

What's going on in the marketplace?

In April, global equity markets as a whole continued to push higher, with the MSCI All Country World Index returning 0.99% and 2.2% year-to-date. Despite escalation in Ukraine and continued worries about China and Japan, investors felt confident enough to continue buying equities. Positive sentiment in Europe and relief from a harsh winter in the U.S. aided investors. U.S. equity markets were positive for the month despite extreme volatility early, as well as continued volatility in momentum stocks; the Russell 3000 returned 0.47% in April and is up 2.2% year-to-date. Developed markets excluding the U.S. were up 1.62% as the performance was broad-based. Emerging markets slowed down after consecutive strong performances in February and March, returning 0.37% to investors, while remaining just below breakeven for 2014.

Developed market equities were solid in April, although there were some weak spots. The UK and Norway led European countries, while only Austria and the Netherlands were down. The Eurozone continues to show improvement, as the PMI continued to rise and consumer confidence unexpectedly ticked up, and ECB President Draghi vowed to fight any threat of deflation. The Pacific region had a strong quarter on a country-by-country basis, but was down overall due to a poor performance from the heavily-weighted Japan. Japan continues to feel the effects of a consumption tax increase and weak

Chinese demand. New Zealand continues to surge among strong dairy exports. Emerging markets posted a total return of 0.37% in April, slowing down from over 3% returns the past two months. Russia, down 5.3%, was the source of weakness of countries in the Europe, Middle East, and Africa (-1.3%). Asian emerging markets were slightly negative while Brazil (+2.9%) led Latin America (2.4%). U.S. stocks returned 0.47% amid strong merger and acquisition activity, with the S&P 500 returning 0.74%. Growth stocks struggled again, returning -0.41% as investors continued to cool towards

hotter names. On the other hand, value stocks returned 0.67% in April. Small cap stocks were hammered during April, returning -3.88%. Five of ten economic sectors had positive returns, led by energy and consumer staples. On the other hand, healthcare and consumer discretionary stocks posted the worst performance.

Fixed income rallied in April, both in the US and across the globe. The Barclays Global Aggregate returned 1.13%, led by global credit slightly outpacing government securities. Within the US, the aggregate index returned 0.84%, as spreads tightened across the rating spectrum. The US Treasury 10-year yield declined over 7 basis points, while the 2 year was mostly flat. US-dollar denominated emerging market debt was up 1.2% and the peripheral countries in Europe also provided positive returns.

Economic data for the month of April was mixed yet again. March Nonfarm payrolls came in at 192K, lower than the 200K expected; however, the prior month's payroll figure was revised upward from 175K to 222K. Jobless claims for the month

averaged approximately 315K and the unemployment rate remained at 6.7%. Manufacturing data, factory orders, and durable goods orders were slightly higher, further rebounding from the harsh winter. Housing data continued to show weakness as mortgage applications slipped and existing home sales, new home sales, and housing starts were lower than expected. Retail sales were higher than expected but consumer confidence was mixed. Inflation, as measured by the Consumer Price Index, ticked up to 1.5%. Meanwhile, GDP for the first quarter came in at a crawling 0.1% pace, affected by weak inventory growth, low business investment, and weak exports.

Investors will continue to monitor the Ukrainian crisis, central banker speeches, and valuation levels.

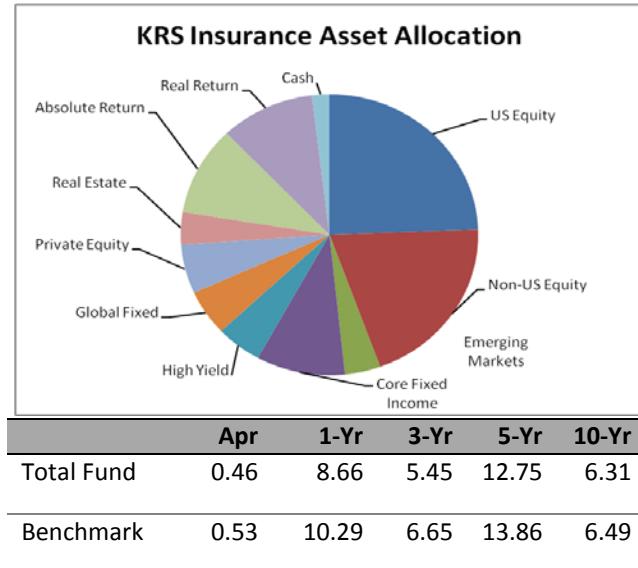

What added value this month?

PENSION – From a manager selection standpoint, emerging market managers significantly outperformed the benchmark, while fixed income managers (especially Stone Harbor and Waterfall) also added value. Absolute return managers in aggregate beat the benchmark as well.

From an allocation perspective, no value was added.

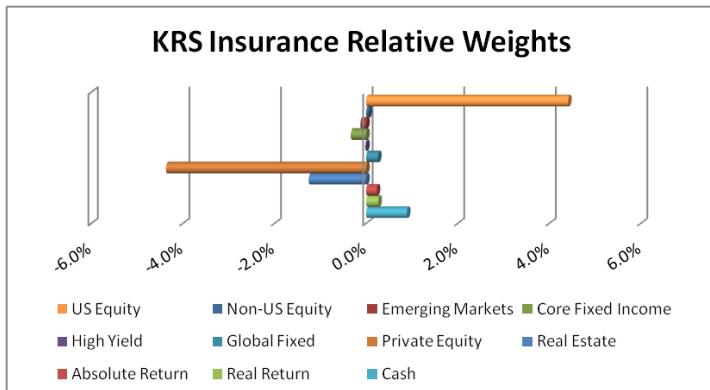

INSURANCE – The Insurance Fund saw similar results, as emerging market equity and absolute return managers handily beat their respective benchmarks, and fixed income slightly outperformed.

The fund benefited from a small overweight to non-US equities.

What detracted this month?

PENSION – From a manager selection standpoint, US equity managers posted a negative return, while the benchmark was up 0.12%, underperforming by 29 basis points. This underperformance was primarily due to struggles from Geneva and Westfield. Non-US equity managers also struggled, primarily due to Pyramis.

From an allocation perspective, an overweight to US equities and an underweight to fixed income hurt performance for the month.

INSURANCE – Both US and non-US equity managers struggled as a whole in the Insurance Fund.

From an allocation perspective, a significant overweight to US equities and an underweight to fixed income detracted from performance.

NOTES:

- 1) Returns displayed are "net". For the purposes of this report, total fund return information is net of fees and expenses, with audited data beginning in July 2011. At the manager level (detailed return sheets pgs.4-5), returns are net of fees beginning with July 2011, and gross of fees for prior data.
- 2) Individual plan allocation and performance (pg.6).
- 3) Prior to January 1, 2014, the inception date for the Private Equity asset class was stated as 10/1/1990 for Pension Fund and 6/1/2001 for Insurance Fund. Prior to 07/01/02, the characteristics of the allocation, and the benchmark itself, were more closely aligned with Real Estate. As such, it is not appropriate to report this portion of the return stream within the Private Equity allocation, whose true inception date has been determined to be 07/01/02 based on funding the System's first private equity mandate. The portion of the original return streams that are no longer reported within the Private Equity allocation (Pension from 10/1/90 to 06/30/02; Insurance 06/01/01 to 06/30/02) are reported within the Fund Level performance figures.
- 4)

Private Equity Composite (Pension)	Private Equity Composite (Insurance)
Inception (07/01/02) to 06/30/11	Inception (07/01/02) to 06/30/11
60.00% S&P 1500 Composite Index	80.00% S&P 1500 Composite Index
40.00% Barclays US Corporate High Yield Index	20.00% Barclays US Corporate High Yield Index
07/01/11 to Present	07/01/11 to Present
100.00% Russell 3000 Index + 4% (Qtr Lag)	100.00% Russell 3000 Index + 4% (Qtr Lag)
- 5) The Private Equity Benchmark, from one month returns up until five year returns, is equal to the performance of the KRS Private Equity allocation. Given there is not appropriate benchmark to use for short term performance evaluation, this will allow greater focus on longer term returns, which is more appropriate given the long term nature of private equity investments.
- 6) Cash returns are posted net of custodian fees, whereas other asset class returns are only net of manager fees. For the month of April 2014, gross cash returns were 0.02% for the Pension fund and 0% for the Insurance fund.
