

What’s going on in the marketplace?

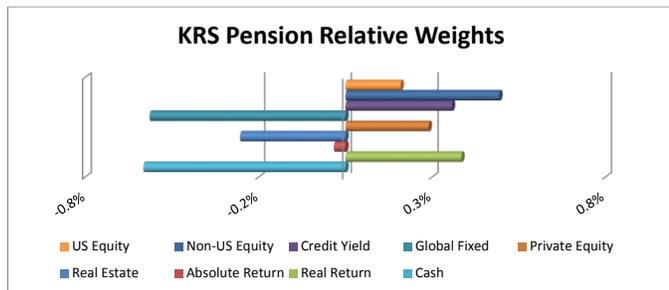

The markets were nervous in October with anticipation of the potential November election outcomes. Domestic equities struggled, with increasing losses moving down the cap spectrum. Small cap equities were down -4.75% per the Russell 2000 Index. Mid cap equities fell -2.68% (S&P Midcap Index) and large caps were down -1.82% (S&P 500 Index). The underperformance of small and mid-caps is evidence of a reversal of the high risk appetite shown by investors in September.

International stocks also struggled in October amongst U.S. uncertainty. Emerging market stocks held up the best, returning 0.25% (MSCI Emerging Market Index). Developed international stocks were much less favorable, returning -2.04% (MSCI EAFE Index). In total, the MSCI ACWI ex USA Index returned -1.43% in October.

Bond markets, which are typically thought to be uncorrelated with equities, followed the same trend as stocks in October. The Barclays U.S. Aggregate Index fell -0.76% for the month. High yield bonds fared better, with the Barclays U.S. Corporate High Yield index returning 0.39% for the month.

What added value this month?

PENSION – From a manager selection standpoint the pension portfolio was able to add relative value in all asset classes other than Non U.S. Equity and Absolute Return. The Fixed income portfolio had the greatest contribution from manager selection, outperforming its benchmark by 50 basis points. Within the Fixed Income portfolio, Marathon Asset management was the best performer, returning 3.39% higher than its benchmark. U.S. Equity had the second highest contribution, outperforming by 9 basis points for the month. The Real Estate and Real Return portfolios also added value relative to their respective benchmarks for the month.

From an allocation standpoint the pension portfolio only benefited from an overweight to Real Return due to the strong benchmark performance in this asset class. In total, the pension portfolio returned -1.03% in October, roughly flat with the benchmark return of -1.01%.

INSURANCE –The insurance portfolio roughly followed the same themes as the pension portfolio in October. The Fixed Income portfolio offered the greatest manager contribution to total portfolio return, returning 0.46% versus a benchmark return of -0.14%. Other positive contributors include U.S. Equity and Real Return.

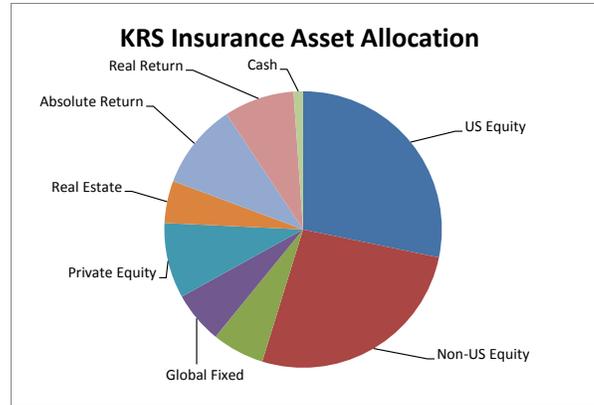

From an allocation standpoint, the insurance portfolio benefited from an overweight to Fixed Income and Real Return due their relatively strong benchmark performance. In total, the Insurance portfolio returned -1.10% in October compared to the benchmark return of -1.05%.

What detracted this month?

PENSION – From a manager selection standpoint, the Non U.S. Equity and Absolute Return portfolios were the only detractors of value. The Non U.S. Equity portfolio underperformed the benchmark by -0.38%. Within the Non U.S. Equity portfolio, Franklin Templeton was the largest detractor, falling short of its benchmark by 320 basis points. The Absolute Return portfolio also underperformed its benchmark by 13 basis points. All other portfolios within the pension fund added value due to manager selection.

From an allocation standpoint, an overweight to the U.S. Equity and Non U.S. Equity portfolios detracted value. This was due to the overall poor performance of the equity markets for October. The Pension portfolio also suffered from an underweight to Fixed Income and Real Estate due to the relatively strong performance of these asset classes.

NOTES:

- Returns displayed are “net”. For the purposes of this report, total fund return information is net of fees and expenses, with audited data beginning in July 2011. At the manager level (detailed return sheets pgs.4-5), returns are net of fees beginning with July 2011, and gross of fees for prior data.
- Individual plan allocation and performance (pg.6).
- Prior to January 1, 2014, the inception date for the Private Equity asset class was stated as 10/1/1990 for Pension Fund and 6/1/2001 for Insurance Fund. Prior to 07/01/02, the characteristics of the allocation, and the benchmark itself, were more closely aligned with Real Estate. As such, it is not appropriate to report this portion of the return stream within the Private Equity allocation, whose true inception date has been determined to be 07/01/02 based on funding the Systems’ first private equity mandate. The portion of the original return streams that are no longer reported within the Private Equity allocation (Pension from 10/1/90 to 06/30/02; Insurance 06/01/01 to 06/30/02) are reported within the Fund Level performance figures.

- 5) The Private Equity Benchmark, from one month returns up until five year returns, is equal to the performance of the KRS Private Equity allocation. Given there is not appropriate benchmark to use for short term performance evaluation, this will allow greater focus on longer term returns, which is more appropriate given the long term nature of private equity investments.
