expense, adjusted for the changing amounts actually invested.

See below for the money-weighted rates of return for multiple periods including fiscal year June 30, 2023, as calculated by the custodian bank, BNY Mellon:

MIKE HARMON AUDITOR OF PUBLIC ACCOUNTS

Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards*

Independent Auditor's Report

To the Members Kentucky Public Pensions Authority

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Kentucky Public Pensions Authority (KPPA), as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise KPPA's basic financial statements, and have issued our report thereon dated November 27, 2023.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered KPPA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of KPPA's internal control. Accordingly, we do not express an opinion on the effectiveness of KPPA's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards* (Continued)

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether KPPA's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

| | Respectfully Submitted, |

Investment Overview

This section of the report was compiled by KPPA investment staff using information provided by Wilshire Associates and the Bank of New York Mellon. Except otherwise noted, investment returns are based on investment asset fair value and calculated using time-weighted return calculation methodologies.

Investment returns play an important role at KPPA in terms of funding status of the plans and continued funding of operations. The Investment Committees of each Board of Trustees is committed to maximizing the long-term total rate of return on investments, given the appropriate level of risk, for the sole benefit of the members in the plans. The overall investment performance goal is to achieve an annualized rate of return which, when combined with employee and employer contributions, will meet or exceed the benefits and administrative funding requirements (see Investment Objectives later in this section).

Investments are managed by professional investment management firms and the KPPA Investment Staff based upon statutory investment authority, the investment policies adopted by the KRS Board of Trustees and the CERS Board of Trustees. The investment staff coordinates and monitors the investments of the trust assets and assists the Investment Committees in the formulation and implementation of investment policies and long-term investment strategy.

Asset Allocation and Diversification

The Trustees recognize that asset allocation is the primary driver of long-term investment performance and therefore review asset allocation on a regular basis. Asset allocation is a process designed to construct an optimal long-term asset mix that achieves a specific set of investment objectives. The Investment Policy Statement establishes the plans' asset allocation policy as designed to meet those objectives.

The asset allocation policies are adopted to provide for diversification of assets in an effort to maximize the longterm returns on investments consistent with prudent levels of market and economic risks. Of all the components of investment strategy formulation, the determination of asset allocation targets is the most important decision.

Risk is further diversified through active and passive management using multiple investment management firms and KPPA Investment Staff with a variety of investment styles. The total investment performance is not dependent upon the outcome of just one particular investment style or manager.

KPPA develops specific contractual investment guidelines for each external manager and each internally managed account that control the risk of high concentrations in a particular sector, industry, or security.

Diversification of the assets among various asset classes, investment management styles, and individual securities mitigates risk and enhances the potential of the investment portfolios to achieve their respective long-term objectives.

The following tables show each Plans' asset allocation targets as specified in their respective Investment Policy Statement and the actual asset allocation of the Plans as of June 30, 2023.

Investment Strategies

Diversification

The Pension and Insurance portfolios are diversified on several levels, primarily through the use of the aforementioned asset class allocations. Asset allocations are evaluated on a periodic basis and represent an efficient allocation to maximize returns and minimize risks at a level appropriate for each system. The individual asset classes are diversified through the use of multiple portfolios that are managed by both the Office of Investments Staff and external Investment Managers. Finally, portfolios within each of the asset classes are diversified through both investment styles and the selection of individual securities. Each portfolio advisor is afforded discretion to diversify its portfolio(s) within the parameters established by the Boards.

Rebalancing

Proper implementation of the investment policy requires that a periodic adjustment, or rebalancing, of assets be made to ensure conformance with the IPS target levels. Such rebalancing is necessary to reflect sizable cash flows and performance imbalances among asset classes and investment advisors. The rebalancing policies call for a rebalancing to within its allocation ranges if an asset class exceeds or falls outside its allowable range as defined in the IPS.

Performance Review

At least once each quarter, the Investment Committees, on behalf of the Boards, review the performance of the portfolio to determine compliance with the IPS. The Investment Committees also review a report created and presented by the KPPA Compliance Officer. The Compliance Officer performs tests daily, monthly, and quarterly to assure compliance with the restrictions imposed by the IPS.

Investment Consulting

The Boards employ qualified independent industry leading external consultants to assist in asset allocation studies, asset allocation recommendations, manager searches and other investment related consulting functions. Consultants also provide performance reports covering both the internally managed and externally managed assets.

Investment Objectives

The Trustees recognize that as long-term investors, the primary aim is that the portfolios meet their performance objectives in the long- term while understanding that this may not necessarily occur in the short term. The overall investment performance goal is to achieve an annualized rate of return which, when combined with employee and employer contributions, will meet or exceed the benefits and administrative funding requirements The following descriptions represent general standards of measurement that will be used as guidelines for the various classes of investments and managers of the Plans.

Public Asset Class Allocations

Short-term: For periods less than five years or a full market cycle, the Asset Class Allocation should exceed the returns of the appropriate Index.

Intermediate & Long-term: For periods greater than five years or a full market cycle, the Asset Class Allocation should exceed the appropriate Index, compare favorably on a risk adjusted basis, and generate returns that rank above the median return of a relevant peer group. Volatility, as measured by the standard deviation of monthly returns, should be comparable to the Index.

Individual Public Security Portfolios

Short-term: For periods less than five years or a full market cycle, individual portfolios should exceed the returns of their market goal or benchmark.

Intermediate & Long-term: For periods greater than five years or a full market cycle, individual portfolios should exceed the return of their market goal or benchmark, compare favorably on a risk-adjusted basis, and generate returns that rank above the median return of a relevant peer group. Volatility, as measured by the standard deviation of monthly returns, should be comparable to the benchmark.

Alternative Assets

Private Equity

The Private Equity portfolio should seek to achieve both short-term and intermediate/long term Net Internal Rate of Returns that provide yields in excess of core equity investments.

Short-term: Alternative investments should earn a Net Internal Rate of Return (IRR) that place the investment above the median Net IRR of other similar funds, of the same vintage year.

Intermediate & Long-term: The private equity portfolio should earn a return that meets or exceeds the Systems Private Equity Index. Individual private equity investments should earn a Net IRR above the median Net IRR of other similar funds, of the same vintage year.

Real Estate

Relative Return: The Real Estate portfolio is expected to generate returns, net of all fees and expenses, in excess of the National Council of Real Estate Investment Fiduciaries Open End Diversified Core Equity Index lagged 1 calendar quarter.

Absolute Return: The long-term real return objective for the Real Estate portfolio is five percent over the Barclays Capital U.S. 7-10 Year Treasury Bond Index, net of investment management fees.

Real Return

Short-term: For periods less than five years or a full market cycle, the allocation should achieve an annual rate of return that exceeds the appropriate benchmark (the weighted average return of the underlying investment benchmarks) annually over a complete market cycle, net of all investment management fees.

Strategic objective: For periods greater than five years or a full market cycle, the allocation should not only outperform the short-term benchmark, but also achieve a rate of return that exceeds CPI + 300 basis points.

Investment Results

For the purposes of this report, total return information has been reported net of investment manager fees and investment expenses with audited data since July 2011. At the manager or individual account level, returns have been reported net of fees since July 2011 and gross of fees are used for prior historical data. All rates of return are calculated using time-weighted rates of return.

Benchmarks

The benchmarks are weighted averages that are composites of the various asset class indices that exist within each of the investment portfolios. The Modified Dietz Method, as its basis for calculations, is used to determine the performance of an investment portfolio based on a time weighted cash flow. The various asset class benchmarks are shown below:

Benchmarks and Allocation Guidelines As of June 30, 2023

Note: These benchmarks are intended to be objective, measurable, investable/replicable, and representative of the investment mandates. The benchmarks are developed from publicly available information and accepted by the investment advisor and KPPA as the neutral position consistent with the investment mandate and status. KPPA Investment Staff and our Consultant recommend the indices and benchmarks, which are reviewed and approved by the Investment Committee and ratified by the KRS and CERS Boards. It is anticipated that as KRS and CERS funds continue to diversify through other markets and asset classes, both the Pension Funds' and Insurance Funds' total benchmarks will evolve to reflect these exposures.

Long-Term Results

The chart below displays the growth of \$1,000 over the course of 10 years given the performance of the portfolios compared to the benchmark and the actuarial assumed rate of return. As of June 30, 2023, the actuarial rate of return for KERS Nonhazardous and SPRS pension was 5.25% and 6.25% for all other funds.

Since June 30, 2014, returns ranged from a minimum of (5.73)% in 2022 to a maximum of 25.00% in 2021. For fiscal year 2023, the annualized total net returns of each Plan exceeded their respective actuarially assumed rates of return. Translating these returns into dollars, a beginning balance of \$1,000 in fiscal year 2014 would have a balance of \$1,996 in fiscal year 2023. The annualized benchmark would have a balance of \$1,961.

The chart below shows theoretical annual returns for the Insurance portfolio since June 30, 2014, where returns range from a minimum of (5.34%) in 2022 to a maximum of 24.95% in 2021. As of June 30, 2023, the Insurance portfolio earned 10.15% versus the annualized benchmark return of 9.27%. The chart below indicates that with a beginning balance of \$1,000 in fiscal year 2014, the Insurance portfolio would have a balance of \$2,006 compared to the actuarially assumed rate of return balance of \$1,930 and the annualized benchmark return would have a balance of \$2,001 at the end of the 10-year period.

Public Equity

For the fiscal year, the KPPA Pension Public Equity portfolio outperformed the benchmark by 121 basis points (bps), 17.74% versus the benchmark return of 16.53% (KPPA Insurance Public Equity: 17.60%). Relative outperformance was primarily driven by stock selection, most notably, broad outperformance across the international portion of the portfolio.

During the 12-months ending June 30, 2023, the KPPA Pension U.S. equity portion of the portfolio underperformed the R3000, 18.54% versus 18.95%; while the aggregate KPPA Insurance U.S. equity mandates returned 18.44%. Stock selection was solid across most strategies, especially within the mid, small, and microcap strategies. The only significant source of relative weakness came from the internal factor-based portfolio (11.31% vs 19.59%); however, this was less about stock selection and more about allocation tilts. The strategy's tilts, smaller in terms of market cap and towards value, weighed on relative performance (growth outpaced value by over 15%). Since inception, the Pension U.S. equity mandates have returned 11.30%, underperforming the benchmark by 9bps, while the Insurance U.S. equity mandates earned 9.92% annualized, outpacing the portfolio's benchmark by 2bps.

For the fiscal year, the KPPA Pension Non-U.S. equity mandates combined to outperform the MSCI ACWI Ex-US by 396bps, returning 16.43% versus 12.47%; while the aggregate KPPA Insurance international mandates returned 16.28%. Relative outperformance can best be attributed to broad based outperformance of the individual strategies. Most notably within the developed large cap and emerging market mandates (especially the dedicated value piece). Since inception, the Pension Non-U.S. equity mandates have returned 3.46%, underperforming the benchmark by 4bps, while the Insurance Non-U.S. equity mandates earned 3.44% annualized, outpacing the portfolio's benchmark by 60bps.

Core Fixed Income

For the fiscal year ended June 30, 2023, the Pension Core Fixed Income portfolio outperformed the benchmark by 2.21%, with a return of 1.27% compared to the Bloomberg U.S. Aggregate which returned (0.94)%. The Insurance Core Fixed Income portfolio posted a 1.14% rate of return, which outperformed the Bloomberg U.S. Aggregate Bond Index by 2.08%. Relative outperformance was driven by the shorter duration profile and tactical allocation to front end investment grade credit as rates rose and credit spreads tightened. Since inception, the Pension Core Fixed Income portfolio has outperformed the benchmark by 0.87%; while the Insurance Core Fixed Income portfolio has outperformed by 0.59% annually.

Private Equity

For the fiscal year ended June 30, 2023, the Pension Private Equity portfolio posted a return of (1.55%), while the Insurance Private Equity portfolio returned 1.99%. The Investment Committee acknowledges the difficulty in assessing short term performance for Private Equity. Performance is typically based on quarterly estimates of each underlying business's value, and managers are often slow to mark valuations up or down. This can distort relative performance against a public market benchmark during periods when that index moves dramatically, such as fiscal year 2023. A better indication of program performance would be the mid- to longer-term time periods because more underlying company holdings have likely transacted at a specific (rather than estimated) valuation.

For the five years ended June 30, 2023, the Pension and Insurance Private Equity portfolios returned 13.91% and 13.25%, respectively. Over the past 10 years, the Pension portfolio trailed its benchmark by 1.57% but still produced a 13.39% return. The Insurance portfolio return of 14.42% was below its benchmark of 14.96%. Since inception in 2002, the Pension and Insurance portfolio's have reported a 11.82% return and a 10.96% return, respectively.

| Return on Private Equity As of June 30, 2023 | | | | | | |

Real Return

For the fiscal year ended June 30, 2023, the Pension Real Return portfolio returned 12.77%, outperforming its benchmark of 7.05%. The Insurance Real Return portfolio posted a return of 11.12%, also outperforming its benchmark return of 7.05% for the period. These returns were driven by strong returns from the portfolio's midstream energy assets. Since inception, the Pension and Insurance Real Return portfolios have outperformed their respective benchmarks by 0.70% and 0.42% respectively.

The Governmental Accounting Standards Board recognizes that it may not be possible or cost-beneficial to separate certain investment expenses from either the related investment income or the general administrative expenses of the plan. KPPA has displayed all investment related fees and expenses identifiable and captured by our custodial bank, BNY Mellon and KPPA staff.

Certification of Actuarial Results

Re: Certification for the Actuarial Results as of June 30, 2023.

Dear Boards of Trustees:

Actuarial valuations are prepared annually as of June 30, for the County Employees Retirement System (CERS), the Kentucky Employees Retirement System (KERS), and the State Police Retirement System (SPRS). These reports describe the current actuarial condition of the Systems and document the calculated employer contribution requirements as well as the changes in the financial condition since the prior actuarial valuation.

Under Kentucky Statute, the Board of Trustees of the Kentucky Retirement System (KRS) must recommend the employer contribution requirement for KERS and SPRS for the fiscal years beginning July 1, 2024 and ending June 30, 2026. The Board of Trustees of the County Employees Retirement System must certify the employer contribution rates for CERS for the fiscal year beginning July 1, 2024 and ending June 30, 2025. The contribution requirements determined by June 30, 2023 actuarial valuations are intended to become effective twelve months after the valuation date and, as such, are intended to be used by the Board for recommending these required contributions effective July 1, 2024.

These contributions are calculated based on the membership data and plan assets as of June 30, 2023. These calculations are also based on the benefit provisions in effect as of June 30, 2023.

FINANCING OBJECTIVES AND FUNDING POLICY

The Kentucky Public Pensions Authority (KPPA) administers pension and health insurance funds to provide for monthly retirement income and retiree health insurance benefits. The total employer contribution requirement is comprised of a contribution to each respective fund.

The employer contribution is determined in accordance with Section 61.565 of Kentucky Statute. As specified by the Statute, the employer contribution is comprised of a normal cost contribution and an actuarial accrued liability contribution. The actuarial accrued liability contribution is calculated by amortizing the unfunded accrued liability as of June 30, 2019 over a closed 30-year amortization period (26 years remaining as of June 30, 2023). Gains and losses incurring in years after June 30, 2019 are amortized as separate, closed 20-year amortization bases.

If the contributions made are equal to the Actuarially Determined Contribution (ADC), and if all actuarial assumptions are met, there will not be an unfunded accrued liability at the end of the 26-year period remaining from the original closed 30-year amortization base. Accordingly, the ADC under the funding policy can be considered a "Reasonable Actuarially Determined Contribution" as required by the Actuarial Standards of Practice.

House Bill 8 passed during the 2021 legislative session and changed how employer contributions are allocated and collected from the participating employers in the KERS non-hazardous fund. Each employer will pay a normal cost contribution on the payroll of their covered employees and contribute to the fund an allocated share of the cost required to amortize the unfunded liability.

HB 1 and HB 604 were enacted in the 2022 legislative session and provided an additional \$135 million and \$105 million in appropriations to finance the unfunded actuarial accrued liability in the KERS non-hazardous retirement fund in FY 2023 and FY 2024. The previous year's valuation reflected the appropriations for FY 2023 in the calculated contribution requirement, and the appropriations for FY 2024 have been reflected in the contribution requirement in this year's valuation.

PROGRESS TOWARD REALIZATION OF FINANCING OBJECTIVES

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan's funded status. In the absence of benefit improvements, assumption changes, or actuarial losses, it should increase over time, until it reaches at least 100%. As of June 30, 2023, the funded ratios for the pension and health insurance funds are as follows:

| | Funding Level As of June 3 <mark>0</mark> | | | | | | | | | | | |
|----------------------|--|-----------|------------|----------|------------|---------|-----------|----------|-----------------|-----------|--|--|
| | 202 | 3 | 2022 | 2 | 2021 | I | 2020 |) | 20 ⁻ | 19 | | |
| System | Pension | Insurance | Pension In | nsurance | Pension In | surance | Pension I | nsurance | Pension | Insurance | | |
| CERS Nonhazardous | 56.1% | 131.5% | 52.0% | 132.1% | 51.8% | 85.4% | 49.4% | 78.5% | 49.1% | 70.7% | | |
| CERS Hazardous | 51.4% | 100.7% | 47.6% | 101.0% | 46.7% | 84.3% | 45.1% | 78.2% | 45.3% | 75.8% | | |
| KERS Nonhazardous | 21.8% | 81.7% | 18.5% | 79.1% | 16.8% | 50.2% | 14.2% | 42.7% | 13.4% | 36.3% | | |
| KERS Hazardous | 65.4% | 170.4% | 63.2% | 172.2% | 60.4% | 135.5% | 55.3% | 126.0% | 54.8% | 123.1% | | |
| SPRS | 54.0% | 100.5% | 52.5% | 100.6% | 30.7% | 82.0% | 28.1% | 75.0% | 27.0% | 71.3% | | |

ASSUMPTIONS AND METHODS

The Boards of Trustees, in consultation with the actuary, set the actuarial assumptions and methods used in the actuarial valuation. An experience study was conducted after the June 30, 2022 actuarial valuation and the Board adopted updated assumptions for use in this actuarial valuation.

The updated assumptions include:

Demographic Assumptions:

- Post-retirement mortality rates were updated based on KPPA experience.
- Mortality improvement assumption was updated to the ultimate rates of the MP-2020 mortality improvement scale.
- Rates of termination prior to retirement were increased.
- Rates of disability incidence for the KERS non-hazardous fund and CERS funds were decreased.
- The percentage of members assumed to cover spouses in the retiree health insurance plan at retirement was increased for the SPRS fund.

156

149 ACT

Economic Assumptions:

- The rate of inflation was increased from 2.30% to 2.50%.
- The salary productivity assumption was reduced by 0.20%, resulting in no change in the salary increase assumption for long-service employees of 3.30% in the non-hazardous funds and 3.55% in the hazardous funds.
- The individual rates of salary increases were increased during the select period for the CERS funds.
- The investment return assumption for the CERS pension funds and all insurances funds was increased from 6.25% to 6.50%.
- The Tier 3 cash balance interest crediting rate assumption was increased to 5.90% for the KERS nonhazardous and SPRS pension funds and to 6.75% for the KERS hazardous and CERS pension funds.

In our opinion, all the assumptions and methods adopted by the Boards Trustees satisfy the requirements in the Actuarial Standards of Practice that are applicable for actuarial valuations of public retirement systems.

It is our opinion that the actuarial assumptions used to perform these valuations are internally consistent and reasonably reflect the anticipated future experience of the Systems. The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can, and almost certainly will, differ as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution requirements, and funding periods. The actuarial calculations are intended to provide information for rational decision making.

ADDITIONAL DISCLOSURES

The benefit structure is outlined in this section of the annual report. GRS prepared the following schedules in the actuarial section: Summary of Actuarial Valuation Results, Recommended Employer Contribution Rates, Summary of Actuarial Unfunded Liabilities, the Solvency Test, the Summary of Active Member Valuation Data, the Summary of Retired Member Valuation Data, Summary of the Assumptions and Methods, and the Summary of the Benefit Provisions.

In addition, GRS prepared the following schedules in the financial section in accordance with GASB Statement No. 67: Net Pension Liability Schedule, Discount Rate Sensitivity Analysis, Schedule of Changes in the Employers' Net Pension Liability, Schedule of Employers' Net Pension Liability, and the Schedule of Employers' Contributions.

DATA

Member data for retired, active and inactive members was supplied as of June 30, 2023, by KPPA staff. The staff also supplied asset information as of June 30, 2023. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data. GRS is not responsible for the accuracy or completeness of the information provided to us by KPPA.

CERTIFICATION

We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Retirement Systems as of June 30, 2023. All of our work conforms with generally accepted actuarial principles and practices, and in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of Kentucky Code of Laws and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel, Roeder, Smith & Co.

Summary of Actuarial Assumptions

The results of the actuarial valuation are based upon the assumptions and funding policies adopted by the Boards and statutory funding requirements. Assumptions and funding policies are reviewed against actual plan experience at least once every five years through the completion of the Actuarial Experience Study. In general, the assumptions and methods used in the June 30, 2023 valuation are based on the most recent actuarial experience study performed as of June 30, 2022, submitted, and adopted by the Boards in May and June 2023.

1. Actuarial Cost Method: The actuarial valuation was prepared using the entry age normal cost (EANC) method as required by state statute. Under this method, the present value of future benefits is determined for each member and allocated equitably as a level percentage of payroll from the member's entry age into the plan to the assumed age of exit from the plan. The portion of the present value of future benefits allocated to the current valuation year is called the normal cost. The portion of the present value of future benefits allocated to prior years of service is called the actuarial accrued liability. The unfunded actuarial accrued liability represents the difference between the actuarial accrued liability and the actuarial value of assets as of the valuation date. Relative to the pension fund and the insurance fund, an employer contribution has been established to pay for both the normal cost and the amount needed to amortize the unfunded actuarial accrued liability (UAAL).

2. UAAL Amortization Method: Effective for the June 30, 2019 valuation, the actuarial accrued liability contribution is calculated by amortizing the unfunded accrued liability as of June 30, 2019 over a closed 30-year amortization period. Gains and losses incurring in future years are amortized as separated closed 20-year amortization bases. This amortization cost is calculated using a 0.00% payroll growth assumption for the KERS and SPRS Funds and a 2.00% payroll growth assumption for the CERS Funds. Effective for fiscal years ending June 30, 2022 and later, the amortization cost for the KERS Nonhazardous funds is allocated amongst employers as a dollar amount based on the employers' actuarial accrued liability as of June 30, 2019. The amortization cost for the remaining funds is divided by covered payroll and included in the contribution rate, payable by employers as a percentage of pay.

3. Asset Valuation Method: The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected market value of assets, based on the investment return assumption. The amount recognized each year is 20% of the difference between market value and expected market value.

4. Retiree Insurance Funding Policy: Effective for the June 30, 2019 valuation, the actuarial accrued liability contribution is calculated by amortizing the unfunded accrued liability as of June 30, 2019, over a closed 30-year amortization period. Gains and losses incurring in future years are amortized as separated closed 20-year amortization bases. This amortization cost is calculated using a 0.00% payroll growth assumption for the KERS and SPRS Funds and a 2.00% payroll growth assumption for the CERS Funds. Effective for fiscal years ending June 30, 2022 and later, the amortization cost for the KERS Nonhazardous funds is allocated amongst employers as a dollar amount based on the employers' actuarial accrued liability as of June 30, 2019. The amortization cost for the remaining funds is divided by covered payroll and included in the contribution rate, payable by employers as a percentage of pay.

5. Investment Return Assumption: The future investment earnings of plan assets are assumed to accumulate at a rate of 6.50% per annum for the CERS Nonhazardous Retirement System, the CERS Hazardous Retirement System, and all Insurance Systems. This rate consists of a 2.50% price inflation component and a 4.00% real rate of return component. The assumed rate of return for the KERS Hazardous pension fund is 6.25% and consists of a 2.50% inflationary component and a 3.75% real rate of return component. The assumed rate of return for the KERS Nonhazardous pension fund and the SPRS pension fund is 5.25% and consist of a 2.50% inflationary component and a 3.75% real rate of return was adopted in 2023.

6. Salary Increase Assumptions: Active member salaries are assumed to increase at the rates provided in Table 1. The rates include a price inflation and productivity component, and an additional increase due to promotion based upon plan experience. The price inflation component is 2.50% for all plans and the productivity component is 0.80% for the nonhazardous systems and 1.05% for the hazardous systems. This assumption was adopted in 2023.

| Table 1. S | Salary Increase Assumptions | | | | | |
|------------|-----------------------------|----------------------|-------------------|----------------------|-------------------|--------|
| Service | | CERS Nonhazardous | CERS Hazardous | KERS Nonhazardous | KERS Hazardous | SPRS |

| 16+ | | 3.30% | 3.55% | 3.30% | 3.55% | 3.55% |

7. Health Care Cost Trend Rate:

The costs for retiree medical premiums are assumed to increase according to the assumptions provided in Table 2.

| le 2: Health Care | Cost Trend Rate (See footno | otes 1-2) | |
|-------------------|-----------------------------------|-------------------------------|-------------------------|
| Year | Non-Medicare Plans ⁽¹⁾ | Medicare Plans ⁽¹⁾ | Dollar Contribution (2) |
| 2025 | 6.80% | 8.50% | 1.50% |
| 2026 | 6.55% | 8.00% | 1.50% |
| 2027 | 6.30% | 8.00% | 1.50% |
| 2028 | 6.05% | 8.00% | 1.50% |
| 2029 | 5.80% | 7.50% | 1.50% |
| 2030 | 5.55% | 7.00% | 1.50% |
| 2031 | 5.30% | 6.50% | 1.50% |
| 2032 | 5.05% | 6.00% | 1.50% |
| 2033 | 4.90% | 5.50% | 1.50% |
| 2034 | 4.75% | 5.00% | 1.50% |
| 2035 | 4.60% | 4.50% | 1.50% |
| 2036 | 4.45% | 4.05% | 1.50% |
| 2037 | 4.30% | 4.05% | 1.50% |
| 2038+ | 4.05% | 4.05% | 1.50% |

⁽¹⁾ All increases are assumed to occur on January 1. The 2024 premiums were known at the time of the June 30, 2023, valuation and were incorporated into the liability measurement.

⁽²⁾ Applies to members participating on or after July 1, 2003. All increases are assumed to occur on July 1.

8. Payroll Growth Assumption: For purposes of determining the amortization cost to finance the unfunded actuarial accrued liability, the active member payroll (or amortization payments for the KERS Nonhazardous fund) is assumed to increase at a rate of 0.00% per year for KERS (Nonhazardous and Hazardous) and SPRS and the active member payroll in CERS (Nonhazardous and Hazardous) is assumed to increase at the rate of 2.00% per annum. This assumption was adopted in 2017.

9. Retiree Cost of Living Adjustments (COLA): SB2 only allows the Cost of Living Adjustments (COLAs) to be awarded on a biennial basis if the State Legislature so authorizes and either (i) the system is over 100% funded or (ii) the Legislature appropriates sufficient funds to pay the increased liability for the COLA.

10. Retirement Rate Assumptions: The probability, or the likelihood, that a member will retire at a specified age or level of service is provided in Table 3. These assumptions were adopted in 2023.

(1) The annual rate of retirement is 12% for male members and 14% for female members with 25-26 years of service.

(2) The annual rate of retirement is 100% at age 65.

(3) The annual rate of retirement is 100% at age 60.

Nonhazardous System: There is a 1% increase in the first two years a member becomes eligible under the age of 65. For members hired after 7/1/2003, the rates shown above are multiplied by 80% if the member is under age 65 to reflect the different retiree health insurance benefit.

Hazardous System: For members hired after 7/1/2003 and prior to 9/1/2008, the rates shown above are multiplied by 80% if the member is under age 65 to reflect the different retiree health insurance benefit.

(1) The annual rate of service retirement is100% at age 55.

(2) The annual rate of service retirement is 100% at age 60.

For members hired after 7/1/2003 and prior to 9/1/2008, the rates shown above are multiplied by 80% if the member is under age 55 to reflect the different retiree health insurance benefit.

11. Mortality Assumptions: Pre-retirement mortality: PUB-2010 General Mortality table, for the Nonhazardous Systems, and the PUB-2010 Public Safety Mortality table for the Hazardous Systems, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

Post-retirement mortality (non-disabled): System-specific mortality table based on mortality experience from 2013-2022, projected with the ultimate rates from MP-2020 mortality improvement scale using a base year of 2023.

Table 4a provides the life expectancy for a non-disabled retiree in future years based on the assumption with full generational projection:

Post-retirement mortality (disabled): PUB-2010 Disabled Mortality table, with rates multiplied by 150% for both male and female rates, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

These mortality assumptions were adopted in 2023. Table 4b provides sample annual rates of mortality in the base year of each table (2023 for the retired member mortality rates and 2010 for the active member and disabled member mortality rates).

13. Rates of Disablement: CERS/KERS/SPRS provides disability benefits for those individuals meeting specific qualifications established by state law. This assumption provides the probability, or likelihood, that a member will become disabled during the course of employment for various age levels. These assumptions were adopted in 2023.

| able 6: Sample Rates of Disablement | | | | | | | | | |
|-------------------------------------|----------------------|-------------------|----------------------|-------------------|-------------|--|--|--|--|
| | CERS Nonhazardous | CERS Hazardous | KERS Nonhazardous | KERS Hazardous | SPRS | | | | |
| Nearest Age | Probability | Probability | Probability | Probability | Probability | | | | |

| 30 | 0.06% | 0.11% | 0.05% | 0.08% | 0.09% | | | | |
| 40 | 0.13% | 0.24% | 0.11% | 0.18% | 0.20% | | | | |
| 50 | 0.37% | 0.67% | 0.31% | 0.50% | 0.56% | | | | |
| 60 | 0.97% | 1.75% | 0.80% | 1.32% | 1.46% | | | | |

14. Assumption Changes Since Prior Valuation: Demographic and Economic assumptions were updated based on the 2022 experience study. A 1% increase in the rate of retirement for each of the first two years a nonhazardous member becomes retirement eligible under the age of 65 is assumed to reflect the shift in retirement pattern due to House Bill 506. Additionally, in conjunction with the review of the healthcare per capita claims cost, the assumed increase in the future healthcare costs, or trend assumption, is reviewed on an annual basis. The trend assumption for the non-Medicare Plans was increased during the select period as a result of this review.

⁽¹⁾ Rates do reflect the CERS phase-in provisions, which limit the increases to the employer contribution rates to 12% over the prior fiscal year through June 30, 2028. However, the actuarially determined employer contribution rates are below this threshold for FYE2025, and therefore, the rates shown above are equal to the actuarially determined rates.

⁽²⁾ For the KERS Nonhazardous fund, contribution rate includes the normal cost portion of the contribution requirement only. Amortization cost will be allocated to employers as a dollar amount.

⁽³⁾ Annual payroll included in the Summary of Actuarial Valuation Results is based upon the annualized monthly payroll for active members as of the valuation date. The annual payroll recorded in the financial section is based upon the sum of the monthly payroll for active members recorded for each month of fiscal year ending June 30, 2023.

CERS Funds

The Insurance Fund contribution rates and the employer contribution rates for CERS Nonhazardous and CERS Hazardous shown in the tables below are the full funding rates presented by the actuary in the 2014 through 2023 annual valuations.

House Bill 362 was enacted during the 2018 legislative session that limits the annual increase in the CERS employer contribution over the prior fiscal year to 12% per year for the period of July 1, 2018 to June 30, 2028, or until the full actuarial required contribution is met.

Recommended Employer Contribution Rates As of June 30

CERS (Nonhazardous Employers)

The insurance fund contribution rates and the employer contribution rates for CERS Nonhazardous and CERS Hazardous shown in the above tables are the full funding rates presented by the actuary in the 2014 through 2023 annual valuations. However, in the case of CERS Nonhazardous and CERS Hazardous, in 2006 the actuary recommended a five-year phase-in of the rate which requires the payment of the insurance benefit normal cost with a five-year phase-in of the unfunded accrued liability (UAL) associated with the insurance funds. In 2008 this recommendation was changed to a ten-year phase-in from the initial starting date. This phase-in was complete and the full actuarial rates were paid in FYE 2018. HB 362 (passed during the 2018 legislative session) limited the employer contribution rate increases to 12% per year over the prior fiscal year for the period of July 1, 2018 to June 30, 2028. SB 249 (passed during the 2020 legislative session) froze the contribution rates for one year so that the rates for FYE 2021 were equal to FYE 2020. As of FYE 2023, the CERS contributions rates were fully phased-in and the actual employer contribution rates equaled the actuarially determined rates shown above.

KERS Funds

The contribution rates for KERS Nonhazardous and KERS Hazardous shown in the tables below are the full funding rates presented by the actuary for 2014 through 2023 annual valuations. However, actual employer contributions were less than the recommended rates for years 2009 through 2014. SB 2 (2013 Legislative Regular Session) required full funding starting in fiscal year 2015. HB 265 from the 2018 legislative session reduced the employer contribution rate for KERS quasi-governmental agencies to the fiscal year 2018 rate for fiscal year 2019, which was 49.47%. The 2019 Special Legislative Session HB 1 sets the employer contribution rate at 49.47%, retroactive to July 1, 2019, for fiscal year 2020 for KERS quasi-governmental agencies. House Bill 8 passed during the 2021 legislative session and changed how employer contributions are allocated and collected from the participating employers in the KERS Nonhazardous Fund. Each employer will pay a normal cost contribution on the payroll of their covered employees and contribute to the fund an allocated share of the cost required to amortize the unfunded liability.

Recommended Employer Contribution Rates As of June 30

The contribution rates for KERS Nonhazardous and KERS Hazardous shown in the above tables are the full funding rates presented by the actuary in the 2014 through 2023 annual valuations. HB 265 (passed during the 2018 legislative session), HB 1 (passed during the 2019 special legislative session), and HB 352 (passed during the 2020 legislative session) reduced the FYE 2019-2021 employer contribution rate to 49.47% for Regional Mental Health/Mental Retardation Boards, Local and District Health Departments, State Universities, Community Colleges and any other agencies eligible to voluntarily cease participating in the KERS Nonhazardous fund. HB 8 (passed during the 2021 legislative session) changed how employer contributions are allocated and collected amongst employers in the KERS Nonhazardous fund effective for FYE2022. The normal cost is collected as a percentage of covered payroll and the amortization cost is allocated to employers as a dollar amount based on their accrued liability as of June 30, 2019. Amortization cost shown above reflects the amortization required as of the valuation date and does not reflect any adjustment for the cessation of any employers after the valuation date.

SPRS Funds

The contribution rates for SPRS shown in the below tables are the full funding rates presented by the actuary in the 2014 through 2023 annual valuations. However, the actual employer contribution rates have been less than those shown below. As a result of HB1 passed in 2008 the statute called for an employer contribution rate at an increasing percentage of the full funding rates. SB2 (2013 Regular Legislative Session) eliminated this phase-in beginning with the June 30, 2013, actuarial valuation.

⁽¹⁾ Annual payroll included in the Schedule of Active Member Valuation Data is based upon the annualized monthly payroll for active members as of the valuation date. The annual payroll recorded in the financial section is based upon the sum of the monthly payroll for active members recorded for each month of fiscal year ending June 30, 2023.

Member data in actuarial section will differ from reported data in other ACFR sections. For this section, the data is reported by account instead of by person (ex: a member could have vested service in KERS, but is currently active in CERS and is reported in two membership categories).

⁽¹⁾ The Annualized Retirement Allowance is the annualized value of the monthly retirement allowance for retired members and beneficiaries as of the valuation date. Consequently, the values will not match the fiscal year total benefit payments recorded in the financial section. Headcounts and hazardous benefits for members receiving benefits in both the nonhazardous and hazardous fund have been included in the hazardous funds' summaries above. Additional \$25,156,000 in KERS Nonhazardous annual benefits and \$29,929,000 in CERS Nonhazardous benefits not included in June 30, 2023 summary above.

Member data in actuarial section will differ from reported data in other Annual Report sections. For this section, the data is reported by account instead of by person (ex: a member could have vested service in KERS, but is currently active in CERS and is reported in two membership categories).

⁽¹⁾ The Annualized Retirement Allowance is the annualized value of the monthly retirement allowance for retired members and beneficiaries as of the valuation date. Consequently, the values will not match the fiscal year total benefit payments recorded in the financial section. Headcounts and hazardous benefits for members receiving benefits in both the nonhazardous and hazardous fund have been included in the hazardous funds' summaries above. Additional \$25,156,000 in KERS Nonhazardous annual benefits and \$29,929,000 in CERS Nonhazardous benefits not included in June 30, 2023 summary above.

Member data in actuarial section will differ from reported data in other Annual Report sections. For this section, the data is reported by account instead of by person (ex: a member could have vested service in KERS, but is currently active in CERS and is reported in two membership categories).

Summary of Benefit Provisions CERS, KERS, and SPRS Plans

Plan Funding

State statute requires active members to contribute 5% of creditable compensation for nonhazardous members and 8% of creditable compensation for hazardous members. For members participating on or after September 1, 2008, an additional 1% of creditable compensation is required. This amount is credited to the Insurance Fund and is non-refundable to the member. Employers contribute at the rate determined by the Boards to be necessary for the actuarial soundness of the systems, as required by KRS 78.635 and KRS 61.565. KERS rates are subject to state budget approval.

Membership Eligibility

For all regular full-time non-school board employees to be eligible for membership, they must average 100 or more hours of work per month over a fiscal or calendar year. For all regular full-time school board employees to be eligible for membership, they must average 80 hours of work per month over the actual days worked during the school year.

Benefit Formula for Hazardous for Tier 3: Members whose participation began on or after 1/1/2014

Each year that the member is active, a 7.50% employer pay credit and the employee's 8.00% contribution will be credited to each member's hypothetical cash balance account. The hypothetical account will earn interest at a minimum rate of 4%, annually. If the geometric average net investment return for the previous five years exceeds 4%, then the hypothetical account will be credited with an additional amount of interest in that year equal to 75% of the amount of the return which exceeds 4%. All interest credits will be applied to the hypothetical account balance on June 30 based on the account balance as of June 30 of the previous year. At retirement, the member's hypothetical account balance may be converted into an annuity based on an actuarial factor.

Summary of Benefit Provisions CERS, KERS SPRS Plans

Post-Retirement Death Benefits

If the member is receiving a monthly benefit based on at least four (4) years of creditable service, the retirement system will pay a \$5,000 death benefit payment to the beneficiary named by the member specifically for this benefit. If a member has more than one account with the systems administered by KPPA, only one death benefit shall be paid. A death benefit is subject to taxation.

Disability Benefits

Members participating before 8/1/2004 may qualify for disability retirement provided the member has at least 60 months of service credit* and is not eligible for an unreduced benefit. Additional service credit may be added for computation of benefits under the benefit formula.

Members participating on or after 8/1/2004 but before 1/1/2014 may qualify for disability retirement provided the member has at least 60 months of service credit*. Benefits are computed as 20% for Nonhazardous and 25% for Hazardous of member's monthly final rate of pay or the amount calculated under the Benefit Formula based upon actual service, whichever is higher.

Members participating on or after 1/1/2014 may qualify for disability retirement provided the member has at least 60 months of service credit. The account which includes member contributions, employer pay credits and interest credits can be withdrawn from the System as a lump sum or an annuity equal to the greater Benefits are computed as 20% for Nonhazardous and 25% for Hazardous of the member's monthly final rate of pay or the annuity computed as if eligible for unreduced retirement benefit, whichever is greater.

Members disabled in the line of duty, or due to a duty-related injury, may be eligible for special benefits.

*Service requirements may be waived if line of duty or duty related.

Pre-Retirement Death Benefits

The beneficiary, which shall be the spouse unless another person was named beneficiary after the marriage date, of a deceased active member is eligible for a monthly benefit if the member died while in the line of duty; or due to a duty-related injury, with a minimum of one (1) month of service credit. If the member's death did not occur in the line of duty or as a result of a duty-related injury, the beneficiary is eligible for a monthly benefit under the following conditions: 1. The member was eligible to retire at the time of death. 2. The member was under the age of 65 (for nonhazardous members) or under the age of 55 (for hazardous members) with a minimum of 60 months of service credit and was employed by a participating agency at the time of death. 3. The member was no longer employed by a participating agency at the time of death but had accumulated a minimum of 144 months of service credit. If the deceased member does not meet one of the eligibility requirements the beneficiary will receive a lump-sum payment from the member's accumulated account balance..

Cost of Living Adjustment (COLA)

Senate Bill 2 passed during the 2013 legislative session, eliminated all future COLAs unless the State Legislature so authorizes on a biennial basis and either (i) the system is over 100% funded or (ii) the Legislature appropriates sufficient funds to pay the increased liability for the COLA.

Health Insurance Benefits

For members participating prior to July 1, 2003, CERS, KERS, and SPRS pay a percentage of the monthly premium for single coverage based upon the service credit accrued at retirement. Members participating on or after July 1, 2003, and before September 1, 2008, are required to earn a minimum of 10 years (120 months) of service credit to qualify for health insurance benefits upon retirement. Members participating on or after September 1, 2008, are required to earn a minimum of 10 years (120 months) of service credit to qualify for health insurance benefits upon retirement. Members participating on or after September 1, 2008, are required to earn a minimum of 15 years (180 months) of service credit to qualify for health insurance benefits upon retirement. The monthly health insurance contribution will be \$10 for each year of nonhazardous and \$15 for each year of hazardous earned service increased by 1.5% annually.

Refunds

Upon termination of employment, a refund of the member's accumulated account balance is available to the member.

Interest on Accounts

For employees participating prior to September 1, 2008, the interest paid is set by the Boards of Trustees and will not be less than 2.0%. For employees participating on or after September 1, 2008, but before January 1, 2014, interest will be credited at a rate of 2.5%. For employees participating on or after January 1, 2014, interest will be credited at a minimum rate of 4.0% (see Note B for additional details on the annual interest calculation).

Benefit Changes since the Prior Valuation

House Bill 506 passed during the 2023 legislative session reinstated the Partial Lump Sum Options (PLSO) form of payment for members retiring on or after January 1, 2024. The bill introduced an expansion of the lump-sum payment options, allowing for payouts equal to 48 or 60 times the member's Basic, or Survivorship 100% monthly retirement allowance. The lifetime monthly retirement allowance is adjusted actuarially to account for the selected lump sum payment option.

House Bill 506 additionally modified the minimum separation period required for a retiree to reemploy with a participating employer of the Systems administered by the KPPA while still receiving their retirement allowance. This adjustment standardized the separation period to one month for all scenarios within each plan for retirement dates effective January 1, 2024 and after.

Definitions

Active members are those members who are currently employed by a participating agency and contributing to KPPA as a condition of employment.

Inactive members are those members who are no longer employed with a participating agency but have not yet retired or taken a refund of contributions.

Retired members include both members and beneficiaries who are receiving a monthly benefit from KPPA.

A single member may have multiple accounts, which contribute to one pension. Each person is only counted once in the Membership by System report. A member who has both a membership account and a retired account is included in the retired count. Members who have multiple membership accounts are included under the system where they most recently contributed. Members who have more than one retirement account are included in the system with the greatest service credit. If the retired accounts have equal service credit, they are counted first in SPRS, CERS Hazardous, KERS Hazardous, CERS Nonhazardous, then KERS Nonhazardous. These tables do not include individuals receiving payments under dependent child accounts, Qualified Domestic Relations Orders, or multiple beneficiary accounts.

The following tables include individuals receiving a monthly benefit as of June 30 in the indicated fiscal year. A single member may have multiple accounts which contribute to one pension. This table represents all individuals receiving a benefit including dependent children, Qualified Domestic Relations Order (QDRO) accounts and multiple beneficiary accounts. If a member has died or a disability decision is pending, the monthly benefit amount is reflected as zero until the account status changes.

Employer Contribution Rates

In CERS, KERS, and SPRS, both the employee and the employer contribute a percentage of creditable compensation to KPPA.

The employee contribution rate is set by state statute. Nonhazardous employees contribute 5% while Hazardous duty members contribute 8%. Employees hired on or after September 1, 2008, contribute an additional 1% to health insurance.

CERS employer contribution rates are set by the CERS Board under Kentucky Revised Statutes 78.635 based on an annual actuarial valuation, unless altered by legislation enacted by the Kentucky General Assembly. The CERS employer contribution rates for fiscal year 2008 through 2009 were reduced from the actuarially recommended rate as a result of the passage of House Bill (HB) 1 during the 2008 Extraordinary Session of the Kentucky General Assembly. Also, during its 2009 Regular Session, the Kentucky General Assembly enacted HB 117, which mandated an extension of the phase-in of insurance contribution rates that had been previously approved by the KPPA Board in 2006 from five years to 10 years to further mitigate the impact of the application of GASB Statements 43 and 45 on CERS employer contribution rates for health insurance. During the 2018 Regular Session of the Kentucky General Assembly, HB 362 capped CERS employer contribution rate increases to no more than 12% per year over the prior fiscal year for the period of July 1, 2018 to June 30, 2028, or until the actuarial recommended contribution was met. Fiscal year 2022 was the last year for the 12% cap for CERS. The actual pension and insurance employer contribution rates that were paid are shown below.

Under Kentucky Revised Statutes 61.565, KERS and SPRS employer contribution rates are set by the KRS Board based on an annual actuarial valuation. However, KERS and SPRS employer rates are subject to approval by the Kentucky General Assembly through the adoption of the biennial Executive Branch Budget. For fiscal years 2003 through 2014, the Kentucky General Assembly suspended Kentucky Revised Statutes 61.565 in the budget in order to provide an employer contribution rate that is less than the amount recommended by the Board's consulting actuary. For fiscal years 2018 thru 2021, the legislature amended the KERS Nonhazardous rate for quasi-government agencies to 49.47%. The table in the Actuarial Section shows the KERS and SPRS employer contribution rates that were actuarial recommended rates in the annual valuation without any adjustments. House Bill 8 passed during the 2021 legislative session changed how employer contributions are allocated and collected from the participating employers in the KERS Nonhazardous Fund. Each employer will pay a normal cost contribution on the payroll of their covered employees and contribute to the fund an allocated share of the cost required to amortize the unfunded liability.

pays the normal cost, which is the rate stated above, along with an actuarial accrued liability payment that is calculated and provided by the actuary.

Insurance Contracts

KPPA provides medical insurance and other managed care coverage for eligible retired members.

Participation in the insurance program is optional and requires the completion of the proper forms at the time of retirement in order to obtain the insurance coverage. KPPA provides access to health insurance coverage through the Kentucky Employees' Health Plan (KEHP) for recipients until they reach age 65 and/or become Medicare eligible. After a retired member becomes eligible for Medicare, coverage is available through a Medicare eligible plan offered by KPPA. A retired member's spouse and/or dependents may also be covered on health insurance through KPPA.

Kentucky Employees Retirement System GASB No. 67 Accounting Valuation Report As of June 30, 2023

November 9, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: GASB 67 Reporting – Actuarial Information – Kentucky Employees Retirement System

Dear Members of the Board:

This report provided herein contains certain information for the **Kentucky Employees Retirement System (KERS)** in connection with the Governmental Accounting Standards Board (GASB) Statement No. 67, "Financial Reporting for Pension Plans" for the fiscal year ending June 30, 2023. A separate report will be provided at a later date with additional accounting information determined in accordance with GASB Statement No. 68, "Accounting and Financial Reporting for Pensions".

The liability calculations presented in this report were performed for the purpose of satisfying the requirements of GASB No. 67 and are not applicable for other purposes, such as determining the plan's funding requirements. The plan's liability for other purposes may produce significantly different results. This report may be provided to parties other than the Board of Trustees of the Kentucky Retirement Systems only in its entirety and only with the permission of the Board.

The total pension liability, net pension liability, and sensitivity information shown in this report are based on an actuarial valuation date of June 30, 2022. The total pension liability was rolled-forward from the valuation date to the plan's fiscal year ending June 30, 2023 using generally accepted actuarial principles. GASB 67 requires the disclosure of a 10-year history of certain information in the Required Supplementary Information within the annual financial report. Information disclosed for years prior to June 30, 2017 were prepared by the prior actuary.

Actuarial Assumptions

The Board of Trustees adopted new actuarial assumptions on June 5, 2023. These assumptions are documented in the report titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022". The Total Pension Liability as of June 30, 2023 is determined using these updated assumptions.

Plan Provisions

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump-Sum Optional Form of payment for members who retire on and after January 1, 2024, with the lump-sum payment options expanded to include to 48 or 60 times the member's monthly retirement allowance.

Board of Trustees November 9, 2023 Page 2

Since this optional form of payment results in a reduced, actuarial equivalent, monthly retirement allowance for members who elect a partial lump-sum option, this provision does not have a fiscal impact to the total pension liability.

House Bill 506 also adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances for each plan. This is a minimal change for members in the hazardous plan, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total pension liability of the hazardous plan.

Similarly, this is a relatively small change for future retirees in the non-hazardous plan. But as the minimum separation period was previously three months in almost every circumstance, we have assumed that there would be a 1.0% increase in the rate of retirement for each of the first two years a non-hazardous member becomes retirement eligible under the age of 65, in order to reflect a shift in the retirement pattern. The total pension liability as of June 30, 2023 for the non-hazardous plan is determined using these updated benefit provisions.

There have been no other plan provision changes that would materially impact the total pension liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable, appropriate, and comply with applicable requirements under GASB No. 67.

Single Discount Rate

Single discount rates of 5.25% for the non-hazardous plan and 6.25% for the hazardous plan were used to measure the total pension liability for the fiscal year ending June 30, 2023. This single discount rate was based on the expected rate of return on pension plan investments for each plan. Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the pension plan's fiduciary net position and future contributions were projected to be sufficient to finance all the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on pension plan investments to determine the total pension liability for each plan.

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Future contributions are projected assuming that the entire actuarially determined employer contribution is received by each plan each future year, calculated in accordance with the current funding policy.

401(h) Subaccount

Based on guidance issued by GASB in connection with GASB Statement No. 74, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered an OPEB asset. As a result, the reported fiduciary net positions as of June 30, 2017 and later are net of the 401(h) asset balance.

Board of Trustees November 9, 2023 Page 3

Additional Disclosures

This report is based upon information, furnished to us by the Kentucky Public Pensions Authority (KPPA), which includes benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" and the "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for the fiscal year ending June 30, 2023.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel Roeder Smith & Co.

State Police Retirement System GASB No. 67 Accounting Valuation Report As of June 30, 2023

September 20, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: GASB 67 Reporting – Actuarial Information – State Police Retirement System

Dear Members of the Board:

This report provided herein contains certain information for the **State Police Retirement System (SPRS)** in connection with the Governmental Accounting Standards Board (GASB) Statement No. 67, "Financial Reporting for Pension Plans" for the fiscal year ending June 30, 2023. A separate report will be provided at a later date with additional accounting information determined in accordance with GASB Statement No. 68, "Accounting and Financial Reporting for Pensions".

The liability calculations presented in this report were performed for the purpose of satisfying the requirements of GASB No. 67 and are not applicable for other purposes, such as determining the plan's funding requirements. The plan's liability for other purposes may produce significantly different results. This report may be provided to parties other than the Board of Trustees of the Kentucky Retirement Systems only in its entirety and only with the permission of the Board.

The total pension liability, net pension liability, and sensitivity information shown in this report are based on an actuarial valuation date of June 30, 2022. The total pension liability was rolled-forward from the valuation date to the plan's fiscal year ending June 30, 2023 using generally accepted actuarial principles. GASB 67 requires the disclosure of a 10-year history of certain information in the Required Supplementary Information within the annual financial report. Information disclosed for years prior to June 30, 2017 were prepared by the prior actuary.

Actuarial Assumptions

The Board of Trustees adopted new actuarial assumptions on June 5, 2023. These assumptions are documented in the report titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022". The Total Pension Liability as of June 30, 2023 is determined using these updated assumptions.

Plan Provisions

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump-Sum Optional Form of payment for members who retire on and after January 1, 2024, with the lump-sum payment options expanded to include to 48 or 60 times the member's monthly retirement allowance.

Board of Trustees September 20, 2023 Page 2

Since this optional form of payment results in a reduced, actuarial equivalent, monthly retirement allowance for members who elect a partial lump-sum option, this provision does not have a fiscal impact to the total pension liability.

House Bill 506 also adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances for each plan. This is a minimal change for members in SPRS, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total pension liability.

There have been no other plan provision changes that would materially impact the total pension liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable, appropriate, and comply with applicable requirements under GASB No. 67.

Single Discount Rate

A single discount rate of 5.25% was used to measure the total pension liability for the fiscal year ending June 30, 2023. This single discount rate was based on the expected rate of return on pension plan investments. Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the pension plan's fiduciary net position and future contributions were projected to be sufficient to finance all the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of the projected benefit payments to determine the total pension liability.

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Future contributions are projected assuming that the entire actuarially determined employer contribution is received each future year, calculated in accordance with the current funding policy.

401(h) Subaccount

Based on guidance issued by GASB in connection with GASB Statement No. 74, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered an OPEB asset. As a result, the reported fiduciary net positions as of June 30, 2017 and later are net of the 401(h) asset balance.

Additional Disclosures

This report is based upon information, furnished to us by the Kentucky Public Pensions Authority (KPPA), which includes benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" and the "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more

Board of Trustees September 20, 2023 Page 3

information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for the fiscal year ending June 30, 2023. To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel Roeder Smith & Co.

GASB No. 67 Accounting Valuation Report as of June 30, 2023

Actual

Notes to Schedule of Employers' Contributions for FYE 2023

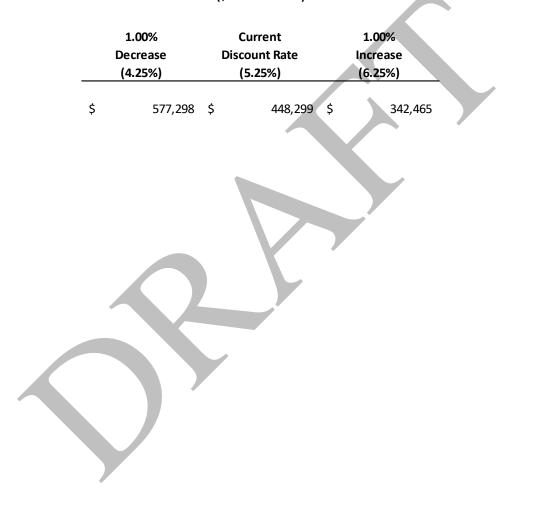

The actuarially determined contribution effective for fiscal year ending 2023 that is documented in the schedule on the previous page was calculated as of June 30, 2021. Based on the June 30, 2021 actuarial valuation report, the actuarial methods and assumptions used to calculate these contribution rates are below:

| Item | SPRS Plan |
|----------------------------|---|
| Determined by the | |
| Actuarial Valuation as of: | June 30, 2021 |
| Actuarial Cost Method: | Entry Age Normal |
| Asset Valuation Method: | 20% of the difference between the market value of assets and the expected actuarial value of assets is recognized |
| Amortization Method: | Level Percent of Pay |
| Amortization Period: | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases |
| Payroll Growth Rate | 0.00% |
| Investment Return: | 5.25% |
| Inflation: | 2.30% |
| Salary Increases: | 3.55% to 16.05%, varies by service |
| Mortality: | System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019 |

Kentucky Employees Retirement System GASB No. 74 Accounting Valuation Report As of June 30, 2023

November 9, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: GASB No. 74 Reporting – Actuarial Information – Kentucky Employees Retirement System

Dear Members of the Board:

This report provided herein contains certain information for the **Kentucky Employees Retirement System (KERS)** in connection with the Governmental Accounting Standards Board (GASB) Statement No. 74, "Financial Reporting for Postemployment Benefit Plans Other than Pension Plans" for the fiscal year ending June 30, 2023. A separate report will be provided at a later date with additional accounting information determined in accordance with GASB Statement No. 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

The liability calculations presented in this report were performed for the purpose of satisfying the requirements of GASB No. 74 and are not applicable for other purposes, such as determining the plan's funding requirements. The plan's liability for other purposes may produce significantly different results. This report may be provided to parties other than the Board of Trustees of the Kentucky Retirement Systems only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The total OPEB liability, net OPEB liability, and sensitivity information shown in this report are based on an actuarial valuation date of June 30, 2022. The total OPEB liability was rolled-forward from the valuation date to the plan's fiscal year ending June 30, 2023, using generally accepted actuarial principles. GASB No. 74 requires the disclosure of a 10-year history of certain information in the Required Supplementary Information within the annual financial report. The exhibits provided in this report include the applicable information for historical years that were calculated in accordance with this accounting standard. Information disclosed for years prior to June 30, 2017 were prepared by the prior actuary.

Actuarial Assumptions

The Board of Trustees adopted new actuarial assumptions on June 5, 2023. These assumptions are documented in the report titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022". Additionally, the discount rate used to calculate the total OPEB liability increased from 5.72% to 5.94% for the non-hazardous plan and from 5.59% to 5.94% for the hazardous plan (see further discussion on the calculation of the single discount rate later in this letter). The Total OPEB Liability as of June 30, 2023 is determined using these updated assumptions.

Board of Trustees November 9, 2023 Page 2

Plan Provisions

House Bill 506 passed during the 2023 legislative session and adjusted the minimum required separation period before a retiree may become reemployed to be one month for all circumstances for each System maintained by KPPA. This is a minimal change for members in the hazardous plan, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total OPEB liability of the hazardous plan.

Similarly, this is a relatively small change for future retirees in the non-hazardous plan. But as the minimum separation period was previously three months in almost every circumstance, we have assumed that there would be a 1.0% increase in the rate of retirement for each of the first two years a non-hazardous member becomes retirement eligible under the age of 65, in order to reflect a shift in the retirement pattern. The total OPEB liability as of June 30, 2023 for the non-hazardous plan is determined using these updated benefit provisions.

There were no other plan provision changes that would materially impact the total OPEB liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable and appropriate, and comply with applicable requirements under GASB No. 74.

Implicit Employer Subsidy for Non-Medicare Retirees

The fully-insured premiums paid for the Kentucky Employees' Health Plan are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit employer subsidy for the non-Medicare eligible retirees. GASB No. 74 requires that the liability associated with this implicit subsidy be included in the calculation of the Total OPEB Liability.

Single Discount Rate

Single discount rates of 5.94% for the non-hazardous plan and 5.94% for the hazardous plan were used to measure the total OPEB liability for the fiscal year ending June 30, 2023. They are based on the expected rate of return on OPEB plan investments of 6.50% and a municipal bond rate of 3.86%, as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of June 30, 2023.

Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the plan's fiduciary net position and future contributions were projected to be sufficient to finance the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on insurance plan investments was applied to all periods of the projected benefit payments paid from the retirement system. However, the cost associated with the implicit employer subsidy is not currently being included in the calculation of the plan's actuarial determined contributions, and it is our understanding that any cost associated with the implicit subsidy will not be paid out of the plan's trust. Therefore, the municipal bond rate was applied to future expected benefit payments associated with the implicit subsidy.

Board of Trustees November 9, 2023 Page 3

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Future contributions are projected assuming that the entire actuarially determined employer contribution is received by each plan each future year, calculated in accordance with the current funding policy.

401(h) Subaccount

Based on guidance issued by GASB in connection with GASB Statement No. 74, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered an OPEB asset. As a result, the reported fiduciary net position includes these 401(h) assets. Additionally, these member contributions and associated investment income and administrative expenses are included in the reconciliation of the fiduciary net position.

Additional Disclosures

This report is based upon information, furnished to us by the Kentucky Public Pensions Authority (KPPA), which includes benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" and the "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for the fiscal year ending June 30, 2023.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel Roeder Smith & Company

Notes:

¹ Data for years prior to 2018 is based on contribution data provided in the 2017 ACFR, based on calculations provided by the prior actuary.

² Actuarially determined contribution for fiscal year ending 2023 is based on the contribution rate calculated with the June 30, 2021 actuarial valuation.

³ Employer contributions do not include the expected implicit subsidy included in exhibit 3.

⁴ Based on derived compensation using the provided employer contribution information. For 2021, 2022, and 2023, derived compensation based on pension contribution information, as there were no required employer contributions for the insurance fund for FYE2021, FYE2022, and FYE2023.

Kentucky Employees Retirement System 8

Notes to Schedule of Employers' Contributions for FYE 2023

The actuarially determined contributions effective for fiscal year ending 2023 that are documented in the schedule on the previous pages were calculated as of June 30, 2021. Based on the June 30, 2021 actuarial valuation report, the actuarial methods and assumptions used to calculate these contributions are below:

| Item | KERS Non-Hazardous | KERS Hazardous |
|-----------------------------------|--|---|
| Determine by the | | |
| Actuarial Valuation as of: | June 30, 2021 | June 30, 2021 |
| Actuarial Cost Method: | Entry Age Normal | Entry Age Normal |
| Asset Valuation Method: | 20% of the difference between the market value of assets and the expected actuarial value of assets is recognized | 20% of the difference between the market value of assets and the expected actuarial value of assets is recognized |
| Amortization Method: | Level Percent of Pay | Level Percent of Pay |
| Amortization Period: | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases |
| Payroll Growth Rate: | 0.00% | 0.00% |
| Investment Return: | 6.25% | 6.25% |
| Inflation: | 2.30% | 2.30% |
| Salary Increases: | 3.30% to 15.30%, varies by service | 3.55% to 20.05%, varies by service |
| Mortality: | System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019. | System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019. |
| Healthcare Trend Rates: Pre-65 | Initial trend starting at 6.30% at January 1, 2023, gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. | Initial trend starting at 6.30% at January 1, 2023, gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. |
| Post-65 | Initial trend starting at 6.30% at January 1, 2023 and gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. | Initial trend starting at 6.30% at January 1, 2023 and gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. |

APPENDIX 1

Appendix 1

Development of Baseline Claims Cost

For non-Medicare retirees, the initial per capita costs were developed using retiree claims experience for calendar years 2020 through 2022. The claims were projected on an incurred claim basis, adjusted for prescription drug rebates, and loaded for administrative expense. The per capita costs shown in the table below also include HRA contributions for retirees on the CDHP plans. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. The fully-insured premiums paid to the Kentucky Employees' Health Plan are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit employer subsidy for the non-Medicare eligible retirees.

For Medicare retirees, the initial per capita costs were estimated based on the plan premiums effective January 1, 2023, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees.

Age graded and sex distinct premiums are utilized by this valuation. These costs are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process "distributes" the average premium over all age/sex combinations and assigns a unique premium for each combination. The age/sex specific costs more accurately reflect the health care utilization and cost at that age.

Kentucky Employees Retirement System 13

State Police Retirement System GASB No. 74 Accounting Valuation Report As of June 30, 2023

September 27, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: GASB No. 74 Reporting – Actuarial Information – State Police Retirement System

Dear Members of the Board:

This report provided herein contains certain information for the **State Police Retirement System (SPRS)** in connection with the Governmental Accounting Standards Board (GASB) Statement No. 74, "Financial Reporting for Postemployment Benefit Plans Other than Pension Plans" for the fiscal year ending June 30, 2023. A separate report will be provided at a later date with additional accounting information determined in accordance with GASB Statement No. 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions".

The liability calculations presented in this report were performed for the purpose of satisfying the requirements of GASB No. 74 and are not applicable for other purposes, such as determining the plan's funding requirements. The plan's liability for other purposes may produce significantly different results. This report may be provided to parties other than the Board of Trustees of the Kentucky Retirement Systems only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The total OPEB liability, net OPEB liability, and sensitivity information shown in this report are based on an actuarial valuation date of June 30, 2022. The total OPEB liability was rolled-forward from the valuation date to the plan's fiscal year ending June 30, 2023, using generally accepted actuarial principles. GASB No. 74 requires the disclosure of a 10-year history of certain information in the Required Supplementary Information within the annual financial report. The exhibits provided in this report include the applicable information for historical years that were calculated in accordance with this accounting standard. Information disclosed for years prior to June 30, 2017 were prepared by the prior actuary.

Actuarial Assumptions

The Board of Trustees adopted new actuarial assumptions on June 5, 2023. These assumptions are documented in the report titled "2022 Actuarial Experience Study for the Period Ending June 30, 2022". Additionally, the discount rate used to calculate the total OPEB liability increased from 5.69% to 6.02% (see further discussion on the calculation of the single discount rate later in this letter). The Total OPEB Liability as of June 30, 2023 is determined using these updated assumptions.

Board of Trustees September 27, 2023 Page 2

Plan Provisions

House Bill 506 passed during the 2023 legislative session and adjusted the minimum required separation period before a retiree may become reemployed to be one month for all circumstances for each System maintained by KPPA. This is a minimal change for members in SPRS, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members and therefore have reflected no fiscal impact to the total OPEB liability.

There were no other plan provision changes that would materially impact the total OPEB liability since June 30, 2022. It is our opinion that these procedures for determining the information contained in these reports are reasonable and appropriate, and comply with applicable requirements under GASB No. 74.

Implicit Employer Subsidy for Non-Medicare Retirees

The fully-insured premiums paid for the Kentucky Employees' Health Plan are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit employer subsidy for the non-Medicare eligible retirees. GASB No. 74 requires that the liability associated with this implicit subsidy be included in the calculation of the Total OPEB Liability.

Single Discount Rate

A single discount rate of 6.02% was used to measure the total OPEB liability for the fiscal year ending June 30, 2023. It is based on the expected rate of return on OPEB plan investments of 6.50% and a municipal bond rate of 3.86%, as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of June 30, 2023.

Based on the stated assumptions and the projection of cash flows as of each fiscal year ending, the plan's fiduciary net position and future contributions were projected to be sufficient to finance the future benefit payments of the current plan members. Therefore, the long-term expected rate of return on insurance plan investments was applied to all periods of the projected benefit payments paid from the retirement system. However, the cost associated with the implicit employer subsidy is not currently being included in the calculation of the plan's actuarial determined contributions, and it is our understanding that any cost associated with the implicit subsidy will not be paid out of the plan's trust. Therefore, the municipal bond rate was applied to future expected benefit payments associated with the implicit subsidy.

The projection of cash flows used to determine the single discount rate must include an assumption regarding actual employer contributions made each future year. Future contributions are projected assuming that the entire actuarially determined employer contribution is received by each plan each future year, calculated in accordance with the current funding policy.

Board of Trustees September 27, 2023 Page 3

401(h) Subaccount

Based on guidance issued by GASB in connection with GASB Statement No. 74, the 1% of pay member contributions for Tier 2 and Tier 3 members to a 401(h) subaccount is considered an OPEB asset. As a result, the reported fiduciary net position includes these 401(h) assets. Additionally, these member contributions and associated investment income and administrative expenses are included in the reconciliation of the fiduciary net position.

Additional Disclosures

This report is based upon information, furnished to us by the Kentucky Public Pensions Authority (KPPA), which includes benefit provisions, membership information, and financial data. We did not audit this data and information, but we did apply a number of tests and concluded that it was reasonable and consistent. GRS is not responsible for the accuracy or completeness of the information provided by KPPA. Please see the "Actuarial Valuation Report as of June 30, 2022" and the "2022 Actuarial Experience Study for the Period Ending June 30, 2022" for additional discussion of the nature of the actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions. These reports should be considered together as a complete report for the fiscal year ending June 30, 2023.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel Roeder Smith & Co.

Daniel J. White, FSA, EA, MAAA Senior Consultant and Actuary

Notes to Schedule of Employers' Contributions for FYE 2023

The actuarially determined contribution effective for fiscal year ending 2023 that is documented in the schedule on the previous page was calculated as of June 30, 2021. Based on the June 30, 2021 actuarial valuation report, the actuarial methods and assumptions used to calculate the contribution are below:

| ltem | SPRS | | | | |
|--|---|--|--|--|--|
| Determine by the Actuarial Valuation as of: | June 30, 2021 | | | | |
| Actuarial Cost Method: | Entry Age Normal | | | | |
| Asset Valuation Method: | 20% of the difference between the market value of assets and the expected actuarial value of assets is recognized | | | | |
| Amortization Method: | Level Percent of Pay | | | | |
| Amortization Period: | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases | | | | |
| Payroll Growth Rate: | 0.00% | | | | |
| Investment Return: | 6.25% | | | | |
| Inflation: | 2.30% | | | | |
| Salary Increases: | 3.55% to 16.05%, varies by service | | | | |
| Mortality: | System-specific mortality table based on mortality experience from 2013-2018, projected with the ultimate rates from MP-2014 mortality improvement scale using a base year of 2019. | | | | |
| Healthcare Trend Rates: Pre-65 | Initial trend starting at 6.30% at January 1, 2023, gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. | | | | |
| Post-65 | Initial trend starting at 6.30% at January 1, 2023 and gradually decreasing to an ultimate trend rate of 4.05% over a period of 13 years. The 2022 premiums were known at the time of the valuation and were incorporated into the liability measurement. | | | | |

Appendix 1

Development of Baseline Claims Cost

For non-Medicare retirees, the initial per capita costs were developed using retiree claims experience for calendar years 2020 through 2022. The claims were projected on an incurred claim basis, adjusted for prescription drug rebates, and loaded for administrative expense. The per capita costs shown in the table below also include HRA contributions for retirees on the CDHP plans. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. The fully-insured premiums paid to the Kentucky Employees' Health Plan are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit employer subsidy for the non-Medicare eligible retirees.

For Medicare retirees, the initial per capita costs were estimated based on the plan premiums effective January 1, 2023, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees.

Age graded and sex distinct premiums are utilized by this valuation. These costs are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process "distributes" the average premium over all age/sex combinations and assigns a unique premium for each combination. The age/sex specific costs more accurately reflect the health care utilization and cost at that age.

Record of Control Weakness or Noncompliance

For APA Use Only:

| Agency | Kentucky Public Pensions Authority |
|--------------------------|------------------------------------|
| Audit Section | Investments |
| Test Workpaper Reference | 102a |
| Finding Reference # | 2023-KPPA-001 |
| Known Questioned Costs | 0 |
| Likely Questioned Costs | 0 |

Condition and Context (Nature of the Weakness or Noncompliance)

The Kentucky Public Pensions Authority (KPPA) investment accounting branch performs reconciliations of investment activity recorded between their custodian, Bank of New York Mellon (BNYM), and their accounting system, Great Plains (GP). While the reconciliations occurred, the reconciliation documentation only had the typed names of the preparer and reviewer and there were no indicators of when the reconciliation occurred. Beginning in July 2023, KPPA updated their internal control process to address this issue.

Cause

KPPA did not design the internal controls to ensure investment reconciliations appropriately documented the time of the reconciliation and to prevent the rollforward of the preparer and reviewer names.

Effect

Properly documented approvals are effective internal controls to prevent and to detect and correct potential misstatements with regards to investment reconciliations. Misstatements in the reconciliation process may occur when approvals are rolled forward on a document and the time of the reconciliation is not documented.

Criteria

Sound internal controls over the investment reconciliation process ensure the investment balances recorded in the accounting system contain complete and accurate information for financial reporting. A complete and accurate reconciliation of investment activity is necessary in order to ensure financial statement reporting requirements are met in accordance with Generally Accepted Accounting Principles (GAAP) and Governmental Accounting Standards Board (GASB) pronouncements.

Recommendation

As noted above, KPPA updated their investment reconciliation processes for FY 2024. We recommend KPPA review those processes to ensure sufficient evidence of proper approvals were documented in the investment reconciliation process.

Record of Control Weakness or Noncompliance

NOTE TO RESPONDENT:

Please provide management's response and planned corrective action with all the required elements using the format below.

Corrective Action Plans

2 CFR 200, Subpart F, § 511(c) (Uniform Guidance) requires the auditee to prepare a Corrective Action Plan (CAP).

Based on the Uniform Guidance:

- §200.26 defines corrective action as "action taken by the auditee that: (a) Corrects identified deficiencies;
 (b) Produces recommended improvements; or (c) Demonstrates that audit findings are either invalid or do not warrant auditee action."
- The CAP should address both federal audit findings and all findings related to the financial statements which are required to be reported in accordance with *Government Auditing Standards* included in the current year auditor's report.
- The CAP must provide the name(s) of the contact person(s) responsible for corrective action, the corrective action planned, and the anticipated completion date.
- If the auditee does not agree with the audit findings or believes corrective action is not required, then the corrective action plan must include an explanation and specific reasons.

Other Requirements

KRS 43.090 requires your agency to notify the Legislative Research Commission and the Auditor of Public Accounts of the audit recommendations that have been implemented and of the audit recommendations that have not been implemented within 60 days of the completion of the final audit report. For any recommendations that have not been implemented, a reason for failure to implement audit recommendations must also be provided.

| Known Questioned Costs | \$0 |
| Likely Questioned Costs | \$0 |

Condition and Context (Nature of the Weakness or Noncompliance)

The Kentucky Public Pensions Authority (KPPA) manages multiple pension and health plans, including the County Employees Retirement System (CERS) hazardous and nonhazardous and the Kentucky Employees Retirement System (KERS) hazardous and nonhazardous plans. KPPA pays a monthly healthcare premium subsidy to Humana and the Department of Employee Insurance (DEI) for retired members. KPPA cash management branch sets up and requests wire transfers from the custodian bank accounts to the trust fund cash clearing accounts to cover the monthly insurance premium obligations for Humana and DEI. The healthcare premium subsidy and wire amounts appear on KPPA reports. The wire transfer requests and reports were reviewed and the following discrepancies noted:

- During May 2023, the KERS nonhazardous insurance account transferred \$2,419,507 and the CERS nonhazardous insurance account transferred \$1,924,760, as requested; however, the accounts were inadvertently switched on the request. Thus, the funds were transferred to the incorrect accounts resulting in KERS nonhazardous insurance being overcharged and CERS nonhazardous insurance being undercharged by \$494,747.
- During April 2023, the calculation of the subsidy amount used in the calculation of the insurance amount to be transferred totaled \$398. This amount was switched between the KERS nonhazardous and KERS hazardous, resulting in KERS nonhazardous being overcharged and KERS hazardous being undercharged by \$398.
- During October 2022, the KERS nonhazardous insurance account transferred \$5,033,988 but should have transferred \$5,033,958, an overcharge of \$30. The KERS nonhazardous pension account was undercharged \$30 having transferred \$1,636,185 when it should have been \$1,636,215.

In addition to the errors identified above, the same employee creating the breakout of the different wire amounts was also responsible for approving the wires once they were set up in the custodial bank's system.

Cause

KPPA's internal controls over the wire transfers did not identify errors and did not prevent a segregation of duties issue between the preparation and review process.

Effect

Incorrect amounts were requested from the custodial bank for one pension plan and several of the insurance plan accounts. The net difference for pension funds indicate an understatement of \$30 and the net difference for insurance funds indicate an overstatement of \$30 on the financial statements in the benefit payments and healthcare premium subsidy expenditures, respectively. The difference by fund are as follows:

• KERS nonhazardous insurance-overcharged \$495,175.

Record of Control Weakness or Noncompliance

- KERS hazardous insurance-undercharged \$398.
- CERS nonhazardous insurance-undercharged \$494,747.
- KERS nonhazardous pension-undercharged \$30.

Failure to segregate duties could lead to undetected errors in the healthcare premium subsidy wire amounts as well as incorrect financial reports.

<u>Criteria</u>

Effective internal controls over wire transfers ensure healthcare premium subsidy transactions contain accurate information for financial reporting and appropriate information for making management decisions.

The objective of segregation of duties is to ensure that assigned duties are separated such that no one employee is in a position both to commit and conceal errors in the normal course of performing their assigned duties. In general, the principal incompatible duties to be segregated are:

- Authorization of transactions,
- Custody of assets,
- Recording or reporting of transactions, and
- Performing reconciliations.

Adequate segregation of duties reduces the likelihood that errors, either intentional or unintentional, will remain undetected. This is carried out by providing for separate processing by different individuals at various stages of a transaction and for independent reviews of the work performed.

Recommendation

We recommend KPPA review the procedures over wire transfers to ensure effective review of wire transactions and adequate segregation of duties.

Record of Control Weakness or Noncompliance

NOTE TO RESPONDENT:

Please provide management's response and planned corrective action with all the required elements using the format below.

Corrective Action Plans

2 CFR 200, Subpart F, § 511(c) (Uniform Guidance) requires the auditee to prepare a Corrective Action Plan (CAP).

Based on the Uniform Guidance:

- §200.26 defines corrective action as "action taken by the auditee that: (a) Corrects identified deficiencies;
 (b) Produces recommended improvements; or (c) Demonstrates that audit findings are either invalid or do not warrant auditee action."
- The CAP should address both federal audit findings and all findings related to the financial statements which are required to be reported in accordance with *Government Auditing Standards* included in the current year auditor's report.
- The CAP must provide the name(s) of the contact person(s) responsible for corrective action, the corrective action planned, and the anticipated completion date.
- If the auditee does not agree with the audit findings or believes corrective action is not required, then the corrective action plan must include an explanation and specific reasons.

Other Requirements

KRS 43.090 requires your agency to notify the Legislative Research Commission and the Auditor of Public Accounts of the audit recommendations that have been implemented and of the audit recommendations that have not been implemented within 60 days of the completion of the final audit report. For any recommendations that have not been implemented, a reason for failure to implement audit recommendations must also be provided.

Management's Response and Planned Corrective Action Finding Reference # 2023-KPPA-002

To be completed by the responding agency:

| Response prepared by: | Connie Davis |
|---|-------------------|
| Note: The APA is requesting the official response of the agency's management. It is the responsibility of the preparer to ensure all internal approvals of the response have been obtained. | |
| Person responsible for corrective action: | Connie Davis |
| Date response prepared: | November 14, 2023 |
| Estimated corrective action completion date: | Completed |

Management's Response and Planned Corrective Action:

We concur with the finding and have corrected the errors noted above. Procedures have been updated to include a review/approval of all wire transactions before instructions are sent for processing.

MIKE HARMON AUDITOR OF PUBLIC ACCOUNTS

Keith Peercy, Chairperson Board of Trustees Kentucky Public Pension Authority 1260 Louisville Road Frankfort, KY 40601

We have audited the financial statements of the Kentucky Public Pension Authority (KPPA) as of and for the year ended June 30, 2023 and have issued our report thereon dated November 27, 2023.

Statement on Auditing Standards AU-C 260, *The Auditor's Communication with Those Charged with Governance*, requires us to communicate certain matters to keep those charged with governance adequately informed about matters related to the financial statement audit that are, in our professional judgment, significant and relevant to the responsibilities of those charged with governance in overseeing the financial reporting process. This report summarizes certain matters required by professional standards to be communicated to you in your oversight responsibility over the KPPA financial reporting process.

This information is intended solely for the information and use of the KPPA management, Audit Committee, and the Board of Trustees and is not intended to be and should not be used by anyone other than these specified parties.

Respectfully Submitted,

Farrah Petter, CPA Assistant Auditor of Public Accounts

November 27, 2023

c: David Eager, Executive Director Rebecca Adkins, Deputy Executive Director

AN EQUAL OPPORTUNITY EMPLOYER MIFID

Required Communications

Statement on Auditing Standards AU-C 260 requires the auditor to provide those charged with governance with additional information regarding the scope and results of the audit that may assist them in overseeing management's financial reporting and disclosure process. For purposes of this statement "those charged with governance" means the person(s) with responsibility for overseeing the strategic direction of the entity and the obligations related to the accountability of the entity, which includes overseeing the financial reporting process. We have identified the Kentucky Public Pension Authority Board of Trustees members as individuals charged with governance. As permitted by auditing standards, we are providing communications to a representative of this group of individuals, which we have determined to be the Board Chair, and are also providing copies of the letter to the KPPA's management.

Our Responsibility in Relation to the Financial Statement Audit

As communicated in our engagement letter dated April 11, 2023, our responsibility, as described by professional standards, is to form and express an opinion(s) about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. Our audit of the financial statements does not relieve you or management of your respective responsibilities.

Our responsibility, as prescribed by professional standards, is to plan and perform our audit to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting. Accordingly, as part of our audit, we considered the internal control of KPPA solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are also responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures for the purpose of identifying other matters to communicate to you.

We have provided our findings, if any, regarding significant control deficiencies over financial reporting, material weaknesses, material noncompliance, and other matters noted during our audit in a separate letter to you dated November 27, 2023. Additional findings were also communicated in a separate letter to management dated November 27, 2023, which did not rise to level necessary to be disclosed in the audit report but still warranted attention by KPPA.

Our responsibility also includes communicating to you any information which we believe is a material misstatement of fact. Nothing came to our attention that caused us to believe that such information, or its manner of presentation, is materially inconsistent with the information, or manner of its presentation, appearing in the financial statements.

Planned Scope and Timing of the Audit

We conducted our audit consistent with the planned scope and timing we previously communicated to you.

Compliance with All Ethics Requirements Regarding Independence

The engagement team, others in our firm, as appropriate, our firm, and our network firms have complied with all relevant ethical requirements regarding independence.

Significant Risks Identified

We have identified the following significant risks:

- Management's override of controls is a mandatory risk in accordance with auditing standards.
- Improper revenue recognition is a presumed risk of material misstatement in auditing standards.
- Ineffective reconciliations among multiple computer programs is a risk.

Qualitative Aspects of the Entity's Significant Accounting Practices²

Significant Accounting Policies

Management has the responsibility to select and use appropriate accounting policies. A summary of the significant accounting policies adopted by KPPA is included in Note A to the financial statements. There have been no initial selection of accounting policies and no changes in significant accounting policies or their application during fiscal year 2023. No matters have come to our attention that would require us, under professional standards, to inform you about (1) the methods used to account for significant unusual transactions and (2) the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Significant Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's current judgments. Those judgments are normally based on knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive

because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments.

The most sensitive accounting estimates affecting the financial statements are:

- Management's estimates related to the fair value of its investments on the Net Asset Value (NAV) of units of the investee. Management's estimate of the NAV is based on the investment manager's NAV since it is a practical resource based on the underlying fair value of investments held by the investee less any liabilities.
- Management's disclosure of the net pension liability in Note M to the financial statements. Management's estimate of the net pension liability is based on KPPA's actuarial valuations and the methods and assumptions used in determining the amounts are disclosed in the notes.
- Management's dosclosure of the net OPEB liability of KPPA in Note M of the financial statements. Management's estimate of the OPEB liability is based on KPPA's actuarial valuations and the methods and assumptions used in determining the amounts are disclosed in the notes.

We evaluated the key factors and assumptions used to develop the NAV, net pension liability, and OPEB liability and determined that it is reasonable in relation to the basic financial statements taken as a whole and in relation to the applicable opinion units.

Financial Statement Disclosures

Certain financial statement disclosures involve significant judgment and are particularly sensitive because of their significance to financial statement users. We believe the financial statement disclosures affecting KPPA's financial statements are sufficient, consistent, and generally acceptable.

Significant Unusual Transactions

For purposes of this communication, professional standards require us to communicate to you significant unusual transactions identified during our audit. No significant unusual transactions were identified as a result of our audit procedures.

Identified or Suspected Fraud

We did not identify or obtain any information that indicates fraud may have occurred or be suspected.

Significant Difficulties Encountered during the Audit

We are required to inform those charged with governance of any significant difficulties encountered during the audit, including significant delays in obtaining information, extensive unexpected effort required to obtain sufficient appropriate audit evidence, the unavailability of expected information, and other matters.

We encountered no significant difficulties in dealing with management relating to the performance of the audit. The employees and management of KPPA provided the auditors with appropriate, timely documentation, and made time available to assist auditors in the performance of audit procedures. The auditors appreciate all of the time and assistance provided to them during the conduct of the audit.

Uncorrected and Corrected Misstatements

For purposes of this communication, professional standards also require us to accumulate all known and likely misstatements identified during the audit, other than those that we believe are trivial, and communicate them to the appropriate level of management. Further, professional standards require us to also communicate the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole and each applicable opinion unit. Based on our audit, no misstatements were presented to management for consideration. Uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even though the uncorrected misstatements are immaterial to the financial statements currently under audit.

In addition, professional standards require us to communicate to you all material, corrected misstatements that were brought to the attention of management as a result of our audit procedures. There were no material misstatements identified during the audit.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter, which could be significant to KPPA's financial statements or the auditor's report. No such disagreements arose during the course of the audit.

Circumstances that Affect the Form and Content of the Auditor's Report

For purposes of this letter, professional standards require that we communicate any circumstances that affect the form and content of our auditor's report. There were no circumstances identified that affect the form and content of the auditor's report.

Representations Requested from Management

We have requested certain written representations from management, which are included in the attached letter dated November 27, 2023.

Management's Consultations with Other Accountants

Board of Trustees Kentucky Public Pension Authority Page 6

In some cases, management may decide to consult with other accountants about auditing and accounting matters. Management informed us that, and to our knowledge, there were no consultations with other accountants regarding auditing and accounting matters.

Other Significant Matters, Findings, or Issues

In the normal course of our professional association with KPPA, we generally discuss a variety of matters, including the application of accounting principles and auditing standards, significant events or transactions that occurred during the year, operating and regulatory conditions affecting the entity, and operational plans and strategies that may affect the risks of material misstatement. None of the matters discussed resulted in a condition to our retention as KPPA's auditors.

Other Information Included in Annual Reports

Pursuant to professional standards, our responsibility as auditors for other information, whether financial or nonfinancial, included in KPPA's annual reports, does not extend beyond the information identified in the audit report, and we are not required to perform any procedures to corroborate such other information. However, in accordance with such standards, we have read the information and considered whether such information, or the manner of its presentation, was materially inconsistent with its presentation in the financial statements.

Our responsibility also includes communicating to you any information which we believe is a material misstatement of fact. Nothing came to our attention that caused us to believe that such information, or its manner of presentation, is materially inconsistent with the information, or manner of its presentation, appearing in the financial statements.

This report is intended solely for the information and use of the management, board of trustees, and others within KPPA and is not intended to be and should not be used by anyone other than these specified parties.

Kentucky Retirement Systems 2023 Actuarial Valuation Results November 14, 2023

Janie Shaw, ASA, EA, MAAA Danny White, FSA, EA, MAAA

Copyright © 2023 GRS – All rights reserved.

- Board adopted new assumptions in June 2023
 - Investment Return Assumption: Increased to 6.50% for insurance funds
 - Mortality: Update the base mortality assumption to reflect recent experience (data dependent). Update the improvement assumption based on more recent published report (anticipated trend).
 - Increase disability mortality. No change to pre-retirement mortality
 - Termination/Withdrawal: Increase the rates of termination prior to retirement age
 - Disability incidence: Decrease the rate of disability incidence for the KERS non-hazardous fund
 - Cash Balance Interest Credit: Increased to 5.90% for KERS nonhazardous and SPRS funds and to 6.75% for KERS hazardous fund

- Change in active membership and payroll
 - Active membership increased across all funds
 - KERS Hazardous: 28% increase in membership payroll
 - SPRS: 38% increase in membership payroll
 - Employer contribution for the KERS nonhazardous fund is no longer tied to payroll

- Overview of legislation passed in 2023
 - HB 506: reinstated the Partial Lump Sum Option
 Form of payment, and adjusted the minimum
 required separation period for return to work
 - HB 1 and HB 604: provides \$240 million in additional appropriations to the non-hazardous retirement fund each year for two years (FY 2023 and FY 2024)

- FYE 2023 Investment Experience
 - 7% to 9% return on market value (varies by fund)
 - Assumed rate of return: 5.25% for KERS non-hazardous and SPRS retirement funds
 - Assumed rate of return: 6.25% for KERS hazardous retirement fund
 - Assumed rate of return: 6.25% for insurance funds (6.50% after the 2023 after the valuation date)
 - Fund assets \$158M more than expected for KERS and SPRS (\$87M pension and \$71M insurance)
 - \$11M in asset gains recognized this year (\$10M pension and \$1M insurance)

- Retirement Fund Liability Experience
 - \$545M loss for all KERS/SPRS retirement funds combined
 - Primarily attributed to salary increases being greater than expected for individual active members
- Insurance Fund Liability Experience
 - \$199M loss for all KERS/SPRS insurance funds combined
 - 2024 Pre-Medicare premiums higher than expected partially offset by Medicare premiums lower than expected

Comments on KERS Non-Haz Retirement Fund

- Imperative to maintain or increase contribution effort for the non-hazardous retirement fund
 - June 30, 2023 plan assets were \$3,540 million
 - Fund distributed \$1,049 million in benefit payments and administrative expenses in FYE 2023
 - Fund received \$1,360 million in employer and member contributions in FYE 2023

PROJECTION INFORMATION PENSION AND INSURANCE

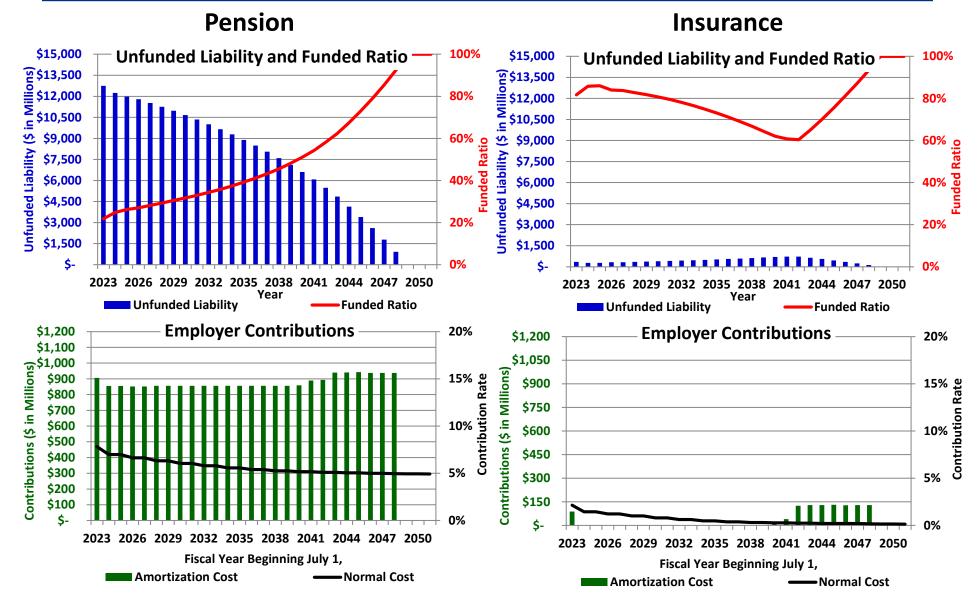

Projection Assumptions

- Assumes that all actuarial assumptions are realized, including the assumed annual asset return of 5.25%/6.25%/6.50%
- Full actuarially determined contribution paid each biennium
- Membership payroll assumed to remain level
 - Total active population assumed to decrease 2% each year

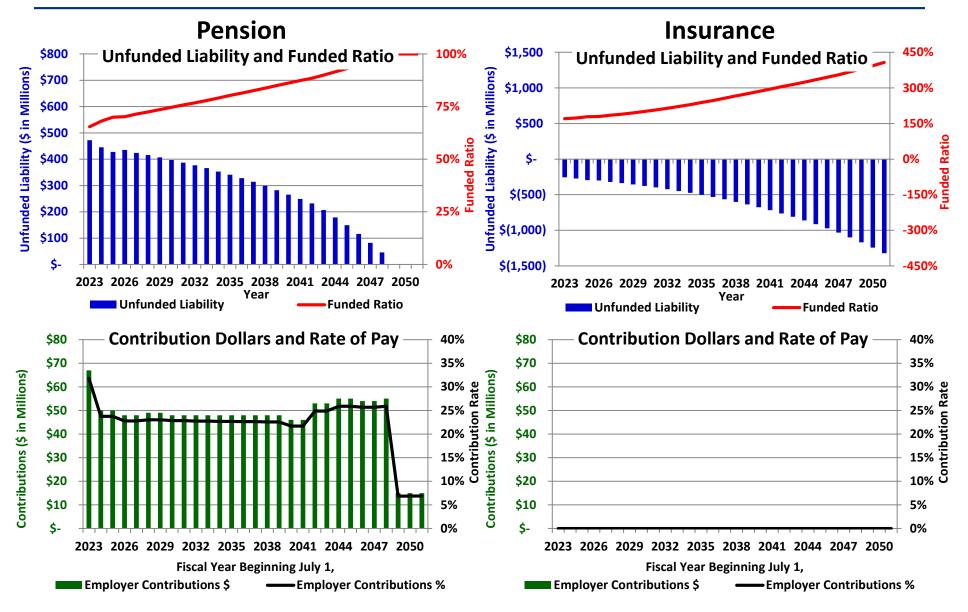

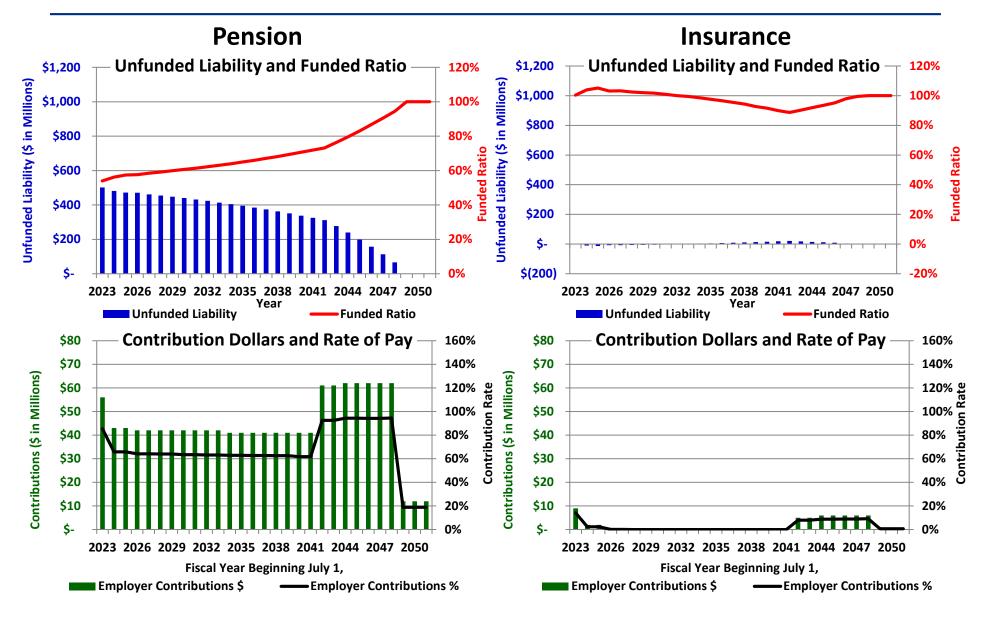

KERS Non-Hazardous Projection

KERS Hazardous Projection

SPRS Projection

Closing Comments on 2023 Valuation Results

- It is imperative the State and participating employers continue contributing the actuarially determined contributions in each future year to improve the System's financial security
- The increase in active members and payroll is a positive signal to the financial wellbeing of the System and the participating employers

Disclaimers

- This presentation is intended to be used in conjunction with the actuarial valuation as of June 30, 2023. This presentation should not be relied on for any purpose other than the purpose described in the valuation report.

Kentucky Employees Retirement System (KERS)

Actuarial Valuation Report as of June 30, 2023

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

P: 469.524.0000 | www.grsconsulting.com

November 13, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Subject: Actuarial Valuation as of June 30, 2023

Dear Trustees of the Board:

This report describes the current actuarial condition of the Kentucky Employees Retirement System (KERS) and provides the actuarially determined employer contribution for fiscal years ending June 30, 2025 and June 30, 2026. In addition, the report analyzes changes in KERS's financial condition and provides various summaries of the data.

Separate reports are issued with regard to valuation results determined in accordance with Governmental Accounting Standards Board (GASB) Statements 67, 68, 74 and 75. Results of this report should not be used for any other purpose without consultation with the undersigned. Valuations are prepared annually as of June 30, the first day of the plan year for KERS. This report was prepared at the request of the Board of Trustees of the Kentucky Retirement Systems (Board) and is intended for use by the Kentucky Public Pensions Authority (KPPA) staff and those designated or approved by the Board.

FINANCING OBJECTIVES AND FUNDING POLICY

The contributions determined by these actuarial valuations are intended to become effective twelve months after the valuation date and, as such, are intended to be used by the Board for recommending required contribution rates effective July 1, 2024, as well as the subsequent fiscal year beginning July 1, 2025 and ending June 30, 2026.

The employer contribution is determined in accordance with Section 61.565 of Kentucky Statute. As specified by the Statute, the employer contribution is comprised of a normal cost contribution and an actuarial accrued liability contribution. The actuarial accrued liability contribution is calculated by amortizing the unfunded accrued liability as of June 30, 2019 over a closed 30-year amortization period (26 years remaining as of June 30, 2023). Gains and losses incurring in years after June 30, 2019 are amortized as separate closed 20-year amortization bases.

Board of Trustees November 13, 2023 Page 2

If the contributions made are equal to the Actuarially Determined Contribution (ADC), and if all actuarial assumptions are met, there will not be an unfunded accrued liability at the end of the 26-year period remaining from the original closed 30-year amortization base. Accordingly, the ADC under the funding policy can be considered a "Reasonable Actuarially Determined Contribution" as required by the Actuarial Standards of Practice.

House Bill 8 passed during the 2021 legislative session and specified the method for allocating and collecting contributions from the participating employers in the non-hazardous fund. Each employer will pay a normal cost contribution on the payroll of their covered employees and contribute to the fund an allocated share of the cost required to amortize the unfunded liability.

HB 1 and HB 604 were enacted in the 2022 legislative session and provided an additional \$135 million and \$105 million in appropriations to finance the unfunded actuarial accrued liability in the KERS non-hazardous retirement fund in FY 2023 and FY 2024. The previous year's valuation reflected the appropriations for FY 2023 in the calculated contribution requirement, and the appropriations for FY 2024 have been reflected in the contribution requirement in this year's valuation.

ASSUMPTIONS AND METHODS

The Board of Trustees, in consultation with the actuary, sets the actuarial assumptions and methods used in the actuarial valuation. Except where noted in this report, the assumptions used in this actuarial valuation are based on an experience study conducted with experience through June 30, 2022, adopted by the Board of Trustees on June 5, 2023 for first use in this June 30, 2023 actuarial valuation.

The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can, and almost certainly will, differ as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contributions, and funding periods. The actuarial calculations are intended to provide information for rational decision making.

BENEFIT PROVISIONS

The benefit provisions reflected in these valuations are those which were in effect on June 30, 2023. House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, and adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances. There were no other material benefit provision changes since the prior valuation.

Board of Trustees November 13, 2023 Page 3

Data

Member data for retired, active and inactive members was supplied as of June 30, 2023, by KPPA staff. The staff also supplied asset information as of June 30, 2023. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data. GRS is not responsible for the accuracy or completeness of the information provided to us by KPPA.

CERTIFICATION

We certify that the information presented herein is accurate and fairly portrays the actuarial position of KERS as of June 30, 2023.

All of our work conforms with generally accepted actuarial principles and practices, and is in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of Kentucky Code of Laws and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel, Roeder, Smith & Company

Daniel J. White, FSA, EA, MAAA Senior Consultant

Krysti Kiesel, ASA, MAAA Senior Analyst and Actuary

Janie Shaw, ASA, EA, MAAA Consultant

Summary of Principal Results

(Dollar amounts expressed in thousands)

¹ Reflects contribution rate payable as a percentage of covered payroll. For the non-hazardous fund, this includes the normal cost portion of the contribution requirement only.

For the hazardous fund, this includes both the normal cost and unfunded liability portion of the contribution requirement.

¹ Contribution rates calculated with the June 30, 2023 valuation are effective for fiscal years ending June 30, 2025 and June 30 2026.

Kentucky Employees Retirement SystemSection 1Actuarial Valuation – June 30, 2023

2

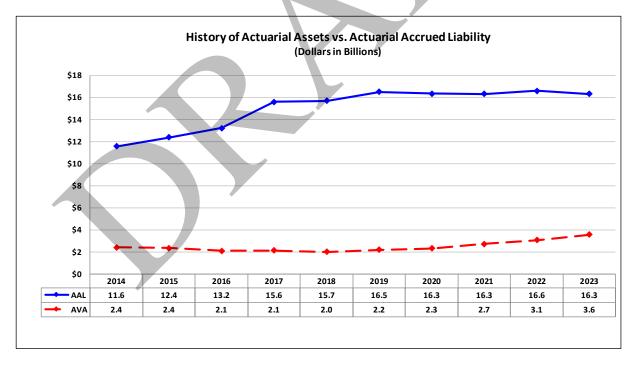

Executive Summary (Continued)

Non-Hazardous Retirement Fund

The unfunded actuarial accrued liability of the non-hazardous retirement fund decreased by \$760 million since the prior year's valuation to \$12.752 billion. This decrease was approximately \$251 million more than expected, primarily due to lower liabilities due to the assumption changes based on the 2022 experience study. The decrease in the liability due to the assumption changes was offset by liability losses as a result of salary increases for individual members being greater than assumed.

For FYE 2023, the non-hazardous retirement fund distributed \$1,049 million in benefit payments and administrative expenses, and received \$1,360 million in employer and employee contributions. As of June 30, 2023, plan assets for this system were \$3,540 million (excluding assets in the 401(h) account). To stabilize the financial condition of this system, it is imperative that contributions to the system continue to exceed the benefit payments.

Below is a chart with the historical actuarial value of assets and actuarial accrued liability. The divergence in the assets and liability at the beginning of the ten-year period was generally due to: (1) actual contributions being insufficient to finance the unfunded actuarial accrued liability, and (2) assumption changes.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Executive Summary (Continued)

Hazardous Retirement Fund

The unfunded actuarial accrued liability of the hazardous retirement fund decreased by \$13 million since the prior year's valuation to \$472 million. This decrease was approximately \$22 million less than expected, primarily due to liability losses as a result of salary increases for individual members being greater than assumed. The increase in the liability due to demographic losses was offset by a decrease in liabilities due to the assumption changes based on the 2022 experience study.

Below is a chart with the historical actuarial value of assets and actuarial accrued liability. The divergence in the assets and liability at the beginning of the ten-year period was generally due to: (1) actual contributions being insufficient to finance the unfunded actuarial accrued liability, and (2) assumption changes.

Executive Summary (Continued)

Summary of Change in Financial Condition of the Insurance Funds

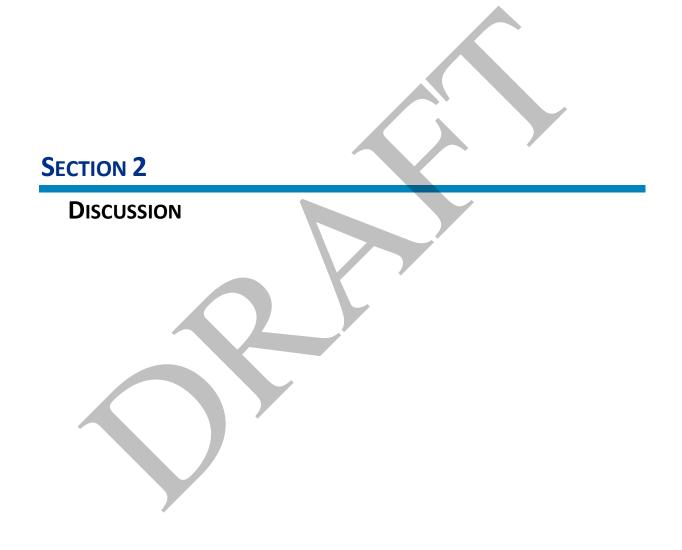

The unfunded actuarial accrued liability of the non-hazardous insurance fund decreased by \$29 million since the prior year's valuation to \$344 million. This decrease was approximately \$57 million less than expected, primarily due to liability losses related to the 2024 premium experience and retiree contribution changes discussed below. The increase in the liability due to demographic losses was offset by a decrease in liabilities due to the assumption changes based on the 2022 experience study.

Similarly, the funding surplus (actuarial accrued liability in excess of assets) of the hazardous insurance fund increased by \$5 million since the prior year's valuation to \$256 million. This increase was approximately \$6 million less than expected.

On average, pre-Medicare premiums were approximately 7% higher than expected and Medicare premiums were approximately 4% lower than expected. In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is also reviewed on an annual basis. The trend assumption for the pre-Medicare Plans was increased in the 2023 actuarial valuation as a result of our review. These changes increased liability for the non-hazardous and hazardous insurance funds by approximately \$38 million and \$13 million, respectively.

Additionally, the Board of Trustees adopted to lower the retiree contribution for the Medicare Advantage plans from \$252.51 to be based on the Humana premiums (\$93.35 as of January 1, 2024). The Board also adopted the Medical Only plan as the KPPA "contribution plan", which further lowered member contributions for those with less than 20 years of service. These changes increased liability for the non-hazardous and hazardous insurance funds by approximately \$123 million and \$14 million, respectively.

Discussion

The Kentucky Employees Retirement System (KERS) is a defined benefit pension plan that provides coverage for employees of state government, non-teaching staff at regional state supported universities, local health departments, regional mental health/mental retardation agencies, and other quasi-state agencies. KERS includes both non-hazardous and hazardous duty benefits. This report presents the results of the June 30, 2023 actuarial funding valuation for both the Retirement Funds and Insurance Funds.

The primary purposes of the valuation report are to describe the current actuarial condition of KERS and provide the actuarially determined employer contributions for fiscal years ending June 30, 2025 and June 30, 2026. In addition, the report analyzes changes in KERS's financial condition, and provides various summaries of the data.

The actuarially determined contribution consist of two components: a normal cost rate and an amortization cost to finance the unfunded actuarial accrued liability. The normal cost rate is the theoretical amount which would be required to pay the members' benefits, based on the current plan provisions, if this amount had been contributed from each member's entry date and if the fund's experience exactly followed the actuarial assumptions. This is the amount that it should cost to provide the benefits for an average member. Since members contribute to the fund, only the excess of the normal cost rate over the member contribution rate is included in the employer contribution. The amortization cost is the amount necessary to amortize the unfunded actuarial accrued liability. The payroll growth rate and discount rate assumptions are selected by the Board. The funding period is specified in Section 61.565 of Kentucky Statute.

All of the actuarial and financial tables referenced by the other sections of this Report appear in Section 3. Section 4 provides additional details related to the calculation of the amortization of the unfunded actuarial accrued liability. Section 5 provides member data and statistical information. Section 6 provides a discussion of various risk measures, which are intended to aid stakeholders in understanding the effects of future experience differing from the assumptions used in performing an actuarial valuation. Appendices A and B provide summaries of the principle actuarial assumptions and methods and plan provisions. Appendix C provides a glossary of technical terms that are used throughout this report. Finally, Appendix D provides the allocation of the amortization cost amongst KERS Non-Hazardous employers in accordance with Statutes enacted with the passing of House Bill 8 during the 2021 legislation session.

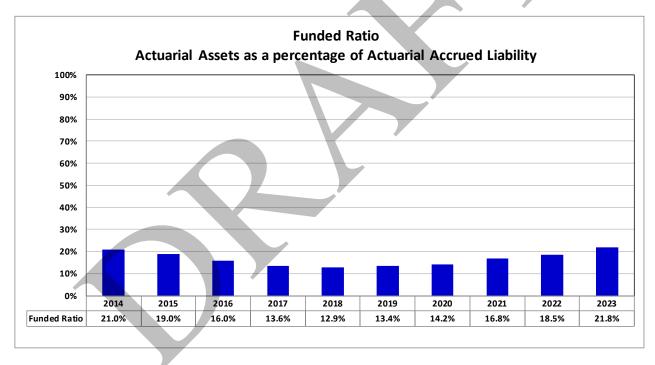

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Funding Progress

The following charts provide a ten-year history of the retirement funds' funded ratio (i.e. the Actuarial Value of Assets divided by the Actuarial Accrued Liability). The decline in the funded ratio in the first half of this ten-year period was generally due to: (1) actual contributions being insufficient to finance the unfunded actuarial accrued liability, and (2) decreases in the assumed rate of return.

The funded ratio has been gradually increasing for the past several years for both the non-hazardous and hazardous funds. Assuming the full actuarially determined contributions are paid in future years and absent material future unfavorable experience, the funded ratio is expected to continue improving. Also, the dollar amount of the unfunded actuarial accrued liability, or the difference between the actuarial accrued liability and the actuarial value of assets, is also expected to continue a decreasing trend. Table 9, Schedule of Funding Progress, in the following section of the report provides additional detail regarding the funding progress of the retirement funds.

Non-Hazardous Retirement Fund

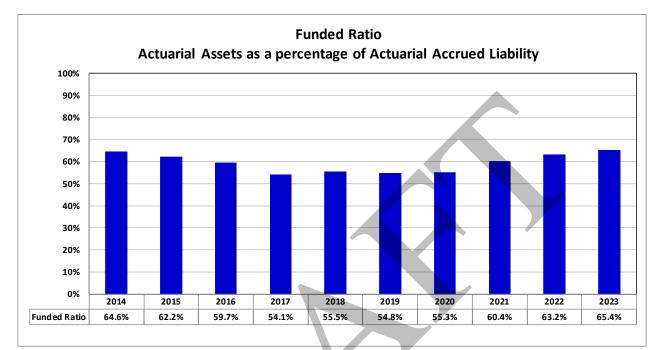

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Funding Progress (Continued)

Hazardous Retirement Fund

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Asset Gains/ (Losses)

The actuarial value of assets ("AVA") is based on a smoothed market value of assets, using a systematic approach to phase-in the difference between the actual and expected investment return on the market value of assets (adjusted for receipts and disbursements during the year). This is appropriate because it dampens the short-term volatility inherent in investment markets. The return is computed net of investment expenses.

Non-Hazardous Retirement Fund

The actuarial value of assets for the retirement fund increased from \$3.065 billion to \$3.552 billion since the prior valuation. The rate of return on the market value of assets on a dollar-weighted basis for the prior fiscal year was 6.8% which is greater than the 5.25% expected annual return. The return on an actuarial (smoothed) asset value was 5.5%, which resulted in a \$8 million gain for the fiscal year. The market value of assets is \$13 million less than the actuarial value of assets, which signifies that the retirement fund is in a position of net deferred investment losses to be realized in future years.

Hazardous Retirement Fund

Likewise, the actuarial value of assets for the hazardous retirement fund increased from \$832 million to \$891 million since the prior valuation. The rate of return on the market value of assets on a dollar-weighted basis for the prior fiscal year was 9.4% which is greater than the 6.25% expected annual return. The return on an actuarial (smoothed) asset value was 6.3%, which resulted in a \$0.7 million gain for the fiscal year. The market value of assets is \$2 million more than the actuarial value of assets, which signifies that the retirement fund is in a position of net deferred investment gains to be realized in future years.

Table 6 in the following section of this report provides asset information that was included in the annual financial statements of the funds, as well as the estimated yield on a market value basis. Tables 7 and 8 provide the development of the actuarial value of assets and the estimated yield on an actuarial value basis.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Actuarial Gains/ (Losses)

The annual actuarial valuation is a snapshot analysis of the benefit liabilities, assets and funded position of the funds as of the first day of the plan year. In any one fiscal year, the experience can be better or worse from that which is assumed or expected. The actuarial assumptions do not necessarily attempt to model what the experience will be for any one given fiscal year, but instead try to model the overall experience over many years. Therefore, as long as the actual experience of a retirement system is reasonably close to the current assumptions, the long-term funding requirements of the system will remain relatively consistent.

Below are tables that separately show a reconciliation of the unfunded liability since the prior actuarial valuation for the retirement and health insurance funds, which include the effect of asset and liability gains and losses, changes in assumptions, and changes in plan provisions. See the discussion in the Executive Summary for additional information related to the liability experience and additional information in this section of the report related to the asset experience, plan changes, and assumption changes.

Actuarial Assumptions and Methods

In determining costs and liabilities, actuaries use assumptions about the future, such as rates of salary increase, probabilities of retirement, termination, death and disability, and an annual investment return assumption. The Board of Trustees, in consultation with the actuary, sets the actuarial assumptions and methods used in the actuarial valuation.

An experience study was conducted after the June 30, 2022 actuarial valuation and the Board adopted updated assumptions for use in this actuarial valuation. The updated assumptions include:

Demographic Assumptions:

- Post-retirement mortality rates were updated based on KPPA experience.
- Mortality improvement assumption was updated to the ultimate rates of the MP-2020 mortality improvement scale.
- Rates of termination prior to retirement were increased based on KERS experience.

• Rates of disability incidence for the non-hazardous fund were decreased based on KERS experience. Economic Assumptions:

- The rate of inflation was increased from 2.30% to 2.50%.
- The salary productivity assumption was reduced by 0.20%, resulting in no change in the salary increase assumption for long-service employees of 3.30% in the non-hazardous fund and 3.55% in the hazardous fund.
- The investment return assumption for each insurance fund was increased from 6.25% to 6.50%.
- The Tier 3 cash balance interest crediting rate assumption was increased to 5.90% for the nonhazardous fund and to 6.75% for the hazardous fund.

In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is reviewed on an annual basis. All other assumptions were adopted by the Board and are based on an experience study conducted based on experience through June 30, 2022. It is our opinion that the assumptions are internally consistent, reasonable, and reflect anticipated future experience of the System. Appendix A includes a summary of the actuarial assumptions and methods used in this valuation.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. This report does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Benefit Provisions

Appendix B of this report includes a summary of the major benefit provisions for System. The following is a summary of the changes in benefits enacted since the last actuarial valuation.

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, with the lump-sum options expanded to include 48 or 60 times the member's monthly retirement allowance. Since this optional form of payment results in a reduced, actuarial equivalent, monthly retirement allowance for members who elect a partial lump-sum option, this provision does not have a fiscal impact to the accrued liability.

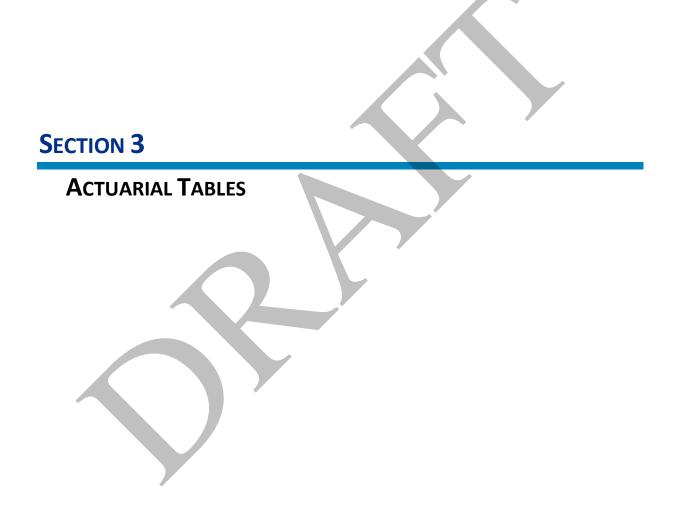

House Bill 506 also adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances for each plan. This is a minimal change for members in the hazardous plan, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members.

Similarly, this is a relatively small change for future retirees in the non-hazardous plan. But as the minimum separation period was previously three months in almost every circumstance, we have assumed that there would be a 1.0% increase in the rate of retirement for each of the first two years a non-hazardous member becomes retirement eligible under the age of 65, in order to reflect a shift in the retirement pattern.

There were no other material plan provision changes since the prior valuation.

Actuarial Valuation – June 30, 2023

Summary of Principal Assumptions and Methods

Below is a summary of the principal economic assumptions, cost method, and the method for financing the unfunded actuarial accrued liability:

| | Non-Hazardous | Hazardous |
|--|---|---|
| Valuation date: | June 30, 2023 | June 30, 2023 |
| Actuarial cost method: | Entry Age Normal | Entry Age Normal |
| Amortization method: | Level percentage of payroll (0% payroll growth assumed) | Level percentage of payroll (0% payroll growth assumed) |
| Amortization period for contribution rate: | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases |
| Asset valuation method: | 5-Year Smoothed Market | 5-Year Smoothed Market |
| Actuarial assumptions: | | |
| Investment rate of return | 5.25% | 6.25% |
| Projected salary increases | 3.30% to 15.30% (varies by service) | 3.55% to 20.05% (varies by service) |
| Inflation | 2.50% | 2.50% |
| Post-retirement benefit adjustments | 0.00% | 0.00% |
| Retiree Mortality | System-specific mortality table based on mortality experience from 2013 to 2022, projected with the ultimate rates from MP-2020 mortality improvement scale using a base year of 2023. | System-specific mortality table based on mortality experience from 2013 to 2022, projected with the ultimate rates from MP-2020 mortality improvement scale using a base year of 2023. |

Note:

Budgeted contribution rates for FYE 2024 were known at the time of the June 30, 2023 Valuation. Amortization bases established at this valuation date were adjusted accordingly.

Per House Bill 8 (passed during the 2021 legislative session), amortization cost for the KERS Non-Hazardous fund is allocated amongst employers based on their 2019 Actuarial Accrued Liability. See appendix D for more information. Amortization cost for the hazardous fund is included in the contribution rate, payable as a percentage of payroll.

¹ 2,423 members receiving benefits in both the non-hazardous and hazardous fund. Members' headcounts and hazardous benefits included in the hazardous summary above. Members' additional \$25,156,000 in non-hazardous annual benefits not included in summary above.

² Vested inactive member section includes Tier 1 members eligible for a benefit equal to the actuarially equivalent of two times the member's contribution balance.

³ Average dollar amounts shown are expressed to the dollar.

Actuarial Valuation – June 30, 2023

SECTION 6

ASSESSMENT AND DISCLOSURE OF RISK

Risks Associated with Measuring the Accrued Liability And Actuarially Determined Contribution (As Required by ASOP No. 51)

The determination of KERS's accrued liability and actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. The risk measures illustrated in this section are intended to aid stakeholders in understanding the effects of future experience differing from the assumptions used in performing an actuarial valuation. These risk measures may also help with illustrating the potential volatility in the funded status and actuarially determined contributions that result from differences between actual experience and the expected experience based on the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience (economic and demographic) differing from the assumptions, changes in assumptions due to changing conditions, changes in contribution requirements due to modifications to the funding policy, and changes in the liability and cost due to changes in plan provisions or applicable law. The scope of this actuarial valuation does not include any analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the System's future financial condition include:

- Investment risk actual investment returns may differ from expected returns;
- Longevity risk members may live longer or shorter than expected and receive pensions for a time period different than assumed;
- Other demographic risks members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future contributions differing from expected;
- Salary and payroll risk actual salaries and total payroll may differ from expected, resulting in actual future accrued liabilities or contributions differing from expected;
- Asset/Liability mismatch changes in assets may be inconsistent with changes in liabilities, thereby altering the relative difference between the assets and liabilities which may alter the funded status and contribution requirements;
- Contribution risk actual contributions may differ from expected future contributions (for example, actual contributions not being paid in accordance with the System's funding policy, withdrawal liability assessments or other anticipated payments to the plan are not being paid, or material changes occurring in the anticipated number of covered employees, covered payroll, or another relevant contribution base).

Effects of certain experience can generally be anticipated. For example, if investment returns since the most recent actuarial valuation are less (or more) than the assumed rate of return, then the funded status of the plan can be expected to decrease (or increase) more than anticipated.

The required contributions in this report were established in accordance with applicable Statutes and assumptions adopted by the Board. However, stakeholders should be aware that the scheduled contributions specified in State Code do not necessarily guarantee that the contribution requirements will not increase in a future year.

Kentucky Employees Retirement SystemSection 6Actuarial Valuation – June 30, 2023

56

Employer Risk with Contribution Rates

Currently contributions for the hazardous fund are collected from participating employers based on the employer's total payroll of employees who are earning benefits in KERS (i.e. covered payroll). The actuarially determined contribution rate is comprised of two components - the normal cost rate (to pay for the benefits accruing in the next year) and the unfunded amortization (to pay for the benefits accrued by members in previous years). The unfunded amortization is calculated by first determining the dollar amount necessary to pay for the unfunded liability based on KERS's funding policy, and then by dividing that dollar amount by expected covered payroll to convert that contribution requirement to a percentage of payroll (i.e. a contribution rate).

As the contribution requirement, as a percentage of payroll, increases then there is increased incentive for participating employers to make deliberate business action to reduce their payroll reported to the System in order to reduce their pension cost. House Bill 8 passed during the 2021 legislative session and changed how the amortization cost would be collected and allocated amongst employers in the non-hazardous fund. This portion of the contribution requirement is no longer collected as a percentage of payroll for the non-hazardous fund.

Plan Specific Risk Measures

Risks faced by a pension plan evolve over time. A relatively new plan with virtually no assets and paying few benefits will experience lower investment risk than a mature plan with a significant amount of assets and large number of members receiving benefits. There are a few measures that can assist stakeholders in understanding and comparing the maturity of a plan to other systems, which include:

- <u>Ratio of market value of assets to payroll</u>: The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. If assets are approximately the same as covered payroll, an investment return that is 5% different than assumed would equal 5% of payroll. In another example, if the assets are approximately twice as large as covered payroll, an investment return that is 5% different than assumed would equal 10% of payroll. A ratio that increases over time generally indicates the potential of an increasing volatility in employer contribution rates as a percentage of payroll.
- <u>Ratio of actuarial accrued liability to payroll</u>: The ratio of actuarial accrued liability to payroll can be used as a measure to indicate the potential volatility of contributions due to volatility in the liability experience. For instance, if the actuarial accrued liability is 5 times the size of the covered payroll, then a change in the liability that is 2% different than expected would be a change in magnitude that is 10% of payroll. A ratio that increases over time generally indicates the potential of an increasing volatility in employer contribution rates as a percentage of payroll.
- <u>Percentage of Expected Contributions Actually Received</u>: This measure identifies the percentage difference between the contributions the fund expects to receive during the fiscal year to and actual contributions received by the fund during the fiscal year. A percentage that is less than 100% means that actual contributions the fund received were less than the expected contributions determined by a prior actuarial valuation. On the other hand, a percentage that is greater than 100% means that actual contributions the fund received were more than the expected contributions.

• <u>Ratio of active to retired members</u>: A relatively mature open plan is likely to have close to the same number of actives to retirees resulting in a ratio that is around 1.0. On the other hand, a super-mature plan, or a plan that is closed to new entrants will have more retirees than active members resulting in a ratio below 1.0. As this ratio declines, a larger portion of the total actuarial accrued liability in the System is attributable to retirees. This metric also typically moves in tandem with the liability to payroll metric, which provides an indication of potential contribution volatility.

The following tables provide a summary of these measures for KERS Non-Hazardous and Hazardous Funds for the current year and the prior four years so stakeholders can identify how these measures are trending. While ASOP No. 51 requires this disclosure with respect to only the retirement funds, we have included this information for the insurance funds for completeness.

and expected compensation based on census data from the June 30, 2022 valuation. As of the 2018 valuation (FYE2020),

the required employer contribution was 0% of pay for the insurance fund.

Low-Default-Risk Obligation Measure

Introduction

In December 2021, the Actuarial Standards Board (ASB) adopted a revision to Actuarial Standard of Practice (ASOP) No. 4, Measuring Pension Obligations and Determining Pension Plan Costs or Contributions. The revised ASOP No. 4 requires the calculation and disclosure of a liability referred to by the ASOP as the "Low-Default-Risk Obligation Measure" (LDROM). The rationale that the ASB cited for the calculation and disclosure of the LDROM was included in the Transmittal Memorandum of ASOP No. 4 and is presented below (emphasis added):

"The ASB believes that the calculation and disclosure of this measure provides appropriate, useful information for the intended user regarding the funded status of a pension plan. The calculation and disclosure of this additional measure is not intended to suggest that this is the "right" liability measure for a pension plan. However, the ASB does believe that this additional disclosure provides a more complete assessment of a plan's funded status and provides additional information regarding the security of benefits that members have earned as of the measurement date."

Comparing the Accrued Liabilities and the LDROM

One of the fundamental financial objectives of the Kentucky Employees' Retirement System (KERS) is to finance each member's retirement benefits over the period from the member's date of hire until the member's projected date of retirement (entry age actuarial cost method) as a level percentage of payroll. To fulfill this objective, the discount rate that is used to value the accrued liabilities is set equal to the **expected return** on each fund's diversified portfolio of assets (referred to sometimes as the investment return assumption). For the non-hazardous retirement fund, the investment return assumption is 5.25%. For the hazardous retirement fund, the investment return assumption is 6.25%.

The LDROM is meant to approximately represent the lump sum cost to a plan to purchase low-default-risk fixed income securities whose resulting cash flows essentially replicate in timing and amount the benefits earned (or the costs accrued) as of the measurement date. The LDROM is very dependent upon market interest rates at the time of the LDROM measurement. The lower the market interest rates, the higher the LDROM, and vice versa. The LDROM results presented in this report are based on the entry age actuarial cost method and discount rates based upon the intermediate rate from the FTSE Pension Discount Curve and Liability Index published by the Society of Actuaries. This rate is 4.90% as of June 30, 2023. This measure may not be appropriate for assessing the need for or amount of future contributions. This measure may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligation.

The difference between the two measures (Valuation and LDROM) is one illustration of the savings the sponsor anticipates by taking on risk in a diversified portfolio.

| Non-Hazardous Retirement Fund | | | Hazardous Retirem | nent Fund |
|-------------------------------|------------------|--|-------------------------------|-----------------|
| Valuation Accrued Liabilities | LDROM | | Valuation Accrued Liabilities | LDROM |

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

APPENDIX A

ACTUARIAL ASSUMPTIONS AND METHODS

Summary of Actuarial Methods and Assumptions

The following presents a summary of the actuarial assumptions and methods used in the valuation of the Kentucky Employees Retirement System.

In general, the assumptions and methods used in the valuation are based on the actuarial experience study as of June 30, 2022 and adopted by the Board in June 2023.

Investment return rate:

Assumed annual rate of 5.25% net of investment expenses for the non-hazardous retirement fund

Assumed annual rate of 6.25% net of investment expenses for the hazardous retirement fund Assumed annual rate of 6.50% net of investment expenses for the insurance funds

Price Inflation:

Assumed annual rate of 2.50%

Payroll Growth Assumption (used for amortization of unfunded accrued liabilities):

Assumed annual rate of 0.00%

Rates of Annual Salary Increase:

Assumed rates of annual salary increases are shown below.

| | | | Annual Rates | of Salary | | |
|------------------|---------------|-----------|-------------------|--------------|---------------|-----------|
| Service Years | Merit & Sen | niority | Price Inflation & | Productivity | Total Incr | ease |
| | Non-Hazardous | Hazardous | Non-Hazardous | Hazardous | Non-Hazardous | Hazardous |
| 0 | 12.00% | 16.50% | 3.30% | 3.55% | 15.30% | 20.05% |
| 1 | 3.50% | 4.00% | 3.30% | 3.55% | 6.80% | 7.55% |
| 2 | 2.75% | 3.00% | 3.30% | 3.55% | 6.05% | 6.55% |
| 3 | 2.50% | 3.00% | 3.30% | 3.55% | 5.80% | 6.55% |
| 4 | 2.00% | 2.00% | 3.30% | 3.55% | 5.30% | 5.55% |
| 5 | 1.50% | 1.50% | 3.30% | 3.55% | 4.80% | 5.05% |
| 6 | 1.25% | 1.00% | 3.30% | 3.55% | 4.55% | 4.55% |
| 7 | 1.00% | 0.50% | 3.30% | 3.55% | 4.30% | 4.05% |
| 8 | 0.75% | 0.50% | 3.30% | 3.55% | 4.05% | 4.05% |
| 9 | 0.50% | 0.00% | 3.30% | 3.55% | 3.80% | 3.55% |
| 10 | 0.50% | 0.00% | 3.30% | 3.55% | 3.80% | 3.55% |
| 11 & Over | 0.00% | 0.00% | 3.30% | 3.55% | 3.30% | 3.55% |

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023 Appendix A 61

Retirement rates:

Assumed annual rates of retirement are shown below. Rates are only applicable for members who are eligible for a service retirement.

| | | Non-Haz | ardous | | | | Ha | azardous | |
|----------|---------------|---------|--------|--------------------------|---------|------------------------------|---------|---|-----------------------------------|

| 73 | 30.0% | 33.0% | | | | | | | |
| 74 | 30.0% | 33.0% | | | | | | | |
| 75 | 100.0% | 100.0% | | | | | | | |

¹ The annual rate of retirement is 12% for male members and 14% for female members with 25-26 years of service.

² The annual rate of retirement is 100% at age 65.

³ The annual rate of retirement is 100% at age 60.

Non-Hazardous: There is a 1% increase in the first two years a member becomes eligible under the age of 65. For members hired after 7/1/2003, the rates shown above are multiplied by 80% if the member is under age 65 to reflect the different retiree health insurance benefit. Hazardous: For members hired after 7/1/2003 and prior to 9/1/2008, the rates shown above are multiplied by 80% if the member is under age 65 to reflect the different retiree health insurance benefit.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Disability rates:

An abbreviated table with assumed rates of disability is shown below.

| | Non-Hazardous | | Haza | rdous |
|-----|---------------|--------|-------|--------|
| Age | Male | Female | Male | Female |
| 20 | 0.03% | 0.03% | 0.05% | 0.05% |
| 30 | 0.05% | 0.05% | 0.08% | 0.08% |
| 40 | 0.11% | 0.11% | 0.18% | 0.18% |
| 50 | 0.31% | 0.31% | 0.50% | 0.50% |
| 60 | 0.80% | 0.80% | 1.32% | 1.32% |

Withdrawal rates (for causes other than disability and retirement):

Assumed annual rates of withdrawal are shown below and include pre-retirement mortality rates as described on the next page.

| Service | Annual Rates of | f Withdrawal |
|-----------|-----------------|--------------|
| Years | Non-Hazardous | Hazardous |
| 1 | 22.00% | 32.50% |
| 2 | 18.10% | 25.58% |
| 3 | 14.73% | 19.66% |
| 4 | 12.77% | 16.19% |
| 5 | 11.37% | 13.73% |
| 6 | 10.29% | 11.82% |

| 25 | 2.67% | 0.00% |
| 26 & Over | 0.00% | 0.00% |

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Mortality Assumption:

Pre-retirement mortality: PUB-2010 General Mortality table, for the non-hazardous funds, and the PUB-2010 Public Safety Mortality table for the hazardous funds, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

Post-retirement mortality (non-disabled): System-specific mortality table based on mortality experience from 2013-2022, projected with the ultimate rates from MP-2020 mortality improvement scale using a base year of 2023.

The following table provides the life expectancy for a non-disabled retiree in future years based on the assumption with full generational projection:

| | Life Expectancy for an Age 65 Retiree in Years | | | | | |
|--------|--|--------------------|------|------|------|--|
| Gender | | Year of Retirement | | | | |
| | 2025 | 2030 | 2035 | 2040 | 2045 | |
| Male | 19.8 | 20.2 | 20.6 | 21.0 | 21.3 | |
| Female | 22.4 | 22.7 | 23.1 | 23.4 | 23.7 | |

Post-retirement mortality (disabled): PUB-2010 Disabled Mortality table, with rates multiplied by 150% for both male and female rates, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

Marital status:

100% of employees are assumed to be married, with the female spouse 3 years younger than the male spouse.

Line of Duty/Duty-Related Disability

Non-Hazardous: 2% of disabilities are assumed to be duty-related (100% of which are assumed to be "total and permanent")

Hazardous: 10% of disabilities are assumed to occur in the line of duty (10% of which are assumed to be "total and permanent")

Line of Duty Death

25% of deaths are assumed to occur in the line of duty

Dependent Children:

For members in the Hazardous Plan who receive a duty-related death or disability benefit, the member is assumed to be survived by two dependent children, each age 6 with payments for 15 years.

Kentucky Employees Retirement System Appen Actuarial Valuation – June 30, 2023

Form of Payment:

Members are assumed to elect a life-only annuity at retirement.

Actuarial Cost Method:

Entry Age Normal, Level Percentage of Pay. The Entry Age Normal actuarial cost method allocates the System's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of pay necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

Health Care Age Related Morbidity/Claims Utilization:

To model the impact of aging on the underlying health care costs for Medicare retirees, the valuation relied on the Society of Actuaries' 2013 Study "Health Care Costs – From Birth to Death". Table 4 (Development of Plan Specific Medicare Age Curve) was used to model the impact of aging for ages 65 and over.

| Year | Non-Medicare Plans ¹ | Medicare Plans ¹ | Dollar Contribution ² |
|---------------|------------------------------------|--------------------------------|-------------------------------------|
| 2025 | 6.80% | 8.50% | 1.50% |
| 2026 | 6.55% | 8.00% | 1.50% |
| 2027 | 6.30% | 8.00% | 1.50% |
| 2028 | 6.05% | 8.00% | 1.50% |
| 2029 | 5.80% | 7.50% | 1.50% |
| 2030 | 5.55% | 7.00% | 1.50% |
| 2031 | 5.30% | 6.50% | 1.50% |
| 2032 | 5.05% | 6.00% | 1.50% |
| 2033 | 4.90% | 5.50% | 1.50% |
| 2034 | 4.75% | 5.00% | 1.50% |
| 2035 | 4.60% | 4.50% | 1.50% |
| 2036 | 4.45% | 4.05% | 1.50% |
| 2037 | 4.30% | 4.05% | 1.50% |
| 2038 & Beyond | 4.05% | 4.05% | 1.50% |

Health Care Cost Trend Rates:

¹All increases are assumed to occur on January 1. The 2024 premiums were known at the time of the valuation and were incorporated into the liability measurement. ²Applies to members participating on or after July 1, 2003. All increases are assumed to occur on July 1.

Health care trend assumptions are based on the model issued by the Society of Actuaries "Getzen model of Long-Run Medical Cost Trends for the SOA; Thomas E. Getzen, iHEA and Temple University 2014 © Society of Actuaries.

The underlying assumptions used to develop the health care trend rates include:

- A short run period-this is a period for which anticipated health care trend rates are manually set based on local information as well as plan-specific and carrier information.
- Long term real GDP growth 1.75%
- Long term rate of inflation 2.30%
- Long term nominal GDP growth 4.05%
- Year that excess rate converges to 0 2036

Health care trend rates are thus the manually set rates for the short run period and rates which decline to an ultimate trend rate which equals the assumed nominal long-term GDP growth rate.

Health Care Participation Assumptions:

• Active members are assumed to elect health coverage at retirement at the following participation rates.

| | Service at Retirement | Members participating before 7/1/2003* | Members participating after 7/1/2003 |
|---|--------------------------|---|---|
| - | Under 10 | 50% | 100% |
| | 10-14 | 75% | 100% |
| | 15-19 | 90% | 100% |
| | Over 20 | 100% | 100% |

* 100% of members with a duty disability or a duty death (in service) benefit are assumed to elect coverage at retirement.

• Future retirees are assumed to have a similar distribution by plan type as the current retirees.

| Medicare Plan | Participation Percentage | Non-Medicare Plan | Participation Percentage |
|---------------------------|-----------------------------|-------------------|-----------------------------|
| Medical Only ¹ | 5% | LivingWell Basic | 4% |
| Essential Plan | 8% | LivingWell CDHP | 35% |
| Premium Plan | 87% | LivingWell PPO | 61% |
| 1 | | | |

¹Includes Mirror Plans

- 50% of deferred vested members participating before July 1, 2003 are assumed to elect health coverage at retirement. 100% of deferred vested members participating after July 1, 2003 are assumed to elect health coverage at retirement.
- Deferred vested members receiving insurance benefits from the non-hazardous fund are assumed to begin health coverage at age 55 for members participating before September 1, 2008, at age 60 for members participating on or after September 1, 2008 but before January 1, 2014, and at age 65 for members participating on or after January 1, 2014.
- Deferred vested members receiving insurance benefits from the hazardous fund are assumed to begin health coverage at age 50 for members participating before January 1, 2014 and at age 60 for members participating on or after January 1, 2014.
- 50% of future retirees, with hazardous service, are assumed to elect spouse health care coverage. No dependent coverage is assumed for members who only have non-hazardous service. 100% of spouses with health care coverage are assumed to continue coverage after the member's death.

Other Assumptions

- 1. Valuation payroll (used for determining the amortization contribution rate): Current fiscal year payroll.
- Individual salaries used to project benefits: For salary amounts prior to the valuation date, the salary from the last fiscal year is projected backward with the valuation salary scale assumption. For future salaries, the salary from the last fiscal year is projected forward with one year's salary scale.
- 3. Pay increase timing: Beginning of (fiscal) year. This is equivalent to assuming that reported salaries represent amounts paid to members during the year ending on the valuation date.
- 4. Current active members that terminated employment (for reasons other than retirement, disability, or death) are assumed to commence their retirement benefits at first unreduced retirement eligibility. Members are assumed to elect a refund of member contributions if the value of their account balance exceeds the present value of the deferred benefit. Members participating in the Cash Balance plan are assumed to elect to receive a lump sum of their cash balance account if their account balance exceeds the present value of the deferred benefit and the member is not eligible for insurance benefits at termination.
- 5. The beneficiaries of current active members that die while active are assumed to commence their survivor benefits at the member's first unreduced retirement eligibility. Beneficiaries are assumed to elect a refund of member contributions if the value of the member's account balance exceeds the present value of the survivor benefit. Beneficiaries of active members that die while in the line of duty are assumed to commence their survivor benefits immediately at the death of the member.
- 6. There will be no recoveries once disabled.
- 7. Cash Balance Provisions: The cash balance interest crediting rate while a member is an active employee is assumed to equal 5.90% for the non-hazardous fund and 6.75% for the hazardous fund. The interest crediting rate after a member terminates employment is 4% for all plans.
- 8. Decrement timing: Decrements of all types are assumed to occur mid-year. Decrement rates are used as described in this report, without adjustment for multiple decrement table effects.
- 9. Service: All members are assumed to accrue 1 year of benefit and eligibility service each year.
- 10. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- 11. Incidence of Contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
- 12. Current Inactive Population (Retirement Funds): All non-vested members are assumed to take an immediate refund of member contributions. Vested members are assumed to elect an immediate refund of member contributions at the valuation date if the value of their

account balance exceeds the present value of their deferred benefit. Non-hazardous members are assumed to retire at age 65. Hazardous members hired prior to September 1, 2008 are assumed to retire at age 55 and hazardous members hired on or after September 1, 2008 are assumed to retire at age 60.

13. The additional \$5 per year of service insurance dollar subsidy effective January 1, 2023 is assumed to be paid in all applicable years.

Participant Data

Participant data was supplied in electronic text files. There were separate files for (i) active and inactive members, and (ii) members and beneficiaries receiving benefits.

The data for active and terminated members included date of birth, gender, date of participation, benefit tier indicator, service with the current system, total vesting service, salary, employee contribution account balances, and employer pay credits for members participating in the cash balance plan. For retired members and beneficiaries, the data included date of birth, gender, spouse's date of birth (where applicable), amount of monthly benefit, date of retirement, and form of payment code.

Assumptions were made to correct for missing, bad, or inconsistent data. These had no material impact on the results presented.

Changes in assumptions since the prior valuation:

Demographic and economic assumptions were updated based on the 2022 Experience Study.

A 1% increase in the rate of retirement for each of the first two years a non-hazardous member becomes retirement eligible under the age of 65 is assumed to reflect the shift in retirement pattern due to House Bill 506.

In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is reviewed on an annual basis. The trend assumption was increased during the select period in this valuation as a result of our review.

Development of Baseline Claims Cost

For non-Medicare retirees, the initial per capita costs were based on the plan premiums effective January 1, 2024, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. The spouse/dependent premium of \$1,129.72 for non-Medicare retirees is based on a blending of Family and Couple premiums for the current retirees that have over 4 years of hazardous service. The fully-insured premiums paid to the Kentucky Employees' Health Plan (KEHP) are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit rate subsidy for the non-Medicare eligible retirees. Actuarial Standard of Practice No. 6 (ASOP No. 6) requires aging subsidies (or implicit rate subsidies) to be recognized. However, the health insurance trusts are only used to reimburse KEHP for the employer's portion of the blended premiums. Said another way, the trusts are not used to fund the difference between the underlying retiree claims and the blended KEHP premiums. As a result, the retiree health care liabilities developed in this report for the non-Medicare retirees are based solely on the premiums charged by KEHP, without any age-adjustment. GASB Statements No. 74 and No. 75 prohibit such a deviation from ASOP No. 6. The liabilities developed in this report are solely for the purpose of funding the benefits paid by the health insurance funds and are not appropriate for financial statement disclosures required by GASB. GRS provides separate GASB reports which include the liabilities associated with the implicit rate subsidy.

| 2024 MONTHLY COSTS FOR THOSE NOT ELIGIBLE FOR MEDICARE | | | | |
|--|----------|-------------------|--|--|
| Age | Member | SPOUSE/DEPENDENTS | | |
| <65 | \$929.46 | \$1,129.72 | | |
| | 40-01-0 | +=,====== | | |

For Medicare retirees, the initial per capita costs were estimated based on the plan premiums effective January 1, 2024, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. Age graded and sex distinct premiums are utilized for retirees over the age of 65. These costs are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process "distributes" the average premium over all age/sex combinations and assigns a unique premium for each combination. The age/sex specific costs more accurately reflect the health care utilization and cost at that age.

| 2024 MONTHLY COSTS FOR THOSE ELIGIBLE FOR MEDICARE | | |
|--|----------|----------|
| Age | Male | Female |
| 65 | \$ 81.35 | \$ 76.72 |
| 75 | 95.18 | 92.87 |
| 85 | 100.65 | 101.83 |

Appendix B of the report provides a full schedule of premiums.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023 The percentage of the insurance premium paid by KERS is calculated based on the Medical Only premium amounts. The majority of KERS Medicare retirees are covered under the Premium Medicare Advantage plan. Because the premiums for the Medical Only plan are higher than the Premium Medical Advantage plan, retirees with less than 20 years of service pay a smaller contribution toward their insurance coverage. To model the impact of the employer contribution being based on the Medical Only Plan rather than the plan selected by the retiree, the employer share for retirees qualifying for percentage-based subsidies was blended to reflect retiree plan selection.

The above assumption implicitly implies that the Medical Only plan premiums will increase at a rate of 4.90% as of January 1, 2024, decreasing over 9 years to an ultimate trend rate of 4.05%, and that the remaining Medicare plan premiums will increase at the Medicare trend assumption used in the actuarial valuation.

| Eligibility | Any age with at least 27 years of service |
| | |
| Benefit Amount | If a member has at least 48 months of service, the monthly benefit is 2.00% times final average compensation times years of service. For members who did not have 13 months of service credit for 1/1/1998-1/1/1999, the monthly benefit is 1.97% times final average compensation times years of service. |
| | If a member has less than 48 months of service, the monthly benefit is the actuarial equivalent of two times the member's contributions with interest. |
| | Final average compensation is based on the member's highest 5 years of compensation. |
| Early Retirement | Any age (prior to age 65) with at least 25 years of service; or |
| Eligibility | Age 55 with at least 5 years of service |
| Early Retirement | |
| Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years and |
| | 4.5% per year for the next five years for each year the member's retirement eligibility precedes the member's normal retirement date. |
| | |

Retirement: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Normal Retirement | Age 65 with at least 5 years of service; or |
|-------------------|--|
| Eligibility | Rule of 87 (Age 57 or older if age plus service equals 87) |

Benefit Amount The monthly benefit is equal to the applicable benefit multiplier times final average compensation times years of service.

| Years of Service | Benefit Multiplier |
|------------------|--------------------|
| 10 or less | 1.10% |
| 10-20 | 1.30% |
| 20-26 | 1.50% |
| 26-30 | 1.75% |
| Greater than 30* | 2.00% |

* The 2.00% benefit multiplier only applies to service credit in excess of 30 years. If a member has greater than 30 years of service at retirement, service prior to 30 years will be multiplied by the 1.75% benefit multiplier.

Final compensation is based on the member's last 5 years of compensation.

| Early Retirement Eligibility | Age 60 with at least 10 years of service |
|---------------------------------|---|
| Early Retirement Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years |
| | and 4.5% per year for the next five years for each year the member's retirement date precedes the member's normal retirement eligibility. |

Retirement: Tier 3, Participation on or after 1/1/2014

| Normal Retirement Eligibility | Age 65 with at least 5 years of service; or Rule of 87 (Age 57 or older if age plus service equals 87) |
|----------------------------------|--|
| Benefit Amount | Each year that the member is active, a 4.00% employer pay credit and the employee's 5.00% contribution will be credited to each member's hypothetical cash balance account. The hypothetical account will earn interest at a minimum rate of 4%, annually. If the System's geometric average net investment return for the previous five years exceeds 4%, then the hypothetical account will be credited with an additional amount of interest in that year equal to 75% of the amount of the return which exceeds 4%. All interest credits will be applied to the hypothetical account balance on June 30 based on the account balance as of June 30 of the previous year. |
| | At retirement, the member's hypothetical account balance may be converted into an annuity based on an actuarial factor. |
| Early Retirement Eligibility | N/A |

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Deferred Vested Benefit: Tier 1, Participation before 9/1/2008

| Eligibility | At least 1 month of service credit |
|----------------|---|
| Benefit Amount | Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age |

Deferred Vested Benefit: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Eligibility | 5 years of service |
|----------------|---|
| Benefit Amount | Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age |

Deferred Vested Benefit Tier 3, Participation on or after 1/1/2014

| Eligibility | 5 years of service |
|----------------|--|
| Benefit Amount | At termination of employment, members may choose to leave their account balance with the System and retire once they are eligible. The hypothetical account balance will earn 4% annual interest after termination. Members may also choose to withdrawal their entire accumulated balance. If a member does not have 5 years of service at termination, the member is eligible to receive a partial refund of their account balance. This refund includes the member's contributions with interest. |

Disability Retirement: Participation before 8/1/2004

| Eligibility | 60 months of service (requirement is waived if line of duty disability) |
|--------------------|--|
| Disability Benefit | Disability benefits are calculated in the same manner as the normal retirement benefit with years of service and final compensation being determined as of the date of disability, except that service credit shall be added to the person's total service beginning with the last date of paid employment and continuing to the member's 65 th birthday, with total service not exceeding 25 years. Total service credit added shall not be greater than the member's actual service at disability. For members with at least 25 years of service on the last day of paid employment but less than 27 years of service, total service shall be 27 years. For members with 27 or more years of service credit, actual service will be used. |

Disability Retirement: Participation on or after 8/1/2004 but before 1/1/2014

| Eligibility | 60 months of service (requirement is waived if line of duty disability) |
|----------------------------------|---|
| Disability Benefit | The higher of 20% of the member's final monthly rate of pay or the member's normal retirement benefit (without reduction for early retirement) with years and final compensation being determined as of the date of disability. |
| Disability Retirement: Participa | tion on or after 1/1/2014 |
| Eligibility | 60 months of service (requirement is waived if line of duty disability) |
| Disability Benefit | The higher of 20% of the member's final monthly rate of pay or the member's retirement benefit calculated at the member's normal retirement date. |
| Duty-Related Disability Benefit | |
| Disability Benefit | If the disability is a direct result of an act in the line of duty, the benefit shall not be less than 25% of the member's final monthly final rate of pay. If the disability is deemed to be Total and Permanent (and the member is working in a non-hazardous position that could be certified as a hazardous position), then this benefit shall not be less than 75% of the member's monthly average pay. |
| Child Benefit | Additionally, each eligible dependent child will receive 10% of the member's monthly average pay up to a maximum of 40%. Member and dependent payment shall not exceed 100% of member's monthly average pay. |
| Pre-Retirement Death Benefit | |
| Eligibility | Eligible for early or normal retirement; or Under age 65 with at least 60 months of service and actively working at the time of death; or At least 144 months of service, if no longer actively working |
| Spouse Benefit | The member's retirement benefit calculated in the same manner as if the member had retired on the day of the member's death and elected a 100% joint and survivor benefit. The benefit is actuarially reduced if the member dies prior to their normal retirement age. |

Pre-Retirement Death Benefit (Death in the Line of Duty)

| Eligibility | One month of service credit |
|--|--|
| Spouse Benefit | A \$10,000 lump sum payment plus a monthly payment of 75% of the deceased member's final monthly average pay. Each dependent child will receive 10% of the final monthly average pay (not to exceed a total child benefit of 25% while the spouse is alive). A spouse may also elect the non-line of duty death benefit. |
| Child Benefit | In the event there is no surviving spouse, the benefit is 50% of final monthly average pay for one child, 65% of final monthly average pay for two children, or 75% of final monthly average pay for three or more eligible children. |
| Post-Retirement Death Benefit | |
| Eligibility | 48 months of service, and in receipt of retirement benefits |
| Death Benefit | A \$5,000 lump sum payment |
| Member Contributions | |
| Tier 1, Participation before 9/1/2008 | 5% of creditable compensation. Members who do not receive a retirement |
| | benefit are entitled to a full refund of contributions with interest. The annual interest rate is set by the Board, not less than 2.0%. |
| Tier 2, Participation on or after $9/1/2008$ | |
| Tier 2, Participation on or after 9/1/2008 but before 1/1/2014 | |
| on or after 9/1/2008 | annual interest rate is set by the Board, not less than 2.0%. 5% of creditable compensation plus 1% of creditable compensation, which is deposited into the 401(h) account and is not refundable. Members who do not receive a retirement benefit are entitled to a refund of non-401(h) |

Change in Retirement Plan Benefits for Non-Hazardous Members since the Prior Valuation

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, and adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances.

KERS Hazardous Employees

Retirement: Tier 1, Participation before 9/1/2008

| Normal Retirement Eligibility | Age 55 with at least 1 month of service credit; or Any age with at least 20 years of service |
|----------------------------------|--|
| Benefit Amount | If a member has at least 60 months of service, the monthly benefit is 2.49% times final average compensation times years of service. |
| | If a member has less than 60 months of service, the monthly benefit is the actuarial equivalent of two times the member's contributions with interest. |
| | Final average compensation is based on the member's highest 3 years of compensation. |
| Early Retirement Eligibility | Age 50 with at least 15 years of service |
| Early Retirement Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years and 4.5% per year for the next five years for each year the member's retirement date precedes the member's normal retirement eligibility. |
| | |

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Retirement: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Normal Retirement | Age 60 with at least 5 years of service; or |
|-------------------|---|
| Eligibility | Any age with at least 25 years of service |

Benefit Amount The monthly benefit is equal to the applicable benefit multiplier times final average compensation times years of service.

| Years of Service | Benefit Multiplier |
|------------------|--------------------|
| 10 or less | 1.30% |
| 10-20 | 1.50% |
| 20-25 | 2.25% |
| Greater than 25 | 2.50% |

Final average compensation is based on the member's highest 3 years of compensation.

| Early Retirement Eligibility | Age 50 with at least 15 years of service |
|---------------------------------|--|
| Early Retirement Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years and 4.5% per year for the next five years for each year the member's retirement date precedes the member's normal retirement eligibility. |

Retirement: Tier 3, Participation on or after 1/1/2014

| Normal Retirement Eligibility | Age 60 with at least 5 years of service; or Any age with at least 25 years of service |
|----------------------------------|--|
| Benefit Amount | Each year that the member is active, a 7.50% employer pay credit and the employee's 8.00% contribution will be credited to each member's hypothetical cash balance account. The hypothetical account will earn interest at a minimum rate of 4%, annually. If the System's geometric average net investment return for the previous five years exceeds 4%, then the hypothetical account will be credited with an additional amount of interest in that year equal to 75% of the amount of the return which exceeds 4%. All interest credits will be applied to the hypothetical account balance on June 30 based on the account balance as of June 30 of the previous year. |
| | At retirement, the member's hypothetical account balance may be converted into an annuity based on an actuarial factor. |
| Early Retirement Eligibility | N/A |

Deferred Vested Benefit: Tier 1, Participation before 9/1/2008

| Eligibility | At least 1 month of service credit |
|----------------|---|
| Benefit Amount | Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age |

Deferred Vested Benefit: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Eligibility | 5 years of service |
|----------------|---|
| Benefit Amount | Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age |

Deferred Vested Benefit Tier 3, Participation on or after 1/1/2014

| Eligibility | 5 years of service |
|----------------|--|
| Benefit Amount | At termination of employment, members may choose to leave their account balance with the System and retire once they are eligible. The hypothetical account balance will earn 4% annual interest after termination. Members may also choose to withdrawal their entire accumulated balance. If a member does not have 5 years of service at termination, the member is eligible to receive a partial refund of their account balance. This refund includes the member's contributions with interest. |

Disability Retirement: Participation before 8/1/2004

| Eligibility | 60 months of service (requirement is waived if line of duty disability) |
|--------------------|--|
| Disability Benefit | Disability benefits are calculated in the same manner as the normal retirement benefit with years of service and final compensation being determined as of the date of disability, except that if the member has less than 20 years of service at disability, service credit shall be added to the person's total service beginning with the last date of paid employment and continuing to the member's 55 th birthday, with total service not exceeding 20 years. Total service credit added shall not be greater than the member's actual service at disability. |

Disability Retirement: Participation on or after 8/1/2004 but before 1/1/2014

| Eligibility | 60 months of service (requirement is waived if line of duty disability) | | |
|----------------------------------|---|--|--|
| Disability Benefit | The higher of 25% of the member's final monthly rate of pay or the member's normal retirement benefit (without reduction for early retirement) with years and final compensation being determined as of the date of disability. | | |
| Disability Retirement: Participa | tion on or after 1/1/2014 | | |
| Eligibility | 60 months of service (requirement is waived if line of duty disability) | | |
| Disability Benefit | The higher of 25% of the member's final monthly rate of pay or the member's retirement benefit calculated at the member's normal retirement date. | | |
| Line of Duty Disability Benefit | | | |
| Disability Benefit | If the disability is a direct result of an act in the line of duty, the benefit shall not be less than 25% of the member's final monthly final rate of pay. If the disability is deemed to be Total and Permanent, then this benefit shall not be less than 75% of the member's monthly average pay. | | |
| Child Benefit | Additionally, each eligible dependent child will receive 10% of the member's monthly average pay up to a maximum of 40%. Member and dependent payment shall not exceed 100% of member's monthly average pay. | | |
| Pre-Retirement Death Benefit | | | |
| Eligibility | Eligible for early or normal retirement; or Under age 55 with at least 60 months of service and actively working at the time of death; or At least 144 months of service, if no longer actively working | | |
| Spouse Benefit | The member's retirement benefit calculated in the same manner as if the member had retired on the day of the member's death and elected a 100% joint and survivor benefit. The benefit is actuarially reduced if the member dies prior to their normal retirement age. | | |

Pre-Retirement Death Benefit (Death in the Line of Duty)

| | Eligibility | One month of service credit |
|---------|--|--|
| | Spouse Benefit | A \$10,000 lump sum payment plus a monthly payment of 75% of the deceased member's final monthly average pay. Each dependent child will receive 10% of the final monthly average pay (not to exceed a total child benefit of 25% while the spouse is alive). A spouse may also elect the non-line of duty death benefit. |
| | Non-Spouse Benefit | If the beneficiary is only one person who is a dependent receiving at least 50% of his or her support from the member, the beneficiary may elect a lump-sum payment of \$10,000. |
| | Child Benefit | In the event there is no surviving spouse, the benefit is 50% of final monthly average pay for one child, 65% of final average pay for two children, or 75% of final average pay for three or more eligible children. |
| Post-Re | tirement Death Benefit | |
| | Eligibility | 48 months of service, and in receipt of retirement benefits |
| | Death Benefit | A \$5,000 lump sum payment |
| Membe | er Contributions | |
| | Tier 1, Participation before 9/1/2008 | 8% of creditable compensation. Members who do not receive a retirement benefit are entitled to a full refund of contributions with interest. The annual interest rate is set by the Board, not less than 2.0%. |
| | Tier 2, Participation on or after 9/1/2008 | |
| | but before 1/1/2014 | 8% of creditable compensation plus 1% of creditable compensation, which is deposited into the 401(h) account and is not refundable. Members who do not receive a retirement benefit are entitled to a refund of non-401(h) contributions with interest. The annual interest rate is 2.5%. |
| 4 | Tier 3, Participation after 1/1/2014 | 8% of creditable compensation plus 1% of creditable compensation, which is deposited into the 401(h) account and is not refundable. Members who do not receive a retirement benefit are entitled to a refund of non-401(h) contributions with interest. |

Change in Retirement Plan Benefits for Hazardous Members since the Prior Valuation

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, and adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Summary of Main Retiree Insurance Benefit Provisions

Insurance: Participation began before 7/1/2003

Benefit Eligibility

Recipient of a retirement allowance

Benefit Amount

| Non-Hazardous Service | Percentage of Member Premium Paid by Retirement System | Hazardous Service | Percentage of Member & Dependent Premium Paid by Retirement System |
|--------------------------|--|----------------------|--|
| Less than 4 years | 0% | Less than 4 years | 0% |
| 4 – 9 years | 25% | 4 – 9 years | 25% |
| 10 – 14 years | 50% | 10 – 14 years | 50% |
| 15 – 19 years | 75% | 15 – 19 years | 75% |
| 20 or more years | 100% | 20 or more years | 100% |

The percentage paid by the retirement system is applied to the 'contribution' plan selected by the Board.

| Duty Disability Retirement | If disability was a result of injuries sustained while in the line of duty, the member receives 100% of the maximum contribution for the member and dependents. This benefit is provided to members in the Non-hazardous and Hazardous plans alike. |
|---|--|
| Duty Death in Service | If an active employee's death was a result of injuries sustained while in the line of duty, the member's spouse and children receive a fully subsidized health insurance benefit. This benefit is provided to members in the Non-hazardous and Hazardous plans alike. |
| Non-Duty Death in Service | If the surviving spouses is in receipt of a pension allowance, he or she is eligible for continued health coverage. The percentage of the premium paid for by the retirement system is based on the member's years of hazardous service at the time of death. |
| Surviving Spouse of a Retiree | A surviving spouse of a retiree, who is in receipt of a pension allowance, will receive a premium subsidy based on the member's years of hazardous service. |
| Hazardous employees who retired prior to August 1, 1998 | System's contribution for spouse and dependents is based on total service. |

Insurance: Participation began on or after 7/1/2003

| Benefit Eligibility | Recipient of a retirement allowance with at least 120 months of service at retirement (180 months if participation began on or after 9/1/2008) |
|----------------------------|--|
| Non-Hazardous Subsidy | Monthly contribution of \$10 for each year of earned non-hazardous service. The monthly contribution is increased by 1.5% each July 1. As of July 1, 2023, the Non-Hazardous monthly contribution was \$14.41/year of service. Upon the retiree's death, the surviving spouse may continue coverage (if in receipt of a retirement allowance) but will be 100% responsible for the premiums. |
| | Effective January 1, 2023, members will receive an additional dollar contribution of \$5 for every year of non-hazardous service a member attains over 27 years. This additional dollar contribution does not increase by 1.5% annually and is only payable for non-Medicare retirees. Also, it is only payable when the applicable insurance fund is at least 90% funded on an actuarial value of asset basis as of the last actuarial valuation. |
| Hazardous Subsidy | Monthly contribution of \$15 for each year of earned hazardous service. The monthly contribution is increased by 1.5% each July 1. As of July 1, 2023, the Hazardous monthly contribution was \$21.62/year of service. Upon the retiree's death, the surviving spouse of a hazardous duty member will receive a monthly contribution of \$10 (\$14.41 as of July 1, 2023) for each year of hazardous service. |
| | Effective January 1, 2023, members will receive an additional dollar contribution of \$5 for every year of hazardous service a Tier 1 member attains over 20 years and a Tier 2 member attains 25 years. This additional dollar contribution does not increase by 1.5% annually and is only payable for non-Medicare retirees. Also, it is only payable when the applicable insurance fund is at least 90% funded on an actuarial value of asset basis as of the last actuarial valuation. |
| Duty Disability Retirement | If disability was a result of injuries sustained while in the line of duty or was duty-related, the member receives a benefit based on at least 20 years of service. This benefit is provided to members in the Non- Hazardous and Hazardous plans alike. |
| | If the disability is deemed to be Total and Permanent, the insurance premium for the member, the member's spouse, and the member's dependent children shall also be paid in full by the System. For non- hazardous members to be eligible for this benefit, they must be working |

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

in a position that could be certified as a hazardous position.

Duty Death in Service

If an active employee's death was a result of injuries sustained while in the line of duty, the member's spouse and children receive a fully subsidized health insurance benefit. This benefit is provided to members in the Non-Hazardous and Hazardous plans alike.

Non-Duty Death in Service

If the surviving spouse is in receipt of a pension allowance, he or she is eligible for continued health coverage. The percentage of the premium paid for by the retirement system is based on the member's years of hazardous service at the time of death.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023

Monthly Health Plan Premiums – Effective January 1, 2024

| Non-Medicare Plan Options | | | | | | | |
|---------------------------|----------|-------------|------------|------------|--------------|--|--|
| Plan Option | Single | Parent Plus | Couple | Family | Family X-Ref | | |
| LivingWell PPO | \$949.04 | \$1,320.40 | \$1,981.62 | \$2,185.78 | \$1,126.28 | | |
| LivingWell CDHP | 930.76 | 1,269.28 | 1,866.24 | 2,078.08 | 1,068.66 | | |
| LivingWell Basic | 901.04 | 1,234.80 | 1,863.04 | 2,069.88 | 1,057.40 | | |

| Medica | re Plan Options |
|----------------------------------|-----------------|
| Medical Only Plan | \$188.73 |
| Essential Mirror Plan | 228.98 |
| Premium Mirror Plan | 328.11 |
| Essential Medical Advantage Plan | 4.07 |
| Premium Medical Advantage Plan | 93.35 |

Contribution plan selected by the Board was the LivingWell PPO plan option for non-Medicare retirees. Contribution plan selected by the Board was the Medical Only plan for the Medicare retirees.

Dollar Contribution Amount for Participation on or after 7/1/2003

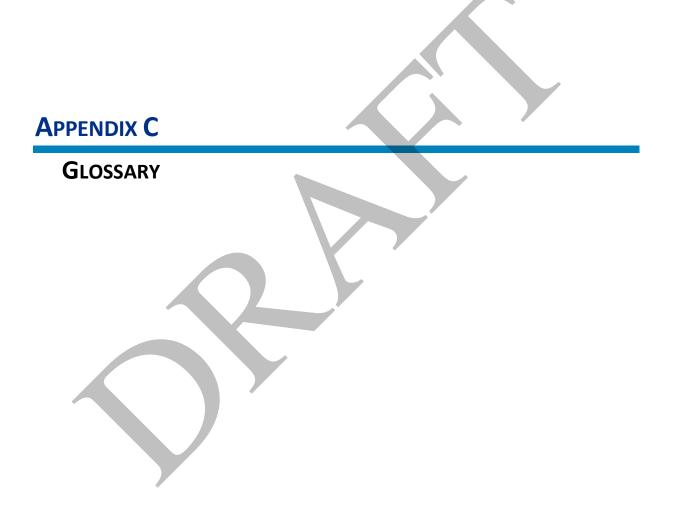

Monthly contribution amounts per year of service as of July 1, 2023.

Changes in Health Insurance Benefits since the Prior Valuation

None.

Glossary

Actuarial Accrued Liability (AAL): That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Plan Benefits which is not provided for by future Normal Costs. It is equal to the Actuarial Present Value of Future Plan Benefits minus the actuarial present value of future Normal Costs.

Actuarial Assumptions: Assumptions as to future experience under the Fund. These include assumptions about the occurrence of future events affecting costs or liabilities, such as:

- mortality, withdrawal, disablement, and retirement;
- future increases in salary;
- future rates of investment earnings and future investment and administrative expenses;
- characteristics of members not specified in the data, such as marital status;
- characteristics of future members;
- future elections made by members; and
- other relevant items.

Actuarial Cost Method or **Funding Method**: A procedure for allocating the Actuarial Present Value of Future Benefits to various time periods; a method used to determine the Normal Cost and the Actuarial Accrued Liability. These items are used to determine the ADC.

Actuarial Gain or Actuarial Loss: A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two Actuarial Valuation dates. Through the actuarial assumptions, rates of decrements, rates of salary increases, and rates of fund earnings have been forecasted. To the extent that actual experience differs from that assumed, Actuarial Accrued Liabilities emerge which may be the same as forecasted, or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., the fund's assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results that produce actuarial liabilities which are larger than projected. Actuarial gains will shorten the time required for funding of the actuarial balance sheet deficiency while actuarial losses will lengthen the funding period.

Actuarially Equivalent: Of equal actuarial present value, determined as of a given date and based on a given set of Actuarial Assumptions.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023 **Actuarial Present Value (APV):** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:

a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.)

b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned, and

c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Actuarial Present Value of Future Plan Benefits: The Actuarial Present Value of those benefit amounts which are expected to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such items as the effect of advancement in age and past and anticipated future compensation and service credits. The Actuarial Present Value of Future Plan Benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive, non-retired members either entitled to a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.

Actuarial Valuation: The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial valuation for a governmental retirement system typically also includes calculations that provide the financial information of the plan, such as the funded ratio, unfunded actuarial accrued liability and the ADC.

Actuarial Value of Assets or Valuation Assets: The value of the Fund's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly actuaries use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the ADC.

Actuarially Determined: Values which have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the law.

Actuarially Determined Contribution (ADC): The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADC consists of the Employer Normal Cost and the Amortization Payment.

Amortization Method: A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.

Kentucky Employees Retirement System Actuarial Valuation – June 30, 2023 *Amortization Payment:* The portion of the pension plan contribution or ADC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.

Closed Amortization Period: A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc. See Funding Period and Open Amortization Period.

Decrements: Those causes/events due to which a member's status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or termination.

Defined Benefit Plan: A retirement plan that is not a Defined Contribution Plan. Typically a defined benefit plan is one in which benefits are defined by a formula applied to the member's compensation and/or years of service.

Defined Contribution Plan: A retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, and the plan's earnings are allocated to each account, and each member's benefits are a direct function of the account balance.

Employer Normal Cost: The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.

Experience Study: A periodic review and analysis of the actual experience of the Fund which may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified as deemed appropriate by the Actuary.

Funded Ratio: The ratio of the actuarial value of assets (AVA) to the actuarial accrued liability (AAL). Plans sometimes calculate a market funded ratio, using the market value of assets (MVA), rather than the AVA.

Funding Period or **Amortization Period**: The term "Funding Period" is used two ways. In the first sense, it is the period used in calculating the Amortization Payment as a component of the ADC. This funding period is specified in State statute. In the second sense, it is a calculated item: the number of years in the future that will theoretically be required to amortize (i.e., pay off or eliminate) the Unfunded Actuarial Accrued Liability, based on a statutory employer contribution rate, and assuming no future actuarial gains or losses.

GASB: Governmental Accounting Standards Board.

GASB 67 and **GASB 68**: Governmental Accounting Standards Board Statements No. 67 and No. 68. These are the governmental accounting standards that set the accounting and reporting rules for public retirement systems and the employers that sponsor, participate in, or contribute to them. Statement No. 67 sets the accounting rules for the financial reporting of the retirement systems, while Statement No. 68 sets the rules for the employers that sponsor, participate in, or contribute to public retirement systems.

Normal Cost: That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method. Any payment in respect of an Unfunded

Kentucky Employees Retirement System Appendi. Actuarial Valuation – June 30, 2023 Actuarial Accrued Liability is not part of Normal Cost (see Amortization Payment). For pension plan benefits which are provided in part by employee contributions, Normal Cost refers to the total of employee contributions and employer Normal Cost unless otherwise specifically stated. Under the entry age normal cost method, the Normal Cost is intended to be the level cost (when expressed as a percentage of pay) needed to fund the benefits of a member from hire until ultimate termination, death, disability or retirement.

Open Amortization Period: An open amortization period is one which is used to determine the Amortization Payment but may not decrease by exactly one year in the subsequent year's actuarial valuation. For instance, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year.

Unfunded Actuarial Accrued Liability: The excess of the Actuarial Accrued Liability over the Actuarial Value of Assets. This value may be negative in which case it may be expressed as a negative Unfunded Actuarial Accrued Liability, also called the Funding Surplus.

Valuation Date or Actuarial Valuation Date: The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

APPENDIX D

KERS NON-HAZARDOUS EMPLOYER CONTRIBUTION

BY AGENCY

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: Sensitivity Analysis Based on Results of the June 30, 2023 Actuarial Valuation – KERS

Dear Members of the Board:

Per Kentucky State Statute 61.670, we are providing this supplemental information regarding the sensitivity of the valuation results to changes in some of the economic assumptions. Specifically, the enclosed tables show the impact for the **Kentucky Employees Retirement System (KERS)** due to changes in the investment return assumption, the inflation rate assumption, and the payroll growth rate assumption.

Background

Investment Assumption

The investment return assumption is used to discount future expected benefit payments to the valuation date in order to determine the liabilities of the plans. The lower the investment return assumption, the less the benefit payments are discounted and the higher the valuation liability. The current investment return assumption is 5.25% for the non-hazardous retirement fund, 6.25% for the hazardous retirement fund, and 6.50% for both insurance funds. The sensitivity analysis shows the financial impact of a 1.00% increase and a 1.00% decrease in the investment return assumption. For purposes of this sensitivity analysis, the inflation assumption and payroll growth assumption remain unchanged from the valuation assumption.

Inflation Assumption

The inflation assumption underlies most of the other economic assumptions, including the investment return, salary increases, and payroll growth rate. This is a macroeconomic assumption and as such the same assumption is used in the valuation of each of the retirement systems. The current assumption is 2.50% for all funds. The sensitivity analysis shows the financial impact of a 0.25% increase and a 0.25% decrease in the inflation assumption. Note, the change in the inflation assumption results in a corresponding change in the investment return assumption, the individual salary increase assumption for projecting members' benefit amounts, the payroll growth rate assumption, and the healthcare trend assumption that is used in the valuation of the health insurance funds.

Board of Trustees November 13, 2023 Page 2

Payroll Growth Assumption

Participating employers of the hazardous fund make contributions to the system as a percentage of covered payroll. Therefore, as payroll changes over time these amortization payments will also change. If actual covered payroll increases at a rate that is less than assumed, then the retirement system receives fewer contribution dollars than expected to finance the unfunded liability, which means the contribution rate in future years will be required to increase in order to finance the unfunded liability over the same time period. The current payroll growth assumption is 0.00% for both the retirement and insurance funds. The analysis shows the impact of a 1.00% increase and a 1.00% decrease in the payroll growth assumption.

For completeness, we have included this sensitivity for the non-hazardous fund. House Bill 8 passed during the 2021 legislative session and changed how contributions are collected and allocated amongst employers. The portion of the required contribution that amortizes (or pays for) the unfunded liability for the non-hazardous fund is no longer collected as a percentage of payroll. This sensitivity for the non-hazardous fund shows the impact of assuming that the amortization cost contributions paid by employers either decrease by 1% or increase by 1% annually (versus the valuation assumption that they remain level through the end of the funding period).

Please note that the payroll growth assumption does not impact the valuation liabilities, unfunded liability, or funded status of the system. Rather, this assumption only impacts the amortization rate for financing the existing unfunded actuarial accrued liability and the actuarially determined employer contribution. For purposes of this analysis, the investment return assumption and the inflation assumption are held at their current valuation assumptions.

Certification

The information provided in this letter compliments the information provided in the June 30, 2023 actuarial valuation report. Please refer to the June 30, 2023 actuarial valuation report for additional discussion of the actuarial valuation, including the nature of actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions.

Actual results can, and almost certainly will, differ as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rate, and funding periods. The actuarial calculations are intended to provide information for rational decision making. The purpose of this information is to provide stakeholders the financial sensitivity of the unfunded liability and contribution rates to changes in the inflation, assumed rate of return, and payroll growth assumption.

Board of Trustees November 13, 2023 Page 3

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel, Roeder, Smith & Company

State Police Retirement System (SPRS) Actuarial Valuation Report

as of June 30, 2023

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

P: 469.524.0000 | www.grsconsulting.com

October 31, 2023

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Subject: Actuarial Valuation as of June 30, 2023

Dear Trustees of the Board:

This report describes the current actuarial condition of the State Police Retirement System (SPRS) and provides the actuarially determined employer contribution rate for fiscal years ending June 30, 2025 and June 30, 2026. In addition, the report analyzes changes in SPRS's financial condition, and provides various summaries of the data.

Separate reports are issued with regard to valuation results determined in accordance with Governmental Accounting Standards Board (GASB) Statements 67, 68, 74 and 75. Results of this report should not be used for any other purpose without consultation with the undersigned. Valuations are prepared annually as of June 30, the first day of the plan year for SPRS. This report was prepared at the request of the Board of Trustees of the Kentucky Retirement Systems (Board) and is intended for use by the Kentucky Public Pensions Authority (KPPA) staff and those designated or approved by the Board.

FINANCING OBJECTIVES AND FUNDING POLICY

The employer contribution rates determined by these actuarial valuations are intended to become effective twelve months after the valuation date and, as such, are intended to be used by the Board for recommending required contribution rates effective July 1, 2024, as well as the subsequent fiscal year beginning July 1, 2025 and ending June 30, 2026.

The employer contribution rate is determined in accordance with Section 61.565 of Kentucky Statute. As specified by the Statute, the employer contribution is comprised of a normal cost contribution and an actuarial accrued liability contribution. The actuarial accrued liability contribution is calculated by amortizing the unfunded accrued liability as of June 30, 2019 over a closed 30-year amortization period (26 years remaining as of June 30, 2023). Gains and losses incurring in years after June 30, 2019 are amortized as separate closed 20-year amortization bases.

Board of Trustees October 31, 2023 Page 2

If the contributions made are equal to the Actuarially Determined Contribution (ADC), and if all actuarial assumptions are met, there will not be an unfunded accrued liability at the end of the 26-year period remaining from the original closed 30-year amortization base. Accordingly, the ADC under the funding policy can be considered a "Reasonable Actuarially Determined Contribution" as required by the Actuarial Standards of Practice.

ASSUMPTIONS AND METHODS

The Board of Trustees, in consultation with the actuary, sets the actuarial assumptions and methods used in the actuarial valuation. Except where noted in this report, the assumptions used in this actuarial valuation are based on an experience study conducted with experience through June 30, 2022, adopted by the Board of Trustees on June 5, 2023 for first use in this June 30, 2023 actuarial valuation.

The results of the actuarial valuation are dependent on the actuarial assumptions used. Actual results can, and almost certainly will, differ as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rate, and funding periods. The actuarial calculations are intended to provide information for rational decision making.

BENEFIT PROVISIONS

The benefit provisions reflected in these valuations are those which were in effect on June 30, 2023. House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, and adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances. There were no other material benefit provision changes since the prior valuation.

Data

Member data for retired, active and inactive members was supplied as of June 30, 2023, by KPPA staff. The staff also supplied asset information as of June 30, 2023. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data. GRS is not responsible for the accuracy or completeness of the information provided to us by KPPA.

Board of Trustees October 31, 2023 Page 3

CERTIFICATION

We certify that the information presented herein is accurate and fairly portrays the actuarial position of SPRS as of June 30, 2023.

All of our work conforms with generally accepted actuarial principles and practices, and is in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of Kentucky Code of Laws and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel, Roeder, Smith & Company

(Dollar amounts expressed in thousands)

¹ Contribution rates calculated with the June 30, 2023 valuation are effective for fiscal years ending June 30, 2025 and June 30 2026. Contribution rates for fiscal year ending June 30, 2024 calculated with the June 30, 2021 valuation.

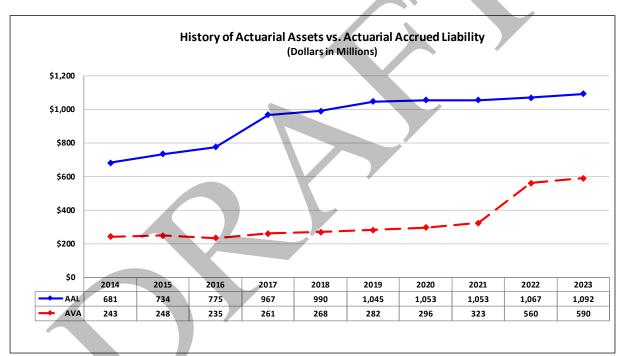

State Police Retirement System Actuarial Valuation – June 30, 2023 Section 1 2

Executive Summary (Continued)

Retirement Fund

The unfunded actuarial accrued liability of the retirement fund decreased by \$6 million since the prior year's valuation to \$502 million. This decrease was approximately \$19 million less than expected, primarily due to liability losses as a result of salary increases for individual members being greater than assumed. The increase in the liability due to demographic losses was offset by a decrease in liabilities due to the assumption changes based on the 2022 experience study.

Below is a chart with the historical actuarial value of assets and actuarial accrued liability. The increase in the actuarial value of assets in FY 2022 was due to a one-time \$215 million appropriation made by the Commonwealth.

Insurance Fund

The funding surplus (actuarial accrued liability in excess of assets) of the insurance fund decreased by \$0.3 million since the prior year's valuation to \$1.1 million. The funding surplus was expected to decrease by \$6.5 million and therefore was \$6.8 lower than expected, primarily due to liability losses related to the 2024 premium experience and retiree contribution changes discussed below. The increase in the liability due to demographic losses was offset by a decrease in liabilities due to the assumption changes based on the 2022 experience study.

On average, pre-Medicare premiums were approximately 7% higher than expected and Medicare premiums were approximately 4% lower than expected. In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is also reviewed on an annual basis. The trend assumption for the pre-Medicare Plans was increased in the 2023 actuarial valuation as a result of our review. These changes increased liability for insurance fund by approximately \$12 million.

Additionally, the Board of Trustees adopted to lower the retiree contribution for the Medicare Advantage plans from \$252.51 to be based on the Humana premiums (\$93.35 as of January 1, 2024). The Board also adopted the Medical Only plan as the KPPA "contribution plan", which further lowered member contributions for those with less than 20 years of service. These changes increased liability for the insurance fund by approximately \$3 million.

Discussion

The State Police Retirement System (SPRS) is a defined benefit pension plan that provides coverage for uniformed state police officers. SPRS includes hazardous duty benefits only. This report presents the results of the June 30, 2023 actuarial funding valuation for both the Retirement Fund and Insurance Fund.

The primary purposes of the valuation report are to describe the current actuarial condition of SPRS and provide the actuarially determined employer contribution rates for fiscal years ending June 30, 2025 and June 30, 2026. In addition, the report analyzes changes in SPRS's financial condition, and provides various summaries of the data.

The actuarially determined contribution consist of two components: a normal cost rate and an amortization cost to finance the unfunded actuarial accrued liability. The normal cost rate is the theoretical amount which would be required to pay the members' benefits, based on the current plan provisions, if this amount had been contributed from each member's entry date and if the fund's experience exactly followed the actuarial assumptions. This is the amount that it should cost to provide the benefits for an average member. Since members contribute to the fund, only the excess of the normal cost rate over the member contribution rate is included in the employer contribution. The amortization cost is the amount necessary to amortize the unfunded actuarial accrued liability. The payroll growth rate and discount rate assumptions are selected by the Board. The funding period is specified in Section 61.565 of Kentucky Statute.

All of the actuarial and financial tables referenced by the other sections of this Report appear in Section 3. Section 4 provides additional details related to the calculation of the amortization of the unfunded actuarial accrued liability. Section 5 provides member data and statistical information. Section 6 provides a discussion of various risk measures, which are intended to aid stakeholders in understanding the effects of future experience differing from the assumptions used in performing an actuarial valuation. Appendices A and B provide summaries of the principle actuarial assumptions and methods and plan provisions. Finally, Appendix C provides a glossary of technical terms that are used throughout this report.

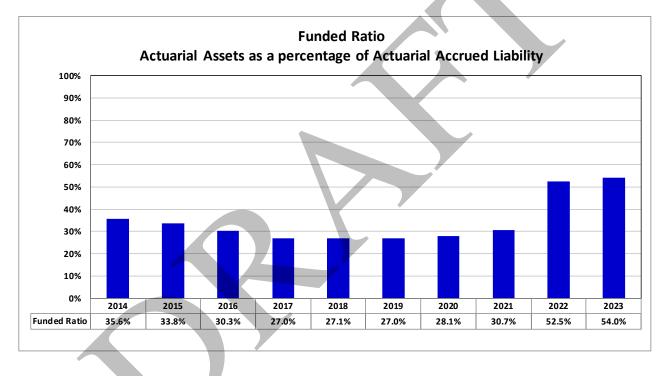

State Police Retirement System Actuarial Valuation – June 30, 2023 Section 2 6

Funding Progress

The following chart provides a ten-year history of the retirement fund's funded ratio (i.e. the Actuarial Value of Assets divided by the Actuarial Accrued Liability). The significant increase in the funded ratio from 2021 to 2022 was due to a \$215 million appropriation made by the Commonwealth in fiscal year 2022.

Assuming the full actuarially determined contributions are paid in future years and absent material future unfavorable experience, the funded ratio is expected to continue improving. Also, the dollar amount of the unfunded actuarial accrued liability, or the difference between the actuarial accrued liability and the actuarial value of assets, is expected to continue a decreasing trend. Table 9, Schedule of Funding Progress, in the following section of the report provides additional detail regarding the funding progress of the retirement fund.

State Police Retirement System Actuarial Valuation – June 30, 2023 Section 2 7

Asset Gains/ (Losses)

The actuarial value of assets ("AVA") is based on a smoothed market value of assets, using a systematic approach to phase-in the difference between the actual and expected investment return on the market value of assets (adjusted for receipts and disbursements during the year). This is appropriate because it dampens the short-term volatility inherent in investment markets. The return is computed net of investment expenses.

Retirement Fund

The actuarial value of assets for the retirement fund increased from \$560 million to \$590 million since the prior valuation. The rate of return on the market value of assets on a dollar-weighted basis for the prior fiscal year was 7.4% which is more than the 5.25% expected annual return. The return on an actuarial (smoothed) asset value was 5.5%, which resulted in a \$1.4 million gain for the fiscal year. The market value of assets is \$1.7 million more than the actuarial value of assets, which signifies that the retirement fund is in a position of net deferred investment gains to be realized in future years.

Table 6 in the following section of this report provides asset information that was included in the annual financial statements of the funds, as well as the estimated yield on a market value basis. Table 7 provides the development of the actuarial value of assets and the estimated yield on an actuarial value basis.

State Police Retirement System Actuarial Valuation – June 30, 2023

Actuarial Gains/ (Losses)

The annual actuarial valuation is a snapshot analysis of the benefit liabilities, assets and funded position of the funds as of the first day of the plan year. In any one fiscal year, the experience can be better or worse from that which is assumed or expected. The actuarial assumptions do not necessarily attempt to model what the experience will be for any one given fiscal year, but instead try to model the overall experience over many years. Therefore, as long as the actual experience of a retirement system is reasonably close to the current assumptions, the long-term funding requirements of the system will remain relatively consistent.

Below is a table that separately shows a reconciliation of the unfunded liability since the prior actuarial valuation for the retirement and health insurance funds, which include the effect of asset and liability gains and losses, changes in assumptions, and changes in plan provisions. See the discussion in the Executive Summary for additional information related to the liability experience and additional information in this section of the report related to the asset experience, plan changes, and assumption changes.

State Police Retirement System Actuarial Valuation – June 30, 2023 Section 2 9

Actuarial Assumptions and Methods

In determining costs and liabilities, actuaries use assumptions about the future, such as rates of salary increase, probabilities of retirement, termination, death and disability, and an annual investment return assumption. The Board of Trustees, in consultation with the actuary, sets the actuarial assumptions and methods used in the actuarial valuation.

An experience study was conducted after the June 30, 2022 actuarial valuation and the Board adopted updated assumptions for use in this actuarial valuation. The updated assumptions include:

Demographic Assumptions:

- Post-retirement mortality rates were updated based on KPPA experience.
- Mortality improvement assumption was updated to the ultimate rates of the MP-2020 mortality improvement scale.
- Rates of termination prior to retirement were increased based on SPRS experience.
- The percentage of members assumed to cover spouses in the retiree health insurance plan at retirement was increased based on SPRS experience.

Economic Assumptions:

- The rate of inflation was increased from 2.30% to 2.50%.
- The salary productivity assumption was reduced by 0.20%, resulting in no change in the salary increase assumption for long-service employees of 3.55%.
- The investment return assumption for the insurance fund was increased from 6.25% to 6.50%.
- The Tier 3 cash balance interest crediting rate assumption was increased to 5.90%.

In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is reviewed on an annual basis. All other assumptions were adopted by the Board and are based on an experience study conducted based on experience through June 30, 2022. It is our opinion that the assumptions are internally consistent, reasonable, and reflect anticipated future experience of the System. Appendix A includes a summary of the actuarial assumptions and methods used in this valuation.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. This report does not include a more robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

Benefit Provisions

Appendix B of this report includes a summary of the major benefit provisions for System. The following is a summary of the changes in benefits enacted since the last actuarial valuation.

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, with the lump-sum options expanded to include 48 or 60 times the member's monthly retirement allowance. Since this optional form of payment results in a reduced, actuarial equivalent, monthly retirement allowance for members who elect a partial lump-sum option, this provision does not have a fiscal impact to the accrued liability.

House Bill 506 also adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances for each plan. This is a minimal change for members in SPRS, as the minimum separation period is currently one month for members who become reemployed on a full-time basis in a hazardous position. The requirement was previously three months only for members who become reemployed on a part-time basis or in any non-hazardous position. We believe this provision of House Bill 506 will have an insignificant impact on the retirement pattern of hazardous members.

There were no other material plan provision changes since the prior valuation.

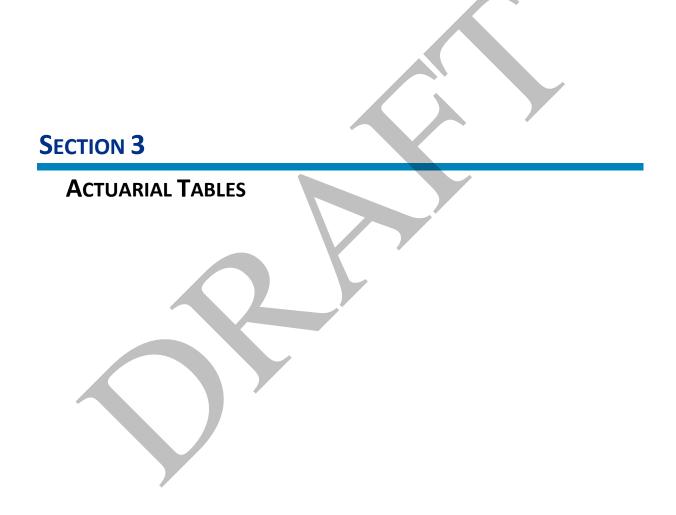

Annual Cost of Tier 3 Pay Credit for Unused Sick Leave (HB 259 Enacted in the 2022 Legislative Session)

Effective July 1, 2023, members earning benefits in the Tier 3 cash balance plan with five or more years of service credit will receive an additional employer pay credit equal to an amount by multiplying the member's unused sick leave in excess of 480 hours (i.e. 60 days) by the member's hourly base pay. Tier 3 members who retire from the State Police Retirement System will receive an additional employer pay credit equal to an amount by multiplying the member's hours by multiplying the member's hours of accumulated sick leave upon termination of employment by the member's hourly base pay.

Section KRS 7A.255 was also amended to require the Department of State Police and the Kentucky Public Pensions Authority to jointly report to the Public Pension Oversight Board on the costs and effectiveness of this benefit provided to the Tier 3 members. The increase in the Tier 3 normal cost rate due to this benefit enhancement is 6.65% of pay. As a result, the dollar amount of this benefit enhancement for FY 2025 is \$1,468,000 which is equal to the increase in the Tier 3 normal cost rate multiplied by the \$22,077,000 Tier 3 payroll.

The incremental difference in the Tier 3 normal cost rate will remain relatively unchanged in future years, however the amount of the dollar cost of this benefit enhancement will increase over time as the number of members (and covered payroll) increase as new members enter the System and earn Tier 3 benefits.

State Police Retirement System Table 9

Actuarial Valuation – June 30, 2023

Summary of Principal Assumptions and Methods

Below is a summary of the principal economic assumptions, cost method, and the method for financing the unfunded actuarial accrued liability:

| Valuation date: | June 30, 2023 |
|---|---|
| Actuarial cost method: | Entry Age Normal |
| Amortization method: | Level percentage of payroll (0% payroll growth assumed) |
| Amortization period for contribution rate: | 30-year closed period at June 30, 2019 Gains/losses incurring after 2019 will be amortized over separate closed 20-year amortization bases |
| Asset valuation method: | 5-Year Smoothed Market |
| Actuarial assumptions: | |
| Investment rate of return, retirement | 5.25% |
| Investment rate of return, insurance | 6.50% |
| Projected salary increases | 3.55% to 16.05% (varies by service) |
| Inflation | 2.50% |
| Post-retirement pension benefit adjustments | 0.00% |
| Retiree Mortality | System-specific mortality table based on mortality experience from 2013 to 2022, projected with the ultimate rates from MP-2020 mortality improvement scale using a base year of 2023. |

SECTION 6

ASSESSMENT AND DISCLOSURE OF RISK

Risks Associated with Measuring the Accrued Liability And Actuarially Determined Contribution (As Required by ASOP No. 51)

The determination of SPRS's accrued liability and actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. The risk measures illustrated in this section are intended to aid stakeholders in understanding the effects of future experience differing from the assumptions used in performing an actuarial valuation. These risk measures may also help with illustrating the potential volatility in the funded status and actuarially determined contributions that result from differences between actual experience and the expected experience based on the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience (economic and demographic) differing from the assumptions, changes in assumptions due to changing conditions, changes in contribution requirements due to modifications to the funding policy, and changes in the liability and cost due to changes in plan provisions or applicable law. The scope of this actuarial valuation does not include any analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the System's future financial condition include:

- Investment risk actual investment returns may differ from expected returns;
- Longevity risk members may live longer or shorter than expected and receive pensions for a time period different than assumed;
- Other demographic risks members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future contributions differing from expected;
- Salary and payroll risk actual salaries and total payroll may differ from expected, resulting in actual future accrued liabilities or contributions differing from expected;
- Asset/Liability mismatch changes in assets may be inconsistent with changes in liabilities, thereby
 altering the relative difference between the assets and liabilities which may alter the funded status and
 contribution requirements;
- Contribution risk actual contributions may differ from expected future contributions (for example, actual contributions not being paid in accordance with the System's funding policy, withdrawal liability assessments or other anticipated payments to the plan are not being paid, or material changes occurring in the anticipated number of covered employees, covered payroll, or another relevant contribution base).

Effects of certain experience can generally be anticipated. For example, if investment returns since the most recent actuarial valuation are less (or more) than the assumed rate of return, then the funded status of the plan can be expected to decrease (or increase) more than anticipated.

The required contributions in this report were established in accordance with applicable Statutes and assumptions adopted by the Board. However, stakeholders should be aware that the scheduled contributions specified in State Code do not necessarily guarantee that the contribution requirements will not increase in a future year.

Employer Risk with Contribution Rates

Currently contributions are collected from the Commonwealth based on the total payroll of employees who are earning benefits in SPRS (i.e. covered payroll). The actuarially determined contribution rate is comprised of two components - the normal cost rate (to pay for the benefits accruing in the next year) and the unfunded amortization (to pay for the benefits accrued by members in previous years). The unfunded amortization is calculated by first determining the dollar amount necessary to pay for the unfunded liability based on SPRS's funding policy, and then by dividing that dollar amount by expected covered payroll to convert that contribution requirement to a percentage of payroll (i.e. a contribution rate).

As the contribution requirement, as a percentage of payroll, increases then there is increased incentive for participating employers to make deliberate business action to reduce their payroll reported to the System in order to reduce their pension cost.

Plan Specific Risk Measures

Risks faced by a pension plan evolve over time. A relatively new plan with virtually no assets and paying few benefits will experience lower investment risk than a mature plan with a significant amount of assets and large number of members receiving benefits. There are a few measures that can assist stakeholders in understanding and comparing the maturity of a plan to other systems, which include:

- <u>Ratio of market value of assets to payroll</u>: The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. If assets are approximately the same as covered payroll, an investment return that is 5% different than assumed would equal 5% of payroll. In another example, if the assets are approximately twice as large as covered payroll, an investment return that is 5% different than assumed would equal 5% of payroll. In another example, if the assets are approximately twice as large as covered payroll, an investment return that is 5% different than assumed would equal 10% of payroll. A ratio that increases over time generally indicates the potential of an increasing volatility in employer contribution rates as a percentage of payroll.
- <u>Ratio of actuarial accrued liability to payroll</u>: The ratio of actuarial accrued liability to payroll can be used as a measure to indicate the potential volatility of contributions due to volatility in the liability experience. For instance, if the actuarial accrued liability is 5 times the size of the covered payroll, then a change in the liability that is 2% different than expected would be a change in magnitude that is 10% of payroll. A ratio that increases over time generally indicates the potential of an increasing volatility in employer contribution rates as a percentage of payroll.
- <u>Percentage of Expected Contributions Actually Received</u>: This measure identifies the percentage difference between the contributions the fund expects to receive during the fiscal year to and actual contributions received by the fund during the fiscal year. A percentage that is less than 100% means that actual contributions the fund received were less than the expected contributions determined by a prior actuarial valuation. On the other hand, a percentage that is greater than 100% means that actual contributions the fund received were more than the expected contributions.

• <u>Ratio of active to retired members</u>: A relatively mature open plan is likely to have close to the same number of actives to retirees resulting in a ratio that is around 1.0. On the other hand, a super-mature plan, or a plan that is closed to new entrants will have more retirees than active members resulting in a ratio below 1.0. As this ratio declines, a larger portion of the total actuarial accrued liability in the System is attributable to retirees. This metric also typically moves in tandem with the liability to payroll metric, which provides an indication of potential contribution volatility.

The following tables provide a summary of these measures for SPRS for the current year and the prior four years so stakeholders can identify how these measures are trending. While ASOP No. 51 requires this disclosure with respect to only the retirement fund, we have included this information for the insurance fund for completeness.

Low-Default-Risk Obligation Measure

Introduction

In December 2021, the Actuarial Standards Board (ASB) adopted a revision to Actuarial Standard of Practice (ASOP) No. 4, Measuring Pension Obligations and Determining Pension Plan Costs or Contributions. The revised ASOP No. 4 requires the calculation and disclosure of a liability referred to by the ASOP as the "Low-Default-Risk Obligation Measure" (LDROM). The rationale that the ASB cited for the calculation and disclosure of the LDROM was included in the Transmittal Memorandum of ASOP No. 4 and is presented below (emphasis added):

"The ASB believes that the calculation and disclosure of this measure provides appropriate, useful information for the intended user regarding the funded status of a pension plan. The calculation and disclosure of this additional measure is not intended to suggest that this is the "right" liability measure for a pension plan. However, the ASB does believe that this additional disclosure provides a more complete assessment of a plan's funded status and provides additional information regarding the security of benefits that members have earned as of the measurement date."

Comparing the Accrued Liabilities and the LDROM

One of the fundamental financial objectives of the State Police Retirement System (SPRS) is to finance each member's retirement benefits over the period from the member's date of hire until the member's projected date of retirement (entry age actuarial cost method) as a level percentage of payroll. To fulfill this objective, the discount rate that is used to value the accrued liabilities of SPRS is set equal to the **expected return** on each fund's diversified portfolio of assets (referred to sometimes as the investment return assumption). For the retirement fund, the investment return assumption is 5.25%.

The LDROM is meant to approximately represent the lump sum cost to a plan to purchase low-default-risk fixed income securities whose resulting cash flows essentially replicate in timing and amount the benefits earned (or the costs accrued) as of the measurement date. The LDROM is very dependent upon market interest rates at the time of the LDROM measurement. The lower the market interest rates, the higher the LDROM, and vice versa. The LDROM results presented in this report are based on the entry age actuarial cost method and discount rates based upon the intermediate rate from the FTSE Pension Discount Curve and Liability Index published by the Society of Actuaries. This rate is 4.90% as of June 30, 2023. This measure may not be appropriate for assessing the need for or amount of future contributions. This measure may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligation.

The difference between the two measures (Valuation and LDROM) is one illustration of the savings the sponsor anticipates by taking on risk in a diversified portfolio.

| Retirement Fund | | | | | |
|-------------------------------|-----------------|--|--|--|--|
| Valuation Accrued Liabilities | LDROM | | | | |
| \$1,091,794,728 | \$1,137,046,120 | | | | |

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

APPENDIX A

ACTUARIAL ASSUMPTIONS AND METHODS

Summary of Actuarial Methods and Assumptions

The following presents a summary of the actuarial assumptions and methods used in the valuation of the State Police Retirement System.

In general, the assumptions and methods used in the valuation are based on the actuarial experience study as of June 30, 2022 and adopted by the Board in June 2023.

Investment return rate:

Assumed annual rate of 5.25% net of investment expenses for the retirement fund

Assumed annual rate of 6.50% net of investment expenses for the insurance fund

Price Inflation:

Assumed annual rate of 2.50%

Payroll Growth Assumption (used for amortization of unfunded accrued liabilities):

Assumed annual rate of 0.00%

Rates of Annual Salary Increase:

| Service | Annual Rates of Salary Increases | | | | | |
|----------|----------------------------------|-----------------------------------|----------------|--|--|--|
| Years | Merit & Seniority | Price Inflation & Productivity | Total Increase | | | |
| 0 | 12.50% | 3.55% | 16.05% | | | |
| 1 | 5.00% | 3.55% | 8.55% | | | |
| 2 | 4.00% | 3.55% | 7.55% | | | |
| 3 | 2.00% | 3.55% | 5.55% | | | |
| 4 | 2.00% | 3.55% | 5.55% | | | |
| 5 | 2.00% | 3.55% | 5.55% | | | |
| 6 | 2.00% | 3.55% | 5.55% | | | |
| 7 | 1.00% | 3.55% | 4.55% | | | |
| 8 | 1.00% | 3.55% | 4.55% | | | |
| 9 | 0.00% | 3.55% | 3.55% | | | |
| 10 & Ove | r 0.00% | 3.55% | 3.55% | | | |

Assumed rates of annual salary increases are shown below.

Retirement rates:

Assumed annual rates of retirement are shown below. Rates are only applicable for members who are eligible for a service retirement.

| Service | Members participating Before 9/1/2008 ¹ | Members participating on or after 9/1/2008 ² | Members participating after 1/1/2014 ² |
|---------|--|--|---|
| 20 | 22.0% | | |
| 21 | 22.0% | | |
| 22 | 22.0% | | |
| 23 | 28.0% | | |
| 24 | 28.0% | | |
| 25 | 28.0% | 17.6% | 16.0% |
| 26 | 28.0% | 17.6% | 16.0% |
| 27 | 28.0% | 17.6% | 16.0% |
| 28 | 44.0% | 22.4% | 16.0% |
| 29 | 44.0% | 22.4% | 16.0% |
| 30 | 44.0% | 22.4% | 100.0% |
| 31 | 58.0% | 22.4% | |
| 32 | 58.0% | 22.4% | |
| 33 | 58.0% | 35.2% | |
| 34 | 58.0% | 35.2% | |
| 35 | 58.0% | 35.2% | |
| 36 | 58.0% | 46.4% | |
| 37 | 58.0% | 46.4% | |
| 38 | 58.0% | 46.4% | |
| 39 | 58.0% | 46.4% | |
| 40+ | 58.0% | 46.4% | |

¹ The annual rate of service retirement is 100% at age 55.

² The annual rate of service retirement is 100% at age 60.

For members hired after 7/1/2003 and prior to 9/1/2008, the rates shown above are multiplied by 80% if the member is under the age of 55 to reflect the different retiree health insurance benefit.

Disability rates:

| | | Annual Rates of Disability | | |
|----|----|----------------------------|--------|--|
| A | ge | Male | Female | |
| 20 |) | 0.05% | 0.05% | |
| 30 |) | 0.09% | 0.09% | |
| 40 |) | 0.20% | 0.20% | |
| 50 |) | 0.56% | 0.56% | |
| 60 |) | 1.46% | 1.46% | |

An abbreviated table with assumed rates of disability is show below.

Withdrawal rates (for causes other than disability and retirement):

Assumed annual rates of withdrawal are shown below and include pre-retirement mortality rates as described on the next page.

| Service | Annual Rates of Withdrawal |
|-----------|----------------------------|
| 1 | 15.00% |
| 2 | 5.30% |
| 3 | 4.14% |
| 4 | 3.47% |
| 5 | 2.98% |
| 6 | 2.61% |
| 7 | 2.30% |
| 8 | 2.05% |
| 9 | 1.83% |
| 10 | 1.63% |
| 11 | 1.45% |
| 12 | 1.29% |
| 13 | 1.14% |
| 14 | 1.01% |
| 15 | 0.88% |
| 16 | 0.77% |
| 17 | 0.66% |
| 18 | 0.56% |
| 19 | 0.46% |
| 20 | 0.37% |
| 21 & Over | 0.00% |
| | |

4

Mortality Assumption:

Pre-retirement mortality: PUB-2010 Public Safety Mortality, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

Post-retirement mortality (non-disabled): System-specific mortality table based on mortality experience from 2013-2022, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2023.

The following table provides the life expectancy for a non-disabled retiree in future years based on the assumption with full generational projection:

| Life Expectancy for an Age 65 Retiree in Years | | | | | |
|--|--------------------|------|------|------|------|
| Gender | Year of Retirement | | | | |
| | 2025 | 2030 | 2035 | 2040 | 2045 |
| Male | 19.8 | 20.2 | 20.6 | 21.0 | 21.3 |
| Female | 22.4 | 22.7 | 23.1 | 23.4 | 23.7 |

Post-retirement mortality (disabled): PUB-2010 Disabled Mortality table, with rates multiplied by 150% for both male and female rates, projected with the ultimate rates from the MP-2020 mortality improvement scale using a base year of 2010.

Marital status:

100% of employees are assumed to be married, with the female spouse 3 years younger than the male spouse.

Line of Duty Disability

70% of disabilities are assumed to occur in the line of duty (10% of which are assumed to be "total and permanent")

Line of Duty Death

25% of deaths are assumed to occur in the line of duty

Dependent Children:

For members who receive a duty-related death or disability benefit, the member is assumed to be survived by two dependent children, each age 6 with payments for 15 years.

Form of Payment:

Members are assumed to elect a life-only annuity at retirement.

Actuarial Cost Method:

Entry Age Normal, Level Percentage of Pay. The Entry Age Normal actuarial cost method allocates the System's actuarial present value of future benefits to various periods based upon service. The portion of the present value of future benefits allocated to years of service prior to the valuation date is the actuarial accrued liability, and the portion allocated to years following the valuation date is the present value of future normal costs. The normal cost is determined for each active member as the level percent of pay necessary to fully fund the expected benefits to be earned over the career of each individual active member. The normal cost is partially funded with active member contributions with the remainder funded by employer contributions.

Health Care Age Related Morbidity/Claims Utilization:

To model the impact of aging on the underlying health care costs for Medicare retirees, the valuation relied on the Society of Actuaries' 2013 Study "Health Care Costs – From Birth to Death". Table 4 (Development of Plan Specific Medicare Age Curve) was used to model the impact of aging for ages 65 and over.

| Year | Non-Medicare Plans ¹ | Medicare Plans ¹ | Dollar Contribution ² |
|---------------|------------------------------------|--------------------------------|-------------------------------------|
| 2025 | 6.80% | 8.50% | 1.50% |
| 2026 | 6.55% | 8.00% | 1.50% |
| 2027 | 6.30% | 8.00% | 1.50% |
| 2028 | 6.05% | 8.00% | 1.50% |
| 2029 | 5.80% | 7.50% | 1.50% |
| 2030 | 5.55% | 7.00% | 1.50% |
| 2031 | 5.30% | 6.50% | 1.50% |
| 2032 | 5.05% | 6.00% | 1.50% |
| 2033 | 4.90% | 5.50% | 1.50% |
| 2034 | 4.75% | 5.00% | 1.50% |
| 2035 | 4.60% | 4.50% | 1.50% |
| 2036 | 4.45% | 4.05% | 1.50% |
| 2037 | 4.30% | 4.05% | 1.50% |
| 2038 & Beyond | 4.05% | 4.05% | 1.50% |

Health Care Cost Trend Rates:

¹All increases are assumed to occur on January 1. The 2024 premiums were known at the time of the valuation and were incorporated into the liability measurement ²Applies to members participating on or after July 1, 2003. All increases are assumed to occur on July 1.

Health care trend assumptions are based on the model issued by the Society of Actuaries "Getzen model of Long-Run Medical Cost Trends for the SOA; Thomas E. Getzen, iHEA and Temple University 2014 © Society of Actuaries.

The underlying assumptions used to develop the health care trend rates include:

- A short run period-this is a period for which anticipated health care trend rates are manually set based on local information as well as plan-specific and carrier information.
- Long term real GDP growth 1.75%
- Long term rate of inflation 2.30%
- Long term nominal GDP growth 4.05%
- Year that excess rate converges to 0 2036

Health care trend rates are thus the manually set rates for the short run period and rates which decline to an ultimate trend rate which equals the assumed nominal long-term GDP growth rate.

Health Care Participation Assumptions:

• Active members are assumed to elect health coverage at retirement at the following participation rates.

| Service at Retirement | Members participating before 7/1/2003* | Members participating after 7/1/2003 |
|--------------------------|---|---|
| Under 10 | 100% | 100% |
| 10-14 | 100% | 100% |
| 15-19 | 100% | 100% |
| Over 20 | 100% | 100% |

* 100% of members with a duty disability or a duty death (in service) benefit are assumed to elect coverage at retirement.

• Future retirees are assumed to have a similar distribution by plan type as the current retirees.

| Medicare Plan | Participation Percentage | Non-Medicare Plan | Participation Percentage |
|------------------------------------|-----------------------------|-------------------|-----------------------------|
| Medical Only ¹ | 5% | LivingWell Basic | 4% |
| Essential Plan | 8% | LivingWell CDHP | 35% |
| Premium Plan | 87% | LivingWell PPO | 61% |
| ¹ Includes Mirror Plans | | | |

¹Includes Mirror Plans

- 100% of deferred vested members participating are assumed to elect health coverage at retirement.
- Deferred vested members are assumed to begin health coverage at age 50 for members participating before January 1, 2014 and at age 60 for members participating on or after January 1, 2014.
- 85% of future retirees, with hazardous service, are assumed to elect spouse health care coverage. 100% of spouses with health care coverage are assumed to continue coverage after the member's death.

Other Assumptions

- 1. Valuation payroll (used for determining the amortization contribution rate): Current fiscal year payroll.
- Individual salaries used to project benefits: For salary amounts prior to the valuation date, the salary from the last fiscal year is projected backward with the valuation salary scale assumption. For future salaries, the salary from the last fiscal year is projected forward with one year's salary scale.
- 3. Pay increase timing: Beginning of (fiscal) year. This is equivalent to assuming that reported salaries represent amounts paid to members during the year ending on the valuation date.
- 4. Current active members that terminated employment (for reasons other than retirement, disability, or death) are assumed to commence their retirement benefits at first unreduced retirement eligibility. Members are assumed to elect a refund of member contributions if the value of their account balance exceeds the present value of the deferred benefit. Members participating in the Cash Balance plan are assumed to elect to receive a lump sum of their cash balance account if their account balance exceeds the present value of the deferred benefit and the member is not eligible for insurance benefits at termination.
- 5. The beneficiaries of current active members that die while active are assumed to commence their survivor benefits at the member's first unreduced retirement eligibility. Beneficiaries are assumed to elect a refund of member contributions if the value of the member's account balance exceeds the present value of the survivor benefit. Beneficiaries of active members that die while in the line of duty are assumed to commence their survivor benefits immediately at the death of the member.
- 6. There will be no recoveries once disabled.
- 7. Cash Balance Provisions: The cash balance interest crediting rate while a member is an active employee is assumed to equal 5.90%. The interest crediting rate after a member terminates employment is 4%.
- 8. Cash Balance Credit for Unused Sick Leave (annual and at retirement): It is assumed Tier 3 members will receive an additional 7.5% of pay employer pay credit each year due to the conversion of unused sick leave after the member attains five years of service. It is also assumed the Tier 3 members will have fund 480 hours of unused sick leave to convert to pay credit at the time of their retirement. It is assumed that the General Assembly will fund this benefit in all future years.
- 9. Decrement timing: Decrements of all types are assumed to occur mid-year. Decrement rates are used as described in this report, without adjustment for multiple decrement table effects.
- 10. Service: All members are assumed to accrue 1 year of benefit and eligibility service each year.
- 11. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

50

- 12. Incidence of Contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
- 13. Current Inactive Population (Retirement Fund): All non-vested members are assumed to take an immediate refund of member contributions. Vested members are assumed to elect an immediate refund of member contributions at the valuation date if the value of their account balance exceeds the present value of their deferred benefit. Members hired prior to September 1, 2008 are assumed to retire at age 55 and members hired on or after September 1, 2008 are assumed to retire at age 60.
- 14. The additional \$5 per year of service insurance dollar subsidy effective January 1, 2023 is assumed to be paid in all applicable years.

Participant Data

Participant data was supplied in electronic text files. There were separate files for (i) active and inactive members, and (ii) members and beneficiaries receiving benefits.

The data for active and terminated members included date of birth, gender, date of participation, benefit tier indicator, service with the current system, total vesting service, salary, employee contribution account balances, and employer pay credits for members participating in the cash balance plan. For retired members and beneficiaries, the data included date of birth, gender, spouse's date of birth (where applicable), amount of monthly benefit, date of retirement, and form of payment code.

Assumptions were made to correct for missing, bad, or inconsistent data. These had no material impact on the results presented.

Changes in assumptions since the prior valuation:

Demographic and economic assumptions were updated based on the 2022 Experience Study.

In conjunction with the review of the healthcare per capita claims cost, the assumed increase in future healthcare costs, or trend assumption, is reviewed on an annual basis. The trend assumption was increased during the select period in this valuation as a result of our review.

Development of Baseline Claims Cost

For non-Medicare retirees, the initial per capita costs were based on the plan premiums effective January 1, 2024, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. The spouse/dependent premium of \$1,129.72 for non-Medicare retirees is based on a blending of Family and Couple premiums for the current retirees that have over 4 years of hazardous service. The fully-insured premiums paid to the Kentucky Employees' Health Plan (KEHP) are blended rates based on the combined experience of active and retired members. Because the average cost of providing health care benefits to retirees under age 65 is higher than the average cost of providing health care benefits to active employees, there is an implicit rate subsidy for the non-Medicare eligible retirees. Actuarial Standard of Practice No. 6 (ASOP No. 6) requires aging subsidies (or implicit rate subsidies) to be recognized. However, the health insurance trusts are only used to reimburse KEHP for the employer's portion of the blended premiums. Said another way, the trusts are not used to fund the difference between the underlying retiree claims and the blended KEHP premiums. As a result, the retiree health care liabilities developed in this report for the non-Medicare retirees are based solely on the premiums charged by KEHP, without any age-adjustment. GASB Statements No. 74 and No. 75 prohibit such a deviation from ASOP No. 6. The liabilities developed in this report are solely for the purpose of funding the benefits paid by the health insurance funds and are not appropriate for financial statement disclosures required by GASB. GRS provides separate GASB reports which include the liabilities associated with the implicit rate subsidy.

| 2024 MONTHLY COSTS FOR THOSE NOT ELIGIBLE FOR MEDICARE | | | |
|--|----------|-------------------|--|
| Age | Member | SPOUSE/DEPENDENTS | |
| <65 | \$929.46 | \$1,129.72 | |
| | | . , | |

For Medicare retirees, the initial per capita costs were estimated based on the plan premiums effective January 1, 2024, and are used for both current and future retirees. An inherent assumption in this methodology is that the projected future retirees will have a similar distribution by plan type as the current retirees. Age graded and sex distinct premiums are utilized for retirees over the age of 65. These costs are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process "distributes" the average premium over all age/sex combinations and assigns a unique premium for each combination. The age/sex specific costs more accurately reflect the health care utilization and cost at that age.

| 2024 MONTHLY COSTS FOR THOSE ELIGIBLE FOR MEDICARE | | |
|--|----------|----------|
| Age | Male | Female |
| 65 | \$ 81.35 | \$ 76.72 |
| 75 | 95.18 | 92.87 |
| 85 | 100.65 | 101.83 |

Appendix B of the report provides a full schedule of premiums.

State Police Retirement System Actuarial Valuation – June 30, 2023 The percentage of the insurance premium paid by SPRS is calculated based on the Medical Only premium amounts. The majority of SPRS Medicare retirees are covered under the Premium Medicare Advantage plan. Because the premiums for the Medical Only plan are higher than the Premium Medical Advantage plan, retirees with less than 20 years of service pay a smaller contribution toward their insurance coverage. To model the impact of the employer contribution being based on the Medical Only Plan rather than the plan selected by the retiree, the employer share for retirees qualifying for percentage-based subsidies was blended to reflect retiree plan selection.

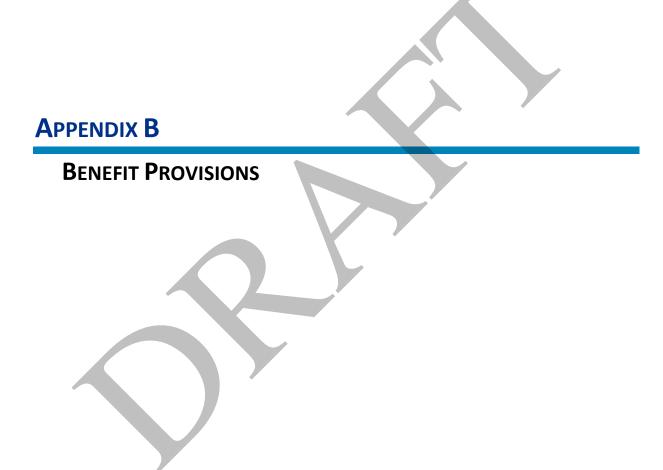

The above assumption implicitly implies that the Medical Only plan premiums will increase at a rate of 4.90% as of January 1, 2024, decreasing over 9 years to an ultimate trend rate of 4.05%, and that the remaining Medicare plan premiums will increase at the Medicare trend assumption used in the actuarial valuation.

Blake Orth is a Member of the American Academy of Actuaries (MAAA) and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Summary of Benefit Provisions for State Police Retirement System (SPRS)

SPRS Employees

Retirement: Tier 1, Participation before 9/1/2008

| Normal Retirement Eligibility | Age 55 with at least 1 month of service credit; or Any age with at least 20 years of service |
|----------------------------------|--|
| Benefit Amount | If a member has at least 60 months of service, the monthly benefit is 2.50% times final average compensation times years of service. |
| | If a member has less than 60 months of service, the monthly benefit is the actuarial equivalent of two times the member's contributions with interest. |
| | Final average compensation is based on the member's highest 3 years of compensation. |
| Early Retirement Eligibility | Age 50 with at least 15 years of service |
| Early Retirement | |
| Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years and 4.5% per year for the next five years for each year the member's retirement eligibility precedes the member's normal retirement date. |
| | |

SPRS Employees (continued)

Retirement: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Normal Retirement | Age 60 with at least 5 years of service; or |
|-------------------|---|
| Eligibility | Any age with at least 25 years of service |

Benefit Amount The monthly benefit is equal to the applicable benefit multiplier times final average compensation times years of service.

| Years of Service | Benefit Multiplier |
|------------------|--------------------|
| 10 or less | 1.30% |
| 10-20 | 1.50% |
| 20-25 | 2.25% |
| Greater than 25 | 2.50% |

Final compensation is based on the member's highest 3 years of compensation.

| Early Retirement Eligibility | Age 50 with at least 15 years of service |
|---------------------------------|--|
| Early Retirement Reduction | Normal Retirement benefit reduced 6.5% per year for the first five years and 4.5% per year for the next five years for each year the member's retirement date precedes the member's normal retirement eligibility. |

Retirement: Tier 3, Participation on or after 1/1/2014

| Normal Retirement Eligibility | Age 60 with at least 5 years of service; or Any age with at least 25 years of service |
|----------------------------------|--|
| Benefit Amount | Each year that the member is active, a 7.50% employer pay credit and the employee's 8.00% contribution will be credited to each member's hypothetical cash balance account. The hypothetical account will earn interest at a minimum rate of 4%, annually. If the System's geometric average net investment return for the previous five years exceeds 4%, then the hypothetical account will be credited with an additional amount of interest in that year equal to 75% of the amount of the return which exceeds 4%. All interest credits will be applied to the hypothetical account balance on June 30 based on the account balance as of June 30 of the previous year. |
| | Each June 30 (beginning June 30, 2023), members with at least five years of service credit will receive an employer pay credit based on their unused sick leave in excess of 480 hours. Members will also receive an employer pay credit based on their balance of unused sick leave upon termination of employment. |
| | At retirement, the member's hypothetical account balance may be converted into an annuity based on an actuarial factor. |
| Early Retirement Eligibility | N/A |

State Police Retirement System Actuarial Valuation – June 30, 2023

SPRS Employees (continued)

Deferred Vested Benefit: Tier 1, Participation before 9/1/2008

| Eligibility | At least 1 month of service credit |
|-------------|------------------------------------|
|-------------|------------------------------------|

Benefit Amount Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age

Deferred Vested Benefit: Tier 2, Participation on or after 9/1/2008 but before 1/1/2014

| Eligibility | 5 years of service |
|----------------|---|
| Benefit Amount | Normal retirement benefit deferred to normal retirement age, or a reduced retirement benefit at an early retirement age |

Deferred Vested Benefit Tier 3, Participation on or after 1/1/2014

| Eligibility | 5 years of service |
|----------------|--|
| Benefit Amount | At termination of employment, members may choose to leave their account balance with the System and retire once they are eligible. The hypothetical account balance will earn 4% annual interest after termination. Members may also choose to withdrawal their entire accumulated balance. If a member does not have 5 years of service at termination, the member is eligible to receive a partial refund of their account balance. This refund includes the member's contributions with interest. |

Disability Retirement: Participation before 8/1/2004

| Eligibility | 60 months of service (requirement is waived if line of duty disability) |
|--------------------|--|
| Disability Benefit | Disability benefits are calculated in the same manner as the normal retirement benefit with years of service and final compensation being determined as of the date of disability, except that if the member has less than 20 years of service at disability, service credit shall be added to the person's total service beginning with the last date of paid employment and continuing to the member's 55 th birthday, with total service not exceeding 20 years. Total service credit added shall not be greater than the member's actual service at disability. |

KRS Board Meeting - Approval of June 30, 2023 Actuarial Valuations for KERS Hazardous, KERS Non-Hazardous and SPRS

SPRS Employees (continued)

Disability Retirement: Participation on or after 8/1/2004 but before 1/1/2014

| Eligibility | 60 months of service (requirement is waived if line of duty disability) | | | |
|-----------------------------------|---|--|--|--|
| Disability Benefit | The higher of 25% of the member's final monthly rate of pay or the member's normal retirement benefit (without reduction for early retirement) with years and final compensation being determined as of the date of disability. | | | |
| Disability Retirement: Participat | tion on or after 1/1/2014 | | | |
| Eligibility | 60 months of service (requirement is waived if line of duty disability) | | | |
| Disability Benefit | The higher of 25% of the member's final monthly rate of pay or the member's retirement benefit calculated at the member's normal retirement date. | | | |
| Line of Duty Disability Benefit | | | | |
| Disability Benefit | If the disability is a direct result of an act in the line of duty, the benefit shall not be less than 25% of the member's final monthly final rate of pay. If the disability is deemed to be Total and Permanent, then this benefit shall not be less than 75% of the member's monthly average pay. | | | |
| Child Benefit | Additionally, each eligible dependent child will receive 10% of the member's monthly average pay up to a maximum of 40%. Member and dependent payment shall not exceed 100% of member's monthly average pay. | | | |
| Pre-Retirement Death Benefit | | | | |
| Eligibility | Eligible for early or normal retirement; or Under age 55 with at least 60 months of service and actively working at the time of death; or At least 144 months of service, if no longer actively working | | | |
| Spouse Benefit | The member's retirement benefit calculated in the same manner as if the member had retired on the day of the member's death and elected a 100% joint and survivor benefit. The benefit is actuarially reduced if the member dies prior to their normal retirement age. | | | |
| | | | | |

SPRS Employees (continued)

Pre-Retirement Death Benefit (Death in the Line of Duty)

| | Eligibility | One month of service credit |
|---------|---|--|
| | Spouse Benefit | A \$10,000 lump sum payment plus a monthly payment of 75% of the deceased member's final monthly average pay. Each dependent child will receive 10% of the final monthly average pay (not to exceed a total child benefit of 25% while the spouse is alive). A spouse may also elect the non-line of duty death benefit. |
| | Non-Spouse Benefit | If the beneficiary is only one person who is a dependent receiving at least 50% of his or her support from the member, the beneficiary may elect a lump sum payment of \$10,000. |
| | Child Benefit | In the event there is no surviving spouse, the benefit is 50% of final monthly average pay for one child, 65% of final average pay for two children, or 75% of final average pay for three or more eligible children. |
| Post-Re | tirement Death Benefit | |
| | Eligibility | 48 months of service, and in receipt of retirement benefits |
| | Death Benefit | A \$5,000 lump sum payment |
| Membe | er Contributions | |
| | Tier 1, Participation before 9/1/2008 | 8% of creditable compensation. Members who do not receive a retirement benefit are entitled to a full refund of contributions with interest. The annual interest rate is set by the Board, not less than 2.0%. |
| | Tier 2, Participation on or after 9/1/2008 | |
| | but before 1/1/2014 | 8% of creditable compensation plus 1% of creditable compensation, which is deposited into the 401(h) account and is not refundable. Members who do not receive a retirement benefit are entitled to a refund of non-401(h) contributions with interest. The annual interest rate is 2.5%. |
| • | Tier 3, Participation after 1/1/2014 | 8% of creditable compensation plus 1% of creditable compensation, which is deposited into the 401(h) account and is not refundable. Members who do not receive a retirement benefit are entitled to a refund of non-401(h) contributions with interest. |

Changes in Retirement Benefits since the Prior Valuation

House Bill 506 passed during the 2023 legislative session and reinstated the Partial Lump Sum Option Form of payment for members who retire on and after January 1, 2024, and adjusted the minimum required separation period before a retiree may become reemployed and continue to receive their retirement allowance to one month for all circumstances.

Summary of Main Retiree Insurance Benefit Provisions

Insurance: Participation began before 7/1/2003

| Benefit | Eligibility |
|---------|-------------|
|---------|-------------|

Recipient of a retirement allowance

Benefit Amount

| Non-Hazardous Service | Percentage of Member Premium Paid by Retirement System | Hazardous Service | Percentage of Member & Dependent Premium Paid by Retirement System | |
|--------------------------|--|----------------------|--|--|
| Less than 4 years | 0% | Less than 4 years | 0% | |
| 4 – 9 years | 25% | 4 – 9 years | 25% | |
| 10 – 14 years | 50% | 10 – 14 years | 50% | |
| 15 – 19 years | 75% | 15 – 19 years | 75% | |
| 20 or more years | 100% | 20 or more years | 100% | |

The percentage paid by the retirement system is applied to the 'contribution' plan selected by the Board.

| Duty Disability Retirement | If disability was a result of injuries sustained while in the line of duty, the member receives 100% of the maximum contribution for the member and dependents. |
|---|--|
| Duty Death in Service | If an active employee's death was a result of injuries sustained while in the line of duty, the member's spouse and children receive a fully subsidized health insurance benefit. |
| Non-Duty Death in Service | If the surviving spouses is in receipt of a pension allowance, he or she is eligible for continued health coverage. The percentage of the premium paid for by the retirement system is based on the member's years of hazardous service at the time of death. |
| Surviving Spouse of a Retiree | A surviving spouse of a retiree, who is in receipt of a pension allowance, will receive a premium subsidy based on the member's years of hazardous service. |
| Hazardous employees who retired prior to August 1, 1998 | System's contribution for spouse and dependents is based on total service. |

Insurance: Participation began on or after 7/1/2003

| Benefit Eligibility | Recipient of a retirement allowance with at least 120 months of service at retirement (180 months if participation began on or after 9/1/2008) | | |
|----------------------------|--|--|--|
| Non-Hazardous Subsidy | Monthly contribution of \$10 for each year of earned non-hazardous service. The monthly contribution is increased by 1.5% each July 1. As of July 1, 2023, the Non-Hazardous monthly contribution was \$14.41/year of service. Upon the retiree's death, the surviving spouse may continue coverage (if in receipt of a retirement allowance) but will be 100% responsible for the premiums. | | |
| | Effective January 1, 2023, members will receive an insurance dollar contribution of \$5 for every year of non-hazardous service a member attains over 27 years. This additional dollar contribution does not increase by 1.5% annually and is only payable for non-Medicare retirees. Also, it is only payable when the applicable insurance fund is at least 90% funded on an actuarial value of asset basis as of the last actuarial valuation. | | |
| Hazardous Subsidy | Monthly contribution of \$15 for each year of earned hazardous service. The monthly contribution is increased by 1.5% each July 1. As of July 1, 2023, the hazardous monthly contribution was \$21.62/year of service. Upon the retiree's death, the surviving spouse of a hazardous duty member will receive a monthly contribution of \$10 (\$14.41 as of July 1, 2023) for each year of hazardous service. | | |
| | Effective January 1, 2023, members will receive an insurance dollar contribution of \$5 for every year of hazardous service a Tier 1 member attains over 20 years and a Tier 2 member attains over 25 years. This additional dollar contribution does not increase by 1.5% annually and is only payable for non-Medicare retirees. Also, it is only payable when the applicable insurance fund is at least 90% funded on an actuarial value of asset basis as of the last actuarial valuation. | | |
| Duty Disability Retirement | If disability was a result of injuries sustained while in the line of duty or was duty-related, the member receives a benefit based on at least 20 years of service. This benefit is provided to members in the Non- Hazardous and Hazardous plans alike. | | |
| | If the disability is deemed to be Total and Permanent, the insurance premium for the member, the member's spouse, and the member's dependent children shall also be paid in full by the System. For non- hazardous members to be eligible for this benefit, they must be working | | |

in a position that could be certified as a hazardous position.

Duty Death in Service

If an active employee's death was a result of injuries sustained while in the line of duty, the member's spouse and children receive a fully subsidized health insurance benefit.

Non-Duty Death in Service

If the surviving spouse is in receipt of a pension allowance, he or she is eligible for continued health coverage. The percentage of the premium paid for by the retirement system is based on the member's years of hazardous service at the time of death.

Monthly Health Plan Premiums – Effective January 1, 2024

| Non-Medicare Plan Options | | | | | |
|---------------------------|----------|-------------|------------|------------|--------------|
| Plan Option | Single | Parent Plus | Couple | Family | Family X-Ref |
| LivingWell PPO | \$949.04 | \$1,320.40 | \$1,981.62 | \$2,185.78 | \$1,126.28 |
| LivingWell CDHP | 930.76 | 1,269.28 | 1,866.24 | 2,078.08 | 1,068.66 |
| LivingWell Basic | 901.04 | 1,234.80 | 1,863.04 | 2,069.88 | 1,057.40 |

| Medica | re Plan Options | |
|----------------------------------|-----------------|----------|
| Medical Only Plan | | \$188.73 |

| Premium Mirror Plan | | 328.11 |
| Essential Medical Advantage Plan | | 4.07 |
| Premium Medical Advantage Plan | | 93.35 |

Contribution plan selected by the Board was the LivingWell PPO plan option for non-Medicare retirees. Contribution plan selected by the Board was the Medical Only plan for the Medicare retirees.

Dollar Contribution Amount for Participation on or after 7/1/2003

Monthly contribution amounts per year of service as of July 1, 2023.

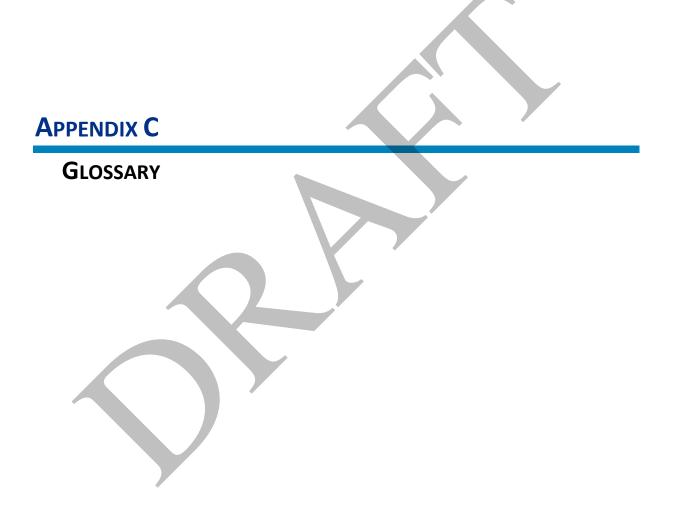

| Non-Hazardous | Hazardous |
|---------------|-----------|
| Service | Service |
| \$14.41 | \$21.62 |

Note: Non-Hazardous benefits are applicable to SPRS members with prior service in a Non-Hazardous System.

Changes in Health Insurance Benefits since the Prior Valuation

None.

Glossary

Actuarial Accrued Liability (AAL): That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Plan Benefits which is not provided for by future Normal Costs. It is equal to the Actuarial Present Value of Future Plan Benefits minus the actuarial present value of future Normal Costs.

Actuarial Assumptions: Assumptions as to future experience under the Fund. These include assumptions about the occurrence of future events affecting costs or liabilities, such as:

- mortality, withdrawal, disablement, and retirement;
- future increases in salary;
- future rates of investment earnings and future investment and administrative expenses;
- characteristics of members not specified in the data, such as marital status;
- characteristics of future members;
- future elections made by members; and
- other relevant items.

Actuarial Cost Method or **Funding Method**: A procedure for allocating the Actuarial Present Value of Future Benefits to various time periods; a method used to determine the Normal Cost and the Actuarial Accrued Liability. These items are used to determine the ADC.

Actuarial Gain or Actuarial Loss: A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two Actuarial Valuation dates. Through the actuarial assumptions, rates of decrements, rates of salary increases, and rates of fund earnings have been forecasted. To the extent that actual experience differs from that assumed, Actuarial Accrued Liabilities emerge which may be the same as forecasted, or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., the fund's assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results that produce actuarial liabilities which are larger than projected. Actuarial gains will shorten the time required for funding of the actuarial balance sheet deficiency while actuarial losses will lengthen the funding period.

Actuarially Equivalent: Of equal actuarial present value, determined as of a given date and based on a given set of Actuarial Assumptions.

Actuarial Present Value (APV): The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:

a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.)

b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned, and

c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Actuarial Present Value of Future Plan Benefits: The Actuarial Present Value of those benefit amounts which are expected to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such items as the effect of advancement in age and past and anticipated future compensation and service credits. The Actuarial Present Value of Future Plan Benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive, non-retired members either entitled to a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.

Actuarial Valuation: The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial valuation for a governmental retirement system typically also includes calculations that provide the financial information of the plan, such as the funded ratio, unfunded actuarial accrued liability and the ADC.

Actuarial Value of Assets or Valuation Assets: The value of the Fund's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly actuaries use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the ADC.

Actuarially Determined: Values which have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the law.

Actuarially Determined Contribution (ADC): The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADC consists of the Employer Normal Cost and the Amortization Payment.

Amortization Method: A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay

method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.

Amortization Payment: The portion of the pension plan contribution or ADC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.

Closed Amortization Period: A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc. See Funding Period and Open Amortization Period.

Decrements: Those causes/events due to which a member's status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or termination.

Defined Benefit Plan: A retirement plan that is not a Defined Contribution Plan. Typically a defined benefit plan is one in which benefits are defined by a formula applied to the member's compensation and/or years of service.

Defined Contribution Plan: A retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, and the plan's earnings are allocated to each account, and each member's benefits are a direct function of the account balance.

Employer Normal Cost: The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.

Experience Study: A periodic review and analysis of the actual experience of the Fund which may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified as deemed appropriate by the Actuary.

Funded Ratio: The ratio of the actuarial value of assets (AVA) to the actuarial accrued liability (AAL). Plans sometimes calculate a market funded ratio, using the market value of assets (MVA), rather than the AVA.

Funding Period or **Amortization Period**: The term "Funding Period" is used two ways. In the first sense, it is the period used in calculating the Amortization Payment as a component of the ADC. This funding period is specified in State statute. In the second sense, it is a calculated item: the number of years in the future that will theoretically be required to amortize (i.e., pay off or eliminate) the Unfunded Actuarial Accrued Liability, based on a statutory employer contribution rate, and assuming no future actuarial gains or losses.

GASB: Governmental Accounting Standards Board.

GASB 67 and **GASB 68**: Governmental Accounting Standards Board Statements No. 67 and No. 68. These are the governmental accounting standards that set the accounting and reporting rules for public retirement systems and the employers that sponsor, participate in, or contribute to them. Statement No. 67 sets the accounting rules for the financial reporting of the retirement systems, while Statement No. 68 sets the rules for the employers that sponsor, participate in, or contribute to public retirement systems.

Normal Cost: That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method. Any payment in respect of an Unfunded Actuarial Accrued Liability is not part of Normal Cost (see Amortization Payment). For pension plan benefits which are provided in part by employee contributions, Normal Cost refers to the total of employee contributions and employer Normal Cost unless otherwise specifically stated. Under the entry age normal cost method, the Normal Cost is intended to be the level cost (when expressed as a percentage of pay) needed to fund the benefits of a member from hire until ultimate termination, death, disability or retirement.

Open Amortization Period: An open amortization period is one which is used to determine the Amortization Payment but may not decrease by exactly one year in the subsequent year's actuarial valuation. For instance, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year.

Unfunded Actuarial Accrued Liability: The excess of the Actuarial Accrued Liability over the Actuarial Value of Assets. This value may be negative in which case it may be expressed as a negative Unfunded Actuarial Accrued Liability, also called the Funding Surplus.

Valuation Date or Actuarial Valuation Date: The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.

Board of Trustees Kentucky Retirement Systems Perimeter Park West 1260 Louisville Road Frankfort, KY 40601

Re: Sensitivity Analysis Based on Results of the June 30, 2023 Actuarial Valuation - SPRS

Dear Members of the Board:

Per Kentucky State Statute 61.670, we are providing this supplemental information regarding the sensitivity of the valuation results to changes in some of the economic assumptions. Specifically, the attached tables show the impact for the **State Police Retirement System (SPRS)** due to changes in the investment return assumption, the inflation rate assumption, and the payroll growth rate assumption.

Background

Investment Assumption

The investment return assumption is used to discount future expected benefit payments to the valuation date in order to determine the liabilities of the plans. The lower the investment return assumption, the less the benefit payments are discounted and the higher the valuation liability. The current investment return assumption is 5.25% for the retirement fund and 6.50% for the insurance fund. The sensitivity analysis shows the financial impact of a 1.00% increase and a 1.00% decrease in the investment return assumption. For purposes of this sensitivity analysis, the inflation assumption and payroll growth assumption remain unchanged from the valuation assumption.

Inflation Assumption

The inflation assumption underlies most of the other economic assumptions, including the investment return, salary increases, and payroll growth rate. This is a macroeconomic assumption and as such the same assumption is used in the valuation of each of the retirement systems. The current assumption is 2.50% for all funds. The sensitivity analysis shows the financial impact of a 0.25% increase and a 0.25% decrease in the inflation assumption. Note, the change in the inflation assumption results in a corresponding change in the investment return assumption, the individual salary increase assumption for projecting members' benefit amounts, the payroll growth rate assumption, and the healthcare trend assumption that is used in the valuation of the health insurance funds.

Board of Trustees October 31, 2023 Page 2

Payroll Growth Assumption

Participating employers of SPRS make contributions to the system as a percentage of covered payroll. Therefore, as payroll changes over time these amortization payments will also change. If actual covered payroll increases at a rate that is less than assumed, then the retirement system receives fewer contribution dollars than expected to finance the unfunded liability, which means the contribution rates in future years will be required to increase in order to finance the unfunded liability over the same time period. The current payroll growth assumption is 0.00% for both the retirement and insurance funds. The analysis shows the impact of a 1.00% increase and a 1.00% decrease in the payroll growth assumption.

Please note that the payroll growth assumption does not impact the valuation liabilities, unfunded liability, or funded status of the system. Rather, this assumption only impacts the amortization rate for financing the existing unfunded actuarial accrued liability and the actuarially determined employer contribution. For purposes of this analysis, the investment return assumption and the inflation assumption are held at their current valuation assumptions.

Certification

The information provided in this letter compliments the information provided in the June 30, 2023 actuarial valuation report. Please refer to the June 30, 2023 actuarial valuation report for additional discussion of the actuarial valuation, including the nature of actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions.

Actual results can, and almost certainly will, differ as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rate, and funding periods. The actuarial calculations are intended to provide information for rational decision making. The purpose of this information is to provide stakeholders the financial sensitivity of the unfunded liability and contribution rates to changes in the inflation, assumed rate of return, and payroll growth assumption.

Board of Trustees October 31, 2023 Page 3

To the best of our knowledge, this report is complete and accurate and is in accordance with generally recognized actuarial practices and methods. Mr. White and Ms. Shaw are Enrolled Actuaries. All three of the undersigned are members of the American Academy of Actuaries and meet all of the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. In addition, all three are independent of KPPA and are experienced in performing valuations for large public retirement systems. This communication shall not be construed to provide tax advice, legal advice or investment advice.

Sincerely,

Gabriel, Roeder, Smith & Company

UG.

Notes and assumptions:

The projection is based on the results of the June 30, 2023 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 5.25%.

New active members are assumed to be hired as current active members are assumed to terminate employment or retire.

The total active population is assumed to decrease 2% each year for each of the next 30 years.

Covered payroll is assumed to remain level throughout the entire projection.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the normal cost portion of the actuarially determined contribution.

The full actuarially determined amortization cost is assumed to be allocated amongst employers each biennium.

The second year of a biannual budget is assumed to take into account any expiring amortization bases.

Per HB 1 and HB 604 (passed in the 2022 legislative session), \$240 million in additional appropriations is assumed to be received in FYE 2024

Notes and assumptions:

The projection is based on the results of the June 30, 2023 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.50%.

New active members are assumed to be hired as current active members are assumed to terminate employment or retire.

The total active population is assumed to decrease 2% each year for each of the next 30 years.

Covered payroll is assumed to remain level throughout the entire projection.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the normal cost portion of the actuarially determined contribution.

The full actuarially determined amortization cost is assumed to be allocated amongst employers each biennium.

The second year of a biannual budget is assumed to take into account any expiring amortization bases.

Notes and assumptions:

The projection is based on the results of the June 30, 2023 actuarial valuation and assumes that all actuarial assumptions are realized, including the assumed annual asset return of 6.50%.

New active members are assumed to be hired as current active members are assumed to terminate employment or retire.

The total active population is assumed to decrease 2% each year for each of the next 30 years.

Covered payroll is assumed to remain level throughout the entire projection.

The contribution rate established in the Commonwealth's biennium budget is assumed to be equal to the full actuarially determined contribution rate.

- To: KRS Trustees
- From: John Chilton, KRS CEO
- Date: December 5, 2023

Subject: Employer Contribution Rates FY 2025 and FY 2026

In accordance with KRS 61.565, the employer contribution rates for the KERS and SPRS systems are determined by the annual valuation and approved by the KRS Board of Trustees in odd numbered years to align with the requirements of the Commonwealth's biennial budget planning period. These rates are confirmed by the budget bill of the General Assembly held in even numbered years.

KPPA actuaries, Gabriel Roeder Smith (GRS), have finalized the actuarial valuation by plan for the year ending June 30, 2023. Included in the valuations are the following recommendations for employer contribution rates.

| PLAN | Pension | Insurance | Normal Cost | Employer Contribution Rate |
|-------------------|---------|-----------|----------------|--------------------------------|
| KERS Nonhazardous | 6.99% | 1.45% | 8.44% | 8.44% plus UAL/AALC payment |
| KERS Hazardous | 23.74% | 0% | N/A | 23.74% |
| SPRS | 65.79% | 2.31% | N/A | 68.10% |

Unfunded Actuarial Liability (UAL) Payment or the Actuarially Accrued Liability Contribution (AALC) Payment

These agency-specific payments are listed in the valuation under Appendix D.

Recommendation for trustee consideration:

Adopt the KERS and SPRS employer contribution rates, including the pension and insurance splits and the KERS Nonhazardous unfunded liability agency-specific payment, as recommended by the actuary, and as stated above.

Overview

Markets continued to struggle for direction in the first quarter of Fiscal 2024 as all major global equity markets produced negative performance during the quarter and finished on the back foot with September marking the largest monthly decline of 2023. Realized rates and expectations for the future path of rates weighted heavily on markets as the US 10Y bond yield spiked to its highest level since 2007 during the quarter and the Treasury curve inverted to a level not seen in decades as markets reassessed the higher for longer narrative and the potential impacts on growth and markets.

September 2023

KPPA MONTHLY PERFORMANCE UPDATE

KERS/KERS-H/SPRS

After a strong first quarter of 2023, real GDP moderated to a 2.1% during the second quarter before surprisingly rebounding to 4.9% in the third quarter, the best quarterly growth rate in nearly two years fueled by consumer spending on goods and services, inventory investments and government spending. While this acceleration and the strength of recent data suggest a recession may not be imminent, expectations remain for a sharp slowdown in growth over the coming quarters as global central banks are intensifying their monetary policy tightening, with money, credit, and liquidity all decisively retreating. Over the past year and a half, the Fed, European Central Bank, Bank of Japan, and Bank of England have withdrawn a total of \$4.7tm from circulation, a significant drain but less than half of the amount added during the post-pandemic quantitative easing programs. Although equities have derated in absolute terms over the past three months, valuations remain relatively expensive relative to safe haven assets with the equity risk premium still quite low from an asset allocation perspective. Although the Q3 reporting season is delivering a relatively high proportion of EPS beats, it has not driven further upward EPS revisions and EPS revisions ratio has fallen sharply as earnings momentum appears to be stalling. Given the numerous headwinds, risk markets are likely to trade range bound with a mild bias toward the downside.

The KRS Pension Composite produced a return of -0.94% for the guarter. The KERS and SPRS Pension portfolios returned -0.89% and -0.92% respectively, while their benchmark returned -0.88%. The KERS-H Pension portfolio returned -1.14% versus its benchmark return of -0.69%. The KRS Insurance Composite produced a -1.86% return for the quarter underperforming the blended benchmark which returned -0.69%. Across portfolios, underperformance in the Public Equity and Private Equity portfolios were the primary drivers of relative performance during the quarter. While the Public Equity portfolio suffered from stock selection and style bias, the relative underperformance of the Private Equity portfolio is primarily due to the misalignment and timing of the benchmark. The current specified benchmark of Russell 3000 + 3% based on a quarter lag benefitted from the strong performance of the Public Equity markets during the quarter that ended June 2023 and was not reflective of the actual performance of Private Equity markets for the quarter ending September 2023. The underweight to Real Return was also a modest drag on performance as it was one of the few assets classes that in aggregate posted positive performance for the quarter. The overweight in the Specialty Credit portfolio was a positive contributor to performance as it outperformed on a relative basis and was one of the best performing asset classes during the quarter. The portfolios also continued to benefit from strong relative performance in the Core Fixed Income portfolio as Staff maintained an overall short duration profile which outperformed as rates rose. Since the end of the quarter, staff has been rebalancing the Core portfolio to lengthen duration as all in yields have become more compelling and rates may be nearing their cycle peaks. Overweights to cash were also positive contributors for the quarter.

September 2023

KPPA MONTHLY PERFORMANCE UPDATE

Public Equity

Global equity markets were notably weaker during the quarter, falling -3.40% per the MSCI ACWI. This brought the asset class return to 20.80% for the one-year period. US markets held up slightly better than international markets during the period (-3.25% versus -3.49%), contributing to them edging out their counterparts for the twelve-month period (20.46% versus 20.19%).

After a good start to the quarter, US markets turned lower in July as thoughts of a potential soft landing began to slide and concerns about extended policy rates and their impact took hold. Interest rates spiked with the 10-year Treasury gaining 100bps to reach new 15-year highs. As yields pushed higher, risk assets sensitive to higher borrowing costs re-priced to the downside (smaller caps and those perceived to be lower quality in particular). With the policy rate now firmly above neutral it follows that slowing economic activity is likely, as businesses and consumers start to feel the costs. The narrow market storyline continued as mega-cap tech dominated, while the average stock lost ground during the quarter (the S&P 500 has returned approximately 13% YTD, while the "magnificent 7" have returned an average 83%), the market now at historically high concentration. Despite value holding up slightly better than growth during the quarter (-3.15% versus -3.34%), market winners this year have been large cap, growth, and quality. Large cap growth has returned 24.98% YTD, while small cap growth has returned 5.24%. On the other hand, large cap value has returned less than 2%, while small cap value has fallen roughly 50bps.

Most Non-US developed markets were weaker during the quarter. This was primarily caused by slowing economic growth and persistently high inflation in the face of continued rate hikes. Underpinning the slower growth is the financial tightening that has caused a deceleration in consumption (increasing but at a slower rate), inventory destocking, and weaker manufacturing. Despite the growth deceleration, company earnings have come in ahead of expectations as they had assumed a hard landing recession. Supply chains appear to have normalized, which has led to reduced input costs which has helped to bolster earnings.

The KPPA global equity returned -4.11% during the quarter versus its benchmark return of -3.40%. Relative underperformance is primarily the result of allocation within the US equity portion of the portfolio, and weaker stock selection within the NonUS mandates, particularly those with a growth style bias.

Within the US equity allocation, the portfolio trailed its index by 24bps (-3.49% vs -3.25%). This was primarily due to allocation. The portfolio tilts towards value and smaller in market cap. The value tilt in

September
2023KPPA MONTHLY PERFORMANCE UPDATEKERS/KERS-H/SPRS

the portfolio was slightly beneficial; however, the smaller size bent hampered relative performance. Small caps underperformed their large cap counterparts by just under 2%.

The international equity allocation underperformed during the quarter, falling -5.05% versus a benchmark return of -3.49%. Weakness was most pronounced in the growth portion of the portfolio as any strategy whether developed or emerging market with a growth bias struggled. This was partially

offset by the value portion of the portfolio which held up better, with two of the three mandates providing positive absolute performance.

For the trailing 12 months, the KPPA global equity portfolio returned 20.39%, trailing its benchmark by 41bps. The US equity portion of the portfolio returned 19.46% versus 20.46%. Underperformance can be attributed to the factor tilts in the portfolio (value and smaller) as stock selection among most mandates was positive. The NonUS equity portion of the portfolio returned 21.62% versus 20.19%. While stock selection was mixed, relative outperformance was driven by strong performance in the value biased mandates.

Core Fixed Income

Rates across the U.S. Treasury curve finished the quarter higher, with the long end rising the most. The yield on the 2-year Treasury, which is highly sensitive to expectations for the Fed Funds rate, started the quarter at 4.90% and closed September at 5.04%. The 10-year Treasury, which is often used as a benchmark for pricing home mortgages, began the quarter trading at 3.84% closing at 4.57%. Lastly, the yield on the 30-year bond, which tends to be highly sensitive to changes in long-term economic expectations, increased from 3.86% to 4.70%.

The Bloomberg U.S. Aggregate Bond Index returned -2.54% for September resulting in a quarterly loss of 3.23% as U.S. Treasury yields rose across the curve and credit spreads rose. Corporate bonds were the best performing spread sector for the quarter, generating 84 basis points of excess returns. Commercial mortgage-backed securities (CMBS) were next, outperforming similar duration Treasuries by 35 basis points. Asset-backed securities (ABS) rounded out the top three closing the quarter generating 29 basis points of excess returns.

The Core Fixed Income portfolio posted a loss of 2.02% for the month and a loss of 1.14% for the quarter, outperforming the benchmark by 0.52% for the month and 2.09% for the quarter. The relative outperformance is directly attributable to the underweight overall duration as rates rose and allocations to the Corporate and ABS sectors within our mandates.

| September | KPPA MONTHLY PERFORMANCE UPDATE | KERS/KERS-H/SPRS |
|-----------|---------------------------------|------------------|
| 2023 | KPPA WONTHLY PERFORMANCE OPDATE | |

Specialty Credit - Private Equity – Real Return – Real Estate

The Bloomberg US High Yield Index returned -1.18% in September and 0.46% over the quarter. Lower rated issues outperformed for the sixth consecutive month. BB, B and CCC-rated issues returned -1.46%, -1.03% and -0.81%, respectively in September. BB, B and CCC-rated issues returned -0.43%, 0.83% and 2.39% during the quarter, respectively. This continued the year-to-date trend of risk outperforming quality, as CCC-rated issues have outperformed BB-rated issues by 8.33% year-to-date. U.S. high yield

bonds saw their worst monthly total return since February as resilient economic data and hawkish Federal Reserve commentary drove interest rates sharply higher. Overall spreads ended the month 23 basis points wider and 4 basis points wider over the quarter.

Leveraged loans outperformed high yield bonds for the fifth time in six months as rising rates and steady CLO issuance provided a tailwind for the asset class. The Morningstar LSTA US Leveraged Loan Index returned 0.96% in September, ending the quarter with a gain of 3.46%. Primary issuance jumped 40% versus the prior month to the highest issuance since November 2021. Despite persistent concerns about maturity walls in the leveraged finance market, just 10% of leveraged loans mature before 2026, down from 20% at the start of the year.

Default and distressed exchange activity moderated in September with one default and one distressed exchange completed. The quarter saw five defaults and four distressed exchanges. There have been seventeen defaults thus far year-to-date, surpassing the seven defaults during all of 2022. However, as of September, bond and leveraged loan default rates ended the quarter at 1.32% and 1.90%, respectively, both below historical averages.

The Specialty Credit portfolio returned 1.07% for the month ending September and 2.64% for the quarter outperforming the custom benchmark for both time periods by 1.18% and 0.69%, respectively. However, the portfolio has performed better over longer time periods as represented by the 3-Year and 5-Year returns outperforming the benchmark by 3.20% and 2.04%, respectively.

Markdowns in Real Estate continued during the quarter, with the portfolio still seemingly affected more by higher cap rates than declining property-level performance. The portfolio's exposures to industrial, self-storage, student housing, medical office, and senior living continued to experience positive rent growth and pricing. From a valuation perspective, a look at the secondaries market suggests that there still may be more room to fall, with real estate funds pricing at significantly wider discounts than other strategies like private equity, credit, and infrastructure. Public markets sent a similarly bearish signal, with the US REIT index RMZ falling 7% during the quarter. That pushed the benchmark to a -2% YTD return and extends the 25% drop it had in 2022. While starting to pick up, real estate deal volume and price discovery remain muted, with new deals remaining concentrated in the industrial and multifamily

|-----------|---------------------------------|------------------|
| 2023 | | KLKS/KLKS-H/SFKS |

sectors. However, even those sectors have seen new construction starts drop to 10-year lows because of higher financing and construction costs. The Real Estate portfolio returned -2.63% for the quarter and -7.75% for the trailing twelve months, outperforming the custom benchmark for both time periods by 0.25% and 2.98%, respectively.

Commodities were mixed during the quarter. Oil prices rose driven by supply cuts from the world's largest producers along with data showing US oil inventories fell to their lowest level in over 12 months. Natural gas prices moved higher for the second straight quarter after six months of significant declines. Prices were up 4.7% for the third quarter but are still down a massive -56.7% for the past twelve months.

Gold declined for the second straight quarter and other precious medals slumped as the DXY dollar index rose and prices were down across the agricultural complex. The Real Return portfolio returned 4.71% for the quarter and 14.98% for the trailing twelve months, outperforming the custom benchmark for both time periods by 3.03% and 8.31%, respectively. MLP exposure has been the main driver of

performance in the Real Return portfolio, returning nearly 30% over the last year. Strong cash flows, disciplined capex, and consolidation have contributed to the industry's 40% annualized returns for the past 3 years since its crash during the early months of COVID.

Liquidity

Federal Reserve officials left interest rates unchanged at the September meeting following a 25 basis point hike in July, continuing the alternate-meeting pace of hikes they have followed since May. The surprise came in the dot plot, where the median projection indicated one more hike in 2023 and just two cuts in 2024 (down from four 2024 cuts in the June projection). The Federal Reserve is sticking to the higher-for-longer message they have been signaling for the last several months, despite downside risks to growth from labor strikes and rising oil prices. Short rate markets are pricing roughly 50% odds of one more rate hike this year.

As of September, the benchmark 3-month T-Bill returned 0.45% for the month and finished the quarter returning 1.38%. The cash portfolio returned 0.39% and 1.12% for the month and quarter, respectively. The underperformance is attributable to lower rates offered by overnight repurchase agreements which is tied to the Fed Funds rate relative to market yields of the 3-month T-Bill. Since the Federal Reserve has begun to slow interest rate hikes, the difference in deposit rates compared to market rates will continue to compress going forward.

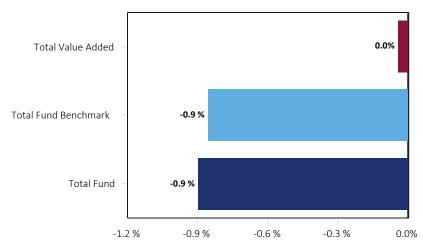

End of September key cash market interest rates: Fed Funds Effective 5.33%, 1M T-Bill 5.34% and 3M T-Bill 5.45%.

Compliance Report

Quarter Ending: September 30, 2023

| Compliance Guideline Review Period Ended September 30, 2023 | Compliance Status | Legend |
|---|----------------------|--|
| Total assets assigned to the selected manager shall not exceed 25% of that firm's total assets under management and shall not exceed 25% of a firm's total assets under management in a commingled product. | ٠ | In Compliance To be determined Not In Compliance |
| The assets managed by any one active or passive investment manager shall not exceed 15% of the overall assets in the Pension and Insurance funds. | •1 | |
| No more than 20% of the total net assets of the Real Return portfolio may be invested in any single closed-end or open-end limited partnership or other unregistered investment vehicle. | ٠ | |
| An investment in any single domestic or international equity allocation in any single corporation cannot exceed 5% of the market value of total assets. | • | |
| The systems in aggregate shall not hold in excess of 3% of the outstanding shares of any single corporation. | | |

| The amount of stock in any one industry in the domestic equity allocation shall not exceed 10% of the aggregate market value of the System's assets. | • |
|---|---|
| Investment in "frontier" markets shall not exceed 5% of the System's international equity assets. | • |
| The duration of the total fixed income portfolio shall not deviate from the Barclays Aggregate Index by more than 25%. | • |
| The amount invested in the debt of a single corporation shall not exceed 5% of the total market value of the System's Assets. | • |
| 50% of the fixed income assets must have liquidity that is T+3 (trade date plus three days) or better. | • |
| No public fixed income manager shall invest more than 5% of the total market value of assets held in any single issue, short-term instruments, with the exception of U.S. Government issued, guaranteed, or agency obligations. | • |
| No more than 50% of the total net assets of the Real Return portfolio may be invested in any one registered investment vehicle, mutual fund, or separately managed account. | • |
| No more than 20% of the total net assets of the Real Return portfolio may be invested in any single closed-end or open-end limited partnership or other unregistered investment vehicle. | • |

Derivatives Applications not Permitted: Derivatives may not be used for any activity for which the primary purpose is speculation or cause the portfolio to be leveraged beyond a 100% invested position.

All instruments in the Liquidity allocation shall have a maturity at the time of purchase that does not exceed 397 days.

1. Interpretation that this restrictions only applies to external manager and not assets managed by KPPA Investment Staff.

| NOTE - Variance Explanation | | | L | Differences du | e to rounding | | |

1) Variance is a result of continuous fluctuation of deposits and transactions that flow through the cash account. As a result of an Internal Audit finding, we continue to evaluate the optimum cash balances at JP Morgan Chase.

2) Short term investments are primarily comprised of cash on hand at the custodial bank, the variance in the balance is a result of the cash flows of each plan.

3) The variance in Investment Accounts Receivable is due to pending trades.

4) The increase in Core Fixed Income is a result of favorable market conditions during the prior fiscal year as well as additional funding.

5) The increase in Public Equities is the result of additional contributions to the public equity asset class.

6) The variance in Derivatives is a result of hedging and arbitration of risk within the portfolios.

7) The increase in Real Return is a result of favorable market conditions as well as additional funding.

8) The variance is a result of the demand of the Securities Lending Program.

9) The variance in Accounts Payable is due to an Increase in the payroll and leave liability accrual as well as an increase in outstanding employer credit invoices.

10) The variance in Investment Accounts Payable is due to pending trades.

11) The variance is a result of the demand of the Securities Lending Program.

| End of Period | \$3,657,871 | \$897,991 | \$588,386 | \$5,144,249 | \$4,421,951 | 16.33% | |
| NOTE - Variance Explanation | | | | Differences | s due to roun | nding. | |

1) Member Contributions increased due to an increase in covered payroll.

2) The Employer Pay Credit will continue to increase as Tier 3 members increase.

3) Employer Contributions increased due to an increase in covered payroll.

4) Pension Spiking contributions decreased due to a decrease in KERS Hazardous pension spiking contributions billed to employers.

5) Health Insurance Contributions continue to fluctuate in the Pension accounts due to Tier 2 and Tier 3 retiree health insurance system costs as well as corrections being processed to previous fiscal years.

6) The increase in Net Appreciation in Fair Value of Investments is the result of less losses in Public Equity and gains from Private Equity and Speciality Credit.

7) The increase in Interest/Divident Income is primarily the result of increased partnership income from Specialty Credit.

8) The increase in Investment Expense is primarily the result of increased management fees and partnership expenses for Specialty Credit.

9) The increase in performance fees is the result of increased fees fro Private Equity and Specialty Credit.

10) The variance is a result of the demand of the Securities Lending Program.

1) The increase Employer Contributions is due to an increase in covered payroll.

2) Health Insurance Premiums decreased due to refunds processed to hazardous retirees for premiums paid for dependents that should have been covered by KPPA.

3) The Humana Gain Share payment will fluctuate year to year based on claims paid.

4) The increase in Retired Re-employed Healthcare Contributions is due to an increase in retired re-employed members in KERS and KERS Hazardous.

5) Health Insurance Contributions will continue to rise as Tier 2 and Tier 3 members increase.

6) The increase in Net Appreciation in Fair Value of Investments is the result of less losses in Public Equity and gains from Private Equity and Speciality Credit.

7) The increase in Interest/Dividend Income is primarily the result of increased partnership income from Specialty Credit.

8) The increase in Investment Expense is primarily the result of increased management fees and partnership expenses for Specialty Credit.

*Pension Spiking invoices on this report are Employer Pension Spiking. By statute these invoices are due 12 months from the invoice date. Employer Pension Spiking is in effect only for retirements prior to July 1, 2018, therefore, unless there has been a recently created invoice for a backdated retirement, all of these invoices are greater than 12 months old.

**Other Invoices include Expense Allowance; Expired Post Pending; IPS Employer Refund; Penalty EOY Reporting; Personnel Adjustment; and, Refunded Member Contributions Due.

KENTUCKY RETIREMENT SYSTEMS

John E. Chilton, Chief Executive Officer 1260 Louisville Road - Frankfort, Kentucky 40601 kyret.ky.gov - Phone: 502-696-8800 - Fax: 502-696-8822

Memorandum

November 14, 2023

To: The Kentucky Retirement Systems Board of Trustees From: John E Chilton

There have been discussions about increasing the investment rate for annuity calculations. This memorandum contains background about these issues and my recommendation regarding changes in the rates. Currently, CERS and KRS annuity rates are 5.25%. CERS is proposing 5.875% which is halfway between the KRS assumed investment earnings rate (5.25%) and the CERS assumed investment earnings rate (6.50%)

Background

Tiers 1 and 2 annuities

Monthly retirement payments for Tiers 1 and 2 retirees are determined by statute with reference to their salary during the highest or final years of employment depending on Tier and plan. Thus, there are no actuarial calculations unless the retiree opts for actuarily equivalent survivorship options, life certain options, 10 years certain, and other optional forms of payment.

While Tiers 1 and 2 monthly benefits are calculated based on a formula as defined by statute, Tiers 1 and 2 retirees can elect other benefit options such as an annuity based on the retiree's and the retiree's beneficiary's lives, payments continuing for at least 10 years, etc. In those cases, the monthly benefit is lower, but the lower monthly payments may extend longer than the straight-life annuity option.

While the Tier 1 or 2 straight-life annuity is determined by the retiree's final compensation, benefit factor, and years of service, the other options involve actuarial computations to determine a monthly payment amount that is actuarily equivalent to the straight-life benefit.

Tier 3 annuity option

Tier 3 retirees have a retirement account to which they and their employers have contributed over the years of employment, as well as interest earnings. At retirement, the retiree can

- (1) take a lump-sum distribution of their retirement account balance. Retirees who choose the lump sum can transfer their account to an IRA, or other qualified plan, thereby avoiding immediate taxation, or
- (2) they can opt for an actuarily computed monthly annuity that also includes the same optional forms of payment that are available to Tiers 1 and 2 members.

Under the annuity option, the monthly payments are computed using their account balance at the time of retirement and an annuity factor. The annuity factor has only two components:

- Interest rate assumption
- Mortality assumption

If the member elects an optional form of payment, an actuarial computation takes place to determine the monthly payment amount that is actuarily equivalent to the annuity option.

Service Purchases

The majority of service purchase types are calculated using the "delayed method calculation." These purchases are generally made to increase service credit in order to receive a higher retirement benefit. One component of the delayed method calculation is an actuarial factor used in calculating the value the additional service has on the member's retirement benefit. This factor is typically based on the actuarial assumptions (interest and mortality) that are adopted by the Board and used in the annual actuarial valuations. In addition, "Hazardous Conversion" costs also use an actuarial factor to determine the cost to convert non-hazardous service to hazardous service.

Expected investment returns

To provide context, in considering a proper annuity rate, the rates used for computing employer contributions are relevant. KRS' current investment return rate for computing employer contributions is 5.25% for KRS-Non-Haz and SPRS, and 6.25% for KRS-Haz. In addition, it is noted that GRS has indicated that KRS has a 60% chance of achieving a 5.25% investment return in KRS.

Annuity rates

The Tier 3 annuity interest rate assumption differs from the investment return assumption used in computing employer contribution rates. The investment return assumption is used to determine employer contributions; it is an expectation of future earnings over the long term. Investment earnings reduce the amount employers must contribute. The investment earnings assumption is constantly evaluated to address changes in future earnings expectations.

For KRS and the commercial annuity providers, once determined, the monthly payments never change. KRS and commercial annuity providers need future investment returns to pay the fixed payments. But investment returns always change. While KRS may project future investment returns of more than the current 5.25% assumed rate, actual investment returns in some years (or over the long-term) may be less – thus, the investment risk.

To address the investment risk, KRS and commercial annuity providers are in a similar economic/financial situation. So, KRS should compare the annuity interest rate assumption with the rate used in commercially available annuities.

Commercial annuity rates developed by insurance companies are determined, in part, with reference to long-term treasury rates. At the present time, the US Treasury's long-term composite rate is 5.28%. The current retiree net interest rate published by Dietrich Direct Quote (which provides pension risk products to retirement plans) happens to be the same rate - 5.28%.

Here are GRS' comments about annuity rates:

"There is a strong relationship between the interest rate assumption and the factor used to convert the Tier 3 annuity cash balance amount to an annuity at retirement. The lower the interest rate used to determine the factor, the smaller the monthly annuity benefit at retirement. On the other hand, there is a weaker relationship between the interest rate assumption and the actuarial factor used to convert the basic form of payment to optional forms of payment with survivor benefits for Tier 1 and Tier 2 members.

"Commercial annuity rates developed by insurance companies are based on long-term treasury rates. They use sophisticated asset-liability models to minimize their investment risk. Also,

these commercial annuity factors have administrative costs and profits built into the calculations. Retirement systems, on the other hand, do not produce profits and are not attempting to eliminate mortality and investment risks. Rather, retirement systems are managing risk to acceptable levels. This is because a retirement system can collect contributions from the participating employer if losses occur (whereas an insurance company cannot invoice additional premiums to the customers).

"An additional consideration is that commercial annuity providers have administrative costs and profits built into their calculations. Retirement systems, on the other hand, have administrative costs but do not produce profits. But they still must cope with risks associated with mortality and investment risks.

"In the case of KRS retirees, once the monthly annuity payment is determined, the monthly payment never changes, while investment performance always changes. There are investment risks for the system in the future. Thus, retirement systems manage overall risk to acceptable levels. This is because a retirement system can collect contributions from the participating employer if losses occur, (whereas an insurance company cannot invoice additional premiums to the customers). Thus, an annuity rate that turns out to be too high, can drive up future employer contributions.

"As a final note, there are a few Retirement Systems that do use annuity factors based on more conservative assumptions to better manage these risks. We consider KPPA using a 5.25% interest rate assumption for the annuity factors to favor towards that category of conservative Retirement Systems.

The Tier 3 annuity conversation factor is relatively more sensitive to the interest rate used in the calculation of the factor because this factor is used to convert a member's account balance to a lifetime annuity at the member's retirement date. The interest rate is the implicit underlying assumed future investment return on the member's account balance. However, the interest rate used in the annuity conversion factor does not have to be the same as the interest rate used in the valuation as the Board may want to use a different assumption to reflect certain factors that include equitably, risk, and subsidy. Note, the actuarial valuation for KRS will reflect the conversion factors adopted by the KRS Board, so any difference in the valuation interest rate and the Tier 3 annuity conversion rate (if any) will be incorporated in the calculation of the liability and contribution rates.

"The factors for converting forms of payment in Tier 1, Tier 2, and Tier 3 to include survivor benefits (e.g., the Joint & 50% Survivor and Joint & 100% Survivor) also have an interest rate component, but these factors are less sensitive to the interest rate because it is already comparing the relative value of two annuities (i.e., the basic form and one with a survivor benefit). Rather the purpose of these factors is to reflect the differences in life expectancy between the retiree and the beneficiary and keep the overall value of the benefit provided cost neutral.

"In summary, our two-part recommendation to the KRS and CERS Boards are as follows:

 Primary: The Boards adopt the same conversion factors for benefit administration of the KRS and CERS systems. These two systems provide identical benefits. Identical demographic members should receive the same benefit (including optional forms of payment) regarding the system they are receiving their benefit. 2. Secondary: While we believe the continued use of a 5.25% interest assumption provides consistency and some risk mitigation, the use of a different interest rate could also be reasonable and appropriate.

GRS is comfortable with KRS using a 5.875% annuity interest rate."

Other transactions

An interest charge, instead of an actuarial factor, is used in the calculation for the service purchase types of Recontribution of Refunds and Omitted with Interest. These occur when an <u>individual</u> <u>pays money</u> to a system to replace money previously withdrawn or when an Omitted cost isn't purchased in the first 6 months after being calculated. The purpose of an interest charge is to replace the money that the retirement plan would have earned if the individual had not withdrawn the money, or the employee contributions had been in the system.

All service purchase costs can be made by lump sum payment, transfer/rollover from another qualified plan, or via an Installment Purchase of Service Agreement ("IPS") if the cost(s) is greater than or equal to \$1,000. If an IPS agreement is initiated, an interest charge is added to the cost amount being financed.

Additionally, an interest charge on creditable compensation is assessed for reinstated employees, delinquent Pension Spiking invoices owed by employers, and delinquent contributions from employers.

Currently, the interest rate for all these situations is 7.5%.

Recommendations

The decisions to be made are whether to adjust the current:

- Annuity/delayed service purchase interest rate of 5.25%,
- Interest rate of 7.50%

My recommendations are to:

- adjust the annuity rate to 5.875%. This seems fair in that the rate is better than the individual could obtain in the current market and is not so high as to expose the system to significant investment risk.
- maintain the interest charged on service purchases, etc. at 7.50% because that amount approximates what might have been earned if the money had been in the plans since withdrawal.

These are policy decisions that must be approved by the KRS Board at the next meeting.

KENTUCKY RETIREMENT SYSTEMS BOARD OF TRUSTEES

STATEMENT OF BYLAWS AND COMMITTEE ORGANIZATION

As Amended: June December 5, 2023

Section 1.1 GENERAL ADMINISTRATION.

This Statement of Bylaws and Committee Organization of the Board of Trustees of the Kentucky Retirement Systems is adopted pursuant to the authority of KRS 61.645. State and Federal law shall control any inconsistency that exists or may exist between the law and this Statement of Bylaws and Committee Organization.

a. Definitions.

- 1. <u>AAC</u>: "AAC" refers to the Joint CERS and Kentucky Retirement Systems Administrative Appeals Committee.
- 2. <u>Board</u>: "The Board" refers to the Board of Trustees of the Kentucky Retirement Systems.
- 3. <u>Board Year</u>: The Board Year shall be from April 1 of each calendar year through March 31 of the following year.
- 4. <u>Bylaws</u>: "Bylaws" refers to the Statement of Bylaws and Committee Organization.
- 5. <u>CEO</u>: "CEO" refers to Kentucky Retirement Systems' Chief Executive Officer, as outlined in KRS 61.645 (9).
- 6. CERS: refers to the County Employees Retirement System
- 7 <u>CIO</u>: "CIO" refers to the KPPA Executive Director Office of Investments.
- 8. <u>Committee member</u>: "Committee member" or "member" used in relation to a Committee refers to a member of the Board of Trustees of the Kentucky Retirement Systems serving on its Standing or *ad hoc* Committees.
- 9. <u>DAC</u>: "DAC" refers to the Joint CERS and Kentucky Retirement Systems' Disability Appeals Committee.
- 10. KPPA: "KPPA" refers to the Kentucky Public Pensions Authority.
- 11. KRS: "KRS" refers to the Kentucky Revised Statutes.
- 12. <u>Member</u>: "Member" or "members" used in relation to individuals participating in a system (or systems) administered by the Kentucky Retirement Systems refers to individuals who are active members (i.e., currently participating as an employee), inactive members (i.e., formerly participated as an employee, but is not currently participating as an employee, has not retired, and has not taken a refund), or retired.
- 13. <u>Retirement Office</u>: "Retirement Office" refers to the offices of the KPPA located at 1260 Louisville Road, Frankfort, Kentucky 40601.

- 14. <u>Take action on</u>: "Take action on" used in relation to the Board refers a motion being made, seconded, and voted upon by the Board in compliance with Robert's Rules of Order. [RONR (11th ed., as amended)].
- 15. <u>Trustee</u>: "Trustee" refers to a member of the Board of Trustees of the Kentucky Retirement Systems.

b. **Quorum; Parliamentary Authority.**

- 1. <u>Board of Trustees</u>: As required by KRS 61.645(8)(c), a majority of the trustees shall constitute a quorum and all actions taken by the Board shall be by affirmativevote of a majority of the trustees present.
- 2. <u>Committees of the Board of Trustees</u>: A majority of the trustees on any Committee of the Board appointed pursuant to Sections 2.1-2.5 of these Bylaws shall constitute a quorum of the Committee and all actions taken by the Committee shall be by affirmative vote of a majority of the Committee trustees present.
- 3. The most recent edition of Robert's Rules of Order shall be the parliamentary authority [RONR (11th ed., as amended)], except that if any Committee of the Board is comprised of five (5) or more trustees, the Committee shall not constitute a quorum of the Board and the Board shall be required to take action on all preliminary decisions made by the Committee, unless otherwise specified by these Bylaws.
- c. <u>Meetings</u>. Meetings of the Board and its Committees shall be conducted consistent with the Open Meetings Act, KRS 61.805 to 61.850. The Open Meetings Act shall control if any inconsistency exists between the Open Meetings Act and these Bylaws.
- d. <u>Annual Meeting</u>. The annual meeting of the Board shall be held on the third Thursday of April of each Board Year.
- e. <u>Regular Meetings</u>. The Board shall determine and approve, on an annual basis in advance, no later than the preceding December Board of Trustees' meeting, the following years' regular Board and Committee meeting schedule. This provision shall not apply to the Joint Disability Appeals Committee and Joint Administrative Appeals Committee meetings. Those meeting dates will be determined at committee meetings.

f. Special Meetings.

- 1. Special meetings of the Board shall be held upon the call of the Chair of the Board or the CEO.
- 2. Special meetings of a Standing or *ad hoc* Committee of the Board of Trustees shall be held upon the call of the Committee Chair or the CEO.
- 3. A trustee may request that the CEO, Chair of the Board (in the case of a special meeting of the Board), or Committee Chair (in the case of a special meeting of a Committee) call a special meeting by email or other written means. Upon receipt of email or other written requests to call a special meeting from a majority of the trustees, the CEO, Board Chair, or Committee Chair shall call the requested special meeting.

g. Notice of Meetings.

1. <u>Regular Meetings</u>. Notice of a regular meeting of the Board shall be posted at least

ten (10) days (inclusive of weekends and holidays) before the meeting is scheduled. The notice of a regular meeting shall include the date, time, and location of the meeting, and the agenda for the meeting. The agenda shall be determined under the direction of and approval by the Chair of the Board. Changes or revisions to the agenda may be proposed by the CEO or a trustee; provided such proposal shallbe delivered to the Chair for approval not less than ninety-six (96) hours before the meeting is scheduled; and further provided that nothing in this sentence shall deprive a trustee from introducing new items of business during a regular meeting. Approved changes or revisions to the agenda shall be posted not less than seventytwo (72) hours before the meeting is scheduled.

- 2. <u>Special Meetings</u>. When circumstances warrant a special meeting of the Board or of a Committee, notice shall be posted as soon as reasonably possible, but not less than twenty-four (24) hours before the meeting is scheduled. The notice of a special meeting shall include the date, time, and location of the special meeting and the agenda for the meeting. Discussions and action at the meeting shall be limited to items listed on the agenda in the notice.
- h. <u>Change in Meeting Dates</u>. Any regular or special meeting of the Board may be changed by following the procedure prescribed in these Bylaws for calling special meetings.
- i. <u>Records of Proceedings</u>. All official acts of the Board shall be recorded in the minutes of the regular or special meeting at which the action was approved or adopted. The CEO shall cause the minutes to be transcribed and presented for approval or amendment at the next regular meeting. An electronic copy (certified by the Chair and the CEO) shall be on file in the Retirement Office for public inspection and posted on the KPPA website. Electronic copies are maintained on the KPPA Website for Board and Committee actions. Copies that have been archived from the website are available on request.
- j. <u>Chair and Vice-Chair of the Board</u>. The Board shall elect a Chair and a Vice-Chair at each annual meeting to hold office for the ensuing Board Year or until their successors are elected. The Chair shall not serve more than four (4) consecutive years as Chair or Vice-Chair (in combination) of the Board. The Vice-Chair shall not serve more than four (4) consecutive years as Chair or Vice-Chair (in combination) of the Board. A trustee who has served four (4) consecutive years as Chair or Vice-Chair of the Board may be elected Chair or Vice-Chair of the Board after an absence of two (2) years from both positions.
- k. <u>Committees</u>. The Board may create Committees with such powers and duties as established by the Board. The Chair of the Board, unless otherwise stipulated or determined by the Board, shall appoint the members of each Standing or *ad hoc* Committee, and such appointments shall be recorded in the minutes of the current or next-following regular Board meeting. Committee members shall serve concurrently with the appointing Chair.

1. Conflicts of Interest.

- 1. Trustees shall file a statement of financial disclosure with the Executive Branch Ethics Commission within thirty (30) days of taking office.
- 2. Trustees shall also file a statement of financial disclosure by April 15 of each

calendar year, and within thirty (30) days following departure from office as a trustee, or as otherwise provided by law.

- 3. Trustees shall also file a written conflict of interest statement as required pursuant to the Kentucky Retirement Systems' Conflict of Interest Policy.
- m. <u>Confidentiality</u>. Trustees shall file a written confidentiality statement as required by the Kentucky Retirement Systems' Confidentiality Policy.

n. Travel Policy Guidelines.

- 1. All travel for official business of Kentucky Retirement Systems must be done in accordance with the requirements of and be consistent with KRS Chapter 45A and the Kentucky Retirement Systems' Board of Trustees Per Diem and Reimbursement Policy.
- 2. No more than four (4) trustees may be passengers in the same common carrier. A Maximum of one (1) executive staff of the Kentucky Retirement Systems may be a passenger in the same common carrier.
- 3. To avoid an accidental violation of Kentucky Open Meetings Laws, other than for scheduled meetings, no more than four (4) Trustees may attend the same off-site conference, training, etc., at the same time. The CEO, or his or her designee, shall review Trustee travel requests to coordinate attendance and avoid noncompliance with Kentucky Open Meetings Laws.
- o. <u>Election Policy Guidelines</u>. All elections for elected trustees of the Board must be conducted in accordance with the provisions of KRS 61.645, 105 KAR 1:445 and the Kentucky Retirement Systems' Board of Trustees Election Policy and Procedures adopted by the Board.
- p. <u>Violations of Board Policies and Guidelines</u>. If a complaint is made that a trustee violated these Bylaws or any policy approved by the Board, the Board shall follow the procedure found in the Conflict of Interest Policy in investigating the complaint.

Section 1.2 BOARD RESPONSIBILITIES.

- a. The Board shall make and maintain Bylaws.
- b. The Board shall appoint a CEO and fix the CEO's salary.
- c. The Board shall appoint a General Counsel and fix the General Counsel's compensation.
- d. The Board shall adopt a Personnel Management policy to outline the job descriptions, qualifications, education, and skills for both the CEO and the General Counsel. This policy should also describe recruitment strategies, performance evaluations, and succession planning for these two positions.
- e. The Board may act on contracts for rental of office space, and professional services, including, but not limited to, the auditor, and legal counsel in accordance with the requirements of the Commonwealth of Kentucky Model Procurement Act (KRS Chapter 45A).
- f. The Board shall consider and take action on changes to administrative regulations proposed by the staff of the Kentucky Retirement Systems or the KPPA.

- g. The Board shall consider and take action on its financial statements and external audits.
- h. The Board shall consider and take action on the recommendations of all of its Committees, except that the AAC and DAC shall have the authority to act upon the recommendations and reports of the hearing officer on behalf of the Board in accordance with KRS Chapter 13B.
- i. The Board shall work with an actuary, who shall be a Fellow of the Conference of Consulting Actuaries or a member of the American Academy of Actuaries. KPPA will select and contract with the actuary pursuant to KRS 61.645(2)(d) which allows the Board to carry out its obligations in accordance with KRS 61.670. The Board shall consider and act on the recommendations of its actuary.
- j. The Board shall adopt contribution rates toward medical insurance premiums.
- k. The Board shall provide oversight concerning programs and services for Kentucky Retirement Systems' members, beneficiaries, recipients, and participating employers.
- 1. The Board shall select candidates for each trustee ballot as provided in KRS 61.645 and 105 KAR 1:445.
- m. The Board shall establish a formal trustee education program for all trustees of the Board, pursuant to the requirements of KRS 61.645(18) and 105 KAR 1:440, and ensure that CEO organizes process for this trustee education to occur.
- n. The Board, and individual trustees, should ordinarily refer all news media inquiries to the CEO and/or the Board Chair, and should not speak on behalf of the Board or Kentucky Retirement Systems with the news media. However, nothing in this subsection is intended to prevent individual trustees from speaking to the media concerning their actions, opinions, and decisions as individual trustees.
- o. The Board shall review the Kentucky Retirement Systems' biennial administrative budget and necessary budget amendments. The CEO (or designee) will schedule meetings, prepare budget documents and supporting schedules, and present them to Board members prior to the date of a meeting.
- p. The Board shall review and investigate the employees whose names have been certified by the applicable authority to meet the criteria of KRS 61.592 and 105 KAR 1:130 for hazardous duty, and also those employees who have been so certified who are not, or who no longer are, working in a hazardous duty position. The Board shall take action on all such employees in accordance with KRS 61.592 and 105 KAR 1:130.
- q. The Board shall collaborate with the KPPA on Business Continuity and Disaster Recovery to ensure that the Kentucky Retirement Systems' records and operations are adequately protected and that critical business operations will continue efficiently. The Board may rely on policies and procedures developed by the KPPA to address Business Continuity and Disaster Recovery issues. The Board Chair shall act as temporary CEO in the event the CEO is not available to perform duties outlined in these Bylaws.

Section 1.3 CEO RESPONSIBILITIES.

- a. The CEO shall be responsible for working with the KPPA Executive Director to ensure compliance with Kentucky's Open Records laws. The CEO shall be responsible for designating a records custodian for the Kentucky Retirement Systems and the Board.
- b. The CEO shall develop a biennial budget and necessary budget amendments for

approval by the Board. The CEO will coordinate approved budget requests with the KPPA Executive Director to ensure that Kentucky Retirement Systems budget requests are integrated with the KPPA budget request for submission to the Governor's office. The CEO (or designee) shall present a budget-to-actual expenditure analysis to the Board at each regular quarterly meeting of the Board.

- c. The CEO shall coordinate with the KPPA staff to ensure that information and record management is comprehensive and efficient, and shall ensure that a disaster recovery plan, continuity of operations plan, and policies to ensure cyber-security are developed and maintained.
- d. The CEO shall be responsible for implementing a formal trustee education program for all trustees of the Board, pursuant to the requirements of KRS 61.645(18).
- e. The CEO shall develop recommendations for improvements and revisions of Board policies and submit such revisions for Board approval. The CEO shall ensure that approved policies are implemented in conformance with statutes, regulations and Board policies.
- f. The CEO shall collaborate with the KPPA legal staff to monitor litigation affecting Kentucky Retirement Systems' plans. The CEO and KPPA legal staff shall report significant developments to the Board.
- g. The CEO shall act as legislative liaison, and represent the Board at legislative hearings and other legislative meetings. The CEO and KPPA Legal staff will review proposed legislation that is likely to affect the Kentucky Retirement Systems' plans or administrative management and advise the Board about pending legislation.
- h. The CEO shall provide technical assistance to the members of the General Assembly, Governor's office, and state and local government officials, as well as members, recipients, and beneficiaries of the Kentucky Retirement Systems.
- i. The CEO shall recommend legislative or regulatory changes and propose draft language.
- j. The CEO shall work with the Executive Director of KPPA to obtain from the actuary any necessary actuarial analysis of legislation affecting the Kentucky Retirement Systems.
- k. The CEO shall implement any statutory or regulatory changes and take appropriate action to conform to federal law. The CEO shall also collaborate with the KPPA Executive Director to monitor implementation of any changes designated as KPPA's responsibilities.
- 1. The CEO shall sign all documents necessary to promulgate or amend an administrative regulation on behalf of the Board as the head of the Kentucky Retirement Systems in accordance with KRS 13A.220.
- m. The CEO shall communicate with the mass media and other agencies, entities or institutions, including responding to correspondence or inquiries addressed to the Board.
- n. The CEO shall coordinate reciprocal benefits with the other state administered retirement systems in Kentucky.
- o. In the case of emergency conditions that threaten the functioning of the Kentucky

Retirement Systems, the preservation or protection Kentucky Retirement Systems' property or assets, vital data, or the health and safety of any person, and where a quorum of the Board is unavailable, the Executive Director may take actions necessary to prevent or mitigate the threat, even if a vote of the Board would otherwise be necessary to take such action. When a quorum of the Board becomes available, any such actions taken by the Executive Director shall be reviewed and ratified as necessary.

Section 2.1 STANDING COMMITTEES.

The Board shall have the Standing Committees specified in Section 2.2, each of them to have the duties and responsibilities as therein set forth, together with such other duties and responsibilities as the Board may by resolution determine. In each Board Year, the Chair, elected at the annual meeting, shall appoint trustees to Committees as specified in Section 2.2, unless otherwise determined by the Board. Each Committee shall have a Chair and the Board Chair shall appoint the Chair of each Committee, unless otherwise determined by the Board. A Committee may (but is not required to) elect a Vice-Chair from among its Committee members by a majority vote of the Committee. A Vice-Chair so elected shall preside at meetings of the Committee in the absence or inability to act of the Committee Chair. Any trustee may attend any meeting of any Committee of which he or she is not a member, but shall not have a vote. Any trustee who wishes to observe a meeting of a committee of which he or she is not a member should do so by watching via live broadcast.

Section 2.2 STANDING COMMITTEES; DUTIES AND RESPONSIBILITIES.

The Standing Committees of the Board are, and shall have respective duties and responsibilities, as follows:

a. <u>Administrative Appeals Committee</u>. The Board shall collaborate with the CERS Board to develop a timely disability and administrative appeals process. The Board and the CERS Board will coordinate the Administrative Appeals process with two AAC between the two Boards. These AACs may be combined with the DACs, in compliance with KRS 61.645(16) and KRS 78.782(16). Consistent with the provisions of KRS Chapter 13B, the AACs shall meet in alternate months, as needed, to act in matters of administrative appeals. Each Committee shall consist of three (3) members;however, the members appointed to one Committee may also serve from time to time

on the other Committee. One of the AAC shall consist of two (2) CERS Trustees and one (1) Kentucky Retirement Systems Trustee. The other AAC shall consist of one (1) CERS Trustee and two (2) Kentucky Retirement Systems Trustees. The Committees shall ensure that the laws governing Kentucky Retirement Systems are administered impartially and uniformly, and that the actions of the Kentucky Retirement Systems resulting in the appeal were correct and fair under the applicable statutes and regulations.

- 1. <u>Committee Responsibilities</u>. In matters of administrative appeals, the Committee members shall consider the administrative record, including the recommended order and any exceptions filed in compliance with KRS 13B.120. The Committee shall act on behalf of the entire Board as the agency head in making a final order of the Board in accordance with KRS 13B.120. The Committee may adopt the hearing officer's recommended order; or it may reject or modify, in whole or in part, the recommended order; or it may remand the matter, in whole or in part, the hearing officer for further proceedings as appropriate; or it may act on cases properly remanded by a court of competent jurisdiction. The Committee may also recommended legislative changes to improve the administration of the benefits. Any recommended legislative changes shall be referred to the CEO for study.
- 2. <u>KPPA Executive Director Office of Benefits Responsibilities</u>. The KPPA Executive Director Office of Benefits or designated staff, in coordination with KPPA's Office of Legal Services staff, will coordinate meeting dates and determine which cases will be reviewed. Designated staff will compile the administrative records and distribute the files to the Committee members prior to each meeting. Staff may provide legal or technical advice to the Committee.
- b. **Disability Appeals Committee.** The Board shall collaborate with the CERS Board to develop a timely disability and administrative appeals process. The Board and the CERS Board will coordinate the Disability Appeals process with two DAC between the two Boards. The DACs may be combined with the AACs, in compliance with KRS 61.645(16) and KRS 78.782(16). Consistent with the provisions of KRS Chapter 13B, the Committees shall meet in alternate months, as needed, to act in matters of disability appeals. Each Committee shall consist of three (3) members; however, the members appointed to one Committee may serve from time to time on the other Committee. One of the DAC shall consist of two (2) CERS Trustees and one (1) Kentucky Retirement Systems Trustee. The other DAC shall consist of one (1) CERS Trustee and two (2) Kentucky Retirement Systems Trustees. The Committees shall ensure that the disability retirement laws are administered impartially and uniformly, that all members of Kentucky Retirement Systems who apply for disability retirement benefits and qualify under the applicable statutes are approved for benefits and that the actions of the Kentucky Retirement Systems resulting in the appeal were correct and fair under the applicable statutes and regulations.
 - 1. <u>Committee Responsibilities</u>. In matters of disability appeals, the Committee members shall consider the administrative record, including the recommended order and any exceptions filed in compliance with KRS 13B.120. The Committee shall act on behalf of the entire Board as the agency head in making a final order of the Board in accordance with KRS 13B.120. The Committee may adopt the

hearing officer's recommended order; or it may reject or modify, in whole or in part, the recommended order; or it may remand the matter, in whole or in part, to the hearing officer for further proceedings as appropriate; or it may act on cases properly remanded by a court of competent jurisdiction. The Committee may also recommend legislative changes to improve the administration of the benefits. Any recommended legislative changes shall be referred to the CEO for study.

- 2. <u>KPPA Executive Director Office of Benefits Responsibilities</u>. The KPPA Executive Director, Office of Benefits, or designated staff, in coordination with KPPA Office of Legal Services staff, will coordinate meeting dates and determine which cases will be reviewed. Designated staff will compile the administrative records and distribute the files to the Committee members prior to each meeting. Staff may provide legal or technical advice to the Committee.
- d. Investment Committee. The Committee shall consist of five (5) members, as follows: (i) the three (3) trustees with investment experience appointed by the Governor pursuant to KRS 61.645(1)(c), (ii) one (1) trustee with retirement experience appointed by the Governor pursuant to KRS 61.645(1)(c) appointed by the Board Chair, and (iii) one (1) elected trustee pursuant to KRS 61.645(1)(a)-(b) appointed by the Board Chair.
 - 1. Committee Responsibilities.
 - A. The Investment Committee shall have authority to implement the investment policies adopted by the Board, including without limitation the Board's Investment Policy Statement (pensions and health), and to recommend action on behalf of the Board on all investment-related matters, and to acquire, sell, safeguard, monitor, and manage the assets and securities of the several funds, subject to the Board's approval.
 - B. The Investment Committee will meet quarterly to review reports from investment staff, investment consultants, and investment managers with authority to convene additional meetings as circumstances require.
 - C. The Committee will monitor investment performance and management practices and make reports and recommendations to the Board. The Committee will recommend the selection and termination of investment managers, investment products, custodial relationship and investment consultants. The Committee will evaluate whether the Investment Policy, the investment activities, and management controls and processes continue to be consistent with meeting the Kentucky Retirement Systems' goals, and perform other duties specified in the Investment Policy Statement.
 - D. Actuarial Subcommittee.
 - 1. The Chair of the Investment Committee shall appoint an Actuarial Subcommittee comprised of three (3) members, with the concurrence of the Board Chair as to each appointee, as follows: (i) one (1) trustee appointed by the Governor pursuant to KRS 61.645(1)(c); (ii) one (1) trustee elected by members of the Kentucky Employees Retirement System; (iii) one (1)

trustee elected by members of the State Police Retirement System. The Investment Committee Chair shall appoint a Chair of the Actuarial Subcommittee. The Actuarial Subcommittee will meet as necessary upon call of the Chair of the Actuarial Subcommittee.

- 2. Upon appointment, the Subcommittee will review and evaluate actuarial assumptions, funding methods and tables proposed by the actuary (including without limitation all economic, mortality, disability, etc. assumptions) for each system within Kentucky Retirement Systems that affect: (i) the annual determination of the actuarial valuation of assets and liabilities of thesystems within the meaning of KRS 61.670; (ii) the factors that apply to amounts payable to members (e.g., early commencement, commutation, repayment, etc.); and (iii) the actuarially recommended contribution rate foremployers required under KRS 61.510 to 61.692 and KRS 16.505 to 16.652, except as otherwise determined by law or regulation.
- 3. The Subcommittee will report its findings and recommendations of each such review or evaluation to the Investment Committee. Upon review and approval, the Investment Committee shall forward the results and its recommendations to the Board for ratification.
- E. The Investment Committee may also recommend legislative changes to the Board to improve the administration of investment-related matters.

2. KPPA Executive Director Office of Investments Responsibilities.

- A. KPPA Executive Director, Office of Investments, also known as the Chief Investment Officer (CIO), shall administer the assets of the Kentucky Retirement Systems consistent with the policies, guidelines, and limits established by the law, the Investment Committee and the Investment Policy Statement.
- B. The CIO shall provide members of the Investment Committee with assessments of service providers and performance reports and shall have authority, subject to the approval of the Chair of the Investment Committee or the Chair of the Board of Trustees, to reduce or increase assets assigned to an investment manager that has already been hired.
- C. The CIO shall identify issues for consideration by the Investment Committee and prepare recommendations regarding those issues.
- D. The CIO shall recommend changes to the Investment Committee regarding service providers, statutes, policies or guidelines, as needed, to maintain a productive relationship between the investment program and its goals.
- E. The CIO shall communicate with the mass media and other agencies, entities, or institutions regarding investment related issues.
- 3. <u>Investment Policy</u>. The "Investment Policy Statement" and the "Investment Procurement Policy" are hereby incorporated by reference.

4. KPPA Executive Director Responsibilities.

The Executive Director of the KPPA shall be responsible for KPPA executing all aspects of the KPPA duties including the management of the assets for Kentucky Retirement Systems and CERS in accordance with their Investment Policy Statements and their Funding Policies. The Executive Director will coordinate with the CEO and the Chair of the Investment Committee of the Kentucky Retirement Systems and the CEO and Chair of the Investment Committee of the CERS to insure they are able to fully satisfy their fiduciary responsibilities and monitor their assets by providing the required information and reports from the KPPA custodian and consultant(s) and access to and meeting with the employees of the KPPA investment department,.

e. Joint Kentucky Retirement Systems and CERS Retiree Health Plan Committee. The Committee shall consist of four (4) Trustees total, two (2) Trustees appointed from the CERS Board by the CERS Chair and two (2) Trustees appointed from the Kentucky Retirement Systems Board by the Kentucky Retirement Systems' Chair. The Committee shall elect a Chair and Vice Chair and shall assist the Board in providing a group hospital and medical insurance plan for present and future recipients of a retirement allowance from the systems administered by Kentucky Retirement Systems as required by KRS 61.702.

1. Committee Responsibilities.

- A. The Committee will meet quarterly to review reports from KPPA staff and retiree health insurance consultants with authority to convene additional meetings, as circumstances require.
- B. The Committee will monitor retiree health insurance matters and make reports and recommendations to the Board. The Committee will evaluate retiree health insurance issues and obligations set forth in state and federal law. The Committee may, as deemed necessary, evaluate health insurance companies, health maintenance organizations, self-insurance proposals, and other ways of providing a group hospital and medical insurance plan for retired members as provided in KRS 61.702.
- C. The Committee may negotiate and recommend appropriate contracts for execution by the Board, in accordance with the requirements of the Commonwealth of Kentucky Model Procurement Act (KRS 45A). The Committee may solicit reports and actuarial analyses in order to analyze issues regarding retiree health insurance. The Committee may also recommend legislative changes to improve the administration of retiree health insurance related matters. Any recommended legislative changes shall be referred to the CEO for study.
- 2. <u>KPPA Executive Director Responsibilities</u>. The KPPA Executive Director and designated staff will maintain and provide the Committee with necessary information to execute its responsibilities. The KPPA Executive Director or designated staff will provide advice regarding state and federal laws and

regulations. Staff will identify issues for consideration by the Committee and prepare recommendations regarding those issues.

f. In addition to the duties and responsibilities described in this Section 2.2, each Standing Committee may develop appropriate additional policies and proposals to be ratified by the Board.

Section 2.3 DELEGATIONS OF AUTHORITY BY THE BOARD.

Delegation of Authority. Except as may be prohibited by or inconsistent with law, the Board may delegate to any Standing Committee of the Board any power, authority, duty, or responsibility conferred on the Board by law. In the case of any such delegation, the decision or action of the Committee within the scope of its delegated authority shall constitute the decision or action of the Board. The Board may at any time rescind the delegated authority as a whole or in part, except that a rescission of authority with respect to quasi-judicial matters delegated to a Committee shall not operate to affect the proceedings or the final action of any such matter pending before the Committee when the Board acts to rescind. This exception is designed to preclude the Board from using its authority to rescind a delegation to interfere with the process or outcome of a quasi-judicial proceeding then in progress before a Committee which had properly commenced the proceeding within the scope of its authority.

Section 2.4 AD HOC COMMITTEES.

In addition to the Standing Committees specified in Section 2.2, the Chair or the Board may at any time establish an *ad hoc* Committee of the Board and fix its duties and responsibilities for any purpose which, in the judgment of the Chair or the Board, is better served by a temporary rather than Standing Committee. Each such Committee shall consist of such number of members as the Chair shall determine, and the Chair shall also then appoint the Chair and designate the other members of the Committee, unless otherwise determined by the Board.

Section 2.5 LIMITATIONS ON AUTHORITY.

No Committee shall have any power or authority, nor shall the Board delegate to itself, power or authority, as to any of the following:

- a. The amendment or repeal of any Board resolution.
- b. Action on other matters committed by Board resolution or by Kentucky law (including the common law of trusts respecting the delegation or the non-delegation of fiduciary responsibilities) to the Board under terms or provisions that make such action non-delegable.

Section 2.6 AMENDMENT OF BYLAWS.

These Bylaws may be amended at any regular or special meeting of the Board of Trustees by a voteof a majority of the entire membership of the Board. The Board shall be provided a copy of the proposed changes at least fifteen (15) calendar days prior to the meeting of the Boardof Trustees where this vote shall be taken.

Section 3.0 CERTIFICATION OF STATEMENT OF BYLAWS AND COMMITTEE ORGANIZATION.

We, the Chair of the Board of Trustees and the Chief Executive Officer of the Kentucky Retirement Systems, do certify that this Statement of Bylaws and Committee Organization was approved and adopted by the Board on the 5th day of <u>June December</u>, 2023.

Chair of the Board of Trustees Kentucky Retirement Systems Date

Chief Executive Officer Kentucky Retirement Systems Date

I. LEGISLATION: Rep. Johnson has agreed to sponsor our Housekeeping Bill. It is essentially a carbon copy of last year's bill.

Sen. Higdon has agreed to sponsors a bill allowing us to lease space for the investment office to be located in Louisville and we are looking for a sponsor for a bill that will permit the creation of the Office of Financial Management.

II. STRATEGIC PLAN UPDATE FROM PROVALIANT: The KPPA strategic planning project is moving forward as planned and the delivery of a strategic plan document by Provaliant Retirement by January 31 is still on track. Since our last monthly update on October 23, the following activities have been conducted. Also included are upcoming activities. As defined previously, the major categories for strategic planning continue to be:

- 1. KPPA Governance Confirm, Improve, Monitor
- 2. KPPA Service Delivery Operations Create a sustainable "KPPA Operational Excellence" model for administration and investment operations.
- 3. Modernize, maintain, and sustain high quality customer service delivery.
- 4. Modernize, maintain, and sustain high quality primary resources and infrastructure.

Components of the following activities are being categorized into the four areas above as additional input and information is identified.

Three more onsite workshops were conducted with KPPA staff by Provaliant consultants. The topics covered were future vision of external customer services delivery via the web, future technology infrastructure needs to support customers and KPPA staff, and future continuous improvement opportunities regarding the process of KPPA board governance and direction to KPPA organization. Workshops, small group, and individual follow-ups will continue in December as needed.

Provaliant also continued to conduct, target, and refine best practice research information to support strategic initiatives being identified through KPPA staff input in workshops, from Provaliant review of a wide variety of KPPA documents, system specifications, KPPA operational

information, and in the strategic planning request for proposal. These best practices are being packaged into a research summary document and will become guiding practices for executing the strategic initiatives once KPPA approves the strategic plan.

Provaliant is in the process of creating a summary presentation of the major strategic initiatives that Provaliant recommends for the KPPA strategic plan. This draft summary will be explained to KPPA executive staff and vetted in December. We will be providing potential dates for this presentation this week. Input from that summary review will guide the draft strategic plan delivery in early January and after more review, discussion, and editing will become the KPPA strategic plan delivered by Provaliant by January 31.

III. BOARD SMART: Board Smart presented their new version of Board Smart 3.0 to the CEOs and a group of staff members. They are attempting to offer a product that Trustees see as being of more value, more relevant, and easier to use. Staff will rely on the decisions the CEOs make regarding the continued use of Board Smart beyond June 30, 2024.

IV. EXECUTIVE DIRECTOR SEARCH: Bill O'Mara and his group finished up on three versions of public communications regarding the search for a new Executive Director:

- 1) The copy for an ad announcing the job opportunity.
- 2) A more detailed description of the position and background on the systems
- 3) A type of brochure with more information including information on Kentucky, etc.

The ads/announcements will start in December with a January 15 cutoff. They hope to have a candidate hired by the end of April.

V. INCIDENT RESPONSE PLANNING ACTIVITIES: KPPA has been working in a variety of areas since early 2020 to facilitate KPPA Security Incident Response Planning and Response Readiness, including developing a Security Incident Response Plan (SIRP). The KPPA Security Incident Reporting and Handling Policy provides for two teams: the KPPA Security Incident Handling Team (technical team), and Security Incident Response Team (Executive will level team with oversight on response strategy, etc.).

| Next Steps | | | | | | | | | |
|---|------------|--|--|--|--|--|--|--|--|
| Item | Target | | | | | | | | |
| Finish the first version of the KPPA Security Incident Response Plan (SIRP) and its associated appendices | 12/31/2023 | | | | | | | | |
| Submit SIRP for review by InfoTech | 2024 Q1 | | | | | | | | |
| Conduct Formal Tabletop Exercise with Executive Group | 2024 Q1 | | | | | | | | |
| Facilitate an annual review of the SIRP | Ongoing | | | | | | | | |
| Conduct periodic technical tabletop exercises | Ongoing | | | | | | | | |

VI. STAFFING: We continue to hover around 250 staff with no unfilled leadership positions except for two portfolio managers in the investment department. We recently received work from home approval for the Division of Retiree Healthcare and the Division of Disability and Survivor Benefits.

VII. KECC: I am pleased to report that KPPA employees pledged and/or contributed over \$24 Thousand (as of November 20, 2023) to the Kentucky Employees Charitable Campaign through payroll deductions, our silent auction and other fund raisers (e.g., Legal's bake sale and a chili cook off in Benefits). Kudos go to a lot of people, but particularly to Lori Casey, Kimberly Leet, and Lori Wells all in HR.

VIII. Conference Attendance: Since the KPPA Board meeting in September, the executive staff attended the following professional conferences:

Erin Surratt – NCPERS Fall Conference – October 2023 Mike Lamb – P2F2 (Public Pension Finance Forum) – October 2023

IX. PPOB: We attended and presented material at the PPOB meetings held on October 24th and November 20th.

X. HOSTING MEETINGS: Since July 1, 2023, and through the end of this week we have hosted 36 Board and Committee meetings and held 8 bi-weekly meetings with the CEOs.
